PART I.

Orders and Notifications by the Lieutenant-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 5786A.

GENERAL.—*No. 739A.D.—The 30th September 1896.*—Mr. G. Gordon, Officiating District and Sessions Judge, Backergunge, is appointed to act, in addition to his other duties, as Additional Sessions Judge of Noakhali, during the period of the Civil Court vacation. He is authorised, under section 193 of the Code of Criminal Procedure, to receive and dispose of all criminal applications and cases, during the absence, on vacation leave, of Mr. Syud Nurul Huda.

No. 743A.D.—The 30th September 1896.—Babu Siva Prasanna Sen, substantive *pro tempore* Deputy Magistrate and Deputy Collector, Burdwan, is transferred to the head-quarters station of the district of Hooghly.

No. 746A.D.—The 30th September 1896.—Babu Sukumar Haldar, Deputy Magistrate and Deputy Collector, is posted to the head-quarters station of the district of Burdwan.

No. 750A.D.—The 30th September 1896.—Babu Chandi Das Ghose, Second Personal Assistant to the Commissioner of the Presidency Division, is appointed to be Head Assistant in the Revenue Department of the Bengal Secretariat.

No. 5776A.—The 2nd October 1896.—Mr. H. A. D. Phillips, I.C.S., has been granted by Her Majesty's Secretary of State for India an extension of furlough for six weeks.

No. 5777A.—The 2nd October 1896.—Lieutenant W. H. Cole, Eastern Bengal State Railway Volunteer Rifle Corps, is allowed leave of absence for six months, with effect from the 27th September 1896.

No. 5781A.—The 2nd October 1896.—Surgeon-Lieutenant-Colonel F. R. Swaine, Chota Nagpur Mounted Rifles, is allowed leave of absence for one year, with effect from the date on which he may avail himself of it.

No. 784A.D.—The 3rd October 1896.—Mr. F. H. Harding, District and Sessions Judge, Shahabad, is appointed to act, in addition to his other duties, as Additional Sessions Judge of Gaya, during the period of the Civil Court vacation. He is authorised, under section 193 of the Code of Criminal Procedure, to receive and dispose of all criminal applications and cases, during the absence, on vacation leave, of Mr. H. Holmwood.

No. 792A.D.—The 3rd October 1896.—Mr. J. E. Friend-Pereira, substantive *pro tempore* Deputy Magistrate and Deputy Collector, Rajmahal, Santhal Parganas, is transferred to the head-quarters station of that district.

No. 795A.D.—The 3rd October 1896.—Mr. R. B. Bainbridge, Officiating Deputy Magistrate and Deputy Collector, Santhal Parganas, is transferred to the Rajmahal subdivision of that district.

No. 798 A.D.—The 3rd October 1896.—Mr. W. H. Thomson, Deputy Magistrate and Deputy Collector, on leave, is posted to the head-quarters station of the district of Singhbhum.

This cancels the order of the 11th September 1896, posting Maulvi Syed Ali Hasan, substantive *pro tempore* Deputy Magistrate and Deputy Collector, Muzaffarpur, to the head-quarters station of the district of Singhbhum.

No. 803A.D.—The 3rd October 1896.—Maulvi Mahomed Abdurrauf, Officiating Deputy Magistrate and Deputy Collector, Rangpur, is allowed leave for three months, under article 291 of the Civil Service Regulations, with effect from the date on which he may avail himself of it.

No. 805A.D.—The 3rd October 1896.—Mr. J. H. E. Garrett, Officiating Magistrate and Collector, Nadia, is allowed leave for one month and twenty-five days, under article 291 of the Civil Service Regulations, with effect from the date on which he may be relieved by Mr. W. Maxwell.

No. 807A.D.—The 3rd October 1896.—Mr. W. Maxwell, Officiating Deputy Commissioner, Jalpaiguri, is appointed to act as Magistrate and Collector of Nadia, during the absence, on leave, of Mr. J. H. E. Garrett, or until further orders, on being relieved of his present appointment.

No. 811A.D.—The 3rd October 1896.—Mr. Brojendro Coomar Seal, Officiating District and Sessions Judge, Birbhum, is appointed to act, in addition to his other duties, as Additional Sessions Judge of Bhagalpur, during the period of the Civil Court vacation. He is authorised, under section 193 of the Code of Criminal Procedure, to receive and dispose of all criminal applications and cases, during the absence, on vacation leave, of Mr. C. M. W. Brett.

No. 819A.D.—The 5th October 1896.—Maulvi Mahmud-ul-Nabi, Deputy Magistrate and Deputy Collector, Hooghly, is allowed leave for one month, under article 291 of the Civil Service Regulations, with effect from the date on which he may avail himself of it.

No. 821A.D.—The 5th October 1896.—Babu Lachmi Narayan Singh, Deputy Magistrate and Deputy Collector, Muzaffarpur, is allowed furlough for six months, under article 371 of the Civil Service Regulations, with effect from the date on which he may avail himself of it.

No. 824A.D.—The 5th October 1896.—The Revd. Charles Jasper Palmer is appointed to be Honorary Chaplain of the Calcutta Light Horse, *vice* the Revd. A. E. Stone.

JAILS.—*No. 786A.D.—The 3rd October 1896.*—Mr. M. S. Emerson, Superintendent of the Buxar Central Jail, is allowed leave for one month, under article 291 of the Civil Service Regulations, with effect from the 9th October 1896.

No. 788A.D.—The 3rd October 1896.—Mr. G. A. Davis is appointed to act as Superintendent of the Buxar Central Jail, in addition to his duties as Officiating Superintendent of Jail Manufactures, Bengal, during the absence, on leave, of Mr. M. S. Emerson, or until further orders.

POLICE.—*No. 770A.D.—The 3rd October 1896.*—Mr. C. B. Drake-Brockman, Assistant Superintendent of Police, is appointed to act as Deputy Commissioner of Police, Calcutta, during the absence, on deputation, of Mr. H. E. C. Paget, or until further orders, on being relieved of the charge of the District Police, Darbhanga.

EDUCATION.—*No. 778A.D.—The 3rd October 1896.*—Sir Alfred W. Croft, K.C.I.E., Director of Public Instruction, Bengal, is allowed leave for two months and twenty-nine days, under article 291 of the Civil Service Regulations, with effect from the 24th August 1896.

No. 815 A.D.—The 5th October 1896.—Babu Kali Kumar Mitra, Urdu and Hindi Translator to Government, is allowed leave for two months, under article 291 of the Civil Service Regulations, with effect from the 23rd October 1896.

No 817A D.—The 5th October 1896.—Pandit Kanhaya Lal Shastri is appointed to act as Urdu and Hindi Translator to Government, during the absence, on leave, of Babu Kali Kumar Mitra, or until further orders.

The following notifications are republished from the *Assam Gazette*:—

2. These officers are also vested with the powers of Assistant Settlement Officers under Rule 1, Chapter VI of the Rules under the Tenancy Act.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No. 2946L.R.

The 6th October 1896.—The Lieutenant-Governor is pleased to direct that, with effect from the 1st November 1896, the following revised rules shall be substituted for those published at pages 603-614, Part I of the *Calcutta Gazette* of the 18th June 1890, with the Government Notification of the 17th idem, on the subject of the payment of land revenue and cesses by means of postal money-orders.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

RULES RELATING TO REVENUE MONEY-ORDERS.

1. These rules are divided into four parts :—

PART I.—Form of Revenue Money-order.
PART II.—Issue of Revenue Money-orders.
PART III.—Payment of Revenue Money-orders.
Section A.—Payment from Disbursing Offices at the Head-quarters of Districts.
Section B.—Procedure to be followed in the Collectorate.
PART IV.—Disposal of Acknowledgments.

2. The forms in use are given in Appendix D.

PART I.

THE FORM OF REVENUE MONEY-ORDERS.

The form.

1. The Revenue Money-order form is divided into four parts viz. :—

(*a*) The Money-order.
(*b*) Lower portion of Money-order, or the Receipt.
(*c*) The Coupon or Chalan.
(*d*) The Acknowledgment.

2. Parts (*a*) and (*b*) require no description, as they are exactly like the corresponding portions of the ordinary Inland Money-order form. Parts (*c*) and (*d*) are considerably larger than the Coupon and Acknowledgment of an ordinary Money-order. Part (*c*) contains on one side all the particulars required by the Treasury, and on the reverse instructions for remitters of Revenue Money-orders. Part (*d*) is on one side a duplicate of the Chalan and is returned to the remitter as his receipt; on the reverse of this part are the remitter's name and address.

Not to be used for any other purpose.

3. This form is to be used for remittances of Land Revenue, Road and Public Works Cess, and Zamindari Dák Cess, and for no other purpose.

To be freely distributed.

4. The forms of Revenue Money-order should be freely distributed among the revenue-paying classes, and no restrictions whatever should be placed in the way of zamindars obtaining these forms.

Supply of forms.

5. Every Postmaster, Sub-Postmaster, and Branch Postmaster will be personally responsible that a sufficient supply of Revenue Money-order forms is always available in his office. In cases of emergency, supplies may be obtained by telegraph direct from the Stock Depôt of the Circle. Divisional Superintendents and Inspectors, when visiting Post offices, will see that a sufficient supply of Revenue Money-order forms is available, and mention in their diaries and inspection reports that they have done so.

5A. The Revenue Money-order system does not apply to remittances of revenue payable to any Native State. Such remittances should be made by the ordinary Money-order form and be dealt with under the ordinary rules for Money-orders.

PART II.

ISSUE OF REVENUE MONEY-ORDERS.

Issue of Revenue Money-orders.

6. Revenue Money-orders are issued from every Head, Sub, and Branch Post-office under the rules which govern the issue of ordinary Inland Money-orders. The following paragraphs contain additional instructions which relate solely to the issue of Revenue Money-orders.

Limit of amount.

7. The rules in the *Postal Guide* fixing the limit of value of a single ordinary Inland Money-order apply to Revenue Money-orders. The rule prohibiting the inclusion of pies (fractions of an anna) in the amount of a Money-order is not applicable to Revenue Money-orders, which may be for amounts including any fraction of an anna not less than one pie.

Office of Issue to help remitter in making entries.

8. The Office of Issue will help the remitter in making the requisite entries, and, if necessary, will make entries for him in the form of a Revenue Money-order, but no fee or any other gratification whatsoever is to be demanded or accepted, either directly or indirectly, by any official of the Postal Department for this service. Disregard of this order will be punished by dismissal of the official in fault, who will, moreover, be liable to any further penalties provided by law. If, notwithstanding the assistance thus offered, the remitter is unable to fill up the entries himself or to give the information necessary for the purpose, the Money-order should be returned to him and should not be issued by the Post-office, till the information is complete

Note.—Remitters should also be advised to allow ample time for their Revenue Money-orders for land revenue to reach the Treasury before kist day, as the acceptance of a Revenue Money order after kist day does not exempt an estate from sale, except as permitted by the rules applicable to personal payment of land revenue after kist day.

Responsibilities of the Office of Issue.

9. The Office of Issue is responsible that no Revenue Money-order is issued of which the Coupon (Chalan) is blank or is not completely filled up. The Post-office has no means of ascertaining the correctness of the information supplied by a remitter; all that it is necessary to see is that entries are made against every printed item in the Coupon (Chalan), that these entries are made against the appropriate printed items, that all the items are understood by the remitter, and that the Money-order is not for a larger sum than is allowed by the rules for ordinary Inland Money-orders. The spaces in the Acknowledgment and Chalan for the entry of interest and expenses (kharcha) are intended to meet the requirements of remitters who are in arrears as regards the payment of their cesses and have incurred liabilities for interest, process fees, or other costs of proceedings. Every alteration or correction in the Money-order must be attested by the initials of the remitter.

Distinguishing of Revenue Money-orders.

10. The letter "R" should be written before the number of every Revenue Money-order, and this mode of distinguishing Revenue Money-orders should be adopted wherever the number is entered.

Number to be assigned to Revenue Money-orders.

11. The number assigned to a Revenue Money-order by the Head Office or Sub-Office of Issue will also be entered at the top of the Coupon (Chalan) and Acknowledgment by the Money-order Clerk of the Head Office or the Sub-Postmaster of the Sub-Office of Issue, as the case may be.

PART III.

Payment of Revenue Money-orders.

Section A.—*Procedure in the Disbursing Office.*

12. When the Revenue Money-orders are in all respects* ready to be handed over to the Postman, a list in triplicate† (Form $\frac{2}{R.M.O.}$) should be made out by the Money-order Clerk, and the entries in the money column of the list should be carefully totalled. The Money-orders should be entered in the list

* Only the total number and amount of Revenue Money-orders received for payment need be entered in the Register of Money-orders received. In order, however, that the record may be complete, it will be necessary to make a note in the last column of the Register whenever all the Revenue Money-orders received in one day are not included in the list of that date. For example, if in the Register of Money-orders received on the 5th July there are shown 500 Revenue Money-orders for Rs. 10,000, but 300 of these orders for Rs. 7,000 were received too late for inclusion in the list sent to the Collectorate on the 5th, there should be an entry in the last column of the Register in this form:—

200 for Rs. 3,000 included in list of 5th.
300 for Rs. 7,000 included in list of 6th.

† The duplicate and triplicate will be prepared by carbonic paper, and a hard pencil must therefore be used in writing the list.

according to the offices of issue. The original copy of the list will take the place of the journal of Money-orders paid, the duplicate of the list will be sent to the Treasury under the procedure described below, and the triplicate of the list will be the list for the comptroller. When the number of Revenue Money-orders for payment in one day is more than enough to fill a single sheet of Form $\frac{2}{\text{R. M. O.}}$, each sheet should be separately totalled, and a grand total should be made at the end of the last sheet of the list or on a separate sheet. The date stamp of the office of payment should be impressed in the space provided for it on the coupon (chalan) for each Money-order.

13. The Postmaster should then check the entries in the list with those on the Money-orders, and also check the total of the money column. He will then prepare a Treasury Voucher (Form A/c 12), representing the total value of the Money-orders as entered at the foot of the list. The amount represented by the Treasury Voucher will not be charged against the letter of credit, and will be paid quite independently of the balance of any letters of credit held by the Treasury in favour of the Post-office. Postmasters before sending Revenue Money-orders to the treasury should examine them carefully, and any error which might have been avoided should be brought to the notice of the Superintendent.

14. The money-orders, the duplicate copy of the list, and the Treasury Voucher duly filled up, should then be made over to the Postman for delivery at the Collectorate, the Postman's receipt for the documents being taken in the usual manner in the Register of Money-orders received.

15. The Postman will take the duplicate copy of the list, the Money-orders and the Treasury Voucher to the Accountant and will receive back from the Accountant the Money-orders without the coupons and acknowledgments. The Postman will be careful to see that he receives back all the Money-orders, and that they are all duly receipted by the Accountant.

16. The paid Money-orders received back from the Treasury will be examined by the Money-order Clerk in the same way as ordinary Money-orders, and checked in detail with the original list. The total amount of the Money-orders will then be entered in the journal of Money-orders paid by a single entry thus: "As

Rs. A. P.

per Revenue Money-order list ." The Money-orders will be disposed of in the usual way, and the classification columns of the triplicate list will be filled up under the rules applicable to other Money-orders.

17. The original and triplicate lists will be kept with the journal of Money-orders paid until the next list of ordinary Money-orders paid is sent to the Comptroller, when the corresponding list of Revenue Money-orders paid will also be sent, the paid Money-orders being arranged in order and attached to the lists. The original lists will then be filed, a separate file of original lists being kept with each journal of Money-orders paid, so that the dates of the journal and file of Revenue Money-order lists correspond.

Entries in Accounts.

18. The amount of the Treasury Voucher will be entered in the head office summary, and the head office cash-book on the receipt side opposite the item "Drawn from treasuries," and will be included in the sum entered on the disbursement side under the head "Money-orders Paid." The amount will also appear in the Treasury Pass-book and Register of transactions with the treasury as money drawn from the District Treasury. All these entries must be made on the same date.

Note.—The date referred to above is the date on which the money orders are sent from the Post office to the Collectorate. If the procedure to be followed in the Collectorate is correctly observed, the money-order will be credited in the Treasury on the same date. If owing to pressure of work or other reasons the money orders are not credited in the Treasury on the same date the entries in the Head Office summary, the Head Office Cash book and the Treasury Pass-book should still be made as prescribed in rule 18, on the date on which the money-orders are sent to the Treasury for payment.

The money-orders should also be entered as paid on the same date in the paid list of money-orders; and if any Revenue money-orders sent to the Collectorate have not been received back when the paid list is due to be sent to the Comptroller, the paid list should still be sent, and the money orders should be forwarded on receipt, a note [illegible] the reason for their absence being submitted at the same time to the

19. On receipt of the acknowledgments duly signed, the Money-order Clerk will examine and compare them with the original list already in his possession, and with the duplicate presented to him along with the Acknowledgments; and, if all are found correct, the Postmaster will sign the duplicate list and return it to the Collectorate official who brought back the documents to the Post-office.

Acknowledgments for Money-orders.

20. The Money-order Clerk should be particularly careful to see that he receives from the Collectorate an Acknowledgment for every Money-order except when a note has been made on the duplicate list against any order showing that it was not for Land Revenue, Road, or Public Works Cess, or Zamindari Dák cess. The Money-order Clerk will also see that every Acknowledgment which he receives is in acknowledgment of the full amount of the Money-order to which it appertains, and that the date of credit entered on each Acknowledgment agrees with the date of payment of the Money-order.

Comparison of the duplicate list with the original.

21. Before the duplicate list is returned to the Collectorate, the Money-order Clerk will carefully compare it with the original, and see that they are exactly alike, any remark recorded in the one list (either in the Collectorate or by the Money-order Clerk, or the Postmaster) being copied in the other list.

Duties of Money-order Clerk in respect of reports to Postmaster.

22. It will be the duty of the Money-order Clerk to report to the Postmaster if the signed Acknowledgments and the duplicate list are not returned to him at latest by 4 P.M. on the day following that on which the Treasury Voucher was sent to the Collectorate. On receipt of such a report, the Postmaster should at once bring the matter to the notice of the Treasury Officer. Any serious or oft-repeated delay in the return of the Acknowledgments should be reported to the Head of the Circle. The Money-order Clerk should report to the Postmaster every case in which Revenue money-orders are not received back on the same day that they are sent to the Treasury, and if it is found that this happens frequently, the Postmaster should bring the matter to the notice of higher authority.

23. The Money-order Clerk will report to the Postmaster every case in which the Coupon (Chalan) of a Revenue Money-order received by him is blank or is imperfectly filled up, and each such case should be reported by the Postmaster to the Superintendent of the Division in which the Office of Issue is situated.

Return of all Revenue Money-orders received during previous month.

24. On the 5th of every month the Money-order Clerk will prepare a return (Form $\frac{3}{R.M.O.}$) of all Revenue Money-orders received during the last month, and this return will be submitted by the Postmaster to the Head of the Circle.

SECTION B.—*Procedure to be followed in the Collectorate.*

25. On receipt in the Treasury of the duplicate copy of the list, the Money-orders, and Treasury Voucher, the Accountant will check and compare the documents. If there is any error, he will return all the documents to the Post-office with a note of the error or errors. This error note will be signed by the Accountant and the Tauzi Navis of the department concerned; when the documents are correct, the Accountant will at once cut off the portion of each Money-order containing the coupon and acknowledgment, sign and date the Money-orders (as payee), and return the paid Money-orders to the Postman. The Accountant will retain the lower portion of each Money-order, including the coupon and acknowledgment, the duplicate list of Money-orders (Form $\frac{2}{R.M.O.}$) and the Treasury Voucher. No Money-order received from the Post-office may be refused.

The acceptance of a Revenue Money-order after kist day is to be treated in the same manner as the receipt of a personal payment of revenue after kist day.

Entries in accounts.

26. The Treasury Officer will, on the same day, charge off the amount represented by the treasury voucher (A. C. 14) by transfer, and credit the [illegible] in the list and

If the estate or holding on account of which a remittance has been received is situated in another district, the remittance should be credited in the usual way, and the Collector to whom the money-order should have been addressed should be advised of the credit according to the procedure in Chapter IV, Section XIII, Rule 3 of the Board's Rules (Miscellaneous Volume, 1888). The remitter should also be advised of his error by a note on the money-order acknowledgment.

If it should be found that a revenue money-order has been erroneously issued for a remittance of some due other than Land Revenue, Road or Public Works cess or Zamindari Dák cess, the Treasury Officer should make a note to that effect against the entry of the money-order on the duplicate list, and forward the coupon and acknowledgment with an advice list (Form 4, G.M.O.) to the appropriate department for disposal under the rules in Part III of the Rules for Government money-orders other than Revenue money-orders.

Money orders which cannot at once be credited in the treasury accounts.

27. If it should be found that any Money-order represents a remittance apparently not due to or intended for Government or any department or authority having an account in the Treasury, or that the amount of the Money-order cannot for this or any other reason be credited at once in the treasury accounts, the amount should be disposed of according to the standing rules and practice of the Account Department, or be made over in cash to the officer who would have been entrusted with it had the money been paid in cash instead of by Money-order, or had it been sent as cash in an ordinary or registered letter.

Responsibility of Treasury Officer

28. The Treasury Officer will be responsible that the total of the amounts credited to the different departments, and any sum made over in cash under rule 27, is equal to the amount of the Treasury Voucher received from the Post-office and debited to the Postal Department.

Examination of Money orders.

29. The next business to be done in the Collectorate will be a rough examination of the Acknowledgments and Coupons to see that the necessary particulars of remittance are given in each case. This examination should be made by the Tauzi Navises of the Land Revenue and Cess Offices and by the Certificate Department if a certificate has issued on account of Road and Public Works Cess. If the amounts due on account of any cess, interest, and expenses are wrongly distributed by the remitter in the Money-order, the Cess Department will correct the distribution. It is not necessary at this stage that the Money-orders should be sent to or examined by the Zamindari Dák office, even when they contain remittances of Zamindari Dák Cess. The fact that the amount remitted is less or more than is due is immaterial. If more than is due is remitted, the excess will be treated as a payment in advance; if less than is due is remitted, it will be treated as a payment on account.

If owing to omissions or errors in the particulars of remittance there is any uncertainty as to whether a remittance can be correctly credited according to the intentions of the remitter, a note should be made across the acknowledgment in red ink, stating how the remittance has been credited or what further particulars are required, and in the latter case the remitter should be asked to send the required information immediately by letter. If a remittance of land revenue by Money-order is received in the Treasury after the sunset of kist day, a note should similarly be made across the acknowledgment in red ink to the effect that the payment is "too late for kist day."*

Documents to be returned to the Post-office and to be retained in the Collectorate.

30. Immediately after the examination prescribed in the preceding rule, the acknowledgments should be signed, dated, and returned with the duplicate list to the Post-office. The date on the acknowledgments must be the date of receipt of the Treasury Voucher by which the Money-orders

* It is to be understood that the date of receipt of the Money-order in the Treasury is the date of the Treasury voucher by which it is paid, and not necessarily the date on which the acknowledgment is examined, signed or returned.

were paid. The Treasury Officer will be responsible that the acknowledgments and duplicate list are returned to the Post-office at latest by 4 P.M. on the day following that on which they were received in the Collectorate. The chalans will be retained in the Collectorate.

Treatment of Chalans.

31. After the return of the acknowledgments to the Post-office the chalans should be sent to the Land Revenue, Road Cess, and Zamindari Dák Cess Offices in the order named, so that the remittances may be entered in the departmental registers. The chalans should be initialled by a responsible officer of each department and then be returned to the Collectorate. On each coupon is to be noted by the muharrir the date when he posted in the Tauzi ledger the amount referred to in the coupon. The muharrir is to sign such note.

Duplicate list to be filed.

32. When the duplicate list, with the Postmaster's acknowledgment for the documents returned to him, is received back from the Post-office, it should be attached to the chalans and filed in the Collectorate.

PART IV.

DISPOSAL OF ACKNOWLEDGMENTS.

Acknowledgments.

33. The Acknowledgments appertaining to Revenue Money-orders received from the Collectorate will be sorted separately for each Office of Issue, and enclosed in envelopes (Form $_{R.M.O.}^{*}$) addressed to the Post-masters of those offices. The total number of acknowledgments closed in each envelope will be the registered number assigned to that envelope. The acknowledgments for orders issued at Branch office are not to be returned to the Branch office direct, but through the Account Office.

Envelopes containing acknowledgments.

34. The money-orders issued by each office will then be bracketed together in the remarks column of the original issue list, and the register number of the envelope enclosing the corresponding acknowledgments will be noted against each bracket. The closed envelopes will then be made over to the registration clerk for despatch, his receipt for the total number of envelopes 'numbered as above' being taken at the foot of the original list.

Disposal of envelopes and acknowledgments.

35. On arrival in the Office of Issue, the envelopes will be opened and the acknowledgments contained in each envelope will be checked with the registered number of the money-order. The envelopes will then be destroyed. The acknowledgments will then be stamped with the Money-order stamp, and be sorted for distribution to postmen and village postmen. The numbers of all acknowledgments given to each postman and village postman will be detailed separately by the Money-order Clerk, Sub or Branch Postmaster in the postman's book or the village postman's register, the entries being repeated as often as the acknowledgments are given out for delivery.

Delivery of acknowledgments.

36. The postman will obtain the remitter's signature or mark when delivering each acknowledgment in the postman's book.

Non delivery and disposal of such.

37. Acknowledgments which cannot be delivered in consequence of the remitter not being found will be returned by the Postman to the Money-order Clerk, Sub-Postmaster, or Branch Postmaster as the case may be, who will sign for them in the Postman's Book or Village Postman's Register.

Undelivered acknowledgments.

38. Undelivered acknowledgments will be kept in the Office of Issue (if a Head Office) for a period of 12 months, and, if still unclaimed, will be destroyed.

if still unclaimed, will be forwarded to the Head Office under a Postal Service registered cover. Such acknowledgments will be kept in the Head Office for a further period of nine months, and, if then still on hand, will be destroyed.

Responsibility of Post-office for delivery of acknowledgments.

40. Postmasters, Sub-Postmasters, and Branch Postmasters of the Offices of Issue will be responsible that acknowledgments are delivered to remittters of Revenue Money-orders without any unnecessary delay and free of charge. Enquiries as to the punctual and free delivery of acknowledgments should be made from time to time from zamindars who may call at the Post-office to have Revenue Money-orders issued.

Remitter to examine acknowledgments.

41. Remitters of Revenue money-orders should be advised to examine carefully their acknowledgments for the money-orders, in case there should be any red ink note by the Collectorate calling for further particulars, or indicating a doubt as to whether a remittance has been correctly credited according to the intentions of the remitter.

APPENDIX D.

List of Forms appertaining to Revenue money-orders.

Number of each form.	Name of each form.	Remarks.
1	2	3
1 R. M. O. ...	Revenue money-order ...	Loose form.

Rules relating to Revenue Money-orders.

1. *Revenue Money-orders may be used for the remittance of Land Revenue, Road and Public Works Cesses and Zamindari Dák Cess and for no other purpose.*

2. *All Revenue Money-orders must be made payable to the Collector of the District in which the estate lies.*

3. *If full particulars are not correctly given in the Chalan, mistakes may occur for the consequences of which the remitter will be alone responsible. Full particulars of the estate or share must be given. In doubtful cases, the Tauzi Department will be guided by the number of the Mahal.*

4. *The revenue and cesses remitted by a single Money-order must be for one estate only. A separate Money-order must be used for each estate on account of which revenue and cesses are remitted.*

5. *The name of the proprietor to whose account the money remitted is to be credited need alone be entered on the reverse. The names of other proprietors need not be given.*

6. *Remittances of land revenue should be made a sufficient time before the kist day to insure their reaching the Treasury on or before that day, and remitters are advised to allow ample margin of time on this account, for the acceptance of a Revenue Money-order after the kist day will not exempt an estate from sale except according to the rules applicable to personal payment of revenue after kist day.*

7. *If the remitter is in arrears as regards payment of his cesses, he should also remit the amount of interest and costs due from him, and show them separately, if possible, from the actual cess. If his distribution of cess, interest, and costs is wrong, it will be corrected in the Cess Office.*

8. *The commission charged on Money-order is as follows :—*

	As.
On any sum not exceeding Rs. 10 ...	2
On any sum exceeding Rs. 10, but not exceeding Rs. 25	4
On any sum exceeding Rs. 25 ... for each complete sum of Rs. 25, and annas 4 for the remainder ; provided that if the remainder do not exceed Rs. 10, the charge for it is only 2 annas.	4

Secy. to the Govt. of Bengal.

NOTIFICATION—No. 641T.F.

The 3rd October 1896.—Mr. Ernest Osmond Robert Myers is appointed to be the Vice-Chairman of the Giridih Branch Road Committee, *vice* Babu Surendra Lall Mittra, Sub-Deputy Collector, transferred.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

MEDICAL DEPARTMENT.

No. 805T.M.—The 1st October 1896.—Surgeon-Lieutenant-Colonel A. E. R. Stephens, Civil Surgeon of Jessore, is appointed to be Civil Surgeon of Purnea.

No. 807T.M.—The 1st October 1896.—Surgeon-Major Dharma Das Basu, Civil Surgeon of Purnea, is appointed to be Civil Surgeon of Jessore.

No. 809T.M.—The 1st October 1896.—The services of Second Class Military Assistant Surgeon E. S. Baillie, attached to the Medical College Hospital, Calcutta, are placed at the disposal of the Government of India, Military Department.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

JUDICIAL DEPARTMENT.

No. 5787A.

No. 746A.D.—The 30th September 1896.—Babu Sukumar Haldar, Deputy Magistrate, who has, under the order of this date, been posted to the head-quarters station of the Burdwan district, is vested with the powers of a Magistrate of the first class.

No. 774A.D.—The 3rd October 1896.—Mr. H. L. Stephenson, Assistant Magistrate, Shahabad, who is exercising the powers of a Magistrate of the second class, is vested with powers under section 206 of the Code of Criminal Procedure, to commit any person to the Court of Session for any offence triable by such Court.

No. 813A.D.—The 5th October 1896.—Babu Dino Nath Dey, Deputy Magistrate, Bankura, is vested with powers under section 133 of the Code of Criminal Procedure.

GRANT OF LEAVE TO MUNSIF.—*No. 5785A.—The 1st October 1896.*—Babu Bijoy Gopal Basu, Munsif of Bhola, in the district of Backergunge, is allowed leave for one day, viz., 1st March 1896, under article 306 (*b*) of the Civil Service Regulations, in extension of that granted to him on the 21st February 1896.

No. 302J.D.—The 3rd October 1896.—Mr. Walter Joseph Wood is appointed to be an Honorary Magistrate of the Independent Bench at Raniganj, in the district of Burdwan, and is vested with the powers of a Magistrate of the third class.

No. 304J.D.—The 3rd October 1896.—The undermentioned gentlemen are appointed to be Honorary Magistrates of the Independent Bench at Sadikpur, in the district of Patna, and are vested with the powers of a Magistrate of the third class:—

Maulvi Syed Abbas.
" Syed Asgar Hossain Khan *alias* Koorshaid Nawab.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION—No. 281J.D.

The 3rd October 1896.—It is hereby notified for general information that His Honour the Lieutenant-Governor of Bengal, in the exercise of the powers vested in him by section 13, clause (1) of the Bengal North-Western Provinces and Assam Civil Courts' Act XII of 1887, is pleased to direct that thana Kalia Chak, in the district of Rajshahi, shall, from the 15th October 1896, be transferred from the local limits of the jurisdiction of the Munsifi of Nawabganj and included within the local limits of the jurisdiction of the Munsifi of Malda.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION—No. 332J.D.

The 5th October 1896.—Under section 3, Act I (B.C.) of 1876 (an Act to provide for the voluntary registration of Muhammadan marriages and divorces), the Lieutenant-Governor has been pleased to grant a license to Maulvi Mahomed Abdul Mannan, authorising him to register Muhammadan marriages and divorces, and to exercise the other functions of a Muhammadan Registrar within thanas Jahanabad, Goghat, and Khanakul, in the district of Hooghly.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION—No. 333J.D.

The 5th October 1896.—Under section 2, Act XII of 1880 (an Act for the appointment of persons to the office of Kazi), the Lieutenant-Governor has been pleased to grant a sanad (license) to Maulvi Mahomed Abdul Mannan, appointing him Kazi of thanas Jahanabad, Goghat, and Khanakul, in the district of Hooghly, for the celebration of marriages and the performance of other rites and ceremonies, when application is made to him to perform any such functions.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION—No. 318J.D.

The 3rd October 1896.—The following rules made by the Lieutenant-Governor under the power vested in him by section 4 of Act III (B.C.) of 1879 for the information and guidance of the Inspectors of Steam-boilers and Prime-movers making inspections under the Act are hereby published for general information :—

Iron Boilers.

The Inspector to fix pressure on safety valves.

1. The Inspector is required by the Act to fix the pressure to be allowed on boilers. In performing this very responsible and onerous duty he must be very careful, as in the event of accident it will be necessary for him to prove clearly that he used due caution. On the one hand he must be careful as regards safety, and on the other hand he must not unduly reduce the pressure on a boiler.

The Inspector himself having fixed the limits of the weight, is then required to declare that in his judgment the boiler and machinery are sufficient for the service intended and in good condition, and that they will be sufficient for twelve months or such other period as he may, in his judgment, determine. For his guidance, the following directions are given, and he should not depart from them in any case, without first reporting particulars to the Commissioners, and for instructions.

Working pressure to be fixed by calculations.

2. The Inspector should fix the working pressure for boilers by a series of calculations of the strength of the various parts, and according to the workmanship and material.

And in the event of any novelty in construction, or of any departure from the practice of staying and strengthening noted in these Instructions, he should report full particulars to the Commissioners before fixing the working pressure.

In the case of boilers made in India, the Boiler Inspection Department may receive for examination plans and particulars of boilers before the commencement of manufacture, by these means hoping to prevent questions arising after the boilers are finished.

No Inspector shall declare a boiler to be safe unless he is fully informed as to its construction, material, and workmanship. He should therefore be very careful how he ventures to give a certificate.

Respecting stays.

3. In the case of new boilers the Inspector may allow a stress not exceeding 7,000 lbs. per square inch of net section on solid iron screwed stays supporting flat surfaces, but the stress should not exceed 5,000 lbs. when the stays have been welded or worked in the fire.

The areas of diagonal stays are found in the following way: Find the area of a direct stay needed to support the surface, multiply this area by the length of the diagonal stay, and divide the product by the length of a line drawn at right angles to the surface supported to the end of the diagonal stay ; the quotient will be the area of the diagonal stay required.

When gusset stays are used, their area should be in excess of that found in the above way.

Girders for flat surfaces.

4. When the tops of combustion boxes or other parts of a boiler are supported by solid rectangular girders the following formula should be used for finding the working pressure to be allowed on the girders, assuming that they are not subjected to a greater temperature than the ordinary heat of steam, and in the case of combustion chambers that the ends are fitted to the edges of the tube plate and the back plate of the combustion box

$$\frac{C \times d^2 \times T}{(W-P)\,D \times L} = \text{Working pressure.}$$

W = Width of combustion box in inches.
P = Pitch of supporting bolts in inches.
D = Distance between the girders from centre to centre in inches.
L = Length of girder in feet.
d = Depth of girder in inches.
T = Thickness of girder in inches.
N = Number of supporting bolts.

$$C = \frac{N \times 1{,}000}{N+1} \text{ when number of bolts is odd.}$$

$$C = \frac{(N+1)\,1{,}000}{N+2} \text{ when number of bolts is even.}$$

The working pressure for the supporting bolts and for the plate between them should be determined by the rule for ordinary stays.

Flat surfaces of boilers.

5. The pressure on plates forming flat surfaces is found by the following formula :

$$\frac{C \times (T+1)^2}{S-6} = \text{Working Pressure.}$$

T = Thickness of the plate in sixteenths of an inch.
S = Surface supported in square inches.
C = Constant according to the following circumstances.
C = 100 when the plates are not exposed to the impact of heat or flame, and the stays are fitted with nuts and washers, the latter being at least three times the diameter of the stay and two-thirds the thickness of the plates they cover.*
C = 90 when the plates are not exposed to the impact of heat or flame, and the stays are fitted with nuts only.
C = 60 when the plates are exposed to the impact of heat or flame, and steam in contact with the plates, and the stays fitted with nuts and washers, the latter being at least three times the diameter of the stay and two-thirds the thickness of the plates they cover.
C = 54 when the plates are exposed to the impact of heat or flame, and steam in contact with the plates, and the stays fitted with nuts only.
C = 80 when the plates are exposed to the impact of heat or flame, with water in contact with the plates, and the stays screwed into the plates and fitted with nuts.
C = 60 when the plates are exposed to the impact of heat or flame, with water in contact with the plates, and the stays screwed into the plates, having the ends riveted over to form substantial heads.
C = 80 when the plates are exposed to the impact of heat or flame, and steam in contact with the plates, with the stays screwed into the plates, and having the ends riveted over to form substantial heads.

In cases where plates are stiffened by T or L irons, and a greater pressure is required for the plates than is allowed by the use of the above

* If the diameter of riveted washers be at least ⅓rds the pitch of the stays, and the thickness not less than the plates they cover, the constant may be increased to 150.

When doubling plates are fitted of the same thickness as the plates they cover, and not less in width than ⅓rds the pitch of the stays, the constant may be increased to 160.

When doubling plates cover the whole of the flat surface the case should be submitted for the consideration of the Commissioners.

constants, the case should be submitted for the consideration of the Commissioners.

When a circular flat end is bolted or riveted to a cylindrical shell, S in the formula may be taken as the area of the square inscribed in the circle passing through the centres of the bolts or rivets securing the end, provided the angle iron or flange is of sufficient thickness.

When the riveted ends of screwed stays are much worn or when the nuts are burned, the constants should be reduced, but the Inspector must act according to the circumstances that present themselves at the time of inspection, and it is expected that in cases where the riveted ends of screwed stays in the combustion boxes and furnaces are found in this state it will be often necessary to reduce the constant 60 to about 36.

Compressive stress on the tube plates.

The Inspector should not in any case allow a greater compressive stress on the tube plates than 8,000 lbs. per square inch, which is that used in the following formula :—

$$\frac{(D-d)\,T \times 16{,}000}{W \times D} = \text{Working pressure.}$$

D = least horizontal distance between centres of tubes in inches.
d = inside diameter of ordinary tubes in inches.
T = thickness of tube plate in inches.
W = extreme width of combustion box in inches from front of tube plate to back of fire-box, or distance between combustion box tube plates when boiler is double ended and the box common to the furnaces at both ends.

Boilers set in brickwork.

6. Having regard to many cases in which serious defects have been discovered, the Inspector should take care that boilers, the outside of which cannot be seen, are cleared of all covering and fittings for inspection whenever the Inspector considers it necessary. It will often be found necessary to reduce the pressure, unless the boilers are partially cleared from their seats to enable the Inspector to judge of their condition. If the owners in any special case have any good reasons for not wishing to clear them when the Inspector requires it, the Inspector should submit the whole of the case in detail to the Commissioners for their consideration. The Inspector must recollect that he is not to certify as sufficient any boiler respecting which he cannot thoroughly satisfy himself.

The Inspector should record in his inspection book the dates on which boilers are inspected, when and to what extent cleared from brickwork, and whether the boilers were set or not when examined, and if not set, where they were examined. Boilers which have been cleared should in all cases be subjected to the hydraulic test before the brickwork is rebuilt.

Cylindrical boilers.

7. Boilers well constructed, well designed, and made of good material should have an advantage in the matter of working pressure over boilers inferior in any of the above respects, as unless this is done the superior boiler is placed at a disadvantage, and good workmanship and material will be discouraged. The following rules are therefore prescribed.

When cylindrical boilers are made of the best material with all the rivet holes drilled in place and all the seams fitted with double butt straps, each of at least five-eighths the thickness of the plates they cover, and all the seams at least double riveted with rivets having an allowance of not more than 75 per cent. over the single shear and provided that the boilers have been open to inspection during the whole period of construction, then 5 may be used as the factor of safety. The tensile strength of the iron is to be taken as equal to 47,000 lbs. per square inch with the grain, and 40,000 lbs. across the grain. But when the above conditions are not complied with, the additions in the following scale must be added to the factor 5, according to the circumstances of each case:—* *

A†	·15	To be added when all the holes are fair and good in the longitudinal seams, but drilled out of place after bending.
B†	·3	To be added when all the holes are fair and good in the longitudinal seams, but drilled out of place before bending.
C.	·3	To be added when all the holes are fair and good in the longitudinal seams, but punched after bending instead of drilled.
D.	·5	To be added when all the holes are fair and good in the longitudinal seams, but punched before bending.
E*	·75	To be added when all the holes are not fair and good in the longitudinal seams.
F.	·1	To be added if the holes are all fair and good in the circumferential seams, but drilled out of place after bending.
G†	·15	To be added if the holes are fair and good in the circumferential seams, but drilled before bending.
H.	·15	To be added if the holes are fair and good in the circumferential seams, but punched after bending.
I†	·2	To be added if the holes are fair and good in the circumferential seams, but punched before bending.
J*	·2	To be added if the holes are not fair and good in the circumferential seams.
K	·2	To be added if double butt straps are not fitted to the longitudinal seams, and the said seams are lap and double riveted.
L	·1	To be added if double butt straps are not fitted to the longitudinal seams, and the said seams are lap and treble riveted.
M	·3	To be added if only single butt straps are fitted to the longitudinal seams, and the said seams are double riveted.
N	·15	To be added if only single butt straps are fitted to the longitudinal seams, and the said seams are treble riveted.
O	1·0	To be added when any description of joint in the longitudinal seams is single riveted.
P	·1	To be added if the circumferential seams are fitted with single butt straps and are double riveted.
Q	·2	To be added if the circumferential seams are fitted with single butt straps and are single riveted.
R	·1	To be added if the circumferential seams are fitted with double butt straps and are single riveted.
S‡	·1	To be added if the circumferential seams are lap joints and are double riveted.
T	·2	To be added if the circumferential seams are lap joints and are single riveted.
U	·25	To be added when the circumferential seams are lap, and the strakes of plates are not entirely under or over.

* * If the iron be tested and the elongation measured in a length of 10 inches is not less than 14 per cent. with, and 8 per cent. across the grain, and the inspectors otherwise satisfied as to quality of the plates and rivets, then 4·5 may be used instead of 5, and the minimum actual tensile strength of the plates used in calculating the working pressure.

V‡	·3	To be added when the boiler is of such a length as to fire from both ends, or is of unusual length, as in the case of flue boilers; and the circumferential seams fitted as described opposite P, R, and S, but of course when the circumferential seams are as described opposite Q and T, V ·3 will become V ·4.
W*	·4	To be added if the seams are not properly crossed.
X*	·4	To be added when the iron is in any way doubtful, and the Inspector is not satisfied that it is of the best quality.
Y††	1·65	To be added if the boiler was not open to inspection during the whole period of its construction.

Where marked* the factor of safety should be increased still further if the workmanship or material is very doubtful or is very unsatisfactory.

† When the holes are to be rimered, or bored out in place, the case should be submitted to the Commissioners as to the reduction or omission of A, B, G, and I as heretofore.

‡ When the middle circumferential seams are double strapped and double riveted or lap and treble riveted, and the calculated strength not less than 65 per cent. of the solid plate S, ·1 and V, ·3 may be omitted. The end circumferential seams in such cases should be at least double riveted.

†† When inspecting boilers that have not been open to inspection during construction, the case should be submitted to the Commissioners as to the factors to be used.

In any special case, a report should be forwarded to the Commissioners.

The strength of ordinary joints is found by the following method:

$$\frac{\text{(Pitch} - \text{Diameter of rivet)} \times 100}{\text{Pitch}} = \left\{\begin{array}{l}\text{Percentage of strength of plate at joint as compared with the solid plate.}\end{array}\right.$$

$$\frac{\text{(Area of rivet} \times \text{No. of rows of rivets)} \times 100}{\text{Pitch} \times \text{thickness of plate}} = \left\{\begin{array}{l}\text{Percentage of strength of rivets as compared with the solid plate.*}\end{array}\right.$$

Then take iron as equal to 47,000 lbs.† per square inch and use the smaller of the two percentages as the strength of the joint, and adopt the factor of safety as found from the preceding scale,

(47,000 † × percentage of strength of joint) × twice the thickness of the plate in inches.

Inside diameter of the boiler in inches × factor of safety. Pressure to be allowed per square inch on the safety-valves.

In the case of ordinary zigzag riveting the strength through the plate diagonally between the rivets, is equal to that horizontally between the rivets, when diagonal pitch = $\frac{6}{7}$ horizontal pitch + $\frac{4}{7}$ diameter of rivet.

Plates that are drilled in place should be taken apart and the burr taken off and the holes slightly countersunk from the outside.

Butt straps should be cut from plates and not from bars, and should be of as good a quality as the shell plates, and for the longitudinal seams should be cut across the fibre. The rivet holes may have been punched or drilled when the plates are punched or drilled out of place, but when drilled in place should be taken apart and the burr taken off and slightly countersunk from the outside.

*If the rivets are exposed to double shear, multiply the percentage as found by 1·75.

† See Note, page 2.

When single butt straps are used, they should be one-eighth thicker than the plates they cover.

The diameter of the rivets should not be less than the thickness of the plates of which the shell is made, but it will be found when the plates are thin, or when lap joints or single butt straps are adopted, that the diameter of the rivets should be in excess of the thickness of the plates.

Stays for dished ends.

Dished ends should be stayed as flat surfaces; but when they are theoretically equal to the pressure needed, when considered as portions of spheres, the stays when solid may have a stress of 14,000 lbs. per square inch of net section, but the stress should not exceed 10,000 lbs. when the stays have been welded or worked in the fire.

Hemispherical ends, man holes, doors and domes.

Truly hemispherical ends subjected to internal pressure may be allowed double the pressure that is suitable for a cylinder of the same diameter and thickness.

All man-holes and openings should be stiffened with compensating rings of at least the same effective sectional area as the plates cut out, and in no case should the plate rings be less in thickness than the plates to which they are attached. The openings in the shells of cylindrical boilers should have their shorter axes placed longitudinally. It is very desirable that the compensating rings round openings in flat surface be made of L or T iron. Cast-iron doors should not be passed for pressures exceeding 100 lbs. per square inch; for pressures of 100 lbs. and under‡ they should work out to the following formula:

$$\frac{C \times T^2}{L \times W} : \text{W. P.}$$

C = 100 for doors bolted on the outside to a faced joint.
C = 80 for doors bolted from the inside with dog bars.
T = Thickness of flange of door in $\frac{1}{16}$th inch.
L = Length of opening for door.
W = Width.
W. P. = Working Pressure.

The neutral part of boiler shells under steam domes must be efficiently stiffened and stayed, as serious accidents have arisen from the want of such precautions.

Hydraulic test.

8. New boilers are to be tested by hydraulic pressure according to the following scale, in the presence and to the satisfaction of the Inspector.

Boilers intended to work up to 100 lbs. pressure per square inch, or any pressure below that, are to be tested to double the working pressure:

Above lbs.	100	up to lbs.	125	to be tested to lbs.	200
"	125	"	150	"	230
	150		175	"	250
	175		200		270
	200		225		290
	225		250		310
	250		275		330
	275		300		350

Any boilers intended for working pressure above these to be tested to not less than 50 lbs. above such working pressure.

In the case of old boilers the Inspector must use his own judgment as to the necessary pressure to be applied.

Inspectors in passing cast iron doors should see that they are in every way sound, and that the joint faces of boiler plate and door are perfectly fair.

The Commissioners would recommend steam users, when ordering new boilers, to specify that all man-hole and mud-hole doors be made of wrought iron or steel, as cast iron is often found unsound in section, although apparently sound on surface, and are so apt to severe fracture owing to careless fitting.

9. Circular furnaces with the longitudinal joints welded or made with a butt strap double riveted, or double butt straps single riveted :—

Circular furnaces.

$$\frac{90{,}000 \times \text{the square of the thickness of the plate in inches}}{(\text{Length in feet} + 1) \times \text{diameter in inches}}$$

= working pressure per square inch, provided it does not exceed that found by the following formula :

$$\frac{9{,}000 \times \text{thickness in inches}}{\text{diameter in inches}} = \left\{ \begin{array}{l} \text{Working pressure per square} \\ \text{inch.} \end{array} \right.$$

The second formula limits the crushing stress on the material to 4,500 lbs per square inch.

The length is to be measured between the rings if the furnace is made with rings.

If the longitudinal joints instead of being butted are lap-jointed in the ordinary way, then 75,000 is to be used instead of 90,000, excepting only where the lap is bevelled and so made as to give the flues the form of a *true* circle, when 80,000 may be used.

When the material or the workmanship is not of the best quality, the constants given above should be reduced, that is to say, the 90,000 will become 80,000, the 80,000 will become 70,000, the 70,000 will become 60,000 ; when neither the material nor the workmanship is of the best quality, such constants will require to be further reduced, according to circumstances and the judgment of the Inspector, as in the case of old boilers One of the conditions of best workmanship is that the joints are double riveted with single butt straps, or single riveted with double butt straps, and the holes drilled after the bending is done and when in place and the plates afterwards taken apart, the burr on the holes taken off and the holes slightly countersunk from the outside.

The following examples will serve to show the application of the constants for the different cases that may arise :

Furnaces with butt joints and drilled rivet holes.	90,000 where the longitudinal seams are welded.
	90,000 where the longitudinal seams are double riveted and fitted with single butt straps.
	80,000 where the longitudinal seams are single riveted and fitted with single butt straps.
	90,000 where the longitudinal seams are single riveted and fitted with double butt straps.
	85,000 where the longitudinal seams are double riveted and fitted with single butt straps.
Furnaces with butt joints and punched rivet holes.	75,000 where the longitudinal seams are single riveted and fitted with single butt straps.
	85,000 where the longitudinal seams are single riveted and fitted with double butt straps.
Furnaces with lapped joints and drilled rivet holes.	80,000 where the longitudinal seams are double riveted and bevelled.
	70,000 where the longitudinal seams are double riveted and not bevelled.
	70,000 where the longitudinal seams are single riveted and bevelled.
	65,000 where the longitudinal seams are single riveted and not bevelled.
Furnaces with lapped joints and punched rivet holes.	75,000 where the longitudinal seams are double riveted and bevelled.
	70,000 where the longitudinal seams are double riveted and not bevelled.
	65,000 where the longitudinal seams are single riveted and bevelled.
	60,000 where the longitudinal seams are single riveted and not bevelled

10. The strength of joints of cylindrical superheaters and the factors of safety are found in a similar manner as for cylindrical boilers and steam receivers, but instead of using 47,000 lbs. as the tensile strength of iron, 30,000 lbs is adopted, unless where the heat or flame impinges at or nearly at right angles to the plate, then 22,000 lbs. is substituted.

Cylindrical superheaters.

When a superheater is constructed with a tube subject to external pressure, the working pressure should be ascertained by the rules given for circular furnaces, but the constants should be reduced as 39 to 47.

11. As the uptakes of vertical boilers and others of this type are especially liable to injury from overheating, unless careful precautions are taken while steam is being raised, the Inspector should in all cases endeavour to persuade makers and owners to make the strength of the uptakes considerably in excess of that required for ordinary superheaters subject to external pressure.

Uptakes of vertical boilers.

When flaming coal is used extra care is required and extra strength absolutely necessary.

Steel Boilers.

12. The following should guide the Commissioners' Inspectors when inspecting steel boilers.

Maker's tests.

The steel-makers or boiler-makers should test one or more strips cut from *each* plate for tensile strength and elongation, and stamp both results on a part of the plate where they can be easily seen when the boiler is constructed.

A few rivets of each size should be selected and should be turned and tested for tensile strength. The tensile strength should be from 28 tons with a contraction of area of about 60 per cent.

Rivet tests.

The tensile strength of the plates *not* exposed to flame should be about 28 tons, and should not exceed 32 tons per square inch of section, and 28 tons should be the strength used in the calculations for cylindrical shells if the plates comply with the conditions as stated herein; but when the minimum tensile strength of shell plates exceeds 28 tons, and allowance is wished for the excess, the case should be specially submitted for the consideration of the Commissioners. The tensile strength of furnace, flanging, and combustion box plates should range from 26 tons to 30 tons per square inch.

Tensile strength, &c.

All plates that are punched, flanged, or locally heated should be carefully annealed after being so treated.

Annealing.

The rivet holes in the furnaces and longitudinal seams of cylindrical shells should be *drilled*, but if it is wished to punch them, makers should afterwards bore the plates or anneal them in a proper furnace.

Perforating and annealing.

Solid steel screwed stays which have *not* been welded or otherwise worked after heating may be allowed a working stress of 9,000 lbs. per square inch of net section, provided the tensile strength is from 28 to 32 tons per square inch, and the elongation in 10 inches about 25 per cent. and not less than 20 per cent. Steel stays which have been welded or worked in the fire have been found to be unreliable. Therefore, they should *not* be passed.

Stress on stays.

If the flanging plates and those exposed to flame comply with the foregoing conditions, the constants in the Commissioners' rules for iron boilers may be increased as follows.—

Constants for flat surfaces.

The constants for flat surfaces when they are supported by stays screwed into the plate and riveted, 10 per cent.

The constants for flat surfaces when they are supported by stays screwed into the plate and nutted, or when the stays are nutted in the steam space, 25 per cent. This is also applicable to the constants for flat surfaces stiffened by riveted washers or doubling strips, and supported by nutted stays.

The constants for combustion box girders, 10 per cent.

Furnaces, plain and corrugated.

The furnace constants about 10 per cent when plain. When new, corrugated and machine made and practically true circles, the working pressure is found by the following formula, provided that the plain parts at the ends do not exceed 6 inches in length, and the plates are not less than $\frac{5}{16}$ inch thick:—

$$\frac{14,000 \times T}{D} = \text{Working pressure.}$$

T = Thickness in inches

D = Mean diameter in inches.

Compressive stress on tube plates.

A greater compressive stress should not be allowed on tube plates than 10,000 lbs per square inch, which is that used in the following formula:—

$$\frac{(D - d) \times 20,000}{W \times D} = \text{Working pressure.}$$

D = Least horizontal distances between centres of tubes in inches.

d = Inside diameter of tubes in inches.

T = Thickness of tube plate in inches

W = Extreme width of combustion box in inches from front of tube plate to back of fire-box, or distance between combustion-box tube plates when boiler is double ended and the box common to the furnaces at both ends.

Plate and rivet section.

The rivet section, if of iron, in the longitudinal seams of cylindrical shells where lapped and at least double riveted should not be less than $1\frac{3}{4}$ times the net plate section; but if steel rivets are used, their section should be at least $\frac{2}{3}$rds of the net section of the plate if the tensile strength of the rivets is not less than 28 tons and not more than 32 tons per square inch. Therefore, in calculating the working pressure, the percentage strength of the rivets may be found in the usual way by the Commissioners' rules, but in the case of iron rivets the percentages found should be divided by $\frac{7}{8}$ and in the steel rivets by $\frac{2}{3}$rds, the results being the percentages required. If the percentage strength of the rivets by calculation is less than the calculated percentage strength of the plate, calculate the working pressure by both percentages. When using the percentage strength of the plate, use the nominal factor of safety suitable for the method of construction as by the Commissioners' rules for iron boilers, but when using the percentage strength of the rivets, use 4·5 as the factor of safety. The less of the two pressures so found is the working pressure to be allowed for the cylindrical portion of the shell.

Local heating to be avoided.

Local heating of the plates should be avoided, as many plates have failed from having been so treated.

Welding, &c.

Steel plates which have been welded should not be passed if subject to a tensile stress, and those welded and subject to a compressive stress should be efficiently annealed.

In other respects the boilers should comply with the rules for iron boilers.

The use of steel should be discouraged in the unshielded uptakes of all boilers including vertical boilers.

Makers of steel.

When the steel is not to be made by any of the following makers, the case will receive the special consideration of the Commissioners, and this should be specially noted by the Inspectors:-

Messrs.	W. Beardmore & Co.	For plates and angles, stay and rivet bars.
,,	J. Brown & Co.	
,,	C. Cammel & Co.	
,,	D Colville and Sons.	
,,	The Consett Iron Co., Ld.	
,,	The Glasgow Iron and Steel Co., Ld.	
,,	The Landore Steel Co.	
,,	The Leeds Forge Co.	
,,	The Moor Steel and Iron Co., Ld.	
	Palmer's Shipbuilding and Iron Co., Ld.	
	John Spencer and Sons Ld.	
	The Steel Co. of Scotland.	
	The Weardale Iron and Coal Co.	
,,	The West Cumberland Iron and Steel Co.	
,,	The Lanarkshire Steel Co., Ld.	For stay and rivet bars.
,,	Nettlefolds.	
,,	Wright, Butler & Co.	

Tracings of boilers may be received for examination upon payment of the usual fee of Rs. 20.

BOILERS—GENERAL.

Small boilers.

13. Small boilers must be inspected and be fitted the same way as the main boilers and have a water and steam gauge, and all other fittings complete, and as regards safety-valves, must comply with the same regulations as the main boilers.

Stop-valves.

14. No boiler or steam chamber is to be so constructed, fitted, or arranged, so that the escape of steam from it through the safety-valve can be wholly, or partially, intercepted by the action of any other valve.

A stop-valve should always be fitted between the boiler and the steam pipe, and, where two or more boilers are connected with a steam receiver or superheater, between each boiler and the superheater or steam receiver. The object of this is obvious, viz., to avoid the failure of all the boilers through the failure of one. The necks of stop-valves should be as short as practicable.

Gauges, &c.

15. Each boiler should be fitted with a steam pressure gauge and a glass water-gauge and two tes-

cocks, or two glass water-gauges fitted independently. When a factory has more than one boiler, each boiler should be treated as a separate one, and have all the requisite fittings.

Inspectors are to be most careful not to give any official sanction to any new arrangement or construction of steam-boilers, without first obtaining the permission of the Commissioners in writing, nor are they allowed to give any written approval of any invention or arrangement, unless by direction of the Commissioners; and whenever they know that any invention or new arrangement is to be fitted, they should, as soon as possible, with a view to preventing subsequent delays and questions, obtain plans and submit the same for consideration.

16. On every inspection of a steam boiler the Inspector shall, if the boiler is large enough, go inside it, and make a thorough examination of it.

When the boilers are not large enough for the Inspector to get into, he should see them tested by hydraulic pressure at every annual inspection unless he is thoroughly satisfied as to the condition of the boiler. In the case of old boilers the Inspectors must use their own judgment as to the necessary pressure to be applied. This is in no way to interfere with the instructions to test all new boilers in accordance with clause 8, nor the proper internal examination of all boilers that are large enough for the Inspectors to get into.

Whenever it is only removable stays that prevent getting in, he must order their removal, and he must see them properly replaced before granting his declaration.

If any part of a main boiler near the uptake fire-boxes or furnaces is so constructed that the Inspector cannot examine it, he is not to give a declaration, but shall report the case to the Commissioners.

If for special reasons, and for special reasons only, the Inspector cannot go inside a small boiler, he must distinctly state on the face of his declaration his reasons for not being able to do so.

17. If the boiler is too hot for the Inspector to examine the inside efficiently, and with safety and convenience, he should decline to examine the boiler, and absolutely refuse to grant a certificate until he can make an efficient internal examination.

Inspector not to go into hot boilers.

18. Before testing a boiler the Inspector shall examine it, take the necessary measurements, and calculate what the working pressure should be in accordance with the regulations, and only test it with reference to that pressure in accordance with Rule 8. If the test is not satisfactory, the pressure must be proportionately reduced.

Strength of boiler to be ascertained and working pressure fixed by calculation.

This instruction applies to superheaters and steam chests, as well as to boilers.

This course will enable any necessary alterations to be made by the owners and prevent delay or disappointment. The Inspector who grants the certificate should not increase the working pressure without first consulting the Commissioners.

The Inspector who grants the certificate must examine the boilers thoroughly, and, in the absence of special instructions from the Commissioners, will be held responsible for the pressure allowed.

19. The Inspector shall see all new boilers, and boilers that have been cleaned for a thorough repair, tested by hydraulic pressure in accordance with Rule 8 previous to the boilers being set, and before they are covered in, to test the workmanship, &c.; but the working pressure is to be determined by the strength of stays, thickness of plates, and strength of riveting, &c., and not by the hydraulic test.

Hydraulic test.

The hydraulic test should in no case exceed twice the calculated working pressure of the boiler, and it is never to be applied until the boiler has been examined and until the strength has been calculated, from the necessary measurements taken from the boiler itself.

When the boilers are set the Inspector may, at any time he thinks it necessary, before he gives a certificate, have them tested by hydraulic pressure to satisfy himself as to any doubtful part, or of places not easy of access, care being taken in the case of old boilers not to overstrain them; but the test must always exceed the working pressure.

The hydraulic test should, before a certificate is granted, be applied to all boilers that have not previously had a working certificate.

When a boiler is partially inspected by one Inspector, and the inspection is completed and a certificate granted by another, if the Inspector, who witnesses the test of the boiler by hydraulic pressure, has an opportunity of examining it inside and outside after the test, such Inspector should determine the pressure to be allowed on the boiler in question, taking care to inform the makers, owners, or agents, and the Inspector who is ultimately to grant a certificate, what pressure should in his opinion be allowed on it. In the event of the original Inspectors having no opportunity to examine the boiler inside and out after the hydraulic test, the Inspector must re-test the boiler by water and examine the boiler inside and out before determining the working pressure and granting a certificate.

The amount of the hydraulic pressure test, and the date on which it was last applied to the boiler, should be inserted in the Inspector's certificate, and recorded in the dimension sheet of that boiler.

Examination of steam pipes, &c.

Inspectors should pay particular attention to the examination and testing of steam pipes and economisers.

Socket expansion joints.

In all cases in which a socket expansion joint is fitted to a bent steam pipe, the Inspector should require a fixed gland and bolts to be fitted, in order to prevent the end of the pipe being forced out of the socket. This regulation should be complied with in all cases of bent pipes fitted with socket expansion joints. Fixed glands and bolts should be fitted to the expansion joints of straight steam pipes, as cases have occurred, particularly with small straight pipes, in which the ends of the pipes have been forced out of the sockets.

20. In all boilers in which the Inspectors find that cast-iron is employed in such a manner as to be subject to the pressure of steam or water, they shall report the circumstances to the Commissioners in order that they may receive instructions how to act. Cast iron should not be used for stays.

Cast-iron in boilers.

21. A pressure once allowed on a boiler is not, *under any circumstances whatever*, to be increased unless the Inspector has previously written for and obtained the sanction of the Commissioners.

Pressure fixed by one surveyor not to be increased by another.

In case an Inspector is of opinion that an increased pressure may with safety be allowed, he shall communicate with the Inspector who last inspected the boiler; and if, on learning the reasons why the existing pressure was formerly allowed, the Inspector is still of opinion that it may be increased, he should communicate all the facts of the case to the Commissioners; but, as above stated, the pressure shall not in any case be increased until the question has been decided by them.

It may in some cases be found that a strict application of the rules would give a lower limit of working pressure allowable than has previously been granted in such cases. The Inspector will, of course, be careful not to make any serious reduction, without reporting the matter for consideration.

SAFETY-VALVES.

22. The Inspectors are instructed that in all *new boilers*, and whenever *alterations can be easily made*, the safety-valve and stop-valve should be placed directly on the boiler; and the neck, or part between the valve and the flange which is bolted on to the boiler, should be as short as possible.

Safety and stop-valve chests to have short necks.

The Inspector should note that it is not intended by this instruction that old boilers which have been previously passed with such an arrangement should be thrown out of work for the alterations to be carried out.

Of course in any case in which an Inspector is of opinion that it is positively dangerous to have a length of pipe between the boilers and the safety-valve, it is his duty at once to insist on the requisite alterations being made before granting a declaration.

The Inspector shall declare, amongst other things, the limits of the weight to be placed on the safety-valves, and that the safety-valves are such and in such condition as required by the Act.

23. The area per square foot of fire-grate surface of safety-valves, or (when there is more than one safety-valve on the boiler) the combined area of the safety-valves should be not less than that given in the following tables opposite the boiler pressure intended, provided the valves are not less than two inches in diameter.

Area of safety-valves.

When, however, the valves are of the common description, and are made in accordance with the tables, it will be necessary to fit them with springs having great elasticity, or to provide other means to keep the accumulation within moderate limits.

In ascertaining the fire-grate area, the length of the grate should be measured from the inner edge of the dead plate to the front of the bridge, and the width from side to side of the furnace on the top of the bars at the middle of their length.

If there is only one safety-valve on a *main* boiler the Inspector should not grant a certificate without first referring the case to the Commissioners for special instructions.

Number of safety-valves to each boiler.

In the case of small boilers, if it is wished to fit valves smaller than two inches diameter, the case should be submitted for the consideration of the Commissioners.

Fitting small safety-valves.

SAFETY-VALVE AREAS.

76	·412	138	·245	200	·174

24. The Inspector in his examination of the boilers and appurtenances is particularly to direct his attention to the safety-valves, and whenever he considers it necessary, he is to satisfy himself as to the pressure on the boiler by actual trial.

Examination of safety valves.

The Inspector is to fix the limits of the weight to be placed on the safety-valves, and the responsibility of issuing a certificate before he is fully satisfied on the point is very grave. The law places on the Inspector the responsibility of "declaring" that the boilers are in his judgment sufficient with the weights he states. The Inspector is to examine the whole of the valves, weights, and springs at every inspection.

The responsibility of seeing to the efficiency of the mode by which the valves are fitted, so as to be as much as practicable under the control of the engineer when steam is up, rests with the Inspector.

Safety-valves should be fitted with lifting gear, so arranged that the valves on any one boiler can at all times be eased without interfering with the valves on any other boiler.

Care should be taken that the safety-valves have a lift equal to at least one-fourth their

diameter; that the openings for the passage of steam to and from the valves, including the waste steam pipe, should each have an area not less than the area of valves required, and that each valve-box has a drain pipe fitted at its lower part. In the case of lever valves, if the lever is not bushed with brass, the pins must be of brass: iron and iron working together must not be passed. Too much care cannot be devoted to seeing that there is proper lift, and free means of escape of waste steam, as it is obvious that unless the lift and means for escape of waste steam are ample, the effect is the same as reducing the area of the valve or putting on an extra load. The valve seats should be secured by studs and nuts.

The Inspectors are, as far as is in their power, to make these points generally known to the owners of steam boilers.

Inspector to see valves weighted.

25. When the Inspector has determined the amount of pressure, he is to see the valves weighted accordingly and the weights or springs fixed in such a manner as to preclude the possibility of their shifting or in any way increasing the pressure. The limits of the weight on the valves is to be inserted in the certificate, and should it at any time come to an Inspector's knowledge that the weights or the loading of the valves have been shifted, or otherwise altered, or that the valves have been in any way interfered with, so as to increase the pressure, without the sanction of the Commissioners, he is at once to report the facts.

Spring safety-valves.

26. If the following conditions are complied with, the Inspector need raise no question as to the substitution of spring loaded valves for dead weighted valves:—

(1) That at least two valves are fitted to each boiler.
(2) That the valves are of the proper size, as by clause 23.
(3) That the springs and valves are so cased in that they cannot be tampered with.
(4) That provision is made to prevent the valves flying off in case of the springs breaking.
(5) That the requisite safety-valve area is cased in and locked up in the usual manner of the Government valves.
(6) That screw lifting gear is provided to ease all the valves, as by clause 24.
(7) That the size of the steel of which the springs are made, is in accordance with that found by the following formula:—

$$\sqrt[3]{\frac{S \times D}{C}} = d:$$

S = the load on the spring in lbs.
D = the diamater of the spring (from centre to centre of wire) in inches.
d = the diameter or side of square, of the wire in inches.
C = 8,000 for round steel.
C = 11,000 for square steel.

(8) That the springs are protected from the steam and impurities issuing from the valves.
(9) That when valves are loaded by direct springs, the compressing screws abut against metal stops or washers, when the loads sanctioned by the Inspector are on the valves.
(10) That the springs have a sufficient number of coils to allow a compression under the working load of at least one quarter the diameter of the valve.

PRIME MOVERS.

27 As regards prime movers, the Inspectors are to make a general external examination at each annual inspection, but they are not to order the mill or factory to be stopped for examination of the prime mover, unless there is reason to believe that defects exist which render such prime mover dangerous.

The Inspectors, in making their examination of the prime movers, should call the attention of the owner of the mill or factory in any case where they find the wheel gearing or belting so exposed as to endanger the lives of the operatives. And in the event of their not taking steps to have the dangerous parts closed in, the case should be reported to the Commissioners.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

ERRATUM—No. 334J.D.

The 5th October 1896.—In the notification No. 5042J., dated the 7th September 1896, published at page 909, Part I of the *Calcutta Gazette* of the 9th idem, appointing certain gentlemen to be Honorary Magistrates of the Municipal Bench at Titagarh, in the district of the 24-Parganas, *for* "Mr. Carl Theodorma Andersonn" *read* "Mr. Carl Theodormax Andersonn."

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

DECLARATION—No. 261J.D.

The 2nd October 1896.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the outpost at Madarganj in the jurisdiction of police-station Jamalpur, in the village of Goborgram, pargana Jafarshahi, zilla Mymensingh, in estate No. 76 within

the zamindari of Kumar Upendra Chandra Chowdhry, of Golokepur, police-station Iswarganj, it is hereby declared that for the above purpose a piece of land measuring, more or less, 4 bighas and 2 chitaks of standard measurement, bounded on the north by Goborgram Hât and the jote lands of Fazil Kha, on the east by a public road, low land of Fazil Kha and Khorka bheel, on the south by the homestead land and jote land of Palto Singh and a small path, and on the west by the jote lands of Fazil Kha, is required within the aforesaid village of Goborgram.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

PUBLIC WORKS DEPARTMENT.

ESTABLISHMENT.

The 5th October 1896.

No. 184.—Rai Beni Madhub Mitra Sahib, Assistant Engineer, Arrah Division, is granted privilege leave for three months under Article 291 of the Civil Service Regulations, with effect from the 5th November 1896, or such subsequent date as he may avail himself of it.

The 6th October 1896.

No. 186.—Mr. O. S. Smith, Assistant Engineer, is, on return from the leave on medical certificate granted in Bengal Government Notification No. 134, dated the 7th July 1896, posted to the Arrah Division of the Sone Circle.

A. D. MCARTHUR, *Col.*, R.E.,
Secy. to the Govt. of Bengal.

ESTABLISHMENT.

The 6th October 1896.

No. 185.—The following notification issued by the Government of India in the Public Works Department is republished for information:—

No. 402, dated the 1st October 1896.—Babu Amar Nath Dass, passed student of the Sibpur Civil Engineering College, is appointed to the Provincial Service of the Engineering Branch of the Public Works Department as an Apprentice, and is posted to Bengal.

J. G. H. GLASS,
Secy. to the Govt. of Bengal.

IRRIGATION DEPARTMENT.

[Third Publication.]

The 21st September 1896.

No. 177.—Notification.—It is hereby notified that, in exercise of the powers conferred on him by section 99 of Act III (B.C.) of 1876, the Lieutenant-Governor of Bengal proposes to substitute the following for rules 6 and 7 of the revised water-rate rules for the Saran Canals published under Notification No. 106 in the *Calcutta Gazette*, dated 26th March 1894:—

6. Leases will be granted for the year 1896-97 for any one of the four canals to any person, approved by the canal officer, who has a beneficial interest in the use of the water. The charge for the use during the whole year, or any part of it, of each of the canals will be—

					Rs.
No. III.—The Daha	river	...	...	...	10,000
„ IV.— „ Gundaki	„	...	...	...	5,500
„ V.— „ Dhanai	„	...	...	...	6,500
„ VI.— „ Gangri	„	...	...	...	8,000
			Total	...	30,000

The water-rate must in each case be paid in full into the Government Treasury either at Gopalganj or Chapra, before a lease will be granted, or before water will be admitted into a canal. An application for a lease for the year 1896-97 must be made in the form of Appendix I.

7. Leases will be granted for a period of three years ending on the 31st March 1899 to any person, approved by the canal officer, who has a beneficial interest in the use of the water.

The charge for the use during the period of three years of each of the canals will be—

Canals.	Payment to be made.		
	Before water is admitted in 1896-97.	Before the 15th April 1897.	Before the 15th April 1898.
1	2	3	4
	Rs.	Rs.	Rs.
No. III.—The Daha river ...	9,000	8,000	7,000
„ IV.— „ Gundaki „ ...	5,000	4,500	4,000
„ V.— „ Dhanai „ ...	6,000	5,500	5,000
„ VI.— „ Gahgri „ ...	7,000	6,000	5,000
Total ...	27,000	24,000	21,000

Water will not be admitted into any canal during any particular year until the water-rate of that year has been paid in full into the Government Treasury, either at Gopalganj or Chapra. An application for a lease for a term of three years must be made in he form of Appendix II.

[Third Publication.]

The 22nd September 1896.

No. 178.—Notification.—The Lieutenant-Governor of Bengal proposes, under sections VI and XI of Act V (B C.) of 1864, to make the following additional rule, with effect from 1st December 1896, for boats, &c., passing out of the Dhappa Lock, to be included with those published under Notification No. 144, of the 23rd May 1893, at pages 493 and 494, Part I of the *Calcutta Gazette* of the 31st idem :—

Additional toll.—All boats, steamers and flats, after passing out of the Dhappa Lock, must proceed outsidet he toll limit at Bamonghatta within 48 hours, otherwise a fresh toll will be levied in accordance with the rules in force.

A. D. McARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

RAILWAY DEPARTMENT.

The 6th October 1896.

No. 118.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for water-supply at Asansol, East Indian Railway, in the village of Asansol, pargana Shergarh, zilla Burdwan, it is hereby declared that for the above purpose a piece of land measuring, more or less, 8 bighas 11 cottahs and 7·75 chitaks of standard measurement (corresponding to 1 acre 29·05 poles), bounded by a nick on the ground, is required within the aforesaid village of Asansol.

Mines of coal, iron-stone, slate or other minerals lying under the land, or any particular portion of the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away, or use in the construction of the work for the purpose of which the land is being acquired, are not needed.

This declaration is made, under the provisions of section 6, Act I of 1894, and section 3, clause (1), Act XVIII of 1885, to all whom it may concern.

No. 119.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, namely, for the purposes of a store and station yard on the main line of the East Coast Railway, in the village of Jatni, taluk Khurda, zilla Puri, it is hereby declared that strips of land measuring, more or less, 55·26 acres, are required within the said aforesaid village.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

No. 120.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up at the public expense for a public purpose, viz., for South Bihar Railway in the district of Gaya, it is hereby declared that, for the above purpose, a strip of land of an average width of 800 feet, more or less, from Manpur, passing near Manpur, Abgilla and Garay to Abgilla, is required in the villages named in the following schedule of an approximate area in each case as therein stated : —

(1) Manpur ... 25·53 | (2) Abgilla ... 6·88

Mines of coal, iron-stone, slate or other minerals lying under the land, or any particular portion of the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away, or use in the construction of the railway, are not needed.

This declaration is made, under the provisions of section 6, Act I of 1894, and section 3, clause (1), Act XVIII of 1885, to all whom it may concern.

J. G. H. GLASS,
Secy. to the Govt. of Bengal.

MARINE DEPARTMENT.

The 30th September 1896.

A. D. MCARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

The 5th October 1896.

No. 111Marine.—It is hereby notified that the following form L.L. 3B. should be adopted in supersession of the form L.L. 3B. published under this Department's Notification No. 88Marine, dated 8th August 1896:—

L.L. 3B.

CERTIFICATE of APPROVAL of the POSITION [Alteration of the position] of the DISC on the sailing ship " ," Official No. , in pursuance of the Merchant Shipping Act, 1876 [Indian Merchant Shipping Act, 1880].

The [ ]

[ ]

[I, , an officer of the Government] have approved, on behalf of the Government, the position [or alteration of the position] of the disc on the sailing ship " ," Official No. , and hereby certify that the centre of such disc is placed at feet inches below the deck line marked under the provisions of the Merchant Shipping Act, VII of 1880.

This certificate is to remain in force as long as the vessel remains in her present class if classed and no material deterioration has taken place in her present structural condition, whether classed or unclassed.

Dated this day 18 .

(Signed)

POSITION OF LINES to be used in connection with the disc.

Maximum load-line in fresh water, Indian summer feet inches above the centre of the disc.

Maximum load-line in fresh water, feet inches above the centre of the disc.

Maximum load-line in Indian fair weather season, feet inches above the centre of the disc.

Maximum load-line in summer or Indian foul weather season, the centre of the disc.

Maximum load-line in winter, feet inches below the centre of the disc.

Maximum load-line in North Atlantic winter, feet inches below the centre of the disc.

Note.—In accordance with the rules made by the Government, the disc and lines must be permanently marked by centre punch marks or cutting, and the particulars given in this certificate are to be entered in the official log. The certificate must also be framed and put up in some conspicuous part of the ship.

A. D. MCARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

The 5th October 1896.

No. 112Marine.—In exercise of the powers conferred on him by section 50 of the Inland Steam-vessels Act, VI of 1884, the Lieutenant-Governor proposes to make the following rules for the protection of inland steam-vessels from danger by explosion or fire, in supersession of the rules sanctioned under the notification of this Government, dated the 24th January 1888, which was published in page 26 of the Appendix to the *Calcutta Gazette* of the 25th idem. These rules will be taken into consideration on the expiry of a month from the date of first publication in the Gazette, and the Lieutenant-Governor will be glad to consider any suggestions or observations that may be made concerning them by any person within this period:—

1. Before an inland steam-vessel proceeds on a voyage, her cargo, and that of any flat or flats which are intended to be towed, shall be safely stowed away, and hay and other inflammable material shall be properly covered with tarpaulins, or other sufficient protection.

2. Sections 48 and 49 of the Act shall be posted up in some prominent place in every inland steam-vessel. Every person who takes any dangerous goods with him on board an inland steam-vessel shall, if required to do so, deliver up the same to the Master of the vessel for safe custody.

3. No person shall use naked lights of any description in the hold or on the cargo deck of any vessel; and no closed light shall be so used unless it be in charge of an officer of the vessel. Fires shall be permitted only in galleys or regularly constructed fireplaces.

4. Stations shall be assigned beforehand to the officers and crew, so that, in case of fire, they may divide into parties and take up those stations.

5. No gunpowder or other explosive shall be carried unless in a suitably constructed magazine compartment; and no fire shall be permitted on board any flat or steamer while gunpowder is being taken in or discharged.

6. Every inland steam-vessel of a burden of 100 tons and upwards shall be provided with sufficient hose to reach from her engines to her stem and taffrail, and shall be supplied with fire-buckets in the proportion of one for each of the crew, which shall be kept in a place where they are at once available. They shall also be provided with fire-engines, which shall be placed under the charge of an officer, who shall be responsible that they are ready for immediate use.

7. Every inland steam-vessel of less than 100 tons burden shall be supplied with fire-buckets in the proportion of one for each of the crew.

8. It shall be the duty of the master of every inland steam-vessel to give effect to and observe the above rules, and he or any other person committing a breach of these rules shall be punished with imprisonment for a term which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

A. D. McARTHUR, *Colonel*, R.E.,
Secy to the Govt. of Bengal.

The 5th October 1896.

HIGH COURT NOTICE.

Issued by Authority of the High Court of Judicature at Fort William in Bengal.

CIVIL.

Rule No. 8, dated the 23rd September, 1896.

After Rule 57, Chapter V, page 159 of the High Court's General Rules and Circular Orders (Civil), *insert* the following :—

57A.—District Judges are at liberty to fix a certain interval after the disposal of each case, on the expiry of which the unclaimed diet-money received in connection with each case will be transferred to deposit. An interval of a month will probably be found sufficient. Items so transferred shall be transferred as individual items in the names of the persons from whom they were originally received, and not in a lump sum.

Published in the *Calcutta Gazette* of the 29th July, 1896, Part I, page 809, and in the *Assam Gazette* of the 1st August, 1896, Part III, page 670.

SMALL CAUSE COURT NOTICE.

NOTICE is hereby given, under section 7 of Act IX of 1887, that the Judge of Small Cause Courts of Dacca and Munshiganj will, in the month of December next, sit in those Courts on the undermentioned dates, Sundays and holidays excepted:—

Dacca Small Cause Court ...	... 3rd, 4th, 9th, 14th and 24th of December 1896.

EDUCATION DEPARTMENT, BENGAL.

NOTIFICATION.

The training of Teachers for English Secondary Schools.

UNDER paragraph 6 of this office circular No. 41, dated the 7th April 1896, persons who have served with credit as teachers for three years or upwards are allowed to compete, without passing through a Training School, for the grade of certificate corresponding to their academical training. As some misapprehension appears to exist as to the meaning of the expression "served with credit as teachers," it is hereby notified that only those who have served successfully as teachers in a subordinate capacity in a High School or as Head or (having passed the Entrance Examination) as Second Masters of a Middle School should be recognised for this purpose.

C. A. MARTIN,
Offg. Director of Public Instruction.

NOTIFICATION.

IT is hereby notified that for the ensuing half-yearly examination of Assistant Magistrates and others to be held on Monday, the 9th November 1896, and the two following days two Local Examination Committees will be convened in this Division, viz., one at Bankipore for officers employed in the districts of Patna, Gaya, and Shahabad, and the other at Muzaffarpur for officers employed in the districts of Saran, Champaran, Muzaffarpur, and Darbhanga.

The examination will commence at 10-30 A.M. each day.

J. A. BOURDILLON, *Commissioner.*

PATNA COMMR.'S OFFICE, BANKIPORE, *the 3rd October 1896.*

NOTIFICATIONS OF THE BOARD OF REVENUE.

No. 1813B.

NOTICE is hereby given that the Eleventh Sale of Opium, the Provision of 1894-95 and 1895-96, will be held at the Government Opium Sale-room, No. 2, Bankshall Street, on Monday, the 2nd November 1896, at 11 A.M., and will comprise 3,250 chests, viz.—

	Chests.
Opium manufactured at the Patna Factory consisting of season 1894-95...	1,625
Ditto ditto at the Ghazipur Factory consisting of season 1895-96	1,625
Total ...	3,250

2nd.—The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 14th November 1895, and published in the *Government* and *Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3rd.—The latest dates for deposit and clearance will be the 7th and 17th November 1896, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room will be received after 1-30 P.M. of Saturday, the 7th November 1896, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Tuesday, the 17th November 1896.

4th.—In addition to the quantity above advertised for sale, the following quantities, more or less, of the Opium manufactured at the Patna and Ghazipur Factories will be brought to sale down to December next about the date specified below. The Board of Revenue, however, reserve to themselves the right of altering the date, should circumstances render it expedient to do so :—

DATES.	Manufactured at the Patna Factory ; about chests.	Manufactured at the Ghazipur Factory ; about chests.	Total ; about chests.
On or about Wednesday, 2nd December 1896	1,625	1,625	3,250
Total ...	1,625	1,625	3,250

Chittagong Collectorate, the 9th September 1896.

B. P. MAZUMDAR, for Collector.

NOTICE is hereby given, under sections 6 and 13, Act XI of 1859, that the undermentioned estates and shares of estates in the district of Jalpaiguri will be put up for sale at the office of the Collector of that district on the 26th October 1896 at 12 A.M. for arrears of revenue and other demands which by law are realisable as arrears of land revenue.

When in columns 6, 7, and 9 of the appended statement it is stated that only a share is to be sold, it is to be understood that a separate account is kept for that share, and that the other share or shares in the estate are excluded from the sale:—

Tauzi No.	Name of mahal and pargana.	Sadar jama of the whole estate.	Whether the whole estate is to be sold.	If only a share is to be sold, specification of such share or shares.	Names of proprietors of property to be sold.	If only a share is to be sold, the sadar jama of such share.	If the whole estate is to be sold, the arrears due from it.	If only a share is to be sold, the arrears due from it.

Stolen.

THE Government Promissory Notes No. 031552 for Rs. 5,000, No. 031059 for Rs 1,000 and No. 040372 for Rs. 1,000, all of the 3½ per cent. loan of 1865 (formerly Nos. 260289, 280260 and 280621, respectively, of the 4 per cent. loan of 1865) last endorsed to our client, Sreemutty Tincoury Debi, of No. 59, Beadon Street, Calcutta, the proprietor by whom it was never endorsed to any other person. Payment of the above Notes and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of duplicates in favour of the proprietor.

FOX AND MANDAL,

Attorneys-at-Law and Attorneys for Sreemutty Tincoury Debi, abovenamed.

12, Old Post Office Street, Calcutta, 17th September 1896. (661—3)

Commissariat Notice No. 46.

SEALED tenders for the supply to the Bombay Commissariat of sugar of Indian manufacture for rations and hospital for one year, from 1st April 1897 to 31st March 1898, will be received by the Commissariat Store-keeper-General, Bombay, Commissariat Store-keeper-General, Madras, Commissariat Store and Shipping Officer, Calcutta, Commissariat Store Officer, Lahore, hereinafter referred to as the Commissariat Officers, up to 12 noon on the 19th October 1896, and then and there opened in the presence of all parties who may choose to attend. Particulars of the quantities and the stations where required are given in the tender form.

2. No tenders will be received except on forms obtainable from the above officers, which, as well as any information required regarding the contract, will be given on application to the above Commissariat Officers up to 4 o'clock P.M. on the 12th October 1896. No addition or alteration must be made in the tender forms.

3. Seals of tenderers will not be accepted: they should have their marks verified by witnesses.

4. Covers to be superscribed "Tender for the supply of sugar of Indian manufacture for rations and hospital."

5. The tender may be for one or both the descriptions and for supply of all the stations or of one or any number of them, but the term of contract must be as noted above, and the rate for each description must be an average for the whole period. The Commissary-General shall have the power to accept a tender in whole or in part, or to reject a tender without assigning any cause for so doing; but in the event of the tender being accepted in part only, and the tenderer failing to take up the contract, the whole earnest-money deposited will be confiscated.

6. Each tender must be accompanied with separate earnest-money for each description of sugar in Government Promissory Notes or Bank of Bengal or Treasury Receipt,* Provincial or Municipal Debenture, or Port Trust Bond, for an amount equal to 2 per cent. of the value at the tendered rate of one year's supply of the quantity of each description of sugar tendered for, but the earnest-money of any one description of sugar need not exceed Rs. 2,000. Tenders without earnest-money will not be attended to.

* The receipt may be for currency note or cash.

7. Earnest-money will be confiscated if the tenderer withdraws from his tender.

8. Samples of the sugar to be supplied can be inspected at any Commissariat Office.

9. Acceptance or rejection of the most favourable tender will be notified by the end of December 1896 at latest.

L H MARRIOTT, Lieut., Commissariat Store and Shipping Officer.

Commissariat Store and Shipping Office, Calcutta, the 25th September 1896.

NOTICE.

In the Court of the Subordinate Judge of 2nd Court at Barisal.

NUFFER CHANDER BHATTA, Subordinate Judge.
Bhagalpur, the 30th September 1896. (702—1

NOTICE OF SALE.

Inthe Court of Rai Aubinash Chandra Mittra, Bahadur, Subordinate Judge, 2nd Court, Hooghly.

TITLE EXECUTION CASE No. 164 of 1896.

Soilendra Nath Mittra, decree-holder, *versus* (1) S. M. Giribala Mittra, as administratix to the estate of late Nogendra Nath Mallick, of Andool, in the district of Hooghly; (2) S. M. Ratna Bibi; (3) Giridhari Lal Saraogi; (4) Rash Behary Dhar, both for self and as heir of late Moti Lal Dhar, judgment-debtors.

THE undermentioned mortgaged properties of the judgment-debtors will be sold by the Nazir of the District Judge's Court at Hooghly at 12 o'clock (noon) on the 9th day of November 1896 for realization of Rs. 47,671-11, due under a mortgage decree in regular suit No. 80 of 1895:—

(4) "One anna twelve gandas share of mahal Brahman Bhoomi, situate in pargana Brahman Bhoomi, police-station Salbani, district Midnapore, bearing tauzi No. 83 (old), at present 88, of the Midnapore Collectorate."

"One anna twelve gandas share of mahal Syam Sundarpur, situate in registration district Midnapore, sub-registry Ghatal, police-station Daspur, pargana Chetoua, bearing tauzi No. 1334 (old), at present 1328, of the Midnapore Collectorate."

"Both the mahals mentioned above comprise 500 mauzas, including rivers, jalkers, rent-free lands, forests and waste lands, &c., according to the permanent maurasi izara lease granted by Kanai Lal Sil on 13th Aswin 1285, corresponding to 28th September 1878. The annual rent of the above mahals is Rs. 5,180; payable to the sharists of the Shil Babus of Calcutta."

(5) "One anna twelve gandas share of mahal Brahman Bhoomi, situate in pargana Brahman Bhoomi, registration district Midnapore, sub-registry Anandapur, police-station Keshpur, bearing tauzi No. 83 (old), 88 (new), of the Midnapore Collectorate."

"One anna twelve gandas share of mahal Syam Sundarpur, situate in pargana Chetoua, sub-registry Ghatal, thana Daspur, bearing tauzi No. 1334 (old), 1328 (new), of the Midnapore Collectorate."

"Both the above mahals comprise 500 mauzas, including rivers, jalkars, bankars, rent-fee lands, forests and waste lands. The debtor No. 1 is in possession of the above mahals by a permanent maurasi izara lease granted by Surath Nath Mullick on 29th Asharh 1286. The annual patni rent whereof is Rs. 4,657 15-15 and is payable to the heirs of late Surath Nath Mullick."

(6) "Taluq Kastapura, situate in registration district Baleshwar, sub-district Vadrak, police-station Bamdebpur, pargana Akura, bearing Collectorate tauzi No. 94. Out of this Taluq 1,350 bighas of rent-free jalpai lands are let in izara to Ramprosad Rai on an annual izara rent of Rs. 1,687-8 by an izara lease dated 13th Magh 1295."

(7) "Mahal Syamsundarpur, situate in the registration district Midnapore, sub-registry Ghatal, thana Daspur, district Midnapore, pargana Chetoua, bearing Collectorate tauzi No. 1334 (old), 1328 (new). The annual revenue for eight annas share of this mahal is Rs. 1,463-7-6 payable to the Midnapore Collectorate."

(8) "Mahal Brahman Bhoomi, situate in the registration district and sub-registry Midnapore, police-station Salbani, district Midnapore, pargana Brahman Bhoomi, bearing Collectorate tauzi No. 83 (old), 88 (new). The annual revenue for eight annas share of this mahal is Rs. 12,120-8-8, and police revenue Rs. 328 8 annas 8 gandas, 3 karas, in all Rs. 12,448 15 annas 4 gandas 3 karas, payable to the Midnapore Collectorate."

N.B.—Of the above properties, the property No. 8 was mortgaged to S. M. Ratna Bibi for Rs. 3,000 by a mortgage bond dated 19th September 1889, who obtained a decree against the debtor No. 1 in execution whereof that property was advertised for sale; but this decree-holder having deposited Rs. 8,147-4-9, the property in question was not sold. That property has again been mortgaged to Giridhari Saraogi on 22nd August 1889 for Rs. 7,500, and the properties Nos. 7 and 8 are mortgaged to Moti Lall Dhar for Rs. 9,000. All these mortgagees are partners in the decree under execution.

AUBINASH CHANDRA MITTRA, Subordinate Judge, 2nd Court, Hooghly.

Hooghly, the October 1896. (708—1)

Caution.

I, on 21st August 1896 Soumutty Bhubuneswary Goopta entered into an agreement for the sale of the house and premises No. 12, Raja Guru Dass's Street, Calcutta. A suit for the specific performance of the said agreement will be instituted shortly.

Dated this 29th September 1896.

UKHOY CHUNDER DUTT, Attorney-at-Law.
No. 8, Old Post Office Street, Calcutta. (692—1)

Jayagunge Railway Company, Limited.

NOTICE is hereby given that in the Extraordinary General Meeting of the Shareholders of the above Company held at the Registered Office of the Company on the 4th September 1896, the following Resolutions were passed:—

(*a*) That the Company be voluntarily wound up.

(*b*) That Babu Gonesh Chander Chanler and Rai Parvati Sanker Chaudhuri be appointed Liquidators.

(*c*) That the Liquidators be authorised to return to the Shareholders the amount of calls paid by them without any deduction whatever.

The above Resolutions were confirmed in a subsequent Extraordinary General Meeting of the Shareholders held on the 28th September 1896.

PARVATI SANKER CHAUDHURI, Managing Director.
44, European Asylum Lane, Calcutta, the 1st October 1896. (695—1)

Copies are to be had at the Office of the Director of Public Instruction.

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series *including postage*, Rs. 22-8.

	Without postage.	With postage.

Ditto. Urdu version. Royal 8vo., stiff boards. 6*a*.

A Dictionary of the Economic Products of India
BY DR. GEO. WATT, C.I.E.,
Reporter on Economic Products.

The first five volumes and Vol. VI, Parts I, II, III & IV of the Dictionary are now ready at the Office of Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is Rs. 45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made), packing and postage, in India, 8 annas per volume; for England, Rs. 2-6 per volume. For copies bound in half calf or half morocco, Rs. 6 and 8 shillings, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross-references, so that the difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal octavo pages; Vol. II embraces the letter C in 689 pages; Vol. III contains the letters D, E, F and half of G; Vol. IV the latter half of G to middle of L; and Vol. V contains the latter half of L to end of O; Vol. VI (which will consist of four parts), Part I, contains letters P to R. The whole work will, it is expected, be completed in nine volumes (including Parts II to IV of Vol. VI) during the current year; but a tenth volume may also be issued, consisting of an index to all the vernacular and other names contained in the Dictionary. The Index will practically be a Glossary of the vernacular and European names of the plants, animals and minerals of India, and as such will be a work of reference, which, it is hoped, may prove of considerable value.

Technical Art Series published up to 1894, together with their explanatory Text—

1886-87, 6 plates with text. Re. 1-8 a set (4*a*.)
1888-89, 18 plates with text. Rs. 4-8 a set (8*a*.)

AUSTRALIA, SOUTH—ST. VINCENT GULF.

Port Adelaide river—Erection of a new beacon.

THE President, Marine Board, Port Adelaide, has given notice (No. 3 of 1896) that in connection with the scheme for lighting the river by electricity, a new beacon is being erected on the edge of the deep water cutting, about 600 feet in a north-easterly direction from No. 10 light beacon. During the erection of the beacon a white riding light will be exhibited from a barge moored alongside of the structure. When the new beacon is completed a white light will be shown therefrom, and that on No. 10 discontinued.

This notice affects Admiralty charts Nos. 2389 A and B, plan 1750.

B. P. CREAGH, *Comdr.*, R.I.M.,
Port Officer of Calcutta.

CALCUTTA, *the 18th September 1896.*

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 190.

[Third Publication.]

NEW ZEALAND—STEWART ISLAND, EAST COAST.

Amended particulars of Ward Rock.

WITH reference to Notice to Mariners No. 120, dated 19th June 1896, issued by this office, the British Admiralty has given further notice (No. 449 of 1896) that the Commander of the New Zealand steam-vessel *Hinemoa* has recently made an examination of the locality, and found Ward rock to consist of several pinnacles, in an area half a cable in extent, with a least depth of $3\frac{3}{4}$ fathoms at low water springs, and 17 to 20 fathoms close around.

It is situated with Akers point rock bearing S. 42° W., distant $1\frac{5}{10}$ miles; and south-west extreme of Bench island S. 50° E.

There is a heavy tide rip over the rock.

Approximate position, lat. 46° 53′ 15″ S., long. 168° 13′ 0″ E.

As this rock is probably identical with the rock marked P. D. on the Admiralty charts, in a position S. 28° W., distant $6\frac{1}{2}$ cables from the south extreme of Boat Refuge island, unsuccessfully searched for in that position by H.M.S. *Lizard* in 1893; and with Ward rock, as reported, about three-quarters of a mile south-eastward of Boat Refuge island in 1896: the rocks marked in each of those positions have been expunged from the Admiralty charts.

(*Variation 17° Easterly in 1896.*)

B. P. CREAGH, *Comdr.*, R.I.M.,
Port Officer of Calcutta.

[Third Publication.]

JAPAN—KIUSIU.

Karatsu no ura—Sunken rocks south-eastward of Taka sima.

THE British Admiralty has given notice (No. 450 of 1896) of the existence of the undermentioned rocks in the south-west part of Karatsu no ura:—

1. A rock, now named Matsura se, with a depth of 2¼ fathoms on it at low water situated with summit of Taka sima (553) bearing W. by N. ½ N. (N. 69° W.), distant $1\frac{4}{10}$ miles and Hime sima summit (647 N. by E. ½ E. (N. 18° E.).

Approximate position, lat. 33° 28′ 25″ N., long. 130° 0′ 55″ E.

2. A rock, with a depth of 3¾ fathoms on it at low water, situated with summit of Taka sima bearing N. W. ½ N. (N. 35° W.), distant $1\frac{1}{10}$ miles; and centre of Daimio's residence W. by S. (S. 79° W.).

(*Variation 4° Westerly in 1896.*)

RESOLUTION ON THE TRIENNIAL REPORT ON THE ADMINISTRATION OF THE REGISTRATION DEPARTMENT FOR THE YEARS 1393-94, 1894-95 AND 1895-96.

RESOLUTION No. 196P.D.

REGISTRATION.

Dated Darjeeling, the 28th September 1896.

READ—

The Triennial Report on the Administration of the Registration Department for the years 1893-94, 1894-95 and 1895-96.

Read also—

The Triennial Report on the Administration of the Registration Department for the years 1890-91, 1891-92 and 1892-93, and the Resolution of Government recorded thereon.

Read also—

The Statistical Returns for the years 1893-94 and 1894-95, with the remarks thereon.

During the triennial period four officers held charge of the Department for various periods. The Report has been punctually submitted to Government by the present Inspector-General, Khan Bahadur Delawar Hosaen Ahmed.

2. The following table shows the total number of registrations, as well as the receipts and expenditure, and the number of offices open during each

year of the triennial period under report, as compared with each of the three preceding years :—

Year.	Number of Registrations				Total receipts.	Total expenditure.	Surplus.	Number of registration offices.	Average receipts.	Average expenditure.
	Affecting immoveable property.		Other registrations.	Total.						
	Compulsory.	Optional.								
1	2	3	4	5	6	7	8	9	10	11
					Rs.	Rs.	Rs.		Rs.	Rs.
1890-91	660,4[illegible]3	148,755	118,148	897,316	12,40,481	6,29,359	6,11,122	322	3,853	1,954
1891-92	659,926	171,701	155,736	988,463	13,3[illegible],736	6,86,205	6,47,532	333	4,006	2,064
1892-93	73[illegible],2 9	207,395	102,66	1,102,321	14,3[illegible],641	7,2[illegible],771	7,08,770	346	4,149	2,100
Total ...	1,991,698	529,851	406,551	2,98[illegible],100	40,09,758	20,40,335	19,69,424	.....	... ..	.....
1893-94	771,531	2[illegible]7,8 7	170,845	1,169,7 3	13,88,184	7,86 142	6,02,042	365	3,803	2,153
1894-95	703,837	288,115	173,7 8	1,2 2,675	[illegible]2,128	8,09,[illegible]3	5,5[illegible],57	383	3,830	2,094
1895-96	76[illegible],3 4	215,6 9	166,625	1,[illegible]44,5[illegible]	13,13,588	8,03,[illegible]45	5,3[illegible],843	397	3,384	2,024
Total ...	2,327,672	681,071	508,193	3,516,936	40,84,100	24,91,918	16,92 182	... ..	.....	.....
Increase ...	335,974	151,220	41,642	528,837	74,342	3,51,584	.....	51	... ..	.....
Decrease	.....	... ..	...	...	...	....	2,77,242	.....	.....	.....

It will be seen that, while the total number of registrations under each head during the three years 1893-94 to 1895-96 exceeds the corresponding total for the preceding period of three years, there has been a falling off under each head during the last year as compared with the years 1893-94 and 1894-95. The Inspector-General points out that the proportionate increase in the last triennial period is larger in the case of optional registration than in that of compulsory registration, and that this indicates an appreciation of the advantages of registration. The fall in the total number of registrations in 1895-96, as compared with 1894-95, is common to all Divisions except Chota Nagpur and Chittagong, and is ascribed, generally, to the better harvests of the year and the consequent diminution in the number of transactions for raising money. A considerable decrease occurred in instruments of sale or exchange and of mortgage of value less than Rs. 100, and deeds of the same classes of higher value also show a reduction, though only nominal in the case of sale or exchange. Perpetual leases, which are generally granted for the sake of the premium, were also fewer. The fluctuations in different classes of deeds are noticed below. The total receipts of the Department for the three years amounted to Rs. 40,84,100, as compared with Rs. 40,09,758 in the three years 1890-91 to 1892-93. If each year is taken separately, however, a steady decrease is observed in the receipts, from Rs. 14,35,541 in 1892-93 to Rs. 13,43,588 in 1895-96. The orders of Government reducing the minimum *ad valorem* fee from 12 annas to 8 annas, which came into effect from July 1893, have no doubt contributed considerably to the falling off in the last three years as compared with 1892-93, part of the decrease in 1895-96 being also due to the smaller number of registrations. The total expenditure, on the other hand, has been steadily rising during the past ten years, from Rs. 5,64,274 in 1886-87 to Rs. 8,03,745 in 1895-96, owing principally to the increase in the number of offices, and the consequent increase in the total amount of remuneration drawn by the Sub-Registrars. The average expenditure per office has, however, decreased from Rs. 2,153 in 1893-94 to Rs. 2,094 in 1894-95 and Rs. 2,024 in 1895-96.

3. The Inspector General notices a continuous increase in gifts of both immoveable and moveable property in the past six years, and observes:

"The contemporaneous increase in both these classes of documents, in spite of fluctuations in all other classes, tends to show that people are now becoming desirous that distant heirs shall not deprive near or close relations of any of the owner's property. Many people have an aversion to testamentary dispositions of property, and the Muhammadans have no power to make such dispositions. Those who will not or cannot make wills have recourse to gifts of property which they make when they become old, fail in health, or expect soon to die."

Wills, however, also show a gradual increase.

4. While fluctuations, due to good and bad seasons, are observed from year to year in the number of sales and mortgages of immoveable property, registrations tend, on the whole, to advance, 8,86,822 deeds of sale and 9,59,534

deeds of mortgage having been presented in the last three years against 7,29,449 and 7,54,574, respectively, in the previous triennial period. There is evidently an increasing desire on the part of the people to have their rights properly secured, as the Inspector-General remarks, and the number of deeds brought to the registration offices is likely to increase. There can, however, be little doubt that many transactions are still not registered or even reduced to writing. In the past year 2,01,044 deeds of sale of less value than Rs. 100 were registered, against 2,12,036 in 1894-95, and 1,88,280 deeds of mortgage of similar value, against 2,11,628. The decrease in sales occurred in all Divisions except Chittagong, and in mortgages in all Divisions without exception. In both cases it was most marked in the Patna Division, where it is ascribed to good harvests and to the partial suspension of land transfers in some districts while rights are being ascertained and recorded in the survey and settlement operations. Further evidence of the effect of a good season on registrations is afforded by a reduction in 1895-96 in the number of obligations for payment of money, including bonds, in most districts of the province.

5. The number of perpetual leases registered shows a steady decrease each year, from 90,989 in 1892-93 to 85,670 in 1895-96. About three-fourths of all perpetual leases are executed in the seven Bengal districts of Chittagong, Noakhalí, Backergunge, Faridpur, Jessore, Khulna, and the 24-Parganas, nearly all of which are littoral districts. In 1892-93 the total number of perpetual leases, registered in these districts, was 70,316, and in 1895-96, 65,255, the decrease occurring chiefly in the Chittagong Backergunge and Faridpur districts while the number registered in the four Divisions of Rajshahi, Patna, Bhagalpur, and Orissa aggregated only 3,002. A decrease was to be expected in the Eastern districts after the very large number of leases executed in former years. Among the causes favouring the permanent settlement of lands with tenants in those districts are perhaps (*a*) the independence of the tenants and their general prosperity, which enables them to pay the premium usually demanded for perpetual leases, (*b*) the great prevalence of sub-infeudation which enhances the difficulty of management and induces proprietors to accept fixed rents, and (*c*) the existence of newly-formed and waste lands, which cultivators do not find it profitable to take up except on a permanent tenure.

6. The total number of leases other than perpetual rose from 239,921 in 1892-93 to 246,526 in 1895-96, showing an increase of only 6,605, as compared with an increase of 66,668 during the previous triennial period. The largest numbers of such leases were registered in the Jessore (27,999), Mymensingh (21,214), Backergunge (15,639), Faridpur (12,652), and Khulna (12,517) districts. There has been an increase in the number of leases of Rs. 25 in value and under, and the average value of the land covered by each lease has fallen from Rs. 46 in 1892-93 to Rs. 41 in 1895-96.

7. A further increase has taken place in the number of applications for search and copy, which has risen from 36,107 in 1892-93 to 54,432 in 1895-96, 88 per cent. having been made at Sadar offices. The practice of making searches, for the purpose of ascertaining whether or not immoveable property is encumbered, before making purchases or lending money on the security of such property, is gaining ground.

8. The following figures (which include those for perpetual leases) show the percentage of the entire number of lettings of land coming under cognizance of the Department during the past six years in which pattas were given by the landlords to their tenants:—

Year.	Registration compulsory.	Registration optional.	Total.
1890-91	22·60	11·28	22·07
1891-92	29·98	9 89	29·37
1892-93	29·18	10 03	28·58
1893-94	29·31	9·55	28·58
1894-95	27 77	7·53	26·95
1895-96	26·80	8·19	34·28

Although the percentage has increased considerably during the past year, the proportion is still very low, and this must be ascribed principally to the reluctance of zamindars to grant pattas to their raiyats, the lettings being completed by the taking of counterparts or kabuliyats from the tenant. The

highest percentages are reported from the Lohardaga (90·20), Sonthal Parganas (78·41), Gaya (69·9), Palamau (68·1), and Purnea (65·1) districts. In most of the Bihar districts the number of pattas exceeded the number of counterparts, and this the Inspector-General attributes partly to the *zar-i-peshgi* leases, equivalent to mortgages with possession, which are common in those districts and rarely have counterparts corresponding to them.

9. The total number of registrations affecting moveable property (excluding wills and written authorities to adopt) was 164,029, as compared with 168,357 in 1894-95, 168,508 in 1893-94, and 160,490 in 1892-93. The decrease occurred in sales and obligations for the payment of money.

10. The aggregate value of property transferred by registered documents during the past year was Rs. 20,18,58,282, as compared with Rs. 17,73,50,008 in 1892-93, and Rs. 14,90,40,558 in 1889-90. Of this amount, the value of immoveable property was Rs. 17,81,76,788 and the value of moveable property Rs. 2,36,81,494, as compared with Rs. 17,63,27,871 and Rs. 2,40,51,406, respectively, during the previous year. The increase in the value of immoveable property is reported to have been due to the registration of documents of unusually high value in many districts. No special cause has been assigned for the decrease in the case of moveable property.

11. The total number of transactions involving the transfer of estates or tenures fell from 1,03,459 in 1893-94 to 1,01,489 in 1894-95 and 98,454 in 1895-96. The percentage of purchasers of each class in such transactions during the past four years is shown below:—

Year.	Mahajans, traders and money-lenders.	Zamindars	Intermediate tenure-holders.	Raiyats.	Others.
1	2	3	4	5	6
1892-93 ...	10·4	15·2	30·6	25·3	18·5
1893-94 ...	10·1	15·6	31·0	24·5	18·5
1894-95 ...	9·6	15·3	32·9	23·1	18·8
1895-96 ...	8·8	14·4	31·8	23·9	20·8

The number of transactions relating to entire revenue-paying estates was 1,985, to shares in such estates 12,077, to revenue-free properties 7,660, to intermediate tenures 51,823, and to properties of other kinds 24,3·9. The revenue-paying estates and shares were mostly acquired by zamindars, the revenue free properties and intermediate tenures by intermediate tenure-holders and raiyats, and the other properties by the same classes and others not specified.

12. The number of raiyati-holdings transferred by deed of sale during each of the last four years, and of purchasers of the different classes, are compared in the following Table:—

	RAIYATI-HOLDINGS AT FIXED RATES.							RAIYATI-HOLDINGS WITH RIGHT OF OCCUPANCY.						
		PURCHASERS.							PURCHASERS.					
YEAR	Number of transactions.	Mahajans, traders or money-lenders.	Zamindars. Landlords of holdings transferred.	Zamindars. Other landlords.	Raiyats.	Others.	Total.	Number of transactions.	Mahajans, traders or money-lenders.	Zamindars. Landlords of holdings transferred.	Zamindars. Other landlords.	Raiyats.	Others.	Total.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
1892-93 ...	43,740	7,881	1,232	4,777	23,760	9,456	47,106	125,250	16,185	3,241	7,589	87,460	13,729	1,27,464
1893-94 ...	47,474	8,430	1,007	6,081	25,168	10,494	51,200	133,884	17,228	3,518	9,329	1,00,993	14,712	1,45,480
1894-95 ...	49,898	8,608	1,072	6,358	25,919	10,929	52,886	145,806	17,898	2,778	9,092	1,09,800	15,978	1,55,569
1895-96 ...	46,403	7,846	892	5,078	24,514	10,749	49,479	142,771	15,845	2,471	9,548	1,06,758	17,448	1,51,068

The number of transactions of both classes fell off in 1895-96, as compared with the figures of the preceding year, but during the past ten years the increase in both classes has been very marked, the numbers having nearly doubled in the case of raiyati-holdings at fixed rates, and nearly trebled in the case of raiyati-holdings with a right of occupancy. It is satisfactory to note that raiyats formed 70 per cent. of the purchasers of the latter class of holdings and the majority also of the purchasers of holdings at fixed rates. The number of sales of raiyati-holdings at fixed rates in 1895-96 was largest in the 24-Parganas (6,557), Chittagong (5,332), Midnapore (4,561), and Bankura (3,906) districts, sales of holdings with a right of occupancy being most frequent in the Tippera (17,394) Midnapore (15,067), Mymensingh (9,641) and Dinajpur (9,485) districts. The average price of raiyati-holdings, both at fixed rates and with occupancy rights, was higher in 1895-96 than in the previous year. In 1895-96 2,12,091 standard bighas of holdings at fixed rates were sold for Rs. 48,45,903, or an average of Rs. 22 per bigha, as compared with 3,30,722 bighas sold for Rs. 50,47,302, or an average of Rs. 14 per bigha in 1894-95. Similarly, the average price of holdings with occupancy rights has risen from Rs. 16 to Rs 19 per bigha. The Inspector-General attributes this partly to a greater demand for land due to increase of population, and partly to the increased acquaintance of the raiyats with the rights secured to them under the Tenancy Act. The recognition by the Act of the transferability of occupancy holdings where it exists by custom and the greater security given to settled and occupancy rights generally by the passing of the Act have, no doubt, greatly contributed to enhance the value of such holdings.

13. The number of registrations under sections 12 and 18 of the Tenancy Act has fallen in a remarkable manner during the past decade, from 79,109 in 1886-87 to 14,780 in 1895-96. The decrease has been explained in previous Reports as due to the unpopularity of the system of levying landlords' fees under these sections of the Act, and to the discontinuance of the wrong practice of registering deeds relating to fractional portions of permanent tenures or holdings at fixed rates. Many transfers of occupancy holdings were also erroneously registered in past years, until the Sub-Registrars became better acquainted with the law.

14. The number of documents impounded by the registering officers during the past year was 2,033, of which 1,545 were declared by the Collectors to be insufficiently stamped, and 250 to be properly stamped. Excluding 64 prosecutions on account of documents insufficiently stamped, the total number of prosecutions instituted under the Indian Registration Act was 123, the same number as in the preceding year, as compared with 88 in 1892-93 and 105 in 1893-94. The number of persons tried in these cases was 174, of whom 65 were acquitted, 99 convicted, and the remainder were pending trial at the close of the year. The majority of the prosecutions were under the headings "false statement" and "false personation." From the facts of several cases which are reported by the Inspector-General it appears that the introduction of the system of thumb impressions has been instrumental in providing evidence for conviction in cases of false personation. All District Registrars, the Inspector-General says, are unanimous in reporting that the system is a great safeguard in ensuring correct registration, and in preventing false personation; while several zamindars are said to have become convinced of its utility, and to have expressed a desire to introduce it in their zamindari transactions. The Inspector-General also reports that although many registering officers have not yet learnt to take correct impressions, they are gradually improving, and it is hoped that, in the course of a year or so, they will have acquired the knowledge. It is essential that they should learn without delay. The essence of the system lies in the accuracy with which the impressions are taken.

15. The Lieutenant-Governor is pleased to see that greater activity has been shown generally in the duty of inspection, the number of inspections having risen from 1,072 in 1892-93 to 1,305 in the past year, and a steady increase being observable in inspections made by District Registrars and Special Sub-Registrars. In many districts the number of subordinate offices has so largely increased that, in the Inspector-General's opinion, it will shortly be necessary to relieve Special Sub-Registrars of the work of registration, and

confine their duties to inspection and such work as the hearing of appeals and applications in cases of refusal of registration. At present the duties of the Special Sub-Registrar are frequently assigned to a Deputy Collector, and this is open to objection. With a view to obviate the inconvenience felt in this respect, joint offices have been opened at the Sadar stations, in order that the Joint-Registrar may remain in charge while the Special Sub-Registrar is absent on inspection. The Lieutenant-Governor agrees as to the importance of proper inspection of rural offices, which are often situated in remote localities, where, as remarked by the Inspector-General, there is no public opinion to control the Rural Sub-Registrars. Of the 397 offices open during the year, 211 were inspected by the special Inspectors of the Department.

16. During the past year a complete Manual of Rules and Circular Orders was published, as revised by Mr. Holmwood. Rules under the Act for the maintenance of records of rights were passed, and the scale of fees to be levied on account of registration of mutations and the scale of compensation to be allowed to Sub-Registrars were determined. Two mutation offices have been established, at Hajipur in Muzaffarpur and at Bettia in Champaran, but it is premature to express an opinion on the working of the Act. The existing accommodation for the office of the Registrar of Calcutta having proved inadequate, a sum of Rs. 55,030 was sanctioned during the year for the construction of new offices in the west block of the Collectorate building. They have been completed and will be shortly occupied.

17. The following table shows the working of Act I (B.C.) of 1876 for the voluntary registration of Muhammadan marriages and divorces since its introduction:—

Years.	Number of district in which the Act was in force.	Number of offices open on the 31st March.	Number of marriages registered.	Number of divorces other than *kholas* registered	Number of *kholas* registered.	Total number of ceremonies registered.
1	2	3	4	5	6	7
1876-77 ...	14	77	2,555	402	161	3,188
1877-78 ...	14	103	7,391	1,404	595	9,390
1878-79 ...	14	103	8,161	1,705	771	10,637
1879-80 ...	14	107	7,137	2,097	623	9,857
1880-81 ...	14	106	5,777	1,874	779	8,430
1881-82 ...	14	107	4,951	2,239	667	7,857
1882-83 ...	14	112	5,068	2,247	766	8,081
1883-84 ...	14	112	4,273	2,315	895	7,483
1884-85 ...	14	112	3,913	2,540	957	7,410
1885-86 ...	14	112	3,993	2,422	1,109	7,524
1886-87 ...	14	112	3,926	2,179	1,147	7,252
1887-88 ...	14	112	4,100	2,478	1,090	7,668
1888-89 ...	14	113	4,527	2,819	1,113	8,459
1889-90 ...	14	113	3,959	3,119	1,137	8,215
1890-91 ...	14	115	4,063	3,154	1,234	8,451
1891-92 ...	19	151	5,442	3,260	1,474	10,176
1892-93 ...	19	151	6,780	3,853	1,542	12,175
1893-94 ...	20	169	8,205	4,485	2,053	14,743
1894-95 ...	25	191	9,488	4,784	1,789	16,061
1895-96 ...	25	211	16,675	4,996	1,709	23,380

During the triennial period the Act has been extended to 6 more districts, and 60 new offices have been opened. The total number of marriages registered has more than doubled, and the number of other ceremonies has also, largely increased, as compared with the total for the previous three years 1890-91 to 1892-93.

The Inspector-General, although thinking that the extension of the Kazi's Act, XII of 1880, has not had much influence on the number of registrations,

considers that registration is gradually becoming popular. The opinions of several District Registrars have been quoted, who suggest that the registration of marriages and divorces should be made compulsory; but the Inspector-General is unable to recommend this. Opinion on this subject is clearly much divided among the Muhammadans, and any proposal for compulsory legislation is likely at present to meet with much opposition.

18. The thanks of the Lieutenant-Governor are due to Khan Bahadur Delawar Hosaen Ahmed for his efficient administration of the Department. The names of the officers favourably mentioned by the Inspector-General will be noted in the Appointment Department.

19. In future years the Inspector-General will forward an early copy of his report to the Director of Land Records, in order that the Lieutenant-Governor in reviewing it may have before him the remarks of that officer.

ORDER.—Order that a copy of this Resolution be forwarded to the Inspector-General of Registration, for information and guidance.

Ordered also that extract paragraph 13 of the Resolution and extract paragraphs 63 to 67 of the Report be forwarded to the Revenue Department, for information.

Ordered also that a copy of the Resolution, together with a copy of the Report, be submitted to the Government of India, in the Home Department, for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

Offg. Chief Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT ON EXCISE ADMINISTRATION IN THE LOWER PROVINCES FOR 1895-96.

FINANCIAL DEPARTMENT (SEPARATE REVENUE.)

Darjeeling, the 3rd October 1896.

RESOLUTION—No. 630T.—F.

READ—

The Report of the Commissioner of Excise for the year 1895-96, with the observations of the Board of Revenue.

Mr. Krishna Govinda Gupta held the appointment of Excise Commissioner throughout the year, with the exception of four months during which he was absent on leave, when his duties were discharged by the Junior Secretary to the Board of Revenue in addition to his own work. The Excise Commissioner had the direct assistance of three Deputy Collectors, one of whom was his Personal Assistant, and two were travelling Inspectors of Excise. In 18 districts, 14 of which have central distilleries, the department was in charge of Special Deputy Collectors whose whole time was given exclusively to Excise and Income-tax work, except in Gaya, Champaran and Bhagalpur, where the order forbidding the employment of Special Deputy Collectors on judicial work was not wholly observed, on the plea of insufficiency of establishment. In 25 districts, excise work was performed by the ordinary Deputy Collectors in addition to their regular duties. Nine Sub-Deputy Collectors were in charge of the more important distilleries, and 27 kanungoes were employed as Superintendents and Deputy Superintendents of the other distilleries and depôts open during the year. In the executive branch of the subordinate establishment, two appointments were abolished, which reduced the number of employés from 203 to 201, drawing salaries ranging from Rs. 20 to Rs. 400, while five of the old excise darogas were replaced by men of a superior class. The number of clerks in the office branch remained the same (141) as in the previous year.

2. *Inspections.*—A sufficient amount of inspection was done by the Inspectors of Excise, and considering the absence of the Excise Commissioner on leave for a portion of the year, and the lengthy periods when he was unavoidably detained in Calcutta, he seems to have travelled as much as could be expected. As suggested in last year's Resolution, every district and distillery in the Province was visited at least once during the year by the Excise Commissioner himself or one of his Inspectors. With regard to Collectors, it is reported that the sadar excise offices were not inspected at all by the District Officers of Hooghly, Khulna, Dacca and Backergunge, and that in Shahabad the Collector did not visit the central distillery. No explanation is forthcoming from Backergunge and Shahabad, and the explanations furnished by the Collectors of the other defaulting districts are not sufficient. It is satisfactory to observe that in 14 out of the 18 districts in which Special Deputy Collectors are employed, the minimum number of days prescribed for inspections in the interior (150) was attained or exceeded; in two districts the deficiency was very slight; in one the Deputy Collector was kept at head-quarters for criminal work; and in the remaining district the officer's tour was cut short by a grave domestic affliction. For Deputy Collectors of the ordinary staff, who supervise excise, the minimum period of touring is fixed at 90 days; in 12 out of 23 districts, excluding Darjeeling and the Sonthal Parganas, the circumstances of which are exceptional, the prescribed amount of touring was done, and in four districts the deficiency was trifling. The largest deficiency (46 days) occurred in Pabna, where the repeated illness of the Deputy Collector is said to have interfered with his touring, but it is not stated why the officer who acted for him during two months of the cold weather was out of the station for only three days. The short tours made in the remaining districts are generally

ascribed to paucity of officers at head-quarters, and to the exigencies of judicial and other work.

3. *Revenue and charges.*—The excise revenue was, as in previous years, realized from fees on licenses for the wholesale and retail sale of distilled and fermented liquors and drugs, distillery fees, and duty on the actual quantity of country rum, country spirit prepared in the central distilleries, opium, and hemp drugs that passed into consumption. Duty on imported liquors forms part of the Imperial Customs revenue. An increase of one rupee per seer in the Government selling price of opium was the principal change made last year in the rates at which duty is levied. The duty on charas has been raised from Rs 8 to Rs. 12 a seer since the 1st April 1896. The following statement shows the gross excise revenue, the charges and the net revenue for the last five years :—

Period.	Revenue.	Charges.	Net revenue.	Percentage of charges.
1	2	3	4	5
	Rs.	Rs	Rs.	
1891-92 ..	1,11,29,813	6,67,792	1,04,62,021	6·
1892-93 ...	1,16,00,621	6,53,715	1,09,46,906	5·6
1893-94 ..	1,21,37,096	6,47,740	1,14,89,356	5·3
1894-95 ...	1,25,67,855	6,37,858	1,19,29,997	5·07
1895-96 ...	1,33,77,980	6,74,582	1,27,03,398	5·03
Difference of the past two years.	+8,10,125	+36,724	+7,73,401	— ·04

In the above table, the net revenue for the year is shown at Rs. 1,27,03,398; but if Rs. 6,420 on account of refunds and Rs. 8,221, the difference between fines collected and rewards distributed, be added to the charges, the true figure for net revenue stands at Rs. 1,26,88,757, against Rs. 1,19,14,155 in the previous year or an increase of Rs. 7,74,602. At the same time the total number of licenses sanctioned under all heads, excepting beer, tari, poppy heads, druggists' licenses for opium, and methylated spirits, fell from 11,050 to 10,855, and the number of licenses actually settled from 10,877 to 10,792. All exciseable articles show an increase of revenue in the past year, with the exception of majum and madak, the largest increase being obtained from outstill and distillery fees and the duty on ganja. The increase of Rs. 36,724 in charges is distributed over a number of heads, the largest items of increase being Rs. 9,733 under executive or inspecting establishment, due chiefly to the employment of a special preventive force in Bankura and Hooghly, and to the deputation of Sub-Inspectors to Noagaon to supervise the manufacture of ganja, and Rs. 9,025 under travelling allowance, while the charges for district office establishment and Special Deputy Collectors decreased by Rs. 6,386.

4. *Revenue by Divisions.*—Distributed according to divisions, the gross receipts for the last five years are shown thus :—

Divisions.	1891-92.	1892-93.	1893-94	1894-95.	1895-96.	1895-96 compared with 1894-95. Increase.	Decrease.
1	2	3	4	5	6	7	8

Total ...	1,11,29,813	1,16,00,621	1,21,37,096	1,25,67,855	1,33,77,980	8,10,125	.....
					Increase ..	8,10,125	

* Revised figures.

The Presidency, Burdwan and Patna Divisions together contribute more than one-half of the increase in receipts as compared with the previous year.

5. *Revenue and consumption.*—The following table illustrates the relation of the growth of consumption to the growth of revenue from the four chief articles of excise :—

	Revenue.		Percentage of difference.	Consumption.		Percentage of difference.
	1894-95.	1895-96.		1894-95.	1895-96.	
1	2	3	4	5	6	7
	Rs.	Rs.		Gall.	Gall.	
Distillery liquor	25,61,538	27,38,312	6·9	456,396	490,476	7·5
Outstill shops	29,99,978	31,78,528	5·8	.....	...	...
Country rum	4,82,227	4,96,296	7·9	63,785	68,014	7·5
				Md. s. ch.	Md. s. ch.	
Opium	22,13,721	23,65,128	6·8	2,037 20 0	2,159 29 6	5·10
Ganja	24,92,755	26,80,819	7·5	4,927 30 8	5,302 20 11	7·6

Under the head of distillery liquor it is satisfactory to find that the proportionate increase of revenue has risen from 4·7 to 6·9, while at the same time the proportionate growth of consumption has fallen from 9·2 to 7·5. Taken with the fact that in the Patna Division, which yields the largest revenue from country spirit, the consumption of distillery liquor has increased from 577,131 gross gallons to 618,198, while at the same time the reported consumption of outstill spirit has fallen throughout the Province from 8,550, 224 to 8,526,056 gross gallons, these statistics seem to show that the reduction of duty in Behar and the adjustment of distillery fees with reference to the actual strength of the liquor produced have enabled distillery spirits to resist the competition of outstill liquor and have lessened the trade in illicit spirits.

6. *Sources of revenue.*—Classified according to articles, the gross excise revenue of the past five years may be shown as follows :—

Articles of Excise	Revenue.					1895-96 compared with 1894-95.	
	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.	Increase.	Decrease.

Opium	21,18,525	20,[illegible],8[illegible]5	21,[illegible]867	2[illegible],[illegible]13,721	23,65,128	1,51,407	.....
Miscellaneous ...	[illegible],973	10,413	10,[illegible]10	12,[illegible]68	14,120	1,[illegible]52	...
Total	1,11,29,813	1[illegible],00,621	1,21,3[illegible],[illegible]28	1,2[illegible] 67,[illegible]35	1,31,77,3[illegible]9	8,22,[illegible]94	12,569
					Net increase ...	8,10,125	

The receipts from country spirits have continued to advance steadily, and now make up 44·3 per cent. of the total excise revenue. Hemp drugs come next with a percentage of 21·3, followed by opium and its preparations 18·1) tari (8·1), rum (3·3), pachwai (3·1) and imported liquors (1·7). Calculated on the population ascertained at the census of 1891, and allowing for natural increase at the rate of 7 per thousand per annum, the average incidence of the excise revenue was 2 annas and 11 pies per head against 2 annas 9 pies in 1894-95, while during the latter year the incidence in Bombay was 8 annas 7 pies and in Madras 6 annas 2 pies per head of the population recorded at the last census. The settlements of the licenses for the current year have again been favourable, the fees showing a net increase of Rs. 2,32,807, shared by all Divisions except Chittagong and Patna, which show decreases of Rs. 71,377 and Rs. 81,329. The decrease in the Chittagong Division is attributed to the lower rates at which opium licenses were settled in Chittagong, the fees having been unduly run up at the auction sales in 1894-95, and in the Patna Division to the non-settlement of outstills carrying heavy fees in Gaya owing to the combination of the abkars.

7. *Country spirit.*—The revenue from country spirit rose from Rs. 55,61,516 to Rs. 59,11,840, being an increase of Rs. 3,50,324, or 6·3 per cent. Of the total amount collected, Rs. 31,73,528 were contributed by outstills and Rs. 27,38,312 by distillery spirits, the latter under the three heads of license fees (Rs. 8,81,324), still-head duty (Rs. 17,95,429), and distillery fees (Rs. 61,559). The income from outstills rose by Rs. 1,73,550, and that from distillery liquor by Rs. 1,,6,774. The statistics of licenses show that the number of outstills sanctioned increased from 2,095 in 1894-95 to 2,099 in the year under review, and the number settled from 2,087 to 2,091 ; while the number of shops sanctioned for distillery spirits was reduced from 1,237 to 1,203, and the number settled from 1,217 to 1,197. In the case of outstills, however, the increase is only apparent, being due to the fact that several branch shops were given separate numbers for the first time during the year; and in paragraph 55 of his Report the Excise Commissioner points out that the aggregate number of outstill shops was really reduced by 25. In the Burdwan Division all the districts show an increase of revenue aggregating Rs. 19,677, the largest increase occurring in Burdwan (Rs. 5,174). The reduction of duty in Bankura from Rs. 2-8 to Rs. 2 per gallon London-proof, and in the Jahanabad sub-division of Hooghly from Rs. 4 to Rs. 2, which was carried out with the object of preventing illicit distillation in those tracts, took effect from 1st April 1895. In Bankura, the reduction of duty did not, it is said, reach the consumers, as what the vendor gained by it was lost in the shape of enchanced license fees which he had to pay owing to increased competition, with the result that the retail price remained the same as before. The result of the reduction of duty in Jahanabad has been successful: the retail prices have been lowered, the revenue has increased, and the cheaper liquor is stated not to have been smuggled into the surrounding area, where the duty is Rs. 5 a gallon. Both here and in Bankura the employment of a special detective force resulted in a considerable increase in the number of convictions for illicit distillation and the smuggling of country liquor into outstill areas. The Presidency Division shows an increase of nearly Rs. 96,000 in the revenue, of which nearly Rs. 73,000 was contributed by Calcutta, this being due to the great influx of up-country labourers of the drinking classes, who find employment in the mills. In the Rajshahi Division, which, with Purnea and Malda, is under the outstill system, a rise of Rs. 68,110 in revenue was obtained. All the districts in the Dacca Division show an increase of revenue amounting to nearly Rs. 25,000. The amalgamation of the distilleries at Dacca and Mymensingh in 1894-95 is reported to have proved a complete success, while the equalization of the rates of duty in the two districts from 1st April 1895 has encouraged healthy competition among the distillers. In the Chittagong Division the consumption of spirits is very limited; the revenue rose during the year by Rs. 2,000, owing chiefly to better settlements. The Patna Division, which for excise purposes may be regarded as including the districts of Monghyr, Bhagalpur and Hazaribagh, in all of which the dual system of central distilleries supplemented by outstills prevails, yields the largest revenue from country spirit; the amount realized in the past year being Rs. 21,80,750 against Rs. 20,86,095 in 1894-95, showing an increase of Rs. 94,655. This increase was obtained in both the outstill and distillery areas. The revenue from outstills shows an increase of Rs. 63,165, a slight falling off in Gaya, Shahabad, and Muzaffarpur being compensated by a large increase in the remaining districts. The distillery revenue rose from Rs. 4,16,647 to Rs. 4,48,137, the increase being largest in Patna, where it is ascribed to better settlements and to larger consumption owing to the small yield of the tari trees. The Orissa Division, with central distilleries everywhere except in the wilder tracts of Cuttack, shows a small decline of revenue (Rs. 9,749), while the Chota Nagpur Division had an increase of Rs. 32,957. The Excise Commissioner observes that the liquor revenue of the province is really derived from country spirit, tari and pachwai; and reviews its progress of recent years as follows:—

"Before the abolition of outstills and the re-introduction of the distillery system in several districts of this province, in accordance with the recommendations of the Excise Commission of 1884, the highest country spirit revenue on record (52 lakhs) had been obtained in the year 1887-88. It then began to fall, but the downward course was arrested in 1891-92. Since that year it again commenced to rise, and in 1893-94 overleaped the revenue of even 1887-88. The past two years pushed it up further, and at the end of 1895-96 it stood at

59 lakhs. Tari and pachwai also made great strides during the period, and the aggregate liquor revenue of the year under report exceeded that of the past year by Rs. 4,33,451, and that of 1887-88 by Rs. 12,41,110. There was an increase under each of the heads, as compared with both the years 1894-95 and 1887-88. It will be observed that since 1887 88 the revenue from country liquor has advanced by over 7 lakhs, and that from tari by nearly 3 lakhs, while that from pachwai has more than doubled itself. As stated in the last report, there can be little doubt that the development of this revenue is mainly due to increasing population and prosperous times It may also, to a certain extent, be attributed to the repression of illicit practices."

8. *Changes in the management of Central Distilleries and Outstills.*—The distillery and outstill areas remained the same as in the previous year, but a small distillery at Pakour was abolished, and arrangements made to supply the shops in the sub-division from the distilleries at Dumka and Rajmahal. In paragraph 53 of his Report, the Excise Commissioner discusses the effect of the substitution of a distillery fee of $2\frac{1}{2}$ annas per gallon London-proof for the former fee of an anna per gallon, irrespective of strength. This change was introduced about three years ago in sixteen out of the twenty-seven districts where the distillery system is in force. In eleven districts, the old rate was maintained by reason of the high duty or the prevalence of illicit distillation and smuggling of outstill or foreign liquor. The object of the change was to equalize the incidence of the distillery fee on the outturn of liquor in the distilleries, and to remove the inducements to distil strong liquor. In the Patna Division, where very weak liquor is consumed, and where the incidence of the fee was relatively very high, the revenue from distillery fees fell from Rs 26,157 in 1892-93 to Rs. 20,991 in the past year, though the consumption steadily rose from 82,582 gallons London proof to 125,801 gallons London proof. In the other districts, where comparatively stronger liquor is drunk, both the revenue and consumption advanced, and the loss of revenue in the Patna Division was made up for by the gain in the other districts, the total revenue showing an increase of Rs. 2,103. The plan of fixing minimum prices for the retail sale of liquor, which involved minute interference and was never effectual, has been abolished everywhere, but the experiment of prescribing a maximum price for the retail sale of distillery liquor is being tried in Gaya. In that district a condition is inserted in the licenses of distillery retail shops, that khasia or weak liquor, which has the largest sale in the district, should be sold at not more than 7 Gorokhpuri pice ($1\frac{1}{4}$ annas) a bottle. The measure was reported by Mr. Macpherson, the late Collector, to have worked well on the ground that it reduced smuggling by equalizing the retail prices of distillery and outstill liquor, improved the distillery revenue, and placed distillery liquor within the reach of the majority of the drinking population. Mr. Savage, the present Collector, while of opinion that it was the introduction of new vendors and competition among them, rather than the system of maximum prices, that brought about a reduction of prices and increased sales, still suggests that the system should be retained to serve as a useful weapon in future cases of combination among vendors. Mr. Gupta, the Excise Commissioner, is also in favour of fixing a maximum; but the Board discourage it as an interference with free trade and in itself difficult to enforce. The whole question should be discussed at length by the Board in a separate report which, with Mr. Gupta's letter No. 50 of 16th May last, referred to in paragraph 251 of the Excise Commissioner's present report, should be submitted for the orders of Government. All restrictions on the capacity of vats have been absolutely withdrawn, but the capacity of stills continues to be regulated as far as possible according to the local demand for liquor and the amount of license fee paid by the vendor.

9. *Sites of shops.*—The rules regarding sites of shops, which require that no liquor shop should be opened in a bazar, on high roads, or close to places of public resort, seem to have been carefully attended to. The sites are selected in consultation with the magisterial and other local authorities, changes being made in deference to their views and the opinion of respectable residents. During the year, three outstills and four pachwai shops in Midnapore, a pachwai shop in Burdwan, two tari shops in Howrah and Darbhanga and an outstill in Tippera, were removed in deference to local opinion; in Dacca an excise shop was removed at the request of the postal authorities; and in Purnea one outstill was transferred at the instance of the manager of an indigo factory, and another on account of its proximity to a school.

10. *Country rum.*—The rum produced in the province is charged with a duty of Rs 5 per gallon London-proof, which is higher than the duty on country spirits except in the metropolitan districts. This higher rate is levied with the view of checking the competition of country rum with country spirit, the substitution of a strong for a weak liquor being calculated to encourage bad habits. The total quantity passing into consumption from the distillery at Sibpur and the new distillery opened at Sakri in Darbhanga, and by importation from Shahjehanpur in the North-Western Provinces, and Aska and Arkot in the Madras Presidency, was 91,144 gallons London-proof (68,014 gross gallons), against 83,624 gallons London-proof (63,285 gross gallons) in 1894-95, showing an increase of 7,520 gallons London-proof. Of this increase, 5,073 gallons London-proof were contributed by Sakri rum alone, which appears to be steadily gaining ground in the market, and the manufacturers of which have contracted to supply 6,000 gallons a quarter to the army. Excluding 9,103 gross gallons exported to Assam and the North-Western Provinces, the actual consumption in Bengal itself was 58,911 gross gallons. The amount consumed in Calcutta itself is taken to be 51,729 gallons at 34° O. P., or 86,646 gallons at 20° U.P., the strength at which rum is usually sold, while the quantity exported from Calcutta to the mufassal districts came to 15,215 gallons. Besides this 2,041 London-proof gallons, or 1,767 gross gallons, were imported into the Bengal mufassal direct from Shahjehanpur. The total revenue from rum rose from Rs. 4,32,227 to Rs. 4,66,296, of which only Rs. 18,498 was contributed by license fees. As, however, rum may be sold under licenses for the sale of country spirits or imported liquor, the above figure does not represent the true revenue from license fees. About the close of the year the Calcutta Wine, Spirit and Beer Association complained that the Shahjehanpur rum was being labelled as brandy, whisky and gin; and the vendors have, under the orders of the Board of Revenue, been required to show the country of manufacture conspicuously on the labels.

11. *Imported Liquor.*—The excise revenue from imported liquor is made up entirely of fees for licenses for wholesale vend, and for licences for retail sale in shops, at hotels, dâk-bungalows and railway refreshment-rooms, and on steamers. The total receipts amounted during the year to Rs. 2,87,995 against Rs. 2,81,588 in the preceding year. The number of hotel and railway refreshment-room licenses and licenses for wholesale shops increased, but licenses for retail shops fell from 455 to 450 and steamer licenses from 18 to 6. The revenue increased in 29 districts and fell in 16. Regarding the sale of cheap imported spirits, the Board write:—

"It is disappointing that in spite of the restrictions placed on the traffic in these deleterious liquors, the trade flourishes and the imports of inferior spirits from Germany continue to increase. When the license fees for the sale of imported liquors in Calcutta were raised, it was expected that higher prices would drive this class of liquor from the market. Since then a rule has been issued prohibiting licensed vendors from selling or having in their possession imported liquors unless the bottle shows the country of origin. It is therefore no longer possible to deceive the customers as to the real nature of the stuff they are buying, but the euphonious names given to the articles, the gaudy labels attached to the bottles, and, above all, the low price at which they are sold as compared with their alcoholic value, no doubt attract a large number of buyers."

12. *Tari.*—The receipts from tari, or the fermented and unfermented sap of palmyra and date trees, amounted to Rs. 10,24,031 against Rs. 9,97,852 in 1894-95. The revenue from license fees on fermented tari shows an increase of Rs. 26,913, which was chiefly contributed by Darbhanga, Patna, Howrah, the Sonthal Parganas, Hooghly and Saran. The number of licenses issued fell from 13,902 to 13,317 in the past year, the decrease being most prominent in the Patna Division, where the number fell from 10,706 to 10,072. The Board attribute this decrease to the endeavour which has for some time past been made to introduce the tree-tax system in the Division. Reference was made in last year's Resolution to the introduction of this system into certain selected districts in Bengal, and for the current year the fee for a license to sell tari has been fixed in the Patna Division, and in the districts of Monghyr, Bhagalpur, Cuttack, Puri and Hooghly, with reference to the number of trees which the licensee declares his intention of tapping, the rate being tentatively fixed at from one anna to eight annas in the case of date trees,

and six annas to twelve annas in the case of palmyra trees. In the Patna district, a further step in the direction of the Madras system has been taken, and the revenue has been divided into two parts, one representing tree tax and the other the fee for permission to sell. Experiments are in progress with a view to ascertain the average yield per tree, but the results of one year differ so widely from those of another as to cast doubts on the accuracy of the figures. For instance, the average yield of a date tree in Burdwan was reported to be 18·7 gallons in 1893-94 and 35·2 gallons in 1894-95. Differences of soil and climate, the stages of maturity of different trees, and the manner in which the experiments were conducted, probably account for most of the variations. The largest decrease in revenue (Rs. 4,537) occurred in Gaya, and is attributed to the withdrawal of the restriction as to the minimum retail price of country spirit having enabled the outstill holders to compete openly with the tari sellers. There was also a fall in revenue of Rs. 3,937 in Calcutta, owing to the difficulty of finding unobjectionable sites for some of the principal shops, which consequently remained unsettled. The number of licenses for fresh tari fell by 722, of which Tippora alone contributed 584, the decrease in this district being ascribed to the fact that certain persons who had extracted juice only for the manufacture of molasses had been led to take out licenses in the previous year under a misapprehension of the law and rules. Unfermented tari has hitherto been exempt from taxation in the Dacca Division in the interest of the trade in date-sugar, but the exemption has recently been withdrawn. The Board have at the same time been instructed to see that the provisions of section 62 of the Excise Act, relating to the possession of tari when supplied or used for the manufacture of *gur* or molasses, are liberally interpreted and effectively carried out.

13. *Pachwai.*—The number of licenses for the retail sale of pachwai, which includes both rice and millet beer, declined from 1,668 to 1,665, but the retail license fees rose from Rs. 3,61,376 to Rs. 4,11,786. There was a very large increase (4,306) in the number of home-brewing licenses for domestic consumption, the revenue under this head amounting to Rs. 27,498 against Rs. 20,960 in the previous year. This has resulted from the system of issuing family licenses to the aboriginal tribes in Darjeeling on payment of an annual fee of Rs. 2 per house, explained in last year's Resolution. On the working of this arrangement the Deputy Commissioner observes:—

"The raiyats have not only been protected from harassment at the hands of detective officers, but they have been saved the trouble of journeying for passes at each domestic occurrence from long distances in the interior, and the risk of prosecution for failure to do so. It also tends to keep them from consuming the fiery stuff sold in the form of outstill *rakshi*, which is the most satisfactory feature in the scheme. The system has not affected the licensed trade in marua to any extent, the loss being very slight."

During the year the privilege of brewing pachwai for home consumption was extended to the aboriginal tribes of Hazaribagh. The Superintendent of St. Mary's, Kurseong, was as a special case granted permission to brew beer for the use of the inmates of that seminary, on his agreeing to pay the usual duty of one anna per gallon on the quantity of beer consumed.

14. *Ganja.*—Ganja is grown under close supervision in a compact area, with Naogaon in Rajshahi as its head-quarters, and is exported thence to golas in the districts, from which it is issued on payment of duty to retail vendors. In accordance with the suggestion of the Hemp Drugs Commission, Government has sanctioned the establishment of a public gola at an approximate cost of Rs. 71,000, for the compulsory storage of the whole of the ganja produced in the Province. The following statement shows the main facts relating to ganja revenue in the last three years:—

	Licenses sanctioned.	Licenses issued.	Quantity consumed.	Revenue.
	No.	No.	Mds.	Rs.
1893-94 ...	2,736	2,715	5,116	25,35,045
1894-95 ...	2,725	2,702	4,828	24,02,755
1895-96 ...	2,696	2,696	5,202	26,80,819

For the first time after several years there was an increase in the consumption of ganja in Bengal from 4,828 maunds to 5,203 maunds. There were decreases under round and flat ganja, and an increase under *chur*—the resinous

fragments which contain the largest proportion of the narcotic. The fluctuations in the consumption of the different kinds of ganja are reported to depend on the quantities of each available in the market, the crop of one year being better suited for manufacture into one particular kind of ganja than into another. The revenue from duty rose from Rs. 13,34,269 in 1894-95 to Rs. 14,67,498 in the past year, and from license fees from Rs. 11,58,486 to Rs. 12,13,321. The figures of consumption are highest in Calcutta (483 maunds), Mymensingh (441 maunds), Dacca (266 maunds), Purnea (235 maunds), and Bhagalpur (201 maunds). The consumption in Orissa shows an increase of 58 maunds over that of 1894-95. To the net increase of 374 maunds Calcutta contributed 121, Dacca 57, and Puri 41. Lower retail prices, the breaking up of a local monopoly, and the influx of coolies to railway works, are the causes assigned. Along with the large increase of consumption in Calcutta (121 maunds), there was a decrease of 181 maunds in the quantity exported to London. It is surmised, however, that this may be more nominal than real, for, as duty is now levied on all such exports, the merchants no longer care to declare any quantity to be intended for export as distinguished from local consumption. The Cooch Behar system, referred to in last year's Resolution, has been introduced into the Tributary States of Orissa from the beginning of the current financial year. Under this system the local cultivation of ganja is prohibited and the chiefs are allowed to get Rajshahi ganja at cost-price, and issue it to the consumers after levying duty at the rates in force in the British districts. In Chota Nagpur some cases of smuggling of Sirguja ganja have been detected in Palamau, but the local officers remark that ganja is not regularly cultivated in the Tributary States, and that the stringent measures adopted in the Orissa Tributary States need not be extended to Chota Nagpur. The imports of such ganja, however, require to be carefully watched by the local officers. In order to prevent the recurrence of frauds such as occurred in 1894 at Netrokona, the Board have prescribed a supplementary register, or daily abstract of receipts and expenditure of ganja, and have directed that the balance should be initialled by the officer in charge of the warehouse every time he receives or issues ganja. An important change was introduced during the year in the method of dealing with the manufactured crop. The old practice of estimating the quantity manufactured by counting the number of bundles was abandoned, and the produce was weighed before being removed to the private storehouses of the cultivators. Although the change at first caused some alarm, it was carried out with conspicuous success, and the work was finished during March, while the rougher process of estimating had invariably lasted on into April.

15. *Production and distribution of ganja.*—The following statement illustrates the production of ganja in, and its export from, Rajshahi during the past year:—

	Mds.
Production—	
Balance of previous years	933
Crop of 1895, less amount exported in 1894-95 ...	5,338
Crop of 1896	7,008
Total to be accounted for ...	13,279
Export—	
Of crop of 1894-95	5,306
„ „ of 1896	2,105
Quantity destroyed under sanction	7
Total accounted for ...	7,418
Balance in hands of cultivators—	
Crop of 1895 and earlier years	958
Crop of 1896	4,903
	5,861

The further distribution of the drug after it leaves Rajshahi may be illustrated thus:—

	Mds.
Balance in district golas on the 1st April 1895	978
Imported from Rajshahi	7,411
Total to be accounted for ...	8,389
Consumed in Bengal	4,438
Exported to North-Western Provinces	337
„ to Nepal	253
„ to London	68
„ to Mauritius	81
„ to Sikkim	1
„ to Hill Tippera	3
„ to Garhjat States	20
„ to Assam	717
„ to Cooch Behar	79
Quantity destroyed	466
Wastage	160
Total accounted for ...	6,603
Actual quantity in stock on 1st April 1896 ...	1,786

There has been a steady decline in the exports of ganja to the North-Western Provinces, the Bengal product being displaced by cheap varieties from the Central Provinces and other places. Since the close of the year it has been decided to allow the export of ganja to the North-Western Provinces under bond without prepayment of duty in Bengal.

16. *Bhang.*—Bhang grows wild in many parts of Bengal, and when the Excise Act is amended, power will be taken to prohibit its collection except under license. It is collected for wholesale vend, chiefly in Monghyr, Purnea and Bhagalpur, and in the last-mentioned district a certain amount of control has for some years past been exercised by the issue of licenses authorising the collection under the supervision of an excise officer. During the past year this practice was introduced in Monghyr. The question of extending the limit of lawful possession of bhang from one quarter of a seer, to a seer, as recommended by the Hemp Drugs Commission, is under the consideration of Government. The number of licenses fell from 320 in 1894-95 to 315 in the past year, but the consumption rose from 1,064 maunds to 1,071 maunds, and the revenue from Rs. 55,394 to Rs. 59,498.

17. *Opium.*—Excise opium is supplied to the licensed vendors from the district treasuries at prices varying from Rs. 17 a seer in the Patna Division to Rs 33 in Orissa. The following statement illustrates the demand for excise opium during the last three years:—

	Licenses.	Consumption.	Revenue.
	No.	Mds.	Rs.
1893-94	3,297	1,970	21,34,867
1894-95	3,067	2,037	22,13,721
1895-96	3,127	2,159	23,65,128

The figures for licenses include permits to licensed druggists to sell opium and its preparations, and poppy-heads, for medical purposes only. The number of these increased by 89, while the number of ordinary licenses diminished by 29 as compared with the previous year. Notwithstanding the raising of the treasury price of opium by one rupee with effect from the 1st July 1895, the consumption rose by 122 maunds and the revenue by Rs. 1,51,407, both license fees and duty contributing to the increase in receipts. The largest increase in consumption occurred in Calcutta (36 maunds), and the Superintendent of Excise Revenue repeats the opinion expressed by him last year that a large quantity of duty-paid opium, supposed to be consumed in Calcutta, found its way to Burma, where the price is very high. This view is to some extent confirmed by the fact that three persons were detected in despatching 9 seers of opium to Rangoon by post. The increase of 30½ maunds in the 24-Parganas is attributed to the cheaper prices of food-grains and to purchases made for

consumption in Midnapore, where the treasury and retail prices were higher. In Midnapore the rise of 12½ maunds is ascribed to the breaking up of the town monopoly, which led to the reduction of retail prices; and in Patna, which showed a decrease of 39 seers in 1894-95, the increase of 12 maunds is supposed to be the effect of the orders requiring retail vendors to keep lists of purchasers, by which some check is exercised over illicit dealings. The competition for shops is highest in Chittagong, where the fact of the vendors not being allowed to sell more than the equivalent of the ascertained local demand has indirectly forced up the retail price to Rs. 80, an amount nearly treble the treasury price, and bearing a fair proportion to the Burma price of Rs. 100.

18. *Madak and Chandu.*—The revenue from madak, the Indian preparation of opium for smoking, fell from Rs 89,439 to Rs. 77,332, and the number of licenses from 308 to 300. The corresponding Chinese preparation (chandu) yielded Rs. 30,360 against Rs. 29,624, while the number of licenses fell from 67 to 58. On the recommendation of the Opium Commission, all madak and chandu shops have been closed from the beginning of the current year, but consumers are allowed to make madak or chandu for private use, and not for sale, up to the limit of one tola. The further question whether legislative measures should not be adopted to suppress opium-smoking saloons, is now under the consideration of the Government of India.

19. *Methylated spirits.*—The quantity of spirits passed out in a methylated state rose from 54,282 gallons in 1894-95 to 59,854 in the past year, and the revenue also increased from Rs. 4,417 to Rs 4,942. This spirit is professedly imported or prepared for use in the arts, manufactures or chemistry, and the principle of taxing it at an *ad valorem* duty of 5 per cent. is based on the assumption that it cannot be used for human consumption. Experience, however, has shown that spirit methylated with wood-naphtha, the agent hitherto in use, can be manipulated into a potable liquor, and rules are now under consideration, the object of which is to ensure, before the spirit is cleared from the Custom House, that it shall have been rendered completely and permanently unfit for human consumption by mixing it with caoutchoucine. At the same time, as methylated spirit is used largely for burning in sick rooms and dressing rooms and for other domestic purposes, the restriction relating to use in arts, manufactures or chemistry has recently been withdrawn, and all spirit which has been rendered effectually and permanently unfit for human consumption has now been exempted from the whole of the custom duty in excess of 5 per cent. *ad valorem*. A similar exemption will be granted in respect of excise duty in the case of spirits manufactured in India. The Excise Commissioner reports that the trade in the so called country-made eau-de-cologne prepared with spirit methylated with wood-naphtha, which was at one time carried on to a large extent in Backergunge, has almost ceased.

20. *Offences against the Opium and Excise Laws.*—While the number of licensees prosecuted for infringing the conditions of their licenses rose from 273 to 342, the number of other persons prosecuted fell from 4,146 to 4,070. The percentage of convictions rose from 86·5 to 86·9. There was an increase in the number of persons arrested by the police, and a decrease in the number arrested by excise officers; but the Board point out that the latter have to work under the disadvantage of being unable to search houses without the presence of police officers. A marked increase in the number of prosecutions for illicit distillation of country spirit occurred in the Sonthal Parganas, and the Board are in correspondence with the local officers and the Excise Commissioner on the subject. Illicit distillation is also stated to prevail largely also in Bankura and Hooghly. A considerable increase in the number of convictions for illicit possession of opium occurred in Calcutta and Chittagong, and in the opium-producing districts of the Patna Division. Among foreign exciseable articles, liquor was smuggled from Chandernagore into Hooghly and the 24-Parganas, and from Bhutan, Sikkim and Nepal into the districts of Jalpaiguri and Darjeeling, while both ganja and liquor were smuggled from Nepal into Bhagalpur and Purnea, from the Garjhats into Cuttack and Puri, and from the Sirguja State into Palamau. Most of these cases are, however, reported to be of a petty character. The total amount of fines imposed for

breaches of the excise laws and rules was Rs. 79,377, of which Rs. 59,364, or 74·7 per cent., were realised. A sum of Rs. 67,585 was distributed in rewards to police and excise officers and informers as against Rs. 58,195 in the previous year.

21. The thanks of Government are due to Mr. Krishna Govinda Gupta for his successful administration of the Department, and to the Board for their supervision, during the year. The Excise Commissioner expresses his obligation to the district officers generally, and to some officers in particular, including the Hon'ble Rai Durgagati Banerji, Bahadur, C.I.E., Superintendent of Excise Revenue, Calcutta. The names of the officers specially mentioned by him will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

RESOLUTION REVIEWING THE ANNUAL REPORT ON THE BENGAL VETERINARY INSTITUTION AND THE WORKING OF THE CIVIL VETERINARY DEPARTMENT, BENGAL, FOR THE YEAR 1895-96.

REVENUE DEPARTMENT—AGRICULTURE.

Darjeeling, the 5th October 1896.

RESOLUTION—No. 847T.—R.

READ—

Letter No. 1199A., dated the 31st July 1896, from the Director of the Department of Land Records and Agriculture, Bengal, submitting Veterinary Captain Gunn's Report on the Bengal Veterinary Institution and the working of the Civil Veterinary Department, Bengal, for the year ending 31st March 1896.

Read also the undermentioned Resolutions, Notifications and letters:—

(1) Bengal Government Resolution No 3886Agri., dated 22nd December 1891, announcing the gifts of Rs. 30,000 and Rs. 25,000 by Babu Sheo Bux Bogla and Sir Dinshaw Manockjee Petit, Bart., of Bombay, in aid of the establishment of a Veterinary Institution near Calcutta.

(2) Bengal Government Resolution No 1176Agri., dated 12th April 1892, announcing the offer of Rs. 2,500 made by Dr. Kenneth McLeod, late Professor of Surgery, Calcutta Medical College, for the founding of a scholarship of Rs. 10 a month in connection with the Bengal Veterinary Institution.

(3) Bengal Government Notifications Nos. 1, 2 and 3Agri., dated the 2nd January 1894, announcing the establishment of a Veterinary Institution at Belgachia and publishing rules for the admission of students and of sick cattle.

(4) Letter No 1790, dated the 7th July 1894, from the Director of the Department of Land Records and Agriculture, Bengal, submitting the Annual Report for the year ending 31st March 1894.

(5) Bengal Government letter No. 4180Agri., dated the 16th August 1894, to the Director of the Department of Land Records and Agriculture, Bengal, reviewing the abovenamed report.

(6) Letter No 1054A., dated 17th July 1895, from the Director of the Department of Land Records and Agriculture, Bengal, submitting the Annual Report for the year ending 31st March 1895.

(7) Bengal Government letter No 3754Agri., dated the 5th August 1895, to the Director of the Department of Land Records and Agriculture, Bengal, reviewing the abovenamed report.

(8) Bengal Government letter No 447T.R., dated the 25th April 1896, to the Government of India, communicating the views of the Lieutenant-Governor on the subject of the proposed organisation of the Subordinate Veterinary Service in Bengal.

1. During the year under report the first students' course of the Bengal Veterinary Institution was completed; and during the current year that Institution and the Civil Veterinary Department in Bengal are to lose Veterinary-Captain W. D. Gunn, the first Superintendent of the Veterinary Department in Bengal. The Lieutenant-Governor therefore takes the opportunity afforded by the present report to review the progress made by the Institution and the Department generally in the last four years.

2. In November 1891, Babu Sheo Bux Bogla (now Rai Sheo Bux Bogla Bahadur) made the generous gift of Rs. 30,000 towards the establishment of a veterinary school and hospital for cattle in the vicinity of Calcutta, a scheme which had then for some time been under the consideration of the Government of Bengal. He subsequently presented Government with a site and house at Belgachia near Dum-Dum. Sir Dinshaw Manockjee Petit, Bart., of Bombay, also made a handsome donation of Rs. 25,000 towards the scheme. On the eve of his departure from India, Dr. Kenneth McLeod, whose labours in the cause of veterinary improvement are well known, endowed a scholarship to be held at the new school. A Committee was appointed to superintend the Institution, consisting of the Director of Agriculture, Babu Sheo Bux Bogla, and Mr. W. B. Gwyther, Executive Engineer; Dr. Koilash Chandra Bose was subsequently added to their number. The foundation stone was laid by Sir Charles Elliott on 20th April 1892. Shortly after this, the orders of the Government of India were received, conveying the Secretary of State's sanction to the establishment of a Civil Veterinary Department and

appointing Veterinary-Captain W. D Gunn to be the first Superintendent of the Department in these provinces. He joined his appointment on 31st May 1892, and in conjunction with Mr. W. B. Gwyther set himself to work out the design of the buildings required for the Veterinary Institution. They were completed by the end of the year 1893, Government contributing to their cost the sum of Rs. 27,800 which was found necessary in addition to the donations already mentioned. Government also bears the cost of establishments and maintenance.

3. The Institution consists of a Veterinary School and a Veterinary Hospital. The former is named the "Kenneth McLeod Veterinary School," at the request of the donor, Babu Sheo Bux Bogla, and the latter the "Sir Dinshaw Manockjee Petit Veterinary Hospital." This building includes four wards for horses and four for cattle, a *post-mortem* room, a forge, and stables for isolation. The establishment of the Institution was notified in the *Calcutta Gazette* of 3rd January 1894, and the conditions for the admission of students to the school and of sick animals to the hospital were published at the same time; it was opened in the following month. Candidates for admission must be not less than 16 years of age and must either have passed the Entrance or the Middle English Scholarship Examination or have been promoted to the first class of a high school. Government offered in each year 15 stipends of Rs. 5 a month, tenable for two years, in addition to the Sheo Bux Bogla scholarship of Rs. 10, which is tenable for three years. The course of studies lasts for two years, each year comprising nine months of teaching, as at the Calcutta Medical College. The curriculum for the first year consists of elementary anatomy, animal physiology, materia medica, botany (so far as it relates to medical plants); that for the second year, of advanced anatomy, equine and bovine medicine and surgery, veterinary hygiene, obstetrics and breeding, and horse-shoeing. The teaching staff consists of the Superintendent, an Assistant Superintendent and two lecturers; and the teaching is in English. Throughout the course practical instruction is given at the hospital and forge, the students attending at all operations and performing the duties of dressers. An examination is held at the end of each year of study.

Notifications Nos. 1, 2, 3 Agri. of 2nd January 1894.

4. The first course of two years has now been completed, and the first final examination was held in March last; 19 students attended the course throughout, and 12 passed the examination and obtained certificates. Twenty-three students joined in 1895, and 22 in the present year; there are now 48 students at the Institution. Besides the holders of the 30 Government stipends and Sheo Bux Bogla scholarship, 7 students have been enabled to attend the school by the liberality of the Burdwan Raj and Darjeeling Municipality, each of which has given two stipends, and of the Chittagong, Patna and Balasore District Boards, which gave one stipend each. Of the 12 students who have completed their course and qualified, one has been appointed an overseer at the Institution, the services of two have been retained by the Calcutta and Howrah Municipalities respectively, one has been engaged by a local Veterinary Committee at Sitamarhi, four more have been selected for appointments at Patna, Dacca, Port Blair and Nagpur, and two have commenced private practice in Calcutta.

5. It has been found that the remote situation of the school is a source of inconvenience to the students, most of whom reside at a distance from Belgachia and are thus hindered from attending to the practical part of their training. This disadvantage to a certain extent keeps back young men from joining the school and, in order to remedy it, it has been decided to attach to the Institution a hostel capable of accommodating 35 students. This house is now in course of construction, at an estimated cost of Rs. 39,000, which sum has been provided by Government.

6. The Committee have recently proposed that the Institution should be raised to the status of a College, and the course of studies extended from two years to three; they consider that a three years' course is required to familiarize students with the handling of animals and to enable them to acquire a sufficient knowledge of pathology, a remark which applies more particularly to students of the literary and commercial classes, by whom the Bengal Veterinary Institution is now mainly attended. The extension of the course would, it is urged, enable all the students to qualify for appointment as

Senior Veterinary Assistants; this matter will be referred to at greater length below. The proposal is under the consideration of the Government of India.

7. The hospital attached to the Institution provides accommodation for 60 head of cattle and for 40 horses; and a daily charge is made which covers the cost of feeding, nursing, operations and general treatment, and is graduated according to the circumstances of the owner. The Superintendent has power to admit free of charge cattle belonging to persons who are in his opinion unable to pay. The following statements show the number of sick animals treated and the number of operations performed since the opening of the Institution:—

I.

Year.	Horses and ponies—				Cattle—				Dogs—				Sheep, deer and goats—			
	Admitted or brought for treatment.	Cured.	Died.	Remaining.	Admitted or brought for treatment.	Cured.	Died.	Remaining.	Admitted or brought for treatment.	Cured.	Died.	Remaining.	Admitted or brought for treatment.	Cured.	Died.	Remaining.

1895-96	125	...	39	10	7	181
Total since the opening ...	266	20	85	16	8	395

8. The successful establishment of a veterinary school is only the first step in a movement which has for its goal the dissemination over Bengal of the knowledge and practical skill necessary to the proper treatment of animals. Apart from considerations of humanity, it is difficult to exaggerate the economic advantage of these acquirements in a country almost entirely dependent upon agriculture. When veterinary aid is made readily available, and in the course of time brought within reach of the cultivators, it will not be idle to look for an improvement in the condition of agricultural live-stock and in the state of agriculture generally. Cattle are the chief instrument of husbandry in this country, and though the treatment and rearing of horses, sheep and other animals which agriculturists may rear for profit have not been neglected, it is a knowledge of the diseases and treatment of cattle that has been chiefly aimed at in the studies of the Bengal Veterinary Institution. The Subordinate Veterinary Service which it is now proposed to form will be recruited from the passed students of that Institution, and they will be able to apply the knowledge

they have gained especially to the care of cattle, which must continue to be the main aim of the Department.

9. Sir Alexander Mackenzie intends to place before the local bodies of a certain number of districts a scheme for the establishment of veterinary dispensaries at head-quarters stations with a suitable staff, and to invite them to co-operate in carrying it out. When this system has been fairly started, and when a larger number of trained men will have become available, it can be gradually extended to other districts; and where funds allow, itinerant Veterinary Assistants may be attached to the Sadar dispensaries. Dispensaries too would be opened, or Veterinary Assistants posted, in large Government or Wards' estates, and it may be hoped in large private estates also. In all dispensaries some income might be secured from the outset by charging fees on a reasonable scale, to be approved by the local bodies and by Commissioners of Divisions, for the treatment of horses and cattle belonging to well-to-do owners. For the present all the local inspection needed may well be performed by the Superintendent, with perhaps one or two Assistants; but, as the area covered by the scheme extends, it will be necessary to organise an inspecting staff. His Honour has proposed the following scales of pay for the Veterinary Assistants attached to dispensaries and for the Senior Veterinary Assistants or inspectors who would be selected from among them:—

Veterinary Assistants.	Senior Veterinary Assistants.
Rs.	Rs.
30 rising to 50 by quinquennial instalments.	75
	85 after 5 years.
	100 „ 10 „
	120 „ 15 „

Officers in the lower grade would be allowed the liberty of private practice. The questions of the rates of pay and of the strength and cost of the supervising establishment are still, however, under the consideration of the Government of India, as well as the proposal, to which allusion has already been made, to raise the Bengal Veterinary Institution to the status of a College.

10. The Municipal Act has now been amended so as to enable municipalities to contribute towards the training of Veterinary Assistants, to provide employment for the trained men, and to establish dispensaries for the treatment of cattle and other animals. At Darjeeling an Assistant who qualified at the Lahore College is already employed, mainly on itinerary duties. The Lieutenant-Governor hopes that municipalities will take advantage of these additional powers, and that these and other local bodies and public-spirited landowners will co-operate with Government by founding scholarships and employing the passed Veterinary Assistants in dispensaries (or as itinerants) according to the plan which commends itself to His Honour and has been sketched out in the preceding paragraph.

The Lieutenant Governor desires that a detailed scheme may now be drawn up on these lines by Veterinary-Captain Gunn in communication with the Director of the Department of Land Records and Agriculture pending the receipt of the final views of the Government of India.

11. Veterinary-Captain Gunn has now been for more than four years Superintendent of the Civil Veterinary Department in this province. His successful labours in connection with the establishment of the Bengal Veterinary Institution have already been touched upon. He has in each year attended the principal horse and cattle fairs in the province and has helped to organise competitions and to adjudge prizes

Sonepore, Berhampore in Shahabad, Sitamarhi, Kalimpong.

The usefulness and popularity of these competitions were evidenced during the year under report by the large increase in the entries for prizes at Berhampore mela and by the success of the shows which were held for the first time in connection with the very important cattle fairs at Sonepore and Sitamarhi: District Boards might with great advantage use the opportunity offered by other large fairs in their own districts to establish competitions of this kind, which are most useful in stimulating attention to questions of breeding as well as in encouraging the kinder treatment of cattle. They may count upon the willing advice and assistance of the officers of the Civil Veterinary Department.

These fairs have also enabled Veterinary-Captain Gunn to collect much valuable information regarding the breeds of cattle, and the remarks in his present report based upon his observations of the trans-frontier breeds and also of the stamp of mules brought for sale to the Military Department at Kalimpong are most interesting. With the object of obtaining information of this kind and also of investigating and combating outbreaks of cattle-disease, he has visited a large number of districts.

12. One of the most important matters connected with the breeds of cattle is the question whether it is possible to improve inferior breeds by mating the cows with bulls of other stocks. Numerous experiments have been made in this direction both by importing sires from Europe and Australia and by putting bulls of up-country breeds (such as the Hissar) to down-country cows. Between 1857 and 1860 Mr. Tayler, then Commissioner of Patna, imported some English bulls, and was able to produce a number of large-framed cross-breeds. The influence of the foreign stock is still felt, even now in the fifth or sixth generation; and many of the cross-breeds are excellent milkers. But this is almost the only experiment of its kind that has proved successful; and the larger number have been failures for various reasons, the chief one being the peculiar liability to disease of the imported bulls. Again, most of these attempts have aimed at increasing the yield of milk rather than at increasing draught power. It is for purposes of draught that Government is chiefly concerned in improving the breeds of village cattle, and the fact has often been overlooked that the best breeds for milk and draught purposes are not the same. There can be no doubt that improvement in draught cattle must be attained by the mixture of indigenous strains. It has been found that the bulls of Northern India, from Hissar or Hansi, are unfitted by their size to serve the very small cows of Lower Bengal, but possibly some improvement might be secured here by the introduction of the bulls of Bihar, which are only slightly larger than these cows. By way of experiment a number of Brahmini bulls have been brought down from Bihar and distributed in Lower Bengal; the results should be carefully watched.

13. The Lieutenant-Governor regrets that the Lower Provinces must soon lose the services of Veterinary-Captain Gunn; for this reason it is desired that he should draw up before he leaves the detailed scheme referred to in paragraph 10 of this Resolution in order that the benefit of his experience may not be lost to his successor. The thanks of His Honour are due to Veterinary-Captain Gunn for his able superintendence of both the Veterinary Institution and the Department, and for his thorough and interesting record of the year's work. They are due also to the Director of Land Records and the other members of the Committee of Management for their efficient supervision of the work of the Bengal Veterinary Institution.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette*, and that a copy of it be forwarded to the Director of Agriculture for information and communication to Veterinary-Captain Gunn.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE AGRICULTURAL DEPARTMENT FOR THE YEAR 1895-96.

REVENUE DEPARTMENT—AGRICULTURE.

Darjeeling, the 5th October 1896.

RESOLUTION—No. 857T.—R.

READ—

Letter No. 836A., dated the 9th September 1896, from the Board of Revenue, Land Revenue Department, submitting the Report of the Agricultural Department for the year 1895-96.

THE eleventh Annual Report of the Department of Land Records and Agriculture, on the subjects of agricultural enquiry, agricultural experiments and agricultural improvements, which was due to Government on the 15th August 1896, was not received from the Board of Revenue until the 14th September 1896. The cause of the delay has not been explained.

2. *Analysis of districts.*—Analytical Reports which were prepared some years back exist for the districts of Burdwan, Dacca, Lohardaga and Cuttack. At the suggestion of the Agricultural Conference, held in Calcutta during the last cold weather, the Lieutenant-Governor desired the Director to cause analyses of one or two additional districts to be prepared by the agency at his disposal as opportunity offered. The Board suggest that Puri and Balasore might be taken in hand, but it appears to the Lieutenant-Governor desirable not to take up districts under survey and settlement until those operations are completed and the settlement statistics are fully available.

3. *Emigration to Burma.*—During the year under report, 136 persons emigrated from Bihar to Burma, against 304 in 1894-95. No reasons have been assigned for this large decrease, and the Lieutenant-Governor desires that the Director will endeavour to ascertain the cause. The arrangements made with the British India Steam Navigation Company for the conveyance of state emigrants from Bihar, Chota Nagpur and Orissa under certain conditions, continued in force during the year. The object with which this scheme was started was to induce Bihar zamindars to take up land in Burma and settle on it Bihar cultivators in the hope that a stream of emigration to that Province might be opened out in time. It is important that the working of the scheme should be closely watched, and the causes that impede its operation be ascertained.

4. *Silk experiments.*—In October 1895 Sir Charles Elliott decided that Mr. Nitya Gopal Mukharji's services were no longer required for the sericultural experiments on which he had been employed for many years; but it was conceded that the experiments might be continued under a travelling Overseer and three Assistant Overseers, tentatively, up to 31st March 1896. These men appear to have carried on with some success the work of instructing cocoon-rearing cultivators, and the experiments have therefore been still further prolonged.

At 11 stations, 6,574 kahans (a kahan = 1,280 cocoons) of seed-cocoons were raised during the year, while the quantity sold to cultivators amounted to 1,351 kahans, or 4,500 ounces, as against 1,035, 1,900, 2,134 and 2,388 ounces sold in the four previous years. Three nurseries were established under Mr. Mukharji's supervision near Berhampur, near Rampur Boalia, and at Garhbeta, respectively, all of which are recognized centres to which cocoon-rearers go in quest of seed. At these nurseries seed is microscopically selected and is sold to the cultivators, and rational methods of feeding and cleaning are followed. The nurseries have achieved considerable success.

The total expenditure incurred on silk experiments during the year was Rs. 7,563, against Rs. 8,259 expended in the preceding year.

information was received of the existence of a wide spread plague among betel-nut trees in the districts of Noakhali and Backergunge. Enquiries into the origin and cause of the plague were made by Dr. G Watt, Reporter on Economic Products to the Government of India, and also by Dr. G. King, Superintendent

of the Royal Botanical Gardens, and Mr. N. G. Mukharji, and the subject is still under consideration. Mr. Mukharji also reported upon a fungoid epidemic, which has broken out in *pán* gardens and has seriously affected the price of *pán*.

6. *Manure and crop experiments.*—Agricultural experiments were carried on in the farms belonging to the Burdwan and Dumraon Estates, and in the Government Farm at Sibpur; also in Government, Wards' and Private Estates. At Burdwan and Dumraon much attention was bestowed on the conservation of cow-dung for manure. Samples taken from both places were analyzed, and it was found that the sample from Burdwan was by far the richer of the two in nitrogen. At Sibpur Dr. Prain made a botanical study of several species of indigenous wheat plants, and obtained information of some value which is to be published by the Department in a separate Report. At Burdwan 96 cultivators undertook the cultivation of special crops, with selected seed, under the supervision of Mr. N. N. Banerji and the Farm Overseer. The cultivation of Naini Tâl potatoes appears to have been specially successful and popular there, as well as in the Dumraon Estate. At both places the planting of sugarcane in trenches was tried with results which show, as in previous years, the advantage of this method over the ordinary one of planting in shallow furrows. In two series of plots, the trenching system gave increased profits of Rs. 32 and Rs. 58 per acre, respectively. Crop-cutting experiments were made in the Jail gardens by the District Officers and the Settlement Officers of Orissa. Among improved agricultural implements, the Sibpur and Baldeo ploughs were tried with but indifferent success. A cream-separator, which was sent up to the Government Cinchona Plantation, seems to have found favour in the Darjeeling district; the raiyats who used it are reported to have found a good market for their butter.

7. *Veterinary Institution.*—The Lieutenant-Governor has in a separate Resolution reviewed the progress made by the Veterinary Department in Bengal since its foundation; and it is unnecessary, therefore, to refer to the subject again here.

The Provincial expenditure of the Civil Veterinary Department, Bengal, during the year 1895-96, amounted to Rs. 16,946-7-2.

8. *Miscellaneous.*—The Agricultural Department prepared and published, during the year, general forecasts of *rabi*, *bhadoi*, winter rice, wheat, jute and oilseed crops; also reports on the early and late cotton crops, statistics of the production and value of mineral gems, a list of agricultural implements and machines tested or in use, and Tables of Agricultural Statistics for 1894-95. Agricultural Exhibitions were held, during the year, at Sonepur, Cossipore, Hat Chapra in Nadia, Barhampur in Shahabad, Sitamarhi in Muzaffarpur, Kalimpong, Alipur and Falakata in Jalpaiguri, Tintanga in Bhagalpur, and Jajpur in Orissa. The Exhibitions held at the eight first-named places were assisted by Government with grants of money, which were spent chiefly in prizes.

9. The total expenditure of the Department on agricultural enquiry and improvement (excluding the pay of superior establishment and the expenditure on silk experiments, and the cost of the Civil Veterinary Department) was Rs. 9,287, against Rs. 9,428 in the preceding year.

10. The time of the Director has in recent years been mainly devoted to the supervision of surveys and settlements. The work of agricultural research and agricultural improvement has on this account not received as much attention as its importance deserves. Now, however, that Settlement Officers have acquired experience, the Lieutenant-Governor hopes that the Director will be able to give more attention to agricultural research and the introduction of agricultural improvements in wards' and Government estates.

ORDER.—Ordered that the Resolution be published in the *Calcutta Gazette*, and that a copy of it, together with the Report and the forwarding letter of the Board of Revenue, be submitted to the Government of India in the Revenue and Agricultural Department, and a copy forwarded also to the Board of Revenue.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Govt. of Bengal.

WORKING OF THE PURI LODGING-HOUSE ACT.

MUNICIPAL DEPARTMENT.—MUNICIPAL.

Darjeeling, the 28th September 1896.

RESOLUTION—No. 752T.—M.

READ—

The reports from Commissioners of Divisions on the working of the Puri Lodging-house Act [IV (B.C.) of 1871, as amended by Act II (B.C.) of 1879] during the year 1895-96 in the various places to which it has been extended.

Read again—

The Resolution reviewing the Commissioners' reports on the working of the Lodging-house Act during the year 1894-95.

During the year under review the Puri Lodging-house Act, IV of 1871, as amended by Acts II of 1879 and I of 1884, was in force in the towns and areas mentioned in the margin. It was extended to Gewankhali, and in Jajpur, where the Act had before been introduced, it was for the first time put into operation. The Jagannath Road Fund and the Puri Lodging-house Fund have, it seems, been amalgamated from 1st April 1896, under the name of the "Pilgrims' Lodging house Fund," but this does not appear to have received the sanction of Government, and the circumstances rendering the amalgamation necessary should now be explained. Most of the reports on the working of the Act were received after the prescribed date, and Commissioners are requested to arrange for their punctual submission in future.

Extension of the Act.

In the Burdwan Division—
1. Garhbeta
2. Dainan.
3. Uluberia.
4. Gewankhali.

In the Presidency Division—
5. Nadia.

In the Chittagong Division—
6. Sitakund.

In the Patna Division—
7. Gaya.

In the Bhagalpur Division—
8. Deoghar.

In the Orissa Division—
9. The "Chattis" on the Jagannath Road in the district of Cuttack.
10. Chandbali.
11. The "Chattis" on the Jagannath Road, in the district of Balasore.
12. Puri town.
13. The "Chattis" on the Jagannath Road, in the district of Puri.
14. Jajpur.

Licensed lodging-houses.

2. The number of licensed lodging-houses increased from 1,721 in 1894-95 to 2,066. The increase is most marked at Sitakund, where the number rose from 53 to 452. During the fair upwards of 30,000 persons assembled—a number considerably above the average, which is attributed partly to the opening of the Assam-Bengal Railway, and partly to the fact that the year was considered an auspicious one for pilgrimage. There was a decrease in the number of lodgers in the *chattis* along the Jagannath Road, in the district of Cuttack, as fewer Bengali pilgrims visited the shrine during the Car festival, and some of the houses were let to permanent residents and took out no licenses. It should be stated in future reports whether, in issuing licenses, effect is given to the suggestion made in the last year's Resolution that no lodging-house should be licensed unless fees are paid for the full number of pilgrims it can accommodate.

Income.

3. The total income of the year was Rs. 39,969, against Rs. 36,352 in 1894-95, the opening balance being Rs. 29,954, and the closing balance Rs. 36,377. The receipts from fees for licenses to receive pilgrims and certificates under section 8 of the Act increased from Rs. 25,743 to Rs. 30,444, the increase being largest at Nadia, Sitakund, and Gaya. The decrease of receipts under the heading "Other fees" from Rs. 2,856 to eight annas is accounted for by the fact that the rents of roadside lands were, under the instructions issued in last year's Resolution, treated as miscellaneous receipts.

Expenditure.

4. The expenditure of the year fell from Rs. 38,262 to Rs. 33,546, including contributions amounting to Rs. 8,576, of which Rs. 5,454 appears to have been paid to the Puri Municipality for sanitary and medical purposes. No mention of this is made in the report, nor is it explained why the contributions at Deoghar were reduced from Rs. 1,460 to Rs. 600. The expenditure on conservancy declined from Rs. 8,072 to Rs. 5,900, the decrease being most marked at Gaya. At the same time, owing to extensive repairs carried out in the *chattis* along the Jagannath Road in the districts of Cuttack and Puri, the expenditure under "Repairs" rose from Rs. 621 to Rs. 1,834. At Nadia the expenditure under

Medical, Conservancy, Construction and Repairs has been amalgamated: the amount spent under each head should in future be shown separately. Considering the objects which these funds are intended to serve, the reduction of expenditure cannot be regarded as satisfactory; the closing balance is unduly large, and the Lieutenant-Governor has little doubt that more money might have been usefully spent on sanitary improvements.

Prosecutions.

5. The number of persons prosecuted for receiving pilgrims without a license, for taking more than the licensed number, and for other offences against the Act and the bye-laws was 278 against 254 in 1894-95, and the number convicted was 270 against 222. The amount of fines realised declined from Rs. 2,544 to Rs. 2,540. In the town of Puri 143 persons were prosecuted, including 7 whose cases were pending at the end of 1894-95; of these 136 were convicted and 7 acquitted.

Public health.

6. Cholera broke out in an epidemic form in the *chattis* along the Jagannath Road, in the district of Cuttack. There were altogether 22 cases, resulting in two deaths. The number of indoor patients admitted into the hospital was 142 during the year against 92 in the preceding year, and the total number of deaths rose from 2 to 6. At Deoghar influenza, cholera and small-pox were very prevalent, and the deaths among the inmates of the lodging-houses numbered 9 against 4 in 1894-95. In the town of Puri cholera cases rose from 173 to 207, and the number of deaths from 141 to 151. The number of pilgrims admitted into the cholera hospital at Gaya was 142, of whom 108 died, as against 52 and 45, respectively, in the previous year. It is stated that the outbreak of the disease commenced with the advent of the pilgrims. The deaths from all causes among pilgrims rose during the year from 80 to 336. At Nadia there were nine cases of cholera, but the necessary sanitary arrangements were adopted, the pilgrims were sent away promptly after the close of the festival, and the progress of the disease was thus stayed.

The Act appears to have been worked with vigour in most of the places to which it has been extended. A combination entered into by the lodging-house keepers at Gewankhali to defeat the Act by refusing to take out licenses was successfully broken up by prosecuting some of them, and all have since taken out licenses. In the *chattis* along the Jagannath Road, in the district of Cuttack, 18 wells were repaired, a new well was sunk, and a tank which had been dug in the preceding year was further excavated. It is stated that two very unwholesome tanks—one belonging to Raja Baidyanath Pandit, of Cuttack, and the other to Raja Baikanta Nath De, of Balasore—have not been put into proper order, although the owners have repeatedly been requested to do so. The Lieutenant-Governor hopes that it may not be necessary to refer to the subject again and that these gentlemen will recognise their obligation to prevent their property from being a source of danger to the public. In the town of Puri some new lodging-houses were constructed, 97 new latrines were built, a large quantity of foul water and silt was removed from the Swetganga tank, two other tanks were thoroughly cleaned and many minor improvements were carried out. The Magistrate of Puri is of opinion that the Act is in some respects defective; and proposes to submit a special report on the subject. His Honour is glad to observe that the opposition with which the introduction of the Act was met at Nadia is beginning to die away in consequence of the efforts that are made to provide for the convenience of pilgrims and to guard against epidemics.

ORDER.—Ordered that a copy of this Resolution be submitted to the Government of India in the Home Department, and that copies of it be forwarded to the Commissioners of the Burdwan, Presidency, Chittagong, Patna, Bhagalpur and Orissa Divisions for information.

Ordered also that a copy of the Resolution be communicated to the Sanitary Commissioner and to the Sanitary Board, and that it be published in the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

FORECAST OF BHADOI CROPS IN BENGAL.

THE following is published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Dated the 5th October 1896.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

First Forecast of the Bhadoi crops in Bengal, 1896.

1. *Character of the season.*—In the month of April there was an almost entire absence of rainfall in these Provinces, except in East Bengal. In May, showers were of daily occurrence in North and East Bengal, and the monthly fall was in excess of the normal. In South West Bengal and Bihar the rainfall was practically normal, but in Orissa and Chota Nagpur it was below the normal. The rainfall received in June was much more copious in the South than in the North of the Province—a result chiefly due to cyclonic storms in the Southern districts in the latter half of the month. Whereas, in South-West Bengal, Orissa and Chota Nagpur, the rainfall was above the normal; in North Bengal if was less than half the normal, and in Bihar slightly less than the normal. The rainfall in July, though rather irregular, did not differ to a large extent from the normal, except in East Bengal, where the fall was noticeably short. In August, the rainfall was deficient throughout these Provinces, except in Orissa. In the first week of September there was general rain in all parts of these Provinces, except in Bihar, where only light scattered showers were reported. In the second week of September the deficiency of rain continued in parts of Bihar, but the rainfall was general in all other parts of this Province. Floods did injury to the *bhadoi* crops throughout Orissa in July, and again in August.

2. *Area cultivated.*—The total area sown with *bhadoi* crops during the current year appears, from the Returns attached to this note, to amount to 15,955,500 acres, against 15,756,600 acres sown in 1895.

3. *Character of the crop.*—Out of the 45 districts of these Provinces, only one district, Palamau, returns a bumper crop. Four districts, Birbhum, Bankura, Hazaribagh and Singhbhum, return an average crop of 16 annas; 12 districts return crops varying from 12 to less than 16 annas, and the 28 districts shown in the margin, estimate the crops at less than 12 annas. From Shahabad, Muzaffarpur, Cuttack, and Puri, the crop is returned even below 8 annas. On comparing these figures with those of 1895,

Nadia, Murshidabad, Jessore, all districts of the Rajshahi Division, Mymensingh, Noakhali and Chittagong; all districts of Patna, Bhagalpur and Orissa Divisions, except Gaya and Angul, and Manbhum.

as shown in column 8 of the appended returns, it will be seen that 12 districts report better crops, 2 districts report equal crops, and 30 districts worse crops than those of last year. The estimated general outturn of the *bhadoi* crops is consequently lower, and is given as 11 annas, against 13 annas estimated for the *bhadoi* crops of 1895.

N. N. BANERJEI,

Assistant Director of the Dept. of Land Records and Agriculture, Bengal.

COUNTERSIGNED.

P. C. LYON,

Offg. Director of the Dept. of Land Records and Agriculture, Bengal.

DARJEELING,
The 26th September 1896.

Preliminary Forecast of the Bhadoi Crops of Bengal, 1896.

1	2	3	4	5	6	7	8	9	10	11
District.	Total area of district in acres.	Total area in district estimated to be under cultivation in acres.	Names of *Bhadoi* crops.	Approximate normal area *under each specified Bhadoi crop* in acres.	Approximate area *last year, under each specified Bhadoi crop*, in acres.	Estimated area *this year, under each specified Bhadoi crop*, in acres.	Taking 16 annas to represent the average outturn, how many annas represents outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
							Annas	Annas.		
Burdwan ...	1,726,080	1,233,800	*Bhadoi* paddy ...	173,700	165,700	16	9½	12½	Owing to absence of rain in parts of the district, residual difficulty has been experienced in transplanting paddy. In some tracts [illegible] accepted. More rain is wanted all over the district. If it do s not come, the outturn will be less than [illegible].	
			Indian-corn (maize) ...	8,000	8,000	8,000	14	16		
			Other *Bhadoi* cereals and pulses.	8,100	7,100	7,000	9	14		
			Other food-crops (*e.g.*, vegetables)	700	600	600	12	16		
			Indigo	6,000	5,800	5,200	10	14		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	22,000	21,600	19,500	10	13		
			Total ..	218,500	203,800	202,500	9½	13		
Birbhum ...	1,121,920	900,000	*Bhadoi* paddy ...	150,000	130,000	140,000	10	16	The rain was sufficient at first, and then partially failed. The whole crop has not been planted out, and a portion of the lands will not be planted this year unless heavy rain falls within 10 days. The estimates now given take for granted that the rainfall will be seasonable.	The normal area of maize has been changed by the collector from 3,000 acres to 2,000 acres.
			Indian-corn (maize) ...	2,000	1,600	2,000	15	16		
			Other food-crops (*e.g.*, vegetables).	1,500	1,200	1,500	10	16		
			Other non-food-crops including jute and cotton, as shown in the special forecasts.	2,500	2,000	2,500	10	16		
			Total ...	156,000	134,700	146,000	10	16		

1	2	3	4	5	6	7	8	9	10	11
District.	Total area of district in acres.	Total area in district estimated to be under cultivation in acres.	Names of *bhadoi* crops.	Approximate normal area under each specified *bhadoi* crop in acres.	Approximate area *last year* under each specified *bhadoi* crop, in acres.	Estimated area *this year* under each specified *bhadoi* crop, in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
							Annas.	Annas.		
Bankura ...	1,677,440	648,800	*Bhadoi* paddy	26,700	14,900	26,500	10	11	The average area under almost all the *bhadoi* crops remained the normal owing to copious rainfall during the sowing season. A full average outturn may be looked for except for indigo which has been estimated at 11 annas.	
			Bajra	900	600	900	12			
			Madua ...	1,200	1,000	1,200	14			
			Indian-corn (maize)	4,900	2,800	4,400	13	16		
			Other *bhadoi* cereals and pulses.	9,900	8,300	9,600	13			
			Other food-crops (*e.g.*, vegetables).	800	300	800	14			
			Indigo	2,200	2,200	2,200	17	11		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	7,700	5,200	8,400	13	16		
			Total ...	54,200	35,000	55,900	13	16		
Midnapore ...	3,362,800	2,111,800	*Bhadoi* paddy ...	119,700	99,700	113,200	10	14	A larger area than that of last year has been brought under cultivation owing to timely and seasonable rainfall.	
			Bajra	9,000	6,000	6,500	12	14		
			Madua ...	3,200	1,800	2,300	14	14		
			Indian-corn (maize) ...	22,000	22,000	21,000	16	14		
			Other *bhadoi* cereals and pulses.	53,000	49,000	51,000	10	14		

			Other food-crops (*e.g.*, vegetables).	27,600	22,500	24,600	10	13	
			Indigo	38,700	45,800	48,700	12	10	
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	59,500	45,700	48,200	11½	13½	
			Total ...	342,700	291,700	316,300	12	13½	
Hooghly ...	1,096,080	702,200	*Bhadoi* paddy	85,500	30,700	45,000	8	13	The rainfall in some parts of the district being a little more favourable this year than in the previous year, there will probably be an increase in the average outturn of the crops.
			Indian-corn (maize)	100	100	100	9½	10	
			Other *bhadoi* cereals and pulses.	3,100	2,000	1,700	8	12	
			Other food-crops (*e.g.*, vegetables)	3,400	1,200	3,000	11	12	
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	39,600	28,100	32,500	12	14	
			Total ...	131,800	62,100	83,400	9	13	
24-Parganas ...	1,344,640	1,058,900	*Bhadoi* paddy	108,700	90,800	102,800	10½	15	The difference between the normal area and the area sown this year is due to the want of sufficient rain at the sowing season. Subsequent rain did much good to the *bhadoi* crops, and the outturn is expected to be better than that of last year.
			Other *bhadoi* cereals and pulses.	3,000	900	2,000	10	12	
			Other food-crops (*e.g.*, vegetables).	4,900	3,600	5,200	13	15	
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	42,000	36,300	41,500	13½	14	
			Total ...	158,600	139,600	152,100	10½	14½	

1	2	3	4	5	6	7	8	9	10	11
District.	Total area of district in acres.	Total area in district estimated to be under cultivation in acres.	Name of *bhadoi* crops.	Approximate normal area *under each specified bhadoi crop* in acres.	Approximate area *last year, under each specified bhadoi crop*, in acres.	Estimated area *this year, under each specified bhadoi crop*, in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
							Annas.	Annas		
Nadia	1,738,160	1,303,000	*Bhadoi* paddy ...	270,000	230,300	250,000	9	8	More land has been sown this year with *bhadoi* crops, as the rains in the beginning of May last much facilitated cultivation, but the scanty rainfall during the present month has much affected the outturn.	
			Indian-corn (maize)	1,000	1,000	800	10	6		
			Other *bhadoi* cereals and pulses.	44,200	48,000	53,500	11	9		
			Other food-crops (*e.g.*, vegetables).	20,500	16,500	21,200	12	10		
			Indigo	52,100	57,800	57,800	11	10		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	85,800	85,300	84,400	12	10		
			Total ...	457,900	438,900	467,000	11	9		
Murshidabad	1,572,160	983,500	*Bhadoi* paddy ...	232,000	212,300	211,500	9	9	The decrease in the area sown this year, as compared with the normal area, is due to the deficiency of rainfall during the sowing season. This also explains the decrease in the outturn.	The estimate of area under indigo this year has not been returned. Last year's figure has been reproduced.
			Indian-corn (maize)	300	200	300	8	9		
			Other *bhadoi* cereals and pulses.	2,600	1,300	1,900	9	10		
			Other food-crops (*e.g.*, vegetables).	12,700	7,500	7,700	11	11		
			Indigo	59,200	51,800	51,300	13	12		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	35,900	28,100	28,000	11	11		
			Total ...	362,100	301,300	300,700	10	10		

Jessore ...	1,572,000	1,116,800	*Bhadoi* paddy	316,400	314,300	314,000	10	8	The decrease in the area of *bhadoi* paddy this year, as compared with last year's area, is due to insufficient rainfall during the year. The increase in area under other non-food-crops is due to the high price at which jute was sold last year. The normal area under *bhadoi* paddy, other food-crops and indigo as shown in the final forecast of the *bhadoi* crops of 1895 has been reduced by the Collector by 100 acres in each case.
			Other *bhadoi* cereals and pulses.	8,900	8,400	8,400	10	10	
			Other food-crops (*e.g.*, vegetables).	18,800	16,600	16,600	10	10	
			Indigo ...	17,700	17,500	17,500	14	14	
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	49,500	41,000	47,100	12	14	
			Total ...	403,200	315,600	403,600	10	8	
Khulna ...	2,103,942	570,000	*Bhadoi* paddy ...	58,400	51,700	52,600	12	12½	The outturn is expected to be a little better in the Sadr and Satkhira subdivisions than in Bagerhat. The Deputy Collector of Bagerhat attributes the low outturn to insufficient rain.
			Other *bhadoi* cereals and pulses.	3,200	3,100	3,200	10	10	
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	22,800	28,600	28,600	13	11½	
			Total ...	84,400	83,200	84,400	12	13	
Rajshahi ...	1,490,365	1,085,900	*Bhadoi* paddy	104,800	100,700	109,600	11½	8	The increase in the area sown this year under the heads *bhadoi* paddy and other non-food-crops is due to timely rainfall at the sowing season. The low outturn of *bhadoi* paddy which is anticipated is due to deficiency of rainfall afterwards.
			Other food-crops (*e.g.*, vegetables).	1,600	800	800	12	12	
			Indigo	9,000	8,000	8,000	16	12	
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	109,500	80,500	80,600	15½	13	
			Total ...	225,900	190,000	199,000	13½	11½	

1	2	3	4	5	6	7	8	9	10	11
DISTRICT.	Total area of district in acres.	Total area in district estimated to be under cultivation in acres.	Names of *bhadoi* crops.	Approximate normal area *under each specified bhadoi crop* in acres.	Approximate area *last year, under each specified bhadoi crop*, in acres.	Estimated area *this year, under each specified bhadoi crops*, in acres.	Taking 16 annas to represent the average outturn, how many annas represented the outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
							Annas.	Annas.		
Dinajpur ..	2,635,520	1,745,000	*Bhadoi* paddy	128,000	128,000	128,000	16	8	*Bhadoi* paddy, and in fact all the *bhadoi* crops have suffered considerably from want of rain in July and August, and hence the poor outturn anticipated.	
			Juar	7,000	7,000	7,000	18	10		
			Maidai	7,000	7,000	7,000	12	6		
			Other food-crops (*e.g.*, vegetables).	100	100	100	16	8		
			Indigo	100	100	100	12	10		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	99,700	99,700	99,700	18	9		
			Total ...	241,900	241,900	241,900	13½	8		
Jalpaigori ...	1,894,600	1,000, 00	*Bhadoi* paddy ...	186,500	187,600	186,700	11	7½	The figures in columns 2 and 3 exclude the area of taluk Chotagurma, viz. 1,080 acres and 700 acres respectively, transferred to Assam. The increase in this year's area under *bhadoi* crops is due to the extension of cultivation in the Duars. Want of seasonable rain retarded the growth of plants.	
			Indian-corn (maize)...	2,000	2,000	3,000	10	8		
			Other *bhadoi* cereals and pulses.	4,400	4,300	4,300	12	6		
			Other food-crops (*e.g.*, vegetables).	5,200	5,100	5,100	12	10½		
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	86,700	86,400	86,400	11	10		
			Total ...	284,600	285,400	286,500	11	8		

Darjeeling ...	744,960	199,460	*Bhadoi* paddy	32,300	32,500	32,500	14	9	Want of seasonable rain has injuriously affected the outturn of all crops, specially *bhadoi* paddy.
			Mandua	7,700	5,300	5,300	14	11	
			Indian-corn (maize)	17,700	22,200	22,200	14	10	
			Other food-crops (*e.g.*, vegetables).	4,500	4,500	4,500	13	11	
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	15,300	15,300	15,300	15	11	
			Total ...	77,500	79,800	79,800	14	10	
Rangpur ...	2,231,040	1,602,700	*Bhadoi* paddy ...	275,400	275,400	260,800	16	10	The decrease in the area under *bhadoi* paddy sown this year is due to excessive fall of rain at the sowing season. The outturn is estimated as worse than that of the previous year owing to excessive rainfall in the early part of the season and long-continued drought afterwards. Want of seasonable rainfall from beginning to end made the prospects worse than those of last year.
			Indian corn (maize) .	100	100	100	16	12	
			Other *bhadoi* cereals and pulses.	91,000	91,000	91,000	16	12	
			Other food-crops (*e.g.*, vegetables).	23,700	23,700	23,700	16	16	
			Indigo	7,700	7,000	7,000	14	9	
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	286,300	286,300	286,800	16	10	
			Total ..	684,200	683,500	669,400	16	10	
Bogra ...	929,280	491,000	*Bhadoi* paddy ...	140,000	105,000	105,000	10	12	Want of insufficient rain in the latter part of July and in August damaged the growth of the crop to some extent.
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	76,000	100,000	100,000	13	10	
			Total ...	216,000	205,000	205,000	11½	11	
Pabna	1,176,960	882,500	*Bhadoi* paddy	125,200	123,000	120,000	15	10	Late and scanty rainfall is supposed to be the cause of the small area cultivated with *bhadoi* paddy and vegetables, and accounts also for the poor outturn expected from them. It is reported from Sirajganj that low floods have made a certain portion of the area unfit for sowing pulses.
			Other *bhadoi* cereals and pulses.	50,500	60,000	50,000	9	8	
			Other food-crops (*e.g.*, vegetables).	102,000	108,700	108,000	12	10	
			Other non-food-crops, including jute and cotton, as shown in the special forecasts.	212,800	175,500	158,300	17	12	
			Total .	490,500	467,200	436,300	16	11¼

No. 3929M., dated the 3rd October 1896.—The following report is published for general information.

H. H. RISLEY,

Secretary to the Government of Bengal.

INSPECTION REPORT OF THE SANITARY COMMISSIONER ON THE DARJEELING MUNICIPALITY.

I INSPECTED the Darjeeling Municipality on the 6th, 8th, 9th and 10th June 1896, in company with Mr. Silk, the Sanitary Engineer, and Mr Herlihy, the local Conservancy Inspector. I did not, however, write a report of my inspection at the time, because I wished to see the condition of the town in the height of the rains before expressing an opinion on its sanitary arrangements. I have now been round again (on the 5th and 7th instant), and the following is an expression of the opinion I have formed as the result of both inspections.

Constitution of the Municipality.—In a town where the Municipal Committee is thoroughly representative of the various local interests, and the executive members are composed of the Deputy Commissioner (Mr. Greer) as Chairman, a Government retired officer (Captain Power) of great experience and himself a large local landed proprietor as Vice-Chairman, and several distinguished gentlemen as members, such as General Yearman-Biggs, Commanding the Presidency District, who has a very wide experience of sanitation in Indian hill stations, two retired members of the Civil Service, viz., Messrs. Worgan and Taylor, the Civil Surgeon of the district, and some of the leading citizens and planters of the district, a high standard of municipal administration is to be expected, and I may say at once that it has been attained, Darjeeling being in this respect much in advance of any of the hill stations in the Punjab (including Simla), of all of which I have personal experience. By this I must not be understood to mean that the sanitary administration here is perfect: it is far from that; but judging from the advance that seems to have been made in recent years, and the eager desire on the part of the authorities to carry out suggested reforms, the time is probably not far distant when there will be little or nothing to find reasonable fault with in the municipal administration of Darjeeling.

Market.—As I commenced my inspection at the meat market, I will deal with that first. The building itself is an excellent design, and the system of stamping the meat 1st, 2nd or 3rd class, according to the quality of it, is a very good one. The stalls, however, are not all good, many of them being uneven wooden tables. They should be built in regular lines of arched masonry platforms, with marble top slabs. The butchers' chopping blocks are the worse for wear, and I noticed that they were not as cleanly kept as is desirable. I saw old particles of grease and flesh lodged in the cuts. These blocks need scraping daily. The flushing arrangements inside the meat shed are also capable of improvement. At present bhistees water the floor, while a sweeper sweeps it. A better and more economical arrangement would be to attach a hose to the hydrant which is just outside the market, and flush the floor once or twice a day, in the same manner as is done on boardship. But before this is done, the drainage needs to be attended to. At present this shed is drained on one side only, and beneath the middle of the floor by a cemented drain which connects with a main drain somewhere under the road, thence along the new covered market, and ultimately into the Lochnagar outfall. A better arrangement would be to block the channel which at present runs under the meat shed, and to construct a proper Raniganj half-pipe drain all round the shed, connecting it direct with the Lochnagar outfall, which is a few yards only from the northernmost corner of the shed. This would be cleaner and more satisfactory in every way than the present insanitary arrangement. The ground at the back of the meat shed between the shed and the bank is low-lying and marshy in the rains. It should be raised a few inches, which can very easily be done, and sloped towards the proposed drain.

The covered market recently constructed is a great improvement. I have no fault to find with it; the structure is good and suitable, and the drainage

around it is efficient. The latrine accommodation alongside for Europeans and Natives might, however, be improved, as I pointed out to the Conservancy Inspector on the spot.

Drainage—On the whole is remarkably good. There are various descriptions of drains, viz., ordinary stone, patent stone, Mirzapore flag, concrete, cement, and Raniganj half-pipes. It is proposed gradually to make them all of a uniform design. The difficulty, however, I understand, is to find material strong enough to stand the force of storm water. Few people have any idea of the destructive influence of the volume of water which during the rainy season rushes down the drains with a force and velocity which is calculated to try the strength of the best cement or concrete. Nothing, it appears, has yet been discovered to thoroughly withstand the force of Darjeeling rain water for long, but Raniganj half-pipes seem to answer best here as elsewhere. I think, therefore, that the Municipality would be wise to construct all their drains of this material in future. Not only would it look better and wear longer than the majority of the existing drains, but being wedged and strongly cemented together would be less liable to collect offensive matter, as is the case at present, in the interstices of stone drains. This is one of the principal causes of the bad smells which are so frequently met with and naturally complained of in Darjeeling. In this respect some of the most offensive drains are the road-side drain from Meadow Bank to the Kutchery, with the house connections on the way, the house-connection drains along the Auckland Road, the drain which runs past Glen Eden, and the Clune Avon Jhora, the drain with its connections along the road from the bazar to the Botanical Gardens, especially at the point in the middle of the Gardens where the main drain ceases to be pucca, the Jitan Jhora, which collects all the drainage of the upper portion of the bazar, the drain from near the Railway Station to the Lowis Jubilee Sanitarium, the drains from Rockville and the houses on the Eastern Jalapahar Road, which join the Calcutta road-side drain and others. Not only are these feeder drains defective in construction, but they are made the more offensive by the disgusting habit of servants using them as latrines and urinals, and private mehters emptying the contents of house-latrines into them in order to save themselves the trouble of going to the nearest public latrine or night-soil depôt. Within the last few days three such cases have come to my knowledge—one at Rockville, one in the vicinity of the Grand Hotel, and the third at Meadow Bank. If landlords will not provide proper connecting drains, and if occupiers of houses will not take the trouble to insist on their servants desisting from the insanitary habits referred to, they have themselves only to blame for the mal-odours which are prevalent. I am told that it used to be, and probably still is, a common practice for the municipal sweepers, on a dark and rainy night, to empty the contents of their drums into the drains, so as to save themselves the trouble of going to the night-soil depôts. I cannot say what was the practice in former years, but it certainly does not appear that this insanitary habit is carried on to any great extent, if at all, now-a-days. Mr. Herlihy informs me that he and his supervising staff keep a very strict watch over the mehters in this respect. Every morning early a special establishment goes round inspecting all the municipal drains, and if night-soil was thrown into them the previous night, some trace would generally be found in the morning and the mehters of the beat would be fined. They know this, and accordingly refrain from committing the offence. I am convinced, after careful personal investigation, that it is not the fault of the Municipality that parts of Darjeeling are often mal-oderous; but, as I have already said, this is due (1) to the faulty construction of private drains, and (2) to the carelessness or wilful insanitary habits of the peoples' own servants. There should be a standard plan of feeder drains from private houses, and the plan should be Raniganj half-pipes.

As regards drainage outfalls, the two principal ones are the Lochnagar Jhora and the Jitan Jhora, situated, roughly speaking, on either side of the bazar. The former collects the drainage and sullage from the Chowrasta half of the station; the latter that of the southern portion of the native town. The drainage of the major portion of the bazar also goes into this outfall, while some of it flows into the main drain which runs through the Botanical Gardens. The upper portion of the Lochnagar outfall is Raniganj half-pipes set in cement and

concrete; below the cart-road it is built of stone with plank flooring at intervals "to protect the drain;" which, I was informed, "cannot otherwise withstand the force of the water." I do not like the arrangement, not only because offensive matter finds its way into and collects under and in the crevices of the planks, and gives off offensive smells under the action of sun and light, but also because an inclined plank floor acts as a shoot which increases the velocity of the flow of water and causes damage to the sides and floor of the drain at the end of the shoot. This is what has actually happened in this outfall jhora. The best plan, I think, would be to construct wherever possible a number of shallow falls along the course of the jhora, which would form water cushions and have the effect of checking the velocity of the water, cause less damage than the present arrangement, and also look better.

The Jitan Jhora, on the other side of the bazar, is pucca along a part of its course; that is, it is constructed of concrete cement, and is so far good; but this good arrangement does not go far enough, for before the drain reaches the Victoria Waterfall Road it becomes a stone channel and immediately gets very offensive in consequence of sullage, &c., collecting in the interstices of the stones. It is very desirable that Raniganj half-pipes or concrete cement should be continued in this outfall jhora to a point below the Victoria Road. Similarly, the main drain which goes through the Botanical Gardens should be made pucca to a point below the Gardens. These Gardens are a favourite pleasure resort which is spoilt by the offensive smells which emanate from the drain in question, especially at the point in the middle of the Garden where the pucca ceases and the stone channel begins. The Clune Avon Jhora past Glen Eden should be dealt with in the same way. This drainage channel above the Western Jalapahar Road is well built and cemented; below the road it is merely a nalla with a rocky and uneven bed, in consequence of which there are numerous evil-smelling pools in which sullage and sewage collects and putrifies in the dry weather.

During the rains, when there is always a strong continuous flow of water, there is no necessity for special flushing arrangements. In the dry weather special arrangements have to be made. The present system, by which flushing taps are provided over the main drains, is wasteful because the force with which the water flows out of the taps is not sufficient to flush the drains effectually. I would suggest removeable wooden shutters at intervals along the drains, let into grooves so as to dam up the water at the time of flushing, and then to let it out with a rush, which would have the effect of sweeping away all matter that may have lodged in the drain; thus the drain would be thoroughly cleaned with a minimum expenditure of water.

The above are the only defects that exist in the main drainage system of Darjeeling, which on the whole is admirable. If the private connecting drains were as good, there would be nothing to complain of in this respect. If there is any provision in the municipal laws by which house-owners can be compelled to construct connecting house-drains according to a standard pattern, no time should be lost in compelling them to do so.

Water-supply.—The springs at Senchal were running freely and well when I inspected them with Mr. Silk. We also inspected the storage reservoirs: in one of them the floating pipe was out of order owing to the joint having rotted, which is not surprising, seeing that it was made of canvas instead of metal. The storage tanks should be converted into filter beds. This would prevent a large amount of mineral and vegetable matter from being swept down the pipes, as happens at present, and might, in fact probably would, clog the proposed Pasteur filters. Moreover, filter beds would assist the Pasteur system, inasmuch as the water would be fairly clean before it entered the Pasteur filters, and thus the candles would not require to be cleansed as often as would otherwise be necessary, and they would also work more easily. It will soon be necessary to tap one or two more springs up at Senchal, for the present supply of water is insufficient, and there is scarcely any to spare, during the dry weather, for road-watering and drain-flushing.

Latrines and urinals.—There are 31 public latrines and 11 public urinals scattered throughout the town, and of those five of the former and two of the latter are reserved for the exclusive use of females. There are 307 private latrines. The public latrines are on the whole well looked after, but being built

and worked on the combination principle, it is impossible to keep them absolutely clean and free from smell. At present liquids and solids are collected together and stored in tubs until the evening, when, between the hours of 8 and 10 P.M., the latrine mehters separate them as much as possible in order to discharge the liquid down the pipes which are now connected with many of the public latrines, and to remove the balance to the trenching ground. This process, as will readily be imagined, is one that must and does give off abominable smells which are most sickening to passers-by. In June last I explained all this to the municipal authorities, and strongly recommended them to put up their next latrine on Donaldson's automatic system—a suggestion which they promptly acted on, and on my return to Darjeeling the other day, one of the first new things that met my eye on the way from the Railway Station was a Donaldson's eight-seated latrine in the bazar near the goods shed of the railway terminus, and what was more gratifying to me was to see and hear how much it was appreciated by the people. The Conservancy Inspector tells me that it is used by about 1,500 people daily, that it is very easy to keep clean, and that the mehters much prefer it to the old system. This new latrine is admitted by the people, as well as by the municipal authorities, to be a complete success; so much so that I understand it has already been decided to construct all public latrines in future after the same pattern. This is very satisfactory, and the Municipality is to be congratulated on its prompt recognition of a great improvement. It should be always borne in mind in connection with latrines that the more ventilation there is, the better, and that, however well in other respects a latrine may be built, it will always be more or less offensive, in spite of the strictest attention, unless well ventilated. I hope the next latrine that will be attended to is the one in the hollow between Caroline Villa, Stortford House, Warwick House, Hadham Lodge, and Mall Lodge. This is in a most insanitary condition, and is a nuisance to the residents of the locality. If there is no other site to which it can conveniently be removed, it should be reconstructed on the separation system and connected by means of a urine pipe with the nearest urine main. Other latrines that require to be attended to are those attached to the new shops below the Club. These, though called private latrines, are really semi-public, because they are used not only by the residents of the shops, but also by the shop employés, who are for the most part day-labourers. These latrines have insufficient ventilation, are in an insanitary condition, and must be very unpleasant to the shop residents. I do not like the idea of semi-public latrines being here at all, but, on account of the nearest public latrine being as far as the meat market, I suppose we must permit some arrangement of the kind. The present structures should be reconstructed so as to provide more ventilation and better floors. Before leaving the subject of latrines, I wish to draw particular attention to a most offensive private latrine in the Kayah bazar. It belongs to Kally Churn Mistry, and adjoins a public latrine which the Municipality are about to demolish. This private latrine should go too, as it is most objectionable. There will be no hardship to the owner in removing it, as there are public latrines and also a public urinal quite close by.

The urine pipes which are attached to most of the public latrines are an excellent idea of General Yeatman-Biggs', for not only do they dispose of the liquid quickly, but they prevent the possibility of lazy mehters emptying the contents of the drums into the drains, as I am told they used to do very frequently before the existence of the pipes. There is one defect, however, in connection with these pipes, which I should like to bring to notice, and that is that they are not trapped. This should be done, and they should also be ventilated, otherwise the pressure of air in the pipes may unseat the traps, and the air, which is practically sewer gas, would be ejected into the urinals and render them less attractive and possibly harmful. The urine pipes should also be flushed at intervals, and for this purpose small siphon flushing tanks should be provided.

In Darjeeling one always knows when one is approaching a public latrine from the strong smell of phenyle with which it is the custom to disinfect it. I suppose phenyle is used because it is supposed to be a strong germicide. It is a germicide, but not a powerful one, and as it is objectionable in smell, perhaps

the Municipality would like to try some other disinfectant. I recommend the following solution of perchloride of mercury (corrosive sublimate):—

Corrosive sublimate	...	...	...	...	½ oz.
Hydrochloric acid	...	...	...	...	1 oz.
Anilife blue	...	...	...	...	20 grains.
Water	...	...	...	...	3 gallons.

This is a very powerful germicide, and has the additional advantage over phenyle that it is odourless.

Cess-pools or sullage water-pits.—These exist in several of the houses, and are one of the causes of the unpleasant smells that are frequently complained of. The worst are those at Mount Pleasant, which is occupied by the Bengal Secretariat clerks, and the people who suffer most in consequence of them are those who live near the drain through which the contents of these cess-pools are emptied at intervals. If private drains were properly constructed, there would be no necessity for these insanitary pits. The Bengal Secretariat ones should be closed at once, and the sullage water allowed to pass directly into the drains.

Rubbish and house-refuse.—This is at present stored in square wooden boxes which are attached to each house, and removed daily by the Municipality. The material of which these outdoor bins is made is objectionable, since wood readily absorbs organic impurities and then emits evil odours. A better plan would be to have iron cylinders, or if this is considered too expensive, then circles of corrugated-iron will do as well. The whole of the sweepings and rubbish of the town, as well as the night-soil, is now removed in carts to a place called Battasia near Goom, and buried there in trenches. On account of the distance, this system, which is the only one feasible, takes a long time in transit, and is a great wear and tear on the conservancy ponies and carts. Arrangements have accordingly just been made with the Railway authorities, by which in future all the refuse of Darjeeling will be railed out to Battasia, the Municipality paying the Railway Company a contract rate of Rs. 700 a month, and meeting the cost of the required trucks and of a siding near Goom, which will be necessary. This is a very satisfactory solution of a difficult problem.

Trenching-ground.—It has already been said in the previous paragraph that the night-soil is now trenched at Battasia, and arrangements are being made to cultivate the place. This is as it ought to be, and I see no reason why the Municipality should not make their trenching-ground a source of profit, as well as grow fodder on it to feed the conservancy ponies. The old trenching ground, which is at the head of the now discontinued rubbish shoot at the end of the bazar hill, has, I hear, been regularly cultivated, and is at present covered with a luxuriant crop of vegetables. The Municipality realized Rs. 700 from the trenching-ground last year. Judging by the appearance of the crops I saw growing on it, I should think it ought to realize more.

Quarrying.—A great deal of mischief is caused by indiscriminate quarrying on the hill sides. Apparently anyone can do what he likes in this respect, and the result is hideous and destructive landslips: witness those which occurred in the early part of the year and did so much damage to property, and was also the cause of some lives being lost. The Municipal bye-laws should be very strict in this respect. They are so in other hill stations, and I am surprised that so much latitude is allowed in Darjeeling.

In conclusion, it only remains for me to congratulate the Chairman and the Municipal Commissioners of Darjeeling on their excellent municipal administration of the town, which is on the whole quite the best managed I have come across either in Bengal or in the Punjab. The Municipality is a go ahead one, is fortunate in its constitution of members, all of whom take a real interest in the welfare of the town, and last, but by no means least, it has a good staff. In Mr. Herlihy, the Conservancy Inspector, the Commissioners possess a very energetic and thorough man, who knows the town well, is constantly to be seen on his rounds, and allows no shirking of work on the part of his subordinates, while he is not afraid to do his duty in insisting as far as he can on compliance with conservancy laws and regulations.

H. J. DYSON,
Sanitary Commissioner for Bengal.

DARJEELING,
The 17th September 1896.

WEATHER AND CROP REPORT.

For the week ending the 5th October, 1896.

Burdwan.—Rainfall at Sadar ·02, Kalna 1·00, Katwa ·49, Raniganj ·31. Weather fair and hot. Harvesting of *aus* and jute and sowing of *rabi* going on. Rain badly wanted at Raniganj. *Aman* thriving splendidly. Supply of fodder and water plentiful. Condition of cattle good. Common rice selling as follows:—

	Srs.	
Sadar	11½ to 14	per rupee.
Kalna	12	
Katwa	12 to 13½	
Raniganj	12 to 14	

Midnapore.—Rainfall at Sadar ·08, Contai 1·66, Tamluk ·72, Ghatal ·30. Weather hot. Prospects of sugarcane, *til*, and jute good. *Aman* badly requires more rain everywhere, especially on high lands. Cattle-disease reported from Garbeta and Binpur. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	15	per rupee.
Contai	16	
Tamluk	13	
Ghatal	13½ to 15	

24-Parganas.—Rainfall at Sadar ·39. Weather hot and clear. Prospects of *aman* paddy favourable. Harvesting of jute and *aus* still continues. No cattle-disease. Fodder and water sufficient. Common rice sells as follows—

	Srs. c.	
Sadar	10 to 13 0	per rupee.
Barasat	9 0	
Basirhat	10 10	
Diamond Harbour	11 6	

Murshidabad.—Rainfall at Sadar 2·34, Kandi ·02, Jangipur ·54. Weather hot. Harvesting of *aus* and sowing of *kalai* going on. Cutting of jute nearly finished. *Aman* and sugarcane doing well. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	11	per rupee.
Kandi	13½	
Jangipur	11½	

Khulna.—Rainfall at Sadar ·32, Bagirhat 1·26, Satkhira ·78. Weather cooler than last week. *Aus* harvest almost over. The crop is about 8 annas. In parts of the district no *aman* paddy has yet been transplanted for want of rain. No cattle-disease. Fodder and water sufficient. Prices of common rice:—

	Srs. c.	
Khulna	9 to 10 0	per rupee.
Bagirhat	9 13	
... ...	9 8	

Dinajpur.—Average rainfall ·75. Nights cool. Prospects of standing crops fair. No report of cattle-disease. Fodder and drinking-water sufficient, Common rice selling from 10 to 12 seers per rupee.

Rangpur.—Average rainfall 1·55. Transplantation of *aman* and washing of jute still going on. Prospects fair. Fodder and water sufficient. Common rice selling from 8 to 11 seers per rupee.

Pabna.—Weather very hot. More rain urgently required. *Aman* crop very poor; winter crops so far promise well provided rain falls Fodder available. Rice selling at Sirajganj 7 seers and Pabna 9 seers per rupee.

Dacca.—Rainfall, 1·59. Weather seasonable. Prospects of standing *aman* crop improving. Fodder available. No cattle-disease. Price of common rice varies from 8 to 9 seers per rupee.

Chittagong.—Rainfall ·38. Weather hot. Transplantation of *aman* finished. Prospects have somewhat improved, but more rain is required. Water and fodder sufficient. Rice sells at 11 seers per rupee.

Patna.—Rain urgently wanted in places for rice crop and for *rabi* preparations. Price have risen sharply owing to heavy exports up-country

Gaya.—Prospects fair. Rain urgently wanted for paddy on high lands. Common rice sells at 9 seers, against average of 14 seers per rupee.

Champaran.—No rain except ·37 at Bagaha. Winter rice has begun to wither on high lands, but fair elsewhere. Copious rain required in about a week to prevent serious general damage, but considerable irrigation is going on. Export of grain up-country has begun, and prices risen generally. Common rice has risen at Sadar from 14 to 11 seers, against average of 15¾ seers per rupee. Fodder and water sufficient.

Darbhanga.—Rain at Sadar ·17. Rain badly wanted for paddy. Fields being prepared for *rabi*. Prices rising owing to export.

Bhagalpur.—No rain at Sadar. Weather seasonable. Prospects of *aahani* paddy fair, but more rain wanted. Sugarcane and other standing crops doing well. Fodder and water sufficient. Rare cases of cattle-disease in Madhipura. Common rice sells as follows:—

		Srs.	c.	
Sadar	.....	11	6	per rupee.
Banka	.....	11	14	
Madhipura	.....	14	0	
Supaul	.....	14	0	

Purnea.—No rain. Prospects of *aghani* paddy promising. Standing crops doing well Cattle disease reported from thana Raniganj. Fodder and water sufficient. Common rice sells at 11 seers per rupee.

Cuttack.—Rainfall at Sadar 1·22. Weather very hot. *Laghu* rice ripening. *Beal* rice being reaped. *Sarad* rice still being transplanted. *Rabi* crops being sown. *Laghu* and *sarad* crops are being injured by insects. Condition of cattle generally good. Fodder sufficient. Common rice sells as follows:—

	Srs.	c.	
Cuttack	15	12	per rupee.
Jajpur	17	1	
Kendrapara	18	6	
Banki	22	13	

Hazaribagh.—No rain. Prospects of crops fair. Rice sells from 8 to 11 seers per rupee.

General Summary.—There was general rain in Orissa and over a great part of Bengal during the week. In Bihar no rain fell except a light shower at Darbhanga. The prospects of the winter rice crop continue generally fair, but in Bihar and in Midnapur, Khulna, and Pabna more rain is urgently required, especially for high lands. In Cuttack the winter rice is being injured by insects. Early rice and jute are still being harvested in some districts. Sugarcane is doing well. The preparation of lands for the *rabi* sowings is in progress. No cattle-disease is reported except from two thanas in Midnapore and one thana in Purnea and a few cases in Bhagalpur. Prices continue generally high. In Bihar they are reported to be rising rapidly owing to heavy exports up-country.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT, M. FINUCANE,

The 6th October, 1896. *Offg. Secy. to the Govt. of Bengal.*

M. FINUCANE,

Offg. Secretary to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of September 1896.

	Inches.	Date.	Hour.
The mean pressure of the month	29·693		
The average pressure of September from 24 years' registers ...	29·672		
The highest pressure in the month	29·949	29th	10
The lowest pressure in the month	29·499	14th	16
The range of pressure	0·450		
	Hours.		
The total number of hours of bright sunshine during the month	103·9		
The maximum possible number of hours of sunshine ...	367·0		
	°		
The mean temperature of the month	83·2		
The average temperature of September from 24 years' registers	83·3		
The highest temperature in the month	93·0	10th	
The lowest temperature in the month	74·9	28th	
The range of temperature during the month	18·1		
The mean daily range of temperature	10·5		
The greatest range of temperature in one day	15·2	3rd	
	Per cent.		
The mean humidity of the month	87		
The average humidity of September from 24 years' registers ...	85		
	Inches.		
The mean vapour tension of the month	0·982		
The average vapour tension of September from 9 years' registers	0·937		
The mean cloud proportion of the month ...	7·50		
The average cloud proportion of September from 19 years' registers	6·95		
	Inches.		
The total rainfall of the month	9·05		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	8·48		
The average fall of September from 48 years' registers ...	10·18		
The greatest fall in 24 hours	1·67	1st & 17th	
	Days.		
The number of rainy days in the month	17		
The average number of rainy days in September from 24 years' registers	21		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	144·5		
The mean difference of sun and air temperatures	56·2		
The greatest sun temperature	156·5	10th	
The greatest excess of sun over air temperature	66·0	29th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	7·54		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	2·6		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	5·1	25th	
	Miles.		
The mean movement of the wind per day	71·8		
The greatest movement of the wind in one day	196·0	15th	
The greatest movement of the wind in one hour	12·0	14th, 10 to 11 A.M. and 18th 9 to 10 A.M. and 11 to Noon.	

The number of hours with winds from each of the 8 points—
N. 40, N.E. 27, E. 41, S.E. 83, S. 60, S.W. 175, W. 164, N.W. 43, Calm 87.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about equal; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

J. H. GILLILAND,

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 5th October 1896.

Abstract of the Results of the Barometric and Thermometric Observations taken at 10 a.m. at the Meteorological Office, Chowringhee, in the month of September 1896.

The total fall from 1st January to 3rd October 1896	53·17
The average fall of the corresponding period for 24 years, Surveyor-General's Office	59·46

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; t, thunder; ≺, lightning.
lr. lightning reflection; p, passing temporary showers; ⌓ dew.

No. 965A.D.—The 10th October 1896.—The order of the 15th September 1896, granting privilege leave for one month and twenty-one days to the Hon'ble Mr. H. H. Risley, C.I.E., Secretary to the Government of Bengal, Financial and Municipal Departments, is cancelled.

No. 977A.D.—The 10th October 1896.—Babu Ganga Charan Chatterji, Deputy Collector, employed on the work of acquiring lands required for the Mugulsarai-Gaya Railway, is vested with the powers of a Collector under Act I of 1894 in the district of Shahabad.

No. 1034A.D.—The 10th October 1896.—Babu Jyotish Chunder Sen, Officiating Deputy Magistrate and Deputy Collector, Madaripur, Faridpur, is transferred to the head-quarters station of the district of Tippera.

No. 1037A.D.—The 10th October 1896.—Babu Khetter Mohun Mitter, Deputy Magistrate and Deputy Collector, Gaya, is transferred to the head-quarters station of the district of Midnapore.

No. 1039A.D.—The 10th October 1896.—Babu Manasa Ranjan Sen, Officiating Deputy Magistrate and Deputy Collector, Burdwan, is transferred to the head-quarters station of the district of Midnapore.

No. 1042A.D.—The 10th October 1896.—Maulvi Abdul Huq, Officiating Deputy Magistrate and Deputy Collector, Malda, is transferred to the head-quarters station of the district of Hooghly.

No. 1045A.D.—The 10th October 1896.—Maulvi Abdus Salam, Deputy Magistrate and Deputy Collector, Howrah, is appointed to have charge of the Brahmanbaria subdivision of the district of Tippera.

No. 1047A.D.—The 10th October 1896.—Babu Sant Prasad, Deputy Magistrate and Deputy Collector, on furlough, is posted to the head-quarters station of the district of Muzaffarpur.

No. 1049A.D.—The 10th October 1896.—Babu Jadu Nath Sarkar, Deputy Magistrate and Deputy Collector, Manbhum, is transferred to the head-quarters station of the district of Purnea.

No. 1051A.D.—The 10th October 1896.—Babu Bhobotosh Banerjee, Deputy Magistrate and Deputy Collector, Puri, is transferred to the head-quarters station of the district of Cuttack.

No. 1053A.D.—The 10th October 1896.—Babu Kali Das Mookerjee, Officiating Deputy Magistrate and Deputy Collector, Sirajganj, Pabna, is transferred to the head-quarters station of the district of Puri.

No. 1056A.D.—The 10th October 1896.—Babu Baroda Das Bose, Officiating Deputy Magistrate and Deputy Collector, Murshidabad, is transferred to the head-quarters station of the district of Howrah.

No. 1059A.D.—The 10th October 1896.—Babu Murali Dhar Ray Chaudhuri, Officiating Deputy Magistrate and Deputy Collector, Bankura, is transferred to the head-quarters station of the district of Jalpaiguri.

No. 1062A.D.—The 10th October 1896.—Babu Hara Chandra Ghosh, Officiating Deputy Magistrate and Deputy Collector, on leave, is posted to the head-quarters station of the district of Pabna.

No. 1065A.D.—The 10th October 1896.—Babu Bipin Bihari Pramanik, Deputy Magistrate and Deputy Collector, on leave, is posted to the Sirajganj subdivision of the district of Pabna.

No. 1067A.D.—The 10th October 1896.—Babu Hem Chandra Chatterjee, Officiating Deputy Magistrate and Deputy Collector, Dacca, is transferred to the head-quarters station of the district of Faridpur.

No. 1070A.D.—The 10th October 1896.—Babu Raghu Nath Sahai, Deputy Magistrate and Deputy Collector, Saran, is transferred to the head-quarters station of the district of Gaya.

No. 1072A.D.—The 10th October 1896.—Babu Satyendra Nath Das, Officiating Deputy Magistrate and Deputy Collector, Bhagalpur, is transferred to the head-quarters station of the district of Malda.

No. 1079A.D.—The 10th October 1896.—Babu Rajkishore Das, substantive *pro tempore* Deputy Magistrate and Deputy Collector, Jajpur, Cuttack, is appointed to have charge of the Bhadrak subdivision of the district of Balasore, on being relieved of his present appointment.

No. 1082A.D.—The 10th October 1896.—Babu Bhabataran Chatterjea, Deputy Magistrate and Deputy Collector, is posted to the head-quarters station of the district of Balasore, on being relieved of his present settlement duty.

No. 1085A.D.—The 10th October 1896.—Babu Hari Bhusan De, Officiating Deputy Magistrate and Deputy Collector, Dacca, is transferred to the Madaripur subdivision of the district of Faridpur.

No. 984A.D.—The 12th October 1896.—Mr. H. Luson, Magistrate and Collector, on furlough, is appointed to act, until further orders, as Deputy Commissioner of Manbhum.

This cancels the order of the 11th September 1896, appointing Mr. H. D. deM. Carey, Officiating Joint-Magistrate and Deputy Collector, to act as Deputy Commissioner of Manbhum and in the third grade of Magistrates and Collectors.

No. 987A.D.—The 12th October 1896.—Mr. A. Earle, Magistrate and Collector, on furlough, is appointed to act as Magistrate and Collector of Saran, during the absence, on deputation, of Mr. F. A. Slack, or until further orders.

No. 989A.D.—The 12th October 1896.—Mr. W. H. Lee, Joint-Magistrate and Deputy Collector, is appointed to act, until further orders, as Magistrate and Collector of Puri, on being relieved of his present appointment as Officiating District and Sessions Judge of Mymensingh by Mr. R. H. Anderson.

No. 991A.D.—The 12th October 1896.—The Hon'ble Mr. J. Pratt, who has, under the orders of the 7th October 1896, been appointed to be District and Sessions Judge of the 24-Parganas, is empowered to perform the functions of a principal Civil Court of original jurisdiction, under section 3, clause (*d*) of Act I of 1894, within the limits of Calcutta.

No. 993A.D.—The 12th October 1896.—Babu Annadaprasada Basu, Deputy Magistrate and Deputy Collector, Nadia, is appointed to be Second Personal Assistant to the Commissioner of the Presidency Division.

No. 1015A.D.—The 12th October 1896.—Mr. Birendra Chandra Sen, Officiating Joint-Magistrate and Deputy Collector, is allowed leave for two months and three weeks, under article 291 of the Civil Service Regulations, with effect from the 24th August 1896.

No. 1018A.D.—The 12th October 1896.—Maulvi Mohummud Abdullah, Deputy Magistrate and Deputy Collector, is appointed to have charge of the Kushtia subdivision of the district of Nadia, with effect from the 24th August 1896.

No. 1089A.D.—The 12th October 1896.—Babu Chaturbhuj Patnaik, Uriya Translator to Government, is allowed leave for two months, under article 291 of the Civil Service Regulations, with effect from the date on which he may avail himself of it.

No. 1091A.D.—The 12th October 1896.—Babu J. Sampson Rout is appointed to act as Uriya Translator to Government during the absence, on leave, of Babu Chaturbhuj Patnaik, or until further orders.

No. 1103A.D.—The 12th October 1896.—Maulvi Mahomed Eskandar Ali, Officiating Deputy Magistrate and Deputy Collector, Tippera, is transferred to the head-quarters station of the district of Dacca.

No. 1106A.D.—The 12th October 1896.—Mr. H. D. deM. Carey, Officiating Joint-Magistrate and Deputy Collector, is posted to the head-quarters station of the district of Cuttack.

No. 1108A.D.—The 12th October 1896.—Mr. J. W. Minden Augier, Officiating Deputy Magistrate and Deputy Collector, Monghyr, is transferred to the head-quarters station of the district of Cuttack.

POLICE.—*No. 1095A.D.—The 12th October 1896.*—Colonel H. M. Ramsay, District Superintendent of Police, on leave, is posted to Muzaffarpur.

No. 1097A.D.—The 12th October 1896.—Mr. A. B. Barnard, District Superintendent of Police, Muzaffarpur, is transferred to Burdwan.

No. 1099A.D.—The 12th October 1896.—Mr. W. Y. Reily, Assistant Superintendent of Police, is posted to Burdwan, on being relieved of his present appointment as Officiating District Superintendent of Police of that district.

No. 1101A.D.—The 12th October 1896.—Mr. J. V. Ryan, Assistant Superintendent of Police, is posted to Gaya, on being relieved of his present appointment as Officiating District Superintendent of Police, Shahabad.

REGISTRATION.—*No. 1093A.D.—The 12th October 1896.*—Maulvi Syed Muhommad Hussain, Special Sub-Registrar of Backergunge, is allowed leave up to the afternoon of the 21st August 1896, under article 369 of the Civil Service Regulations, in extension of the leave granted to him under the order of the 13th May 1896.

EDUCATION.—*No. 5793A.—The 13th October 1896.*—Mr. F. J. Rowe, Professor, Presidency College, is allowed furlough for three months, under article 343 of the Civil Service Regulations, with effect from the 4th October 1896.

The following notifications are republished from the *Assam Gazette*:—

GENERAL.—*No. 6384G.—The 28th September 1896.*—The following is published—

The undermentioned officer has been granted by Her Majesty's Secretary of State for India permission to return to duty, as advised in list dated the 28th August 1896:

Name.	Service.	Appointment.	Date on which permitted to return.
Mr. E. C. S. Baker	...	District Superintendent of Police, Assam.	... Within period of leave.

No. 6438G.—The 1st October 1896.—With effect from the 31st August 1896, in consequence of the return from privilege leave of Captain A. A. Howell, I.S.C., Officiating Deputy Commissioner, third grade,—

Mr. A. G. Hallifax, I.C.S., Officiating Deputy Commissioner, third grade, to officiate as Deputy Commissioner, fourth grade.

No. 6526G.—The 2nd October 1896.—Under the provisions of section 22 of the Code of Criminal Procedure (Act X of 1882), the Chief Commissioner appoints Mr. G. Balthasar, I.C.S., Assistant Commissioner, to be a Justice of the Peace within the Province of Assam.

No. 4191J.—The 1st October 1896.—Under the provisions of section 7(1) of the Civil Courts Act, XII of 1887, Babu Nilalohit Mukharji, Munsif of Bangaon, in the district of Jessore, whose services have been placed at the disposal of the Chief Commissioner by Bengal Government Notification No. 5522A., dated the 14th September 1896, is appointed to be a Munsif in the district of Sylhet, to be stationed ordinarily at the Sadar station of that district.

No. 4192J.—The 1st October 1896.—Under the provisions of section 25 of Act XII of 1887 (The Civil Courts Act), the Chief Commissioner confers upon Babu Nilalohit Mukharji, Munsif of the Sadar station of Sylhet, the jurisdiction of a Judge of a Court of Small Causes for the trial of suits cognizable by such Court up to the value of Rs. 100 within the limits of the Sadar station of Sylhet.

No. 4193J.—The 1st October 1896.—Under the provisions of section 7 (1) of the Civil Courts Act, XII of 1887, Babu Annada Kumar Sen, Munsif of Bagerhat, in the district of Jessore, whose services have been placed at the disposal of the Chief Commissioner by Bengal Government Notification No. 5590A, dated the 14th September 1896, is appointed to be an Additional Munsif in the district of Sylhet, to be on deputation to Habiganj.

No. 4194J.—The 1st October 1896.—Under the provisions of section 7 (1) of the Civil Courts Act, XII of 1887, Babu Kali Krishna Chaudhuri, Munsif of Atia, in the district of Mymensingh, whose services have been placed at the disposal of the Chief Commissioner by Bengal Government Notification No. 5527A, dated the 14th September 1896, is appointed to be a Munsif in the district of Sylhet, to be stationed ordinarily at Maulvi Bazar.

No. 4195J.—The 1st October 1896.—Under the provisions of section 25 of Act XII of 1887 (The Civil Courts Act), the Chief Commissioner confers upon Babu Kali Krishna Chaudhuri, Munsif of Maulvi Bazar, the jurisdiction of a Judge of a Court of Small Causes for the trial of suits cognizable by such a Court up to the value of Rs. 100 within the limits of the Maulvi Bazar Munsifi.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION—No. 982A.D.

The 10th October 1896.—With reference to the notification of this Government, dated the 14th July 1896, it is hereby notified that the examination of candidates for recruiting the staff of the superior Police Officers in Bengal and Assam will be held at the Bengal Secretariat, Writers' Buildings, Calcutta, on the dates and at the hours mentioned below:—

14th December 1896.		15th December 1896.		16th December 1896.		17th December 1896.		18th December 1896.	
10-30 A.M. to 1 P.M.	1-30 P.M. to 4 P.M.	10-30 A.M. to 1 P.M.	1-30 P.M. to 4 P.M.	10-30 A.M. to 1 P.M.	1-30 P.M. to 4 P.M.	10-30 A.M. to 1 P.M.	1-30 P.M. to 4 P.M.	10-30 A.M. to 1 P.M.	1-30 P.M. to 4 P.M.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT,—(FORESTS.)

NOTIFICATION—No. 4051For.

The 13th October 1896.—In exercise of the power conferred by section 31 of the Indian Forest Act (VII of 1878) and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to order that for the words "Wax and Honey—one rupee per maund," in Rule I (*a*) of the rules framed under sections 31 and 41 of the said Act for the Sundarbans Protected Forests, in notification No. 1397-For., dated the 12th April 1892, published at page 403, Part I of the *Calcutta Gazette* of the 13th idem, the following words shall be substituted :—

Wax.—Two rupees per maund.
Honey.—One rupee per maund.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT,—(OPIUM).

NOTIFICATION—No. 4056-O.

The 13th October 1896.—The privilege leave for one month granted to Mr. L. S. Graham, Assistant Sub-Deputy Opium Agent in the Benares Agency, under notification No. 3479O., dated the 27th August 1896, published at page 897, Part I of the *Calcutta Gazette* of 2nd September 1896, is hereby cancelled.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT,—(LAND REVENUE).

NOTIFICATION—No. 4035L.R.

The 10th October 1896.—Declaration No. 2196L.R., dated the 4th May 1896, published in the *Calcutta Gazette* of the 6th idem, for the purpose of acquiring a piece of land for the post-office at Deganga, in the district of 24-Parganas, is hereby cancelled.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal

NOTIFICATION—No. 4049L.R.

The 12th October 1896.—The following officers are vested with the powers of Assistant Settlement Officers under Rule 1, Chapter VI of the Rules under the Bengal Tenancy Act VIII of 1885 :—

1. Maulvi Muhammad Yusuf Ali, Officiating Deputy Magistrate and Deputy Collector.
2. Mr. Rowland Nagendra Lal Chandra, Officiating Deputy Magistrate and Deputy Collector.
3. Maulvi Ashfaq Hossein, Officiating Deputy Magistrate and Deputy Collector.
4. Babu Hem Chunder Chatterji, Officiating Deputy Magistrate and Deputy Collector.
5. „ Probodh Chunder Chatterji, Officiating Deputy Magistrate and Deputy Collector.
6. „ Akhouri Brahmadeva Narayan Sinha, Probationary Deputy Collector.
7. „ Burmeshwar Prosad, Sub-Deputy Collector.
8. „ Suresh Chandra Chuckerbutty, substantive *pro tempore* Sub-Deputy Collector.
9. „ Nilmony Dey, Probationary Sub-Deputy Collector.
10. „ Bhavani Prasada, Probationary Sub-Deputy Collector.
11. Mr. J. W. Engelbregt, substantive *pro tempore* Sub-Deputy Collector.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No. 4050L.R.

The 13th October 1896.—Under section 8 (17) of the Bengal Tenancy Act, Mr. J. G. Cumming, C.S., is authorized to discharge the functions of a Revenue Officer, under the provisions of that Act, so far as they relate to Revenue Officers, and is vested with the powers of a Settlement Officer, under Rule 1, Chapter VI of the Rules under the said Act, for the purpose of making a survey and record of rights in respect of the lands appertaining to the village Rajapur, pargana Lohagar, in the district of Tippera.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No. 4055L.R.

The 13th October 1896.—The following clause is added to Executive Instruction 5 in Chapter III of the Rules, Executive Instructions and Forms under the Land Records Mantenance Act, III (B.C.) of 1895, published with Government Notification No. 5306L.R., dated the 9th December 1895, in Part I of the *Calcutta Gazette* of the 11th idem :—

"For the purposes of this calculation the rule as to miscellaneous operations, given in Rule 232(6), at page 62 of the Manual of Rules under the Indian Registration Act, III of 1877, shall apply."

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

SURVEY OF INDIA DEPARTMENT.

BENGAL SURVEYS.

NOTIFICATION No. 2.

Dated 28th September 1896.

BABU NILMONI CHATTERJI, Sub-Assistant Superintendent, Survey of India, is allowed privilege leave for one month, under article 291 of the Civil Service Regulations, with effect from the forenoon of the 11th instant.

R. CRICHTON, *Captain*, R.E.,
Superintendent of Settlement-Surveys, Bengal.

GENERAL DEPARTMENT,—(ECCLESIASTICAL).

NOTIFICATION—No. 3227.

The 10th October 1896.—In exercise of the powers vested in him by section 8 of the Calcutta Burial Board's Act V (B.C.) of 1881, the Lieutenant-Governor is pleased to sanction the addition of the following rule to Chapter III of the Revised Rules for the Christian Burial Board :—

5A. No screen or other erection, allowed to be erected on any grave space, shall exceed 3½ feet in height above the ground.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

JUDICIAL DEPARTMENT.

No. 5801A.

No. 5750A.—The 24th September 1896.—Babu Gopal Chandra Bose, Subordinate Judge of Tippera, is allowed leave for one month, under article 306 (*b*) of the Civil Service Regulations, with effect from the 16th November 1896, or any subsequent date on which he may be relieved.

No. 951A.D.—The 9th October 1896.—Babu Syam Chand Dhur, Subordinate Judge and Assistant Sessions Judge, Mymensingh, is transferred temporarily to Tippera.

Nos. 1020A.D., 1022A.D., 1024A.D., 1026A.D., 1028A.D., 1030A.D., 1032A.D.—The 9th October 1896.—The undermentioned officers are vested with the powers of a Magistrate of the third class :—

Babu Hem Chandra Chatterjee, Officiating Deputy Magistrate, Dacca.
" Manasa Ranjan Sen, Officiating Deputy Magistrate, Burdwan.
" Murali Dhar Ray Chaudhuri, Officiating Deputy Magistrate, Bankura.
" Satyendra Nath Das, Officiating Deputy Magistrate, Bhagalpur.
Akhouri Brahmadeva Narayan Sinha, Officiating Deputy Magistrate, Shahabad.
Maulvi Mahomed Eskandar Ali, Officiating Deputy Magistrate, Tippera.
Mr. A. J. Ollenback, Officiating Deputy Magistrate, Patna.

No. 980A.D.—The 10th October 1896.—Babu Surbesur Mozumdar, Officiating Subordinate Judge of Dinajpur, is vested with the powers of a Judge of a Court of Small Causes for the trial of suits cognizable by such a Court up to the value of Rs. 500, and also with the

powers of a Munsif for the trial of suits cognizable by a Court of the first instance up to the value of Rs. 1,000, within the local limits of the Sadar Munsifi of Dinajpur, during the absence, on deputation, of the permanent incumbent, or until further orders.

No. 1082A.D.—The 10th October 1896.—Babu Bhabataran Chatterjee, Deputy Magistrate, who has, under the order of this date, been posted to the head-quarters station of the district of Balasore, is vested with the powers of a Magistrate of the second class.

No. 336J.D.—The 6th October 1896.—Babu Jogendra Chandra Roy is appointed to be an Honorary Magistrate of the Independent Bench at Katwa, in the district of Burdwan, and is vested with the powers of a Magistrate of the third class.

No. 372J.D.—The 7th October 1896.—The Lieutenant-Governor accepts the resignation tendered by Babu Prem Lal Das of his appointment as an Honorary Magistrate of the Madhipura Independent Bench in the district of Bhagalpur.

No. 377J.D.—The 7th October 1896.—Maulavi Khandker Muhammad Ali is appointed to be an Honorary Magistrate of the Independent Bench at Sherpur, in the district of Mymensingh, and is vested with the powers of a Magistrate of the third class.

Under the authority vested in him by the final clause of section 357 of the Code of Criminal Procedure, Act X of 1882, the Lieutenant-Governor empowers Maulavi Khandker Muhammad Ali to take down evidence in criminal cases in the English language.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION—No. 369J.D.

The 7th October 1896.—Under the power conferred by section 3, Regulation III of 1872 (the Sonthal Parganas Settlement Regulation), as amended by Regulation III of 1886 (the Sonthal Parganas Laws Regulation), the Lieutenant-Governor directs that the following Acts shall have force and effect in the Sonthal Parganas :—

Acts of the Governor-General of India in Council.

Act VIII of 1894 (an Act to amend the law relating to Customs duties, and for other purposes).
Act I of 1896 (an Act to amend the Indian Emigration Act, 1883).
„ V of 1896 (an Act to amend the Foreign Jurisdiction and Extradition Act, 1879).
„ VI of 1896 (an Act to amend the Indian Penal Code).
„ IX of 1896 (an Act to amend the Indian Railways Act, 1890).
„ X of 1896 (an Act to amend the Indian Volunteers Act, 1869).
„ XIII of 1896 (an Act to amend the Criminal Procedure Code, 1882).

Act of the Lieutenant-Governor of Bengal in Council.

Act V (B.C.) of 1895. (Lepers' Act).

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATION—No. 424J.D

Jalapahar Cantonment Boundary Pillars.

The 10th October 1896.—The description published in *Calcutta Gazette*, dated 6th August 1877, to be altered as described below between pillars No. 12 to No. 14, consequent on No. 13 pillar being removed to a new position :—

Number of pillar.	Description of pillar.	Distance in feet.	Bearing.		Remarks.
			Degrees.	Minutes.	
1	2	3	4	5	6
12	In the ravine between Eagle's Nest Barrack and the house known as "Point Clear," distance and bearing to next pillar (No. 13).	131	302°		
13	In the same ravine as No. 12, on left bank of the stream, distance and bearing to next pillar (No. 14).	370	320°		

NOTE.—The above distances are measured along the slope of the ground, and are not horizontal as shown on plan.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION—No. 318J.D.

The 3rd October 1896.—The following rules made by the Lieutenant-Governor under the power vested in him by section 4 of Act III (B.C.) of 1879 for the information and guidance of the Inspectors of Steam-boilers and Prime-movers making inspections under the Act are hereby published for general information:—

Iron Boilers.

The Inspector to fix pressure on safety valves.

1. The Inspector is required by the Act to fix the pressure to be allowed on boilers. In performing this very responsible and onerous duty he must be very careful, as in the event of accident it will be necessary for him to prove clearly that he used due caution. On the one hand he must be careful as regards safety, and on the other hand he must not unduly reduce the pressure on a boiler.

The Inspector himself having fixed the limits of the weight, is then required to declare that in his judgment the boiler and machinery are sufficient for the service intended and in good condition, and that they will be sufficient for twelve months or such other period as he may, in his judgment, determine. For his guidance, the following directions are given, and he should not depart from them in any case, without first reporting particulars to the Commissioners, and asking for instructions.

Working pressure to be fixed by calculations.

2. The Inspector should fix the working pressure for boilers by a series of calculations of the strength of the various parts, and according to the workmanship and material.

And in the event of any novelty in construction, or of any departure from the practice of staying and strengthening noted in these Instructions, he should report full particulars to the Commissioners before fixing the working pressure.

In the case of boilers made in India, the Boiler Inspection Department may receive for examination plans and particulars of boilers before the commencement of manufacture, by these means hoping to prevent questions arising after the boilers are finished.

No Inspector shall declare a boiler to be safe unless he is fully informed as to its construction, material, and workmanship. He should therefore be very careful how he ventures to give a certificate.

Respecting stays.

3. In the case of new boilers the Inspector may allow a stress not exceeding 7,000 lbs. per square inch of net section on solid iron screwed stays supporting flat surfaces, but the stress should not exceed 5,000 lbs. when the stays have been welded or worked in the fire.

The areas of diagonal stays are found in the following way: Find the area of a direct stay needed to support the surface, multiply this area by the length of the diagonal stay, and divide the product by the length of a line drawn at right angles to the surface supported to the end of the diagonal stay; the quotient will be the area of the diagonal stay required.

When gusset stays are used, their area should be in excess of that found in the above way.

Girders for flat surfaces.

4. When the tops of combustion boxes or other parts of a boiler are supported by solid rectangular girders the following formula should be used for finding the working pressure to be allowed on the girders, assuming that they are not subjected to a greater temperature than the ordinary heat of steam, and in the case of combustion chambers that the ends are fitted to the edges of the tube plate and the back plate of the combustion box.

$$\frac{C \times d^2 \times T}{(W - P)\, D \times L} = \text{Working pressure.}$$

W = Width of combustion box in inches.
P = Pitch of supporting bolts in inches.
D = Distance between the girders from centre to centre in inches.
L = Length of girder in feet.
d = Depth of girder in inches.
T = Thickness of girder in inches.
N = Number of supporting bolts.

$C = \frac{N \times 1{,}000}{N+1}$ when number of bolts is odd.

$C = \frac{(N+1)\ 1{,}000}{N+2}$ when number of bolts is even.

The working pressure for the supporting bolts and for the plate between them should be determined by the rule for ordinary stays.

Flat surfaces of boilers.

5. The pressure on plates forming flat surfaces is found by the following formula

$$\frac{C \times (T+1)^2}{S - 6} = \text{Working Pressure.}$$

T = Thickness of the plate in sixteenths of an inch.
S = Surface supported in square inches.
C = Constant according to the following circumstances.

C = 100 when the plates are not exposed to the impact of heat or flame, and the stays are fitted with nuts and washers, the latter being at least three times the diameter of the stay and two-thirds the thickness of the plates they cover.*

C = 90 when the plates are not exposed to the impact of heat or flame, and the stays are fitted with nuts only.

C = 60 when the plates are exposed to the impact of heat or flame, and steam in contact with the plates, and the stays fitted with nuts and washers, the latter being at least three times the diameter of the stay and two-thirds the thickness of the plates they cover.

C = 54 when the plates are exposed to the impact of heat or flame, and steam in contact with the plates, and the stays fitted with nuts only.

C = 80 when the plates are exposed to the impact of heat or flame, with water in contact with the plates, and the stays screwed into the plates and fitted with nuts.

C = 60 when the plates are exposed to the impact of heat or flame, with water in contact with the plates, and the stays screwed into the plates, having the ends riveted over to form substantial heads.

C = 36 when the plates are exposed to the impact of heat or flame, and steam in contact with the plates, with the stays screwed into the plates, and having the ends riveted over to form substantial heads.

In cases where plates are stiffened by T or L irons, and a greater pressure is required for the plates than is allowed by the use of the above

* If the diameter of riveted washers be at least ⅓rds the pitch of the stays, and the thickness not less than the plates they cover, the constant may be increased to 150.

When doubling plates are fitted of the same thickness as the plates they cover, and not less in width than ⅓rds the pitch of the stays, the constant may be increased to 160.

When doubling plates cover the whole of the flat surface the case should be submitted for the consideration of the Com-

constants, the case should be submitted for the consideration of the Commissioners.

When a circular flat end is bolted or riveted to a cylindrical shell, S in the formula may be taken as the area of the square inscribed in the circle passing through the centres of the bolts or rivets securing the end, provided the angle iron or flange is of sufficient thickness.

When the riveted ends of screwed stays are much worn or when the nuts are burned, the constants should be reduced, but the Inspector must act according to the circumstances that present themselves at the time of inspection, and it is expected that in cases where the riveted ends of screwed stays in the combustion boxes and furnaces are found in this state it will be often necessary to reduce the constant 60 to about 36.

Compressive stress on the tube plates.

The Inspector should not in any case allow a greater compressive stress on the tube plates than 8,000 lbs. per square inch, which is that used in the following formula :—

$$\frac{(D-d)\,T \times 16{,}000}{W \times D} = \text{Working pressure.}$$

D = least horizontal distance between centres of tubes in inches.
d = inside diameter of ordinary tubes in inches.
T = thickness of tube plate in inches.
W = extreme width of combustion box in inches from front of tube plate to back of fire-box, or distance between combustion box tube plates when boiler is double ended and the box common to the furnaces at both ends.

Boilers set in brickwork.

6. Having regard to many cases in which serious defects have been discovered, the Inspector should take care that boilers, the outside of which cannot be seen, are cleared of all covering and fittings for inspection whenever the Inspector considers it necessary. It will often be found necessary to reduce the pressure, unless the boilers are partially cleared from their seats to enable the Inspector to judge of their condition. If the owners in any special case have any good reasons for not wishing to clear them when the Inspector requires it, the Inspector should submit the whole of the case in detail to the Commissioners for their consideration. The Inspector must recollect that he is not to certify as sufficient any boiler respecting which he cannot thoroughly satisfy himself.

The Inspector should record in his inspection book the dates on which boilers are inspected, when and to what extent cleared from brickwork, and whether the boilers were set or not when examined, and if not set, where they were examined. Boilers which have been cleared should in all cases be subjected to the hydraulic test before the brickwork is rebuilt.

Cylindrical boilers.

7. Boilers well constructed, well designed, and made of good material should have an advantage in the matter of working pressure over boilers inferior in any of the above respects, as unless this is done the superior boiler is placed at a disadvantage, and good workmanship and material will be discouraged. The following rules are therefore prescribed.

When cylindrical boilers are made of the best material with all the rivet holes drilled in place and all the seams fitted with double butt straps, each of at least five-eighths the thickness of the plates they cover, and all the seams at least double riveted with rivets having an allowance of not more than 75 per cent. over the single shear and provided that the boilers have been open to inspection during the whole period of construction, then 5 may be used as the factor of safety. The tensile strength of the iron is to be taken as equal to 47,000 lbs. per square inch with the grain, and 40,000 lbs. across the grain. But when the above conditions are not complied with, the additions in the following scale must be added to the factor 5, according to the circumstances of each case :—* *

A†	·15	To be added when all the holes are fair and good in the longitudinal seams, but drilled out of place after bending.
B†	·3	To be added when all the holes are fair and good in the longitudinal seams, but drilled out of place before bending.
C.	·3	To be added when all the holes are fair and good in the longitudinal seams, but punched after bending instead of drilled.
D.	·6	To be added when all the holes are fair and good in the longitudinal seams, but punched before bending.
E*	·75	To be added when all the holes are not fair and good in the longitudinal seams.
F.	·1	To be added if the holes are all fair and good in the circumferential seams, but drilled out of place after bending.
G†	·15	To be added if the holes are fair and good in the circumferential seams, but drilled before bending.
H.	·15	To be added if the holes are fair and good in the circumferential seams, but punched after bending.
I†	·2	To be added if the holes are fair and good in the circumferential seams, but punched before bending.
J*	·2	To be added if the holes are not fair and good in the circumferential seams.
K	·2	To be added if double butt straps are not fitted to the longitudinal seams, and the said seams are lap and double riveted.
L	·1	To be added if double butt straps are not fitted to the longitudinal seams, and the said seams are lap and treble riveted.
M	·3	To be added if only single butt straps are fitted to the longitudinal seams, and the said seams are double riveted.
N	·15	To be added if only single butt straps are fitted to the longitudinal seams, and the said seams are treble riveted.
O	1·0	To be added when any description of joint in the longitudinal seams is single riveted.
P	·1	To be added if the circumferential seams are fitted with single butt straps and are double riveted.
Q	·2	To be added if the circumferential seams are fitted with single butt straps and are single riveted.
R	·1	To be added if the circumferential seams are fitted with double butt straps and are single riveted.
S‡	·1	To be added if the circumferential seams are lap joints and are double riveted.
T	·2	To be added if the circumferential seams are lap joints and are single riveted.
U	·25	To be added when the circumferential seams are lap, and the strakes of plates are not entirely under or over.

* * If the iron be tested and the elongation measured in a length of 10 inches is not less than 14 per cent. with, and 8 per cent. across the grain, and the inspectors otherwise satisfied as to quality of the plates and rivets, then 4·5 may be used instead of 5, and the minimum actual tensile strength of the plates used in calculating the working pressure.

V‡	·3	To be added when the boiler is of such a length as to fire from both ends, or is of unusual length, as in the case of flue boilers; and the circumferential seams fitted as described opposite P, R, and S, but of course when the circumferential seams are as described opposite Q and T, V ·3 will become V ·4.
W*	·4	To be added if the seams are not properly crossed.
X*	·4	To be added when the iron is in any way doubtful, and the Inspector is not satisfied that it is of the best quality.
Y††	1·65	To be added if the boiler was not open to inspection during the whole period of its construction.

Where marked* the factor of safety should be increased still further if the workmanship or material is very doubtful or is very unsatisfactory.

† When the holes are to be rimered, or bored out in place, the case should be submitted to the Commissioners as to the reduction or omission of A, B, G, and I as heretofore.

‡ When the middle circumferential seams are double strapped and double riveted or lap and treble riveted, and the calculated strength not less than 65 per cent. of the solid plate S, ·1 and V, ·3 may be omitted. The end circumferential seams in such cases should be at least double riveted.

†† When inspecting boilers that have not been open to inspection during construction, the case should be submitted to the Commissioners as to the factors to be used.

In any special case, a report should be forwarded to the Commissioners.

The strength of ordinary joints is found by the following method:

$$\frac{(\text{Pitch} - \text{Diameter of rivet}) \times 100}{\text{Pitch}} = \left\{\begin{array}{l}\text{Percentage of strength of plate at joint as compared with the solid plate.}\end{array}\right.$$

$$\frac{(\text{Area of rivet} \times \text{No. of rows of rivets}) \times 100}{\text{Pitch} \times \text{thickness of plate}} \left\{\begin{array}{l}\text{Percentage of strength of rivets as compared with the solid plate.*}\end{array}\right.$$

Then take iron as equal to 47,000 lbs.† per square inch and use the smaller of the two percentages as the strength of the joint, and adopt the factor of safety as found from the preceding scale.

(47,000 † × percentage of strength of joint) × twice the thickness of the plate in inches.

Inside diameter of the boiler in inches × factor of safety. Pressure to be allowed per square inch on the safety-valves.

In the case of ordinary zigzag riveting the strength through the plate diagonally between the rivets, is equal to that horizontally between the rivets, when diagonal pitch = $\frac{6}{10}$ horizontal pitch + $\frac{4}{10}$ diameter of rivet.

Plates that are drilled in place should be taken apart and the burr taken off and the holes slightly countersunk from the outside.

Butt straps should be cut from plates and not from bars, and should be of as good a quality as the shell plates, and for the longitudinal seams should be cut across the fibre. The rivet holes may have been punched or drilled when the plates are punched or drilled out of place, but when drilled in place should be taken apart and the burr taken off and slightly countersunk from the outside.

When single butt straps are used, they should be one-eighth thicker than the plates they cover.

The diameter of the rivets should not be less than the thickness of the plates of which the shell is made, but it will be found when the plates are thin, or when lap joints or single butt straps are adopted, that the diameter of the rivets should be in excess of the thickness of the plates.

Stays for dished ends.

Dished ends should be stayed as flat surfaces; but when they are theoretically equal to the pressure needed, when considered as portions of spheres, the stays when solid may have a stress of 14,000 lbs. per square inch of net section, but the stress should not exceed 10,000 lbs. when the stays have been welded or worked in the fire.

Hemispherical ends, man-holes, doors and domes.

Truly hemispherical ends subjected to internal pressure may be allowed double the pressure that is suitable for a cylinder of the same diameter and thickness.

All man-holes and openings should be stiffened with compensating rings of at least the same effective sectional area as the plates cut out, and in no case should the plate rings be less in thickness than the plates to which they are attached. The openings in the shells of cylindrical boilers should have their shorter axes placed longitudinally. It is very desirable that the compensating rings round openings in flat surface be made of L or T iron. Cast-iron doors should not be passed for pressures exceeding 100 lbs. per square inch; for pressures of 100 lbs. and under‡ they should work out to the following formula:—

$$\frac{C \times T^2}{L \times W} = W.\ P.$$

C = 100 for doors bolted on the outside to a faced seat.
C = 80 for doors bolted from the inside with dog bars.
T = Thickness of flange of door in $\frac{1}{16}$th inch.
L = Length of opening for door.
W = Width.
W. P. = Working Pressure.

The neutral part of boiler shells under steam domes must be efficiently stiffened and stayed, as serious accidents have arisen from the want of such precautions.

Hydraulic test.

8. New boilers are to be tested by hydraulic pressure according to the following scale, in the presence and to the satisfaction of the Inspector.

Boilers intended to work up to 100 lbs. pressure per square inch, or any pressure below that, are to be tested to double the working pressure:

Above lbs.	100	up to lbs.	125	to be tested to lbs.	200
,,	125	,,	150	,,	230
,,	150	,,	175	,,	250
	175	,,	200	,,	270
	200	,,	225	,,	290
,,	225	,,	250	,,	310
,,	250	,,	275	,,	330
,,	275	,,	300	,,	350

Any boilers intended for working pressure above these to be tested to not less than 50 lbs. above such working pressure.

In the case of old boilers the Inspector must use his own judgment as to the necessary pressure to be applied.

* If the rivets are exposed to double shear, multiply the percentage as found by 1·75.

† See note, page 2.

‡ Inspectors in passing cast iron doors should see that they are in every way sound, and that the joint faces of boiler plate and door are perfectly fair.

The Commissioners would recommend steam users, when ordering new boilers, to specify that all man-hole and mud-hole doors be made of wrought iron or steel, as cast-iron is often found unsound in section, although apparently sound on surface, and are so apt to severe fracture owing to careless fitting.

9. Circular furnaces with the longitudinal joints welded or made with a butt strap double riveted, or double butt straps single riveted :—

Circular furnaces.

$$\frac{90{,}000 \times \text{the square of the thickness of the plate in inches}}{(\text{Length in feet} + 1) \times \text{diameter in inches}}$$

= working pressure per square inch, provided it does not exceed that found by the following formula :

$$\frac{9{,}000 \times \text{thickness in inches}}{\text{diameter in inches}} = \left\{ \begin{array}{l} \text{Working pressure per square} \\ \text{inch.} \end{array} \right.$$

The second formula limits the crushing stress on the material to 4,500 lbs. per square inch.

The length is to be measured between the rings if the furnace is made with rings.

If the longitudinal joints instead of being butted are lap-jointed in the ordinary way, then 75,000 is to be used instead of 90,000, excepting only where the lap is bevelled and so made as to give the flues the form of a *true* circle, when 80,000 may be used.

When the material or the workmanship is not of the best quality, the constants given above should be reduced, that is to say, the 90,000 will become 80,000, the 80,000 will become 70,000, the 70,000 will become 60,000 ; when neither the material nor the workmanship is of the best quality, such constants will require to be further reduced, according to circumstances and the judgment of the Inspector, as in the case of old boilers. One of the conditions of best workmanship is that the joints are double riveted with single butt straps, or single riveted with double butt straps, and the holes drilled after the bending is done and when in place and the plates afterwards taken apart, the burr on the holes taken off and the holes slightly countersunk from the outside.

The following examples will serve to show the application of the constants for the different cases that may arise :

Furnaces with butt joints and drilled rivet holes.	90,000	where the longitudinal seams are welded.
	90,000	where the longitudinal seams are double riveted and fitted with single butt straps.
	80,000	where the longitudinal seams are single riveted and fitted with single butt straps.
	90,000	where the longitudinal seams are single riveted and fitted with double butt straps.
	85,000	where the longitudinal seams are double riveted and fitted with single butt straps.
Furnaces with butt joints and punched rivet holes.	75,000	where the longitudinal seams are single riveted and fitted with single butt straps
	85,000	where the longitudinal seams are single riveted and fitted with double butt straps.
Furnaces with lapped joints and drilled rivet holes.	80,000	where the longitudinal seams are double riveted and bevelled.
	70,000	where the longitudinal seams are double riveted and not bevelled.
	70,000	where the longitudinal seams are single riveted and bevelled.
	65,000	where the longitudinal seams are single riveted and not bevelled.
Furnaces with lapped joints and punched rivet holes.	75,000	where the longitudinal seams are double riveted and bevelled
	70,000	where the longitudinal seams are double riveted and not bevelled.
	65,000	where the longitudinal seams are single riveted and bevelled.
	60,000	where the longitudinal seams are single riveted and not bevelled

10. The strength of joints of cylindrical superheaters and the factors of safety are found in a similar manner as for cylindrical boilers and steam receivers, but instead of using 47,000 lbs. as the tensile strength of iron, 30,000 lbs. is adopted, unless where the heat or flame impinges at or nearly at right angles to the plate, then 22,000 lbs. is substituted.

Cylindrical superheaters.

When a superheater is constructed with a tube subject to external pressure, the working pressure should be ascertained by the rules given for circular furnaces, but the constants should be reduced as 30 to 47.

11. As the uptakes of vertical boilers and others of this type are especially liable to injury from overheating, unless careful precautions are taken while steam is being raised, the Inspector should in all cases endeavour to persuade makers and owners to make the strength of the uptakes considerably in excess of that required for ordinary superheaters subject to external pressure.

Uptakes of vertical boilers.

When flaming coal is used extra care is required and extra strength absolutely necessary.

Steel Boilers.

12. The following should guide the Commissioners' Inspectors when inspecting steel boilers.

Maker's tests.

The steel-makers or boiler-makers should test one or more strips cut from *each* plate for tensile strength and elongation, and stamp both results on a part of the plate where they can be easily seen when the boiler is constructed.

A few rivets of each size should be selected, and should be turned and tested for tensile strength. The tensile strength should be from 28 tons with a contraction of area of about 60 per cent.

Rivet tests.

The tensile strength of the plates *not* exposed to flame should be about 28 tons, and should not exceed 32 tons per square inch of section, and 28 tons should be the strength used in the calculations for cylindrical shells if the plates comply with the conditions as stated herein; but when the minimum tensile strength of shell plates exceeds 28 tons, and allowance is wished for the excess, the case should be specially submitted for the consideration of the Commissioners. The tensile strength of furnace, flanging, and combustion box plates should range from 26 tons to 30 tons per square inch.

Tensile strength, &c.

All plates that are punched, flanged, or locally heated should be carefully annealed after being so treated.

Annealing.

The rivet holes in the furnaces and longitudinal seams of cylindrical shells should be *drilled*, but if it is wished to punch them, makers should afterwards bore the plates or anneal them in a proper furnace.

Perforating and annealing.

Solid steel screwed stays which have *not* been welded or otherwise worked after heating may be allowed a working stress of 9,000 lbs. per square inch of net section, provided the tensile strength is from 28 to 32 tons per square inch, and the elongation in 10 inches about 25 per cent. and not less than 20 per cent. Steel stays which have been welded or worked in the fire have been found to be unreliable. Therefore, they should *not* be passed.

Stress on stays.

If the flanging plates and those exposed to flame comply with the foregoing conditions, the constants in the Commissioners' rules for iron boilers may be increased as follows:—

Constants for flat surfaces.

The constants for flat surfaces when they are supported by stays screwed into the plate and riveted, 10 per cent.

The constants for flat surfaces when they are supported by stays screwed into the plate and nutted, or when the stays are nutted in the steam space, 25 per cent This is also applicable to the constants for flat surfaces stiffened by riveted washers or doubling strips, and supported by nutted stays.

The constants for combustion box girders, 10 per cent.

Furnaces, plain and corrugated.

The furnace constants about 10 per cent when plain. When new, corrugated and machine made and practically true circles, the working pressure is found by the following formula, provided that the plain parts at the ends do not exceed 6 inches in length, and the plates are not less than $\frac{5}{16}$ inch thick:—

$$\frac{14{,}000 \times T}{D} = \text{Working pressure.}$$

T = Thickness in inches.
D = Mean diameter in inches.

Compressive stress on tube plates.

A greater compressive stress should not be allowed on tube plates than 10,000 lbs. per square inch, which is that used in the following formula:—

$$\frac{(D - d) \times 20{,}000}{W \times D} = \text{Working pressure.}$$

D = Least horizontal distances between centres of tubes in inches.
d = Inside diameter of tubes in inches.
T = Thickness of tube plate in inches
W = Extreme width of combustion box in inches from front of tube plate to back of fire-box, or distance between combustion-box tube plates when boiler is double ended and the box common to the furnaces at both ends.

Plate and rivet section.

The rivet section, if of iron, in the longitudinal seams of cylindrical shells where lapped and at least double riveted should not be less than $1\frac{3}{4}$ times the net plate section; but if steel rivets are used, their section should be at least $1\frac{1}{3}$ of the net section of the plate if the tensile strength of the rivets is not less than 28 tons and not more than 32 tons per square inch. Therefore, in calculating the working pressure, the percentage strength of the rivets may be found in the usual way by the Commissioners' rules, but in the case of iron rivets the percentages found should be divided by $1\frac{3}{4}$ and in the steel rivets by $1\frac{1}{3}$, the results being the percentages required. If the percentage strength of the rivets by calculation is less than the calculated percentage strength of the plate, calculate the working pressure by both percentages. When using the percentage strength of the plate, use the nominal factor of safety suitable for the method of construction as by the Commissioners' rules for iron boilers, but when using the percentage strength of the rivets, use 4·5 as the factor of safety. The less of the two pressures so found is the working pressure to be allowed for the cylindrical portion of the shell.

Local heating to be avoided.

Local heating of the plates should be avoided, as many plates have failed from having been so treated.

Welding, &c.

Steel plates which have been welded should not be passed if subject to a tensile stress, and those welded and subject to a compressive stress should be efficiently annealed.

In other respects the boilers should comply with the rules for iron boilers.

The use of steel should be discouraged in the unshielded uptakes of all boilers including vertical boilers.

Makers of steel.

When the steel is not to be made by any of the following makers, the case will receive the special consideration of the Commissioners, and this should be specially noted by the Inspectors:—

Messrs.	W. Beardmore & Co.	For plates and angles, stay and rivet bars.
,,	J. Brown & Co.	
,,	C. Cammel & Co.	
,,	D Colville and Sons.	
,,	The Consett Iron Co., Ld.	
,,	The Glasgow Iron and Steel Co., Ld.,	
,,	The Landore Steel Co.	
,,	The Leed Forge Co.	
,,	The Moor Steel and Iron Co., Ld.	
,,	Palmer's Shipbuilding and Iron Co., Ld.	
	John Spencer and Sons Ld.	
	The Steel Co. of Scotland.	
	The Weardale Iron and Coal Co.	
	The West Cumberland Iron and Steel Co.	
,,	The Lanarkshire Steel Co., Ld.	For stay and rivet bars.
,,	Nettlefolds.	
,,	Wright, Butler & Co.	

Tracings of boilers may be received for examination upon payment of the usual fee of Rs. 20.

BOILERS—GENERAL.

Small boilers.

13. Small boilers must be inspected and be fitted the same way as the main boilers and have a water and steam gauge, and all other fittings complete, and as regards safety-valves, must comply with the same regulations as the main boilers.

Stop-valves.

14. No boiler or steam chamber is to be so constructed, fitted, or arranged, so that the escape of steam from it through the safety-valve can be wholly, or partially, intercepted by the action of any other valve.

A stop-valve should always be fitted between the boiler and the steam pipe, and, where two or more boilers are connected with a steam receiver or superheater, between each boiler and the superheater or steam receiver. The object of this is obvious, viz., to avoid the failure of all the boilers through the failure of one. The necks of stop-valves should be as short as practicable.

Gauges, &c.

15. Each boiler should be fitted with a steam pressure gauge and a glass water-gauge and two test

cocks, or two glass water-gauges fitted independently. When a factory has more than one boiler, each boiler should be treated as a separate one, and have all the requisite fittings.

Inspectors are to be most careful not to give any official sanction to any new arrangement or construction of steam-boilers, without first obtaining the permission of the Commissioners in writing, nor are they allowed to give any written approval of any invention or arrangement, unless by direction of the Commissioners; and whenever they know that any invention or new arrangement is to be fitted, they should, as soon as possible, with a view to preventing subsequent delays and questions, obtain plans and submit the same for consideration.

16. On every inspection of a steam boiler the Inspector shall, if the boiler is large enough, go inside it, and make a thorough examination of it.

When the boilers are not large enough for the Inspector to get into, he should see them tested by hydraulic pressure at every annual inspection unless he is thoroughly satisfied as to the condition of the boiler. In the case of old boilers the Inspectors must use their own judgment as to the necessary pressure to be applied. This is in no way to interfere with the instructions to test all new boilers in accordance with clause 8, nor the proper internal examination of all boilers that are large enough for the Inspectors to get into.

Whenever it is only removable stays that prevent getting in, he must order their removal, and he must see them properly replaced before granting his declaration.

If any part of a main boiler near the uptake fire-boxes or furnaces is so constructed that the Inspector cannot examine it, he is not to give a declaration, but shall report the case to the Commissioners.

If for special reasons, and for special reasons only, the Inspector cannot go inside a small boiler, he must distinctly state on the face of his declaration his reasons for not being able to do so.

17. If the boiler is too hot for the Inspector to examine the inside efficiently, and with safety and convenience, he should decline to examine the boiler, and absolutely refuse to grant a certificate until he can make an efficient internal examination.

Inspector not to go into hot boilers.

18. Before testing a boiler the Inspector shall examine it, take the necessary measurements, and ascertain and calculate what the working pressure should be in accordance with the Rule 8, only but in reference to Rule 8. If the pressure must be proved.

Strength of boiler to be ascertained and working pressure fixed by

This instruction steam checks.

This condition to be or disappointment certificate should without first

19. The Inspector shall and boiler

declared

repair, tested by hydraulic pressure in accordance with Rule 8 previous to the boilers being set, and before they are covered in, to test the workmanship, &c.; but the working pressure is to be determined by the strength of stays, thickness of plates, and strength of riveting, &c., and not by the hydraulic test.

The hydraulic test should in no case exceed twice the calculated working pressure of the boiler, and it is never to be applied until the boiler has been examined and until the strength has been calculated, from the necessary measurements taken from the boiler itself.

When the boilers are set the Inspector may, at any time he thinks it necessary, before he gives a certificate, have them tested by hydraulic pressure to satisfy himself as to any doubtful part, or of places not easy of access, care being taken in the case of old boilers not to overstrain them; but the test must always exceed the working pressure.

The hydraulic test should, before a certificate is granted, be applied to all boilers that have not previously had a working certificate

When a boiler is partially inspected by one Inspector, and the inspection is completed and a certificate granted by another, if the Inspector, who witnesses the test of the boiler by hydraulic pressure, has an opportunity of examining it inside and outside after the test, such Inspector should determine the pressure to be allowed on the boiler in question, taking care to inform the makers, owners, or agents, and the Inspector who is ultimately to grant a certificate, what pressure should in his opinion be allowed on it. In the event of the original Inspectors having no opportunity to examine the boiler inside and out after the hydraulic test, the Inspector must re-test the boiler by water and examine the boiler inside and out before determining the working pressure and granting a certificate.

The amount of the hydraulic pressure test, and the date on which it was last applied to the boiler, should be inserted in the Inspector's certificate, and recorded in the dimension sheet of that boiler.

Inspectors should pay particular attention to the examination and testing of steam pipes and economisers.

of steam pipes, &c.

In all cases in which a socket expansion joint is fitted to a bent steam pipe, the Inspector should require a fixed gland and bolts to be fitted, in order to prevent the end of the pipe being forced out of the socket. This regulation should be complied with in all cases of bent pipes fitted with [illegible] expansion joints. Fixed glands and bolts should be fitted to the expansion joints of straight steam pipes, as cases have occurred, particularly with [illegible] pipes, in which the ends of the pipes have been forced out of the sockets.

Socket expansion joints.

20. In all boilers in which the Inspectors find that cast-iron is employed in such a manner as to be subject to the pressure of steam or water, they shall report the circumstances to the Commissioners in order that they may receive instructions how to act. Cast iron should not be used for stays.

Cast iron in boilers.

21. The pressure allowed on a boiler is not, *under any circumstances whatever*, to be increased unless the Inspector has previously written for and obtained the sanction of the Commissioners.

In case an Inspector is of opinion that an increased pressure may with safety be allowed, he shall communicate with the Inspector who last inspected the boiler; and if, on learning the reasons why the existing pressure was formerly allowed, the Inspector is still of opinion that it may be increased, he should communicate all the facts of the case to the Commissioners; but, as above stated, the pressure shall not in any case be increased until the question has been decided by them.

It may in some cases be found that a strict application of the rules would give a lower limit of working pressure allowable than has previously been granted in such cases. The Inspector will, of course, be careful not to make any serious reduction, without reporting the matter for consideration.

SAFETY-VALVES.

22. The Inspectors are instructed that in all *new boilers*, and whenever *alterations can be easily made*, the safety-valve and stop-valve should be placed directly on the boiler; and the neck, or part between the valve and the flange which is bolted on to the boiler, should be as short as possible.

Safety and stop-valve boxes to have short necks.

The Inspector should note that it is not intended by this instruction that old boilers which have been previously passed with such an arrangement should be thrown out of work for the alterations to be carried out.

Of course in any case in which an Inspector is of opinion that it is positively dangerous to have a length of pipe between the boilers and the safety-valve, it is his duty at once to insist on the requisite alterations being made before granting a declaration.

The Inspector shall declare, amongst other things, the limits of the weight to be placed on the safety-valves, and that the safety-valves are such and in such condition as required by the Act.

23. The area per square foot of fire-grate surface of safety-valves, or (when there is more than one safety-valve on the boiler) the combined area of the safety-valves should be not less than that given in the following tables opposite the boiler pressure intended, provided the valves are not less than two inches in diameter.

Area of safety-valves.

When, however, the valves are of the common description, and are made in accordance with the tables, it will be necessary to fit them with springs having great elasticity, or to provide other means to keep the accumulations within moderate limits.

In ascertaining the fire-grate area, the length of the grate should be measured from the inner edge of the dead plate to the front of the bridge, and the width from side to side of the furnace on the top of the bars at the middle of their length.

If there is only one safety-valve on a steam boiler the Inspector should not grant a certificate without first referring the case to the Commissioners for special instructions.

Number of safety-valves to each boiler.

In the case of small boilers, if it is proposed to fit valves smaller than two inches diameter, the case should be submitted for the consideration of the Commissioners.

Fitting small safety-valves.

24. The Inspector in his examination of the boilers and appurtenances is particularly to direct his attention to the safety-valves, and whenever he considers it necessary, he is to satisfy himself as to [illegible] boiler by actual trial.

Examination of safety-valves.

The Inspector is to [illegible] of the weight to be placed on the [illegible] and the responsibility of issuing a [illegible] before he is fully satisfied on the [illegible] The law places on the [illegible] responsibility of "declaring" that [illegible] judgment sufficient with [illegible] The Inspector is to [illegible] of the valves, weights, [illegible]

The [illegible] efficiency of the [illegible] fitted, so as to be as much [illegible] the control of the engineer [illegible] with the Inspector.

Safety-valves should be fitted with lifting gear, so arranged that the valve on any one boiler can at all times be raised without interfering with the valves on any other boiler.

Care should be taken that the safety-valves have a lift equal to at least one-fourth their

diameter; that the openings for the passage of steam to and from the valves, including the waste steam pipe, should each have an area not less than the area of valves required, and that each valve-box has a drain pipe fitted at its lower part. In the case of lever valves, if the lever is not bushed with brass, the pins must be of brass: iron and iron working together must not be passed. Too much care cannot be devoted to seeing that there is proper lift, and free means of escape of waste steam, as it is obvious that unless the lift and means for escape of waste steam are ample, the effect is the same as reducing the area of the valve or putting on an extra load. The valve seats should be secured by studs and nuts.

The Inspectors are, as far as is in their power, to make these points generally known to the owners of steam boilers.

Inspector to see valves weighted.

25. When the Inspector has determined the amount of pressure, he is to see the valves weighted accordingly and the weights or springs fixed in such a manner as to preclude the possibility of their shifting or in any way increasing the pressure. The limits of the weight on the valves is to be inserted in the certificate, and should it at any time come to an Inspector's knowledge that the weights or the loading of the valves have been shifted, or otherwise altered, or that the valves have been in any way interfered with, so as to increase the pressure, without the sanction of the Commissioners, he is at once to report the facts.

Spring safety valves

26. If the following conditions are complied with, the Inspector need raise no question as to the substitution of spring loaded valves for dead weighted valves:

(1) That at least two valves are fitted to each boiler.

(2) That the valves are of the proper size, as by clause 23.

(3) That the springs and valves are so cased [illegible] cannot be tampered with. [illegible] is made to prevent the [illegible] if in case of the springs

(5) That the requisite safety-valve area is cased in and locked up in the usual manner of the Government valves.

(6) That screw lifting gear is provided to ease all the valves, as by clause 24.

(7) That the size of the steel of which the springs are made, is in accordance with that found by the following formula:—

$$\sqrt[3]{\frac{S \times D}{C}} = d:$$

S = the load on the spring in lbs.
D = the diameter of the spring (from centre to centre of wire) in inches.
d = the diameter or side of square, of the wire in inches.
C = 8,000 for round steel.
C = 11,000 for square steel.

(8) That the springs are protected from the steam and impurities issuing from the valves.

(9) That when valves are loaded by direct springs, the compressing screws abut against metal stops or washers, when the loads sanctioned by the Inspector are on the valves.

(10) That the springs have a sufficient number of coils to allow a compression under the working load of at least one quarter the diameter of the valve

PRIME MOVERS.

27. As regards prime movers, the Inspectors are to make a general external examination at each annual inspection, but they are not to order the mill or factory to be stopped for examination of the prime mover, unless there is reason to believe that defects exist which render such prime mover dangerous.

The Inspectors, in making their examination of the prime movers, should call the attention of the owner of the mill or factory in any case where they find the wheel gearing or belting so exposed as to endanger the lives of the operatives. And in the event of their not taking steps to have the dangerous parts closed in, the case should be reported to the Commissioners.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

PUBLIC WORKS DEPARTMENT.

Railway Department.

The 12th October 1896.

No. 189.—[illegible] Government of India, Public Works Department Notification No. [illegible], dated the 1st October 1896, Babu Annie Nath Das, Apprentice Engineer, is posted to the [illegible] Circle.

A. F. McARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

Buildings.

The 12th October 1896.

No. 187.—[illegible] It appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for reconstructing the Hatya [illegible] in the village of Hatya pargana Sandip, chakla Hatya, zilla Noakhali, it is hereby declared that for the above purpose a piece of land,

measuring, more or less, 4 bighas 19 cottahs of standard measurement, bounded on the north by the lands of Samadali Miya and Gagan Chandra Sarcar, on the south and on the east by the lands of Samadali Miya and Basia, and on the west by the lands of the District Board, is required within the aforesaid village of Horoni.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

J. G. H. GLASS,
Secy. to the Govt. of Bengal.

COMMUNICATIONS.

The 10th October 1896.

No. 188.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for Overseer's bungalow at Soro, in the village of Barkhuri, pargana Banchas, zilla Balasore, it is hereby declared that for the above purpose a piece of land, measuring, more or less, 18 ghoonts and 12 biswas of standard measurement, bounded on the—

North.—By public road,
East.—By Kancha Gohiri,
South.—By the remaining portion of the lakhraj land under acquisition and the house of Sheik Dianat,
West.—By ditto and the house of Hari Gharai,

is required within the aforesaid village of Barkhuri.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

J. G. H. GLASS,
Secy. to the Govt. of Bengal.

LOCAL COMMUNICATIONS.

The 12th October 1896.

No. 190.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, *viz.*, for constructing a rest-house at Nowdona in the village of Kaulic, pargana Bhulua, zilla Noakhali, it is hereby declared that for the above purpose a piece of land, measuring, more or less, 2 bighas 7 cottahs 8 chittacks of standard measurement, bounded on the east by Ram Mohan Shaha's land and on the south by Nazamaddin and Tamejaddin's lands, and on the west by Nazamaddin and Ameeruddin's lands, and on the north by the District Board road ditch, is required within the aforesaid village of Kaulic.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

J. G. H. GLASS,
Secy. to the Govt. of Bengal.

IRRIGATION DEPARTMENT.

[Fourth Publication.]

The 21st September 1896.

No. 177.—Notification.—It is hereby notified that in exercise of the powers conferred on him by section 99 of Act VII (B.C.) of 1876, the Lieutenant-Governor of Bengal proposes to substitute the following for rules 6 and 7 of the rules framed for the Saran Canals published under Notification No. 106 in the Calcutta Gazette, dated 28th March 1894:—

6. Leases will be granted for the year 1896-97 for any [illegible] canals to any person, approved by the canal officer, who has a beneficial interest in irrigation of the water. The charge for the use during the whole year, or any portion of the season of the canals will be—

		Rs.
No. III.—	The Daha river ...	[illegible]
„ IV.—	„ Gandak „ ...	[illegible]
„ V.—	„ Dhanai „ ...	[illegible]
„ VI.—	„ Gangra „ ...	[illegible]
	Total ...	[illegible]

The water-rate must in each case be paid in full into the Government Treasury either at Gopalganj or Chapra, before a lease will be granted, or before water will be admitted into a canal. An application for a lease for the year 1896-97 must be made in the form of Appendix I.

7. Leases will be granted for a period of three years ending on the 31st March 1899 to any person, approved by the canal officer, who has a beneficial interest in the use of the water.

The charge for the use during the period of three years of each of the canals will be-

CANALS.	PAYMENT TO BE MADE.

Mines of coal, iron-stone, slate or other minerals lying under the land, or any particular portion of the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away, or use in the construction of the railway, are not needed.

This declaration is made, under the provisions of section 6, Act I of 1894, and section 3, clause (1), Act XVIII of 1885, to all whom it may concern.

The 12th October 1896.

No. 122.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the station site for the Howrah-Ampta Tramway, in the village of Rajapur, pargana Balia, zilla Howrah, it is hereby declared that for the above purpose a piece of land measuring, more or less, 3 cottahs and 15 chitaks of standard measurement, bounded on the north by the Amta Road, east, south and west by pickings on the ground, is required within the aforesaid village of Rajapore.

This declaration is made, under the provisions of section 6, Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector for the Howrah-Amta Tramway, at Howrah.

No. 123.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the station site for the Howrah-Amta Tramway in the village of Jagotballavpur, pargana Balia, zilla Howrah, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1 bigha 11 cottahs and 12 chitaks of the standard measurement, bounded

on the north by Jagatballavpur Road, east and south by nickings on the ground, and west by the Patibat Road, is required within the aforesaid village of Jagatballavpur.

This declaration is made, under the provisions of section 6, Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Land Acquisition Deputy Collector for the Howrah-Amta Tramway, at Howrah.

No. 124.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for Mr. R. D. Bhoga's siding on the Damuda Branch of the Jheria Extension, East Indian Railway, in the village of Koosaunda, pargana Jheria, zilla Manbhum, it is hereby declared that for the above purpose a piece of land measuring, more or less, 2 bighas 11 cottahs and 10·67 chittacks of standard measurement (corresponding to 3 roods 16·64 poles), bounded by a nick on the ground, is required within the aforesaid village of Koosaunda.

Mines of coal, iron-stones, slate or other minerals lying under the land, or any particular portion of the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away, or use in the construction of the work for the purpose of which the land is being acquired, are not needed.

This declaration is made, under the provisions of section 6, Act I of 1894, and section 3, clause (1), Act VIII of 1885, to all whom it may concern.

No. 125.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the public expense for a public purpose, viz., for a permanent station and passing sidings at Rasulpur Railway Station in mauzas Rasulpur and Dallubazar, pargana Nulluhee, zilla Burdwan, it is hereby declared that for the above purpose three pieces of land, measuring, more or less, 7 bighas 6 cottas and 7 chittacks of standard measurement, bounded as follows, are required within the aforesaid villages of Rasulpur and Dallubazar:—

Plot No. 1.—On the east by land belonging to Kalee Prassana Seal, Mokund Lal Chaudhury, Abinash Chunder Chaudhury, Mohun Lall Chaudhury and others; on the south by Kalee Prassana Seal's land; on the west by the East Indian Railway land, and on the north by land belonging to Mokund Lal Caudhury, Abinash Chandra Chaudhury, Mohun Lall Chaudhury and others.

Plot No. 2.—On the east by Kalee Prassana Seal's land; on the west and north by the East Indian Railway land, and on the south by land belonging to late Kristo Chandra Bisswar, Ram Chandra Bisswar, Bepin Behari Bisswar, and Kalee Prassana Seal.

Plot No. 3.—On the north and east by the East Indian Railway land, and on the south and west by the Grand Trunk Road.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

No. 126.—Notification.—Whereas it appears to the Lieutenant-Governor of Bengal that land in the Bhagalpur and Monghyr districts is likely to be needed for a public purpose, viz., for a railway from Mansi on the Khagaria-Katihar extension to Bhaptiahi on the Northern Extension of Tirhut State Railway, with branch from near Sihursa through Mudehpura to Murliganj, notice is hereby given to all whom it may concern that, in exercise of the power conferred by section 4 of the Land Acquisition Act of 1894, the Lieutenant-Governor has authorized the Bengal and North-Western Railway Engineers for the time being engaged on this undertaking to enter upon and survey lands, and do all other acts required for the proper execution of their work as provided for or specified in the said section.

The general route taken for the railway will probably be from Mansi *vid* Dhamara Ghât to Sihursa, and thence *vid* Soopole to Bhaptiahi and branch from Sihursa through Mudehpura to Murliganj.

No. 127.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for borrowpits for the Howrah-Ampta Tramway at Kadomtollah, in the village of South Bantra, pargana Boro, zilla Howrah, it is hereby declared that for the above purpose a piece of land, measuring, more or less, 3 cottas 12 chittaks of standard measurement, bounded as follows:—

Plot No. 1.—Bounded on the north by a nicking on the ground, on the east by the Bantra Road, on the south and west by the premises of Choitan Charan Kundu and others;

Plot No. 2.—Bounded on the north by Kadamtollah station site, on the east by the Bantra Road, on the south by nicking, and on the west by conservancy line,

is required within the aforesaid village of South Bantra.

This declaration is made, under the provisions of section 6, Act I of 1894, to all whom it may concern.

A. D. McARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

[Second Publication.]

The 5th October 1896.

No. 112 Marine.—In exercise of the powers conferred on him by section 50 of the Inland Steam-vessels Act, VI of 1884, the Lieutenant-Governor proposes to make the following rules for the protection of inland steam-vessels from danger by explosion or fire, in supersession of the rules sanctioned under the notification of this Government, dated the 24th January 1888, which was published in page 26 of the Appendix to the *Calcutta Gazette* of the 25th idem. These rules will be taken into consideration on the expiry of a month from the date of first publication in the Gazette, and the Lieutenant-Governor will be glad to consider any suggestions or observations that may be made concerning them by any person within this period:—

1. Before an inland steam-vessel proceeds on a voyage, her cargo, and that of any flat or flats which are intended to be towed, shall be safely stowed away, and hay and other inflammable material shall be properly covered with tarpaulins, or other sufficient protection.

2. Sections 48 and 49 of the Act shall be posted up in some prominent place in every inland steam-vessel. Every person who takes any dangerous goods with him on board an inland steam-vessel shall, if required to do so, deliver up the same to the Master of the vessel for safe custody.

3. No person shall use naked lights of any description in the hold or on the cargo deck of any vessel; and no closed light shall be so used unless it be in charge of an officer of the vessel. Fires shall be permitted only in galleys or regularly constructed fireplaces.

4. Stations shall be assigned beforehand to the officers and crew, so that, in case of fire, they may divide into parties and take up those stations.

5. No gunpowder or other explosive shall be carried unless in a suitably constructed magazine compartment; and no fire shall be permitted on board any flat or steamer while gunpowder is being taken in or discharged.

6. Every inland steam-vessel of a burden of 100 tons and upwards shall be provided with sufficient hose to reach from her engines to her stem and taffrail, and shall be supplied with fire-buckets in the proportion of one for each of the crew, which shall be kept in a place where they are at once available. They shall also be provided with fire-engines, which shall be placed under the charge of an officer, who shall be responsible that they are ready for immediate use.

7. Every inland steam-vessel of less than 100 tons burden shall be supplied with fire-buckets in the proportion of one for each of the crew.

8. It shall be the duty of the master of every inland steam-vessel to give effect to and observe the above rules, and he or any other person committing a breach of these rules shall be punished with imprisonment for a term which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

A. D. MCARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

CIVIL MEDICAL DEPARTMENT, BENGAL.

No. 392D., dated the 8th October 1896.—Assistant Surgeon Nil Kanta Chatterjee is appointed to do supernumerary duty in the Medical College Hospital, Calcutta, with effect from the forenoon of the 30th September 1896.

G. C. ROSS, *Surgn.-Col.*,
Inspector-General of Civil Hospitals, Bengal.

HIGH COURT NOTICES.

Issued by authority of the High Court of Judicature at Fort William in Bengal.

(CRIMINAL.)

Rule No. 1, dated the 30th September 1896.

After Rule 47, Chapter III, at page 87 of the High Court's General Rules and Circular Orders (Criminal), *insert* the following :—

47A. When an Appellate Court orders a fine to be refunded, it shall be the duty of the Court which imposed the fine, immediately on receipt of the Appellate Court's order for the refund, to prepare a payment order on the Treasury, if the fine has been levied, attaching a copy of the Appellate Court's order thereto, and to deliver it to the payee, whether he applies for it or not, with instructions to duly receipt the bill and present it for payment at the Treasury. In such cases no written application shall be required from the payee; and should such an application be made, it shall be exempted from stamp-duty by virtue of the Notification of the Government of India, No. 3389S.R., dated the 6th August 1896.

The same procedure shall also be followed in respect of cases dealt with on revision.

In cases in which a sentence of fine passed by a Magistrate is confirmed by a Court of Session, but set aside by the High Court on revision, it shall be the duty of the Sessions Judge to whom the order of the High Court is certified, immediately to apprise the Magistrate concerned of the order of the High Court by sending him a certified copy of such order.

Published in the *Calcutta Gazette* of the 23rd September 1896, Part I, page 984, and in the *Assam Gazette* of the 26th *idem*, Part III, page 815.

NOTIFICATION.

The 10th October 1896.

THE following rules having been framed by the High Court of Judicature at Fort William in Bengal, in the exercise of the power vested in it by section 15, of Statute 24 and 25 Victoria, Chapter 104, and sanctioned by the Governor-General in Council, are published for general information.

By Order of the High Court,

W. H. JOYCE, *Deputy Registrar,*
for Registrar.

CRIMINAL.

Rule No. *dated the* *1896.*

(2) Babu Thakur Prasad, B.A., Fourth Master (Class VII), to act as Third Master, *vice* Babu Pramatha Nath Mukerjea, promoted.

C. A. MARTIN,
Offg. Director of Public Instruction, Bengal.

NOTIFICATION.

IN accordance with the Government of Bengal notifications of the 22nd January and 14th June 1895, notice is hereby given that the next Half-yearly Examination of Compounders will be held at 8-30 A.M., on Thursday, the 5th November 1896, at the Temple Medical School, Patna.

2. Every candidate must produce one of the following certificates:—

(*a*) From the Superintendent of a Vernacular Medical School, or of the Dublin University Mission at Hazaribagh, or of the Church of Scotland Mission at Kalimpong, Darjeeling, that he has attended regularly for one year the Compounder Class of the School, or of any of the two Missions above mentioned; or

(*b*) From the legally qualified Medical Manager of a Chemist's or Druggist's establishment, recognized by the Inspector-General of Civil Hospitals, Bengal, that he has been apprenticed for a period of three years in his establishment; or

(*c*) From a civil surgeon, that he has assisted in the dispensing of drugs at the Sadar dispensary of a civil station for a period of five years.

Exception.—Any person who at the time of the extension of Section 252 of Act III (B.C.) of 1884 to any municipality shall have acted as Compounder for the seven years preceding in any shop or place of the kind referred to in the above section shall, on producing a satisfactory certificate to this effect, be exempted from producing a certificate of the kind referred to in this rule.

3. Applicants must register their names and submit their certificates, together with a fee of Rs. 3, at least one week before the 5th November 1896, at the office of the undersigned.

Exception.—The students belonging to the Compounder class of a Vernacular Medical School will be exempted from paying this fee on producing a certificate from the Superintendent that they have already paid the School entrance fee.

4. Should any candidate fail to pass the required examination, he will forfeit his fee.

5. Candidates will be examined in Materia Medica, Pharmacy, the reading of prescriptions and the writing in English of the directions contained in prescriptions.

N. B.—The attention of candidates is drawn to Rule 5, Section (*b*) of the Government notification of the 23rd July 1887, or paragraph 2 (*b*) of this notification, from which they will observe that the Chemist's and Druggist's establishments, from the legally qualified Managers of which they obtain their certificates, will have to be recognized by the Inspector-General of Civil Hospitals, Bengal, prior to the candidates applying to the Superintendent to register their names to appear at the examination.

CALCUTTA, *the 8th October 1896.*

No. 1813B.

NOTICE is hereby given that the Elventh Sale of Opium, the Provision of 1894-95 and 1895-96, will be held at the Government Opium Sale-room, No. 2, Bankshall Street, on Monday, the 2nd November 1896, at 11 A.M., and will comprise 3,250 chests, viz.—

	Chests.
Opium manufactured at the Patna Factory consisting of season 1894-95...	1,625
Ditto ditto at the Ghazipur Factory consisting of season 1895-96	1,625
Total ...	3,250

2nd.—The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 14th November 1895, and published in the *Government* and *Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3rd.—The latest dates for deposit and clearance will be the 7th and 17th November 1896, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room will be received after 1-30 P.M. of Saturday, the 7th November 1896, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Tuesday, the 17th November 1896.

4th.—In addition to the quantity above advertised for sale, the following quantities, more or less, of the Opium manufactured at the Patna and Ghazipur Factories will be brought to sale down to December next about the date specified below. The Board of Revenue, however, reserve to themselves the right of altering the date, should circumstances render it expedient to do so :—

DATES.	Manufactured at the Patna Factory ; about chests.	Manufactured at the Ghazipur Factory ; about chests.	Total ; about chests.
On or about Wednesday, 2nd December 1896	1,625	1,625	3,250
Total ...	1,625	1,625	3,250

Chittagong Collectorate, the 19th September 1896.

C. G. H. ALLEN, Offg. Collector.

NOTICE is hereby given, under sections 6 and 13, Act XI of 1859, that the undermentioned estates or shares of estates in the district of Saran will be put up for sale at the Collector's office of that district on the 9th November 1896, for arrears of revenue and other demands which by the Regulations and Acts in force are directed to be realised in the same manner as arrears of revenue.

When in columns 5, 7, and 9 of the appended statement it is stated that only a share is to be sold, a separate account is kept for such share, and the other share or shares in the estate are excluded from the sale:—

1	2	3	4	5	6	7	8	9
Tauzi No.	Name of mahal and pargana.	Sadar jama of whole estate.	Whether the whole estate is to be sold.	If only a share is to be sold, specification of such share or shares. KISHORI MOHAN MUKHERJEE, L.C.E.,
District Engineer, Balasore.

District Engineer's Office, Balasore, the 10th October 1896. (745—2)

In the goods of John Clarke, deceased.

PURSUANT to section 320 of Act X of 1865 and section 42 of Act XXVIII of 1866, notice is hereby given that all persons having claims against the estate of John Clarke, late of Telkhul Ghaut, Howrah, Managing Agent of John King & Co., Limited, who died at Howrah on the 10th March 1896, and in respect of whose estate letters of administration with copy of Will annexed were, on the 24th June 1896, granted by the High Court, Calcutta, to William Clarke and George Irving, should send in particulars of such claims with vouchers to the said William Clarke at No. 23, Garden Reach, Calcutta, on or before the 31st day of October 1896, after which date no claims will be admitted, and the assets of the estate of the deceased will be distributed.

MORGAN & Co., Attorneys for the said Administrators.

Calcutta, 18th September 1896. (664—3)

PURSUANT to a decree of the High Court of Judicature at Fort William in Bengal in its Ordinary Original Civil Jurisdiction made in suit No 365 of 1896 (wherein Prem Lall Mullick is the plaintiff and Administrator-General of Bengal is the defendant), and dated the 25th day of August 1896, the creditors of Nundo Lall Mullick, late of No 84, Upper Chitpore Road, in the town of Calcutta, zamindar and landholder, who died at Cawnpore in the North-West Provinces in or about the month of February 1894, are, on or before the 7th day of December 1896, to send to the office of the Registrar of this Court in its Original Jurisdiction their names, addresses, and descriptions, the full particulars of their claims, a statement of their accounts and the nature of the securities (if any) held by them, or, in default thereof, they will be peremptorily excluded from the benefit of the said decree. Every creditor holding any security may produce or transmit the same to the said Registrar with particulars of his claim, or shall produce the same before the said Registrar in the Court-house on Tuesday, the 22nd day of December 1896, at 12 o'clock, noon, being the time appointed for adjudicating on the claims.

Dated this 25th day of September, one thousand eight hundred and ninety-six.

R. BELCHAMBERS, Registrar.

G. C. Chunder & Co., Plaintiff's Attorneys.

Exe. Engr., Nadia Rivers Division.

Berhampore, *the 5th October 1896.*

Parts I, II and III of a Descriptive Catalogue of the Sanskrit Manuscripts in the Library of the Calcutta Sanskrit College, prepared by Pandit Hrishikesa Sastri and Babu Siva Chandra Gui, M.A., B.L., of that College, are offered to the public for sale. The Catalogue is to be completed in 23 parts, the price of each part being 12 annas a copy, exclusive of postage. Copies can be obtained from the Principal of the Sanskrit College, Calcutta.

Annual Statement of the Sea-borne Trade and Navigation of the Bengal Presidency and of its Chief Port (Calcutta), and each of its Subordinate Ports (Chittagong, Balasore, Cuttack, Pooree, and Narsinguge), Volumes I and II. Price Rs. 20 for 1895-96. Published at the Calcutta Custom House. Previous years' volumes can also be obtained at the same price.

A Manual of Tibetan, being a Guide to the Colloquial Speech of Tibet, in a series of progressive Exercises, by Major T. H. Lewin, F.R.G.S., of the Bengal Staff Corps, Late Deputy Commissioner of Darjeeling. *Price Rs. 6: postage, 3 annas.*

Copies are to be had at the Office of the Director of Public Instruction.

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series *including postage*, Rs. 22-8.

	Without postage. Rs.	A.	P.	With postage Rs.	A.	P.
For the Calcutta Series ...	10	0	0	12	8	0
,, each of the Madras, Bombay, and Allahabad Series	6	0	0	7	0	0
,, a part of the Calcutta Series purchased separately (*inclusive of postage in India*				2	0	0
,, part of each of the Madras, Bombay, and Allahabad Series purchased separately (*inclusive of postage in India*) ...				1	0	0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town. Rs.	A.	P.	For mufassal Rs.	A.	P.
For the Calcutta Series, per copy ...	0	8	9	0	10	3
,, each of the Madras, Bombay, and Allahabad Series, per copy	0	5	3	0	5	0
,, the Calcutta Series. For the year	7	2	6	8	6	3
,, each of the Madras, Bombay and Allahabad Series. For the year	4	4	6	4	11	3

Persons desiring to subscribe for or purchase the Report should apply to—

Superintendent, Government Press, Madras,

The Superintendent, Government Central Press, Bombay.

,, Curator of Government Books, North-Western Provinces and Oudh.

,, Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 *should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.*

ADVERTISEMENTS will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance—

	One page.	Half page.	Quarter page.
For one issue ...	Rs. 20	Rs. 14	Rs. 9
,, three issues ...	,, 55	,, 36	,, 24

Obtainable at the Bengal Secretariat Book Depot, Writers Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depot.

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

Notice.

IT is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

Catalogue of Books procurable from Thomason College Book Depôt.

Application to be made to Curator. Cash must accompany order. Articles will be sent by Value-payable Post to persons in Government employment only. It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage and other incidental charges (except commission for value-payable supplies), and are for all purchasers other than resident College Students.

Drawing Instruments (electrum) are available at the College Book Depôt at Rs. 62 per box. Drawing Instruments, drawing materials, &c., are also obtainable from the Roorkee Workshops, and application should be made to the Superintendent.

PART VI.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 1st October, 1896:

NO. 25 OF 1896.

A Bill to amend the law relating to Government and other Provident Funds.

WHEREAS it is expedient to amend the law relating to Government and other Provident Funds; It is hereby enacted as follows:

Title, extent and commencement.

1. (*1*) This Act may be called the Provident Funds Act, 1896.

(*2*) It extends to the whole of British India; and

(*3*) It shall come into force at once.

Definitions.

2. In this Act—

(*1*) "Provident Fund" means a fund in which the subscriptions or deposits of any class or classes of employees are received and held on their individual accounts, and includes any contributions credited in respect of, and any interest accruing on, such subscriptions or deposits under the rules of the Fund:

(*2*) "Government Provident Fund" means a Provident Fund constituted by the authority of the Government of India for the benefit of any class or classes of its employees:

(*3*) "Railway Provident Fund" means a Provident Fund constituted by the authority of the Government of India or of any company which administers a railway in British India, either under a special Act of Parliament or under contract with the Government of India, for the benefit of any class or classes of the employees on, or in connection with, such railway: and

(*4*) "compulsory deposit" means a subscription or deposit which is not repayable on the demand, or at the option, of the subscriber or depositor, and includes any contribution which may have been credited in respect of, and any interest which may have accrued on, such subscription or deposit under the rules of the Fund.

Payment from Government or Railway Provident Fund on death of subscriber or depositor.

3. (*1*) When a subscriber to, or depositor in, any Government or Railway Provident Fund dies and the sum standing to his credit in the books of the Fund does not exceed two thousand rupees, the officer whose duty it is to pay such sum to the person entitled may pay it as follows:

(*a*) he may pay it to any executor of the deceased subscriber or depositor who has proved the will;

(*b*) if he is satisfied that there is no will, or if no will is produced to him within three months after the death of the subscriber or depositor, he may pay it to any person entitled to receive it according to the rules of the Fund or, in the absence of any rule of the Fund to the contrary, to any person nominated in writing by the deceased subscriber or depositor to receive it;

(*c*) in any case not hereinbefore provided for he may pay it to any person appearing to him to be entitled to receive it.

(*2*) The provisions of sub-section (*1*) may be applied to any sum which, at the commencement of this Act, stands to the credit of any subscriber or depositor already deceased.

Government and Railway Provident Funds not to be attached.

4. After the commencement of this Act, the compulsory deposits in any Government or Railway Provident Fund shall not be liable to attachment under any decree or order of a Court of Justice against a subscriber to, or depositor in, such Fund.

Protection for anything done in good faith under this Act.

5. No suit or other legal proceeding shall lie against any person in respect of anything in good faith done or intended to be done in pursuance of the provisions of this Act.

Power to extend Act to other Provident Funds.

6. The Governor General in Council may, in his discretion, by notification in the official Gazette, extend the provisions of this Act to any other Provident Fund established for the benefit of its employees by any local authority within the meaning of the Local Authorities Loans Act, 1879. XI of 18

Saving as to estates of soldiers.

7. Nothing in section 3 shall apply to money belonging to the estate of any European officer, non-commissioned officer or soldier dying in Her Majesty's service in India, or of any European who at the time of his death was a deserter from such service.

STATEMENT OF OBJECTS AND REASONS.

THE law as it stands does not provide for the disbursement of the assets, however small, standing to the credit of a member of a Provident Institution at the time of his death without the production of probate or letters of administration or a succession-certificate. In a very large number of cases such assets are small, and, owing partly to ignorance and partly to the trouble and expense involved in obtaining such authority, it is probable that a large proportion of them may remain unclaimed, much hardship to the representatives of the poorer class of subscribers for whose benefit these Provident Institutions are maintained, being caused thereby. The proposal is to remove the difficulty in the case of assets not exceeding a certain amount, as is done as regards deposits in Government Savings Banks.

2. Again, the Government of India have been advised that, as the money standing to the credit of a member of a Provident Institution is a debt which is due by the Institution to him or his estate, as the case may be, on the happening of any of the following events, *viz.*, his retirement, death, dismissal or default, it cannot be attached by a Court, under section 266 of the Code of Civil Procedure, until the debt becomes due, *i.e.*, till the happening of any one of the above events. Consequently, if a member dies, the sum at his credit may be attached, and thus the object of the Institution may be frustrated and those in whose interests he subscribed, may reap no benefit whatever. It is intended, therefore, to protect such moneys from attachment.

3. The Bill applies in the first instance to Government and Railway Provident Funds only, but clause 6 provides for the extension of its provisions to any other Provident Fund established for the benefit of its employees by any local authority within the meaning of the Local Authorities Loans Act (XI of 1879).

The 26th September, 1896.

M. D. CHALMERS.

S. HARVEY JAMES,
Secretary to the Government of India.

NOTICES TO MARINERS.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 198.

[First Publication.]

AUSTRALIA—MORETON BAY.

New lights and buoys in the North-West Channel.

THE Port Master, Brisbane, has given notice (No. 18 of 1896) that, on and after 7th September, the following lights, gas buoys, and additional buoys will be exhibited and in position for use in entering or leaving Moreton Bay by the North-West Channel, viz.—

Light on Caloundra Head.—The light is of the 4th order dioptric condensing; it is placed in a circular tower 38 feet high from ground to lantern top, standing on the summit of the hill, 11¾ cables west from Bray Rock. The focal plane of the light is 171 feet above high-water level, and the light is visible a distance of about 16 miles.

It shows a fixed white light to seaward between the bearings of S. 1° E. and N. 61° W., a fixed red light over the North Banks between the bearings of N. 61° W. and N. 30° W., and an intensified white sector down the North-West Channel between the bearings of N. 30° W. and N. 23° W.

Note.—The light may be partially obscured by trees between the bearings of S.S.W. and S. by W.

Leading Lights on Bribie Island.—These lights bear in line S. 55° W. The front light is of the 4th order dioptric condensing; it is placed in a skeleton wooden tower 62 feet high from ground to lantern top, and the tower stands 80 yards back from high-water line, bearing S. 10° W., distant 4·78 miles from Bray Rock. The focal plane of the light is 56 feet above high-water level, and the light will be visible about 12 miles.

It shows a fixed white light to seaward between the bearings of S. 17° W. and S. 77° W., intensified over an arc of 15°, the centre of which is on the line of lights; it is obscured between the bearings of S. 77° W. and N. 46° W., and shows an intensified white sector down the North-West Channel between the bearings of N. 46° W. and N. 40° W.

The back leading light is holophotal, showing a fixed white light over an arc of about 15° to seaward, the centre of which passes over the front light. It is placed on a skeleton wooden tower 97 feet from ground to top of lantern, and is 1,060 yards distant from the front light. The focal plane of the light is 95 feet above high-water level, and the light will be visible about 15 miles.

Two gas buoys, painted black with can-shaped superstructures, replace the two black buoys hitherto marking the western extremity of the Spitfire Banks and the western side of Yule Bank respectively; and one gas buoy painted red with conical superstructure replaces the red buoy hitherto marking the northern extremity of the Western Banks.

From the black buoys a fixed white light is shown; and from the red buoy an occulting white light, visible 2 seconds, eclipsed 2 seconds, is shown. The focal plane of the lights is 10 feet above water level, and the lights will be visible about 3 to 4 miles.

Additional Black Buoys.—Three additional black buoys, marking the eastern side of the North-West Channel, are placed on a line joining the buoys marking the northern extremity of the North Banks and the western extremity of the Spitfire Banks on the following bearings, viz.—

Buoy in 8 fathoms—
Caloundra Light-house, bearing N.W. by N. ½ N., Mount Beerwah, bearing W. ½ S.

Buoy with top-mark in 10 fathoms—
Caloundra Light-house, bearing N.W. by N., Mount Beerwah, bearing W. ½ N.

Buoy in 9 fathoms—
Caloundra Light-house, bearing N.W. ½ N., Mount Beerwah, bearing W. ½ N.

Buoy Numbers.—The black buoy marking the northern extremity of the North Banks will be numbered NW1, as before; the additional buoys will be numbered NW3, NW5, and NW7, respectively. The Spitfire Bank gas buoy will be numbered NW9, and the Yule Bank gas buoy will be numbered NW11. The Western Banks gas buoy will be numbered NW4.

Buoys Nos. 1 and 5 will carry top-marks.

Directions by Night.—Vessels from the southward, after rounding Cape Moreton, should steer a course for Caloundra Light, keeping both the Yellow Patch and the Caloundra Light white until the Bribie leading lights come in line, bearing S. 55°W. Keep the latter in line, passing through the red sector from Caloundra Light until in the white sector from that light, then haul up and bring the light astern, bearing N. 25° W., until through the obscured sector of the front leading light; and when the white sector from the latter is entered keep within its limits until the Spitfire Bank gas buoy is visible, when steer to pass it on the port hand at a distance of about 3 cables; thence steer to pass the Western Banks gas buoy on the starboard hand at a distance of about 3 cables off; then steer to pass the Yule Bank gas buoy on the port hand at a distance of about 4 cables, and then steer for Cowan Cowan Light, bearing S.E. ¾ E., until the bright white sector from Comboyuro Light is entered, when bring that light astern bearing north, and continue, passing through the obscured sector from Cowan Cowan Light until the Cowan Cowan Light opens out bright again, when bring it astern, and keeping within the limits of that sector steer a course across the Bay for the anchorage near the Pile Light.

Vessels from the northward must approach the entrance, keeping Caloundra Light white until the leading lights are in line, when proceed as directed above.

Directions by Day.—Vessels from the southward after rounding Cape Moreton should steer for Caloundra Head, keeping Cape Moreton Light-house open east of the Outer White Patch until the light towers on Bribie Island come in line, bearing S. 55° W., or until the S.E. Glasshouse Mountain (marked 920 feet on chart) comes in line with the front leading light-house. Steer in on that line until Coolum Hill (600 feet high) is shut in its own width with Caloundra Head—its top showing over the near land—or until Caloundra Light-house bears N.-W. by N. ¾ N.; then steer S. 36° E., rounding the black buoy with top-mark on the north extreme of the North Banks, passing three more black buoys on the port hand, the middle one of which carries a top-mark, and the Spitfire Bank gas buoy. Pass the latter at a distance of about 2 to 3 cables, and steer to pass the red gas buoy on the western banks on the starboard hand at a similar distance; then steer to pass the Yule Bank gas buoy on the port hand at a distance of 3 to 4 cables; and then steer for Cowan Cowan Light-house, keeping Cone Hill just open south of the tower until the red buoy on the East Knoll Bank is visible, when steer to pass it on the starboard hand at a distance of about 4 cables, and continue until Mount Campbell, bearing N.E. ½ N., is just open south of Cowan Cowan Light. Keep these marks in that position, and continue on across the Bay to the roadstead.

Vessels from the northward should not bring Coolum Hill west of the summit of Cartwright Point before running down the line of leading marks; then proceed as directed above.

Omura bay entrance—Dangers south-westward of Kogo saki.

THE British Admiralty has given notice (No. 508 of 1896) that information has been received from Vice-Admiral Sir Alexander Buller, K.C.B., Commander-in-Chief on the China station, that dangers stretch off from Kogo saki to the 4¾ fathom patch, situated 4 cables S.W. by S. from that point.

Two white beacons, erected on the mainland just eastward of Kogo saki, kept in line, N.E. by N., lead south-eastward of the extremity of the dangers.

Approximate position, Kogo saki, lat. 33° 6′ 10″ N., long. 129° 39′ 50″ E.

PACIFIC—SOUTH-WEST.

Search for La Brillante shoal and Melaine rock.

THE British Admiralty has given notice (No. 513 of 1896) that a thorough search has recently been made for La Brillante shoal and Melaine (Melanie) rock by Commander J. W. Combe, H. M. Surveying Vessel *Waterwitch* :—

(1) In the case of La Brillante shoal, while it may be taken for granted that the search has disproved the existence of a danger, the soundings indicate that there is a small bank (of probably 20 to 30 fathoms) still to be found in about lat. 23° 14′ S., long. 170° 6′ E., the presence of which would account for the various reports of shallow water in the vicinity.

(2) In the case of Melaine rock, the report of which was most vague, the search is considered to have disposed of its existence either in lat. 21° 26′ S., long. 170° 57′ E.; or in a position 5 to 10 miles W. by N. from Matthew island.

Melaine rock and the rock marked *E. D.*, in the last position, have therefore been expunged from the Admiralty Charts; and a depth of 22 fathoms, with *La Brillante* written against it, has been placed on the charts in lat. 23° 14′ S., long. 170° 6′ E.

AGRICULTURAL AND OTHER IMPROVEMENTS IN GOVERNMENT AND WARDS' ESTATES.

REVENUE DEPARTMENT,—LAND REVENUE.

Darjeeling, the 9th October 1896.

RESOLUTION—No. 895T.R.

READ the following reports and papers—

Report of the Indian Famine Commission, Part II, Chapter IV, Section II, paragraph 13.

Resolution of the Government of India, No. 2—125-134, dated 30th August 1881.

Letter from the Government of India, No. 53, dated 8th December 1883.

Resolution of the Government of Bengal, dated 2nd May 1885.

Annual Report of the Director of the Agricultural Department, Bengal, for the year 1885-86.

Reports by the Bengal Agricultural Department on the system of Agriculture and Agricultural Statistics of the Burdwan, Dacca, Cuttack, and Lohardaga districts.

Dr. Voelcker's Report on the Improvement of Indian Agriculture (1893).

Resolutions by the Government of Bengal on the Board's Annual Reports on the Administration of the Land Revenue and of Wards' estates in the Lower Provinces of Bengal for the years 1886-87 to 1895-96.

This Government's letter to the Board of Revenue, No. 850L.R., dated the 15th February 1895.

SIR ALEXANDER MACKENZIE'S attention has recently been drawn to the insufficiency of the efforts made, and the smallness of the amounts expended in attempts, to introduce agricultural and other improvements in some Government estates and nearly all Wards' estates in Bengal, and His Honour now desires to bring the subject prominently to the notice of the Board of Revenue, Commissioners, Collectors, and Managers, who are responsible for the management of these estates.

2. The Government of India, in their Resolution dated the 30th August 1881, directed that one of the objects to be kept in view by Provincial Agricultural Departments was to be the general improvement of Indian Agriculture, with a view to increasing the general food-supply and resources of the country; and the Government of Bengal, in proposing in 1883 the establishment of an Agricultural Department in Bengal, while admitting that in the matter of agricultural research no real step could, at that time, be made in advance by Government in permanently-settled estates managed by their owners, remarked that the case was otherwise in estates the property of Government and of disqualified proprietors. It was added—

"It is no doubt a truism that before improvements can be introduced into any matter, the existing condition of things should be fully and accurately known; and inasmuch as admittedly we have no full and accurate knowledge on the subject of agriculture in Bengal, it may seem premature to endeavour to improve it. To this it may be said that on some points connected with native agriculture, our ignorance is not such as to incapacitate us from rendering useful service. No one more than the Lieutenant-Governor is willing to admit that, looking to the means and appliances at the disposal of the Bengal raiyat, he usually gets as much out of the soil as it is possible for him to get. So far as non-scientific agriculture is concerned, there is probably but little to teach him. On the other hand, it must not be forgotten that his knowledge is altogether empirical, the best of its kind perhaps, but easily replaced by a better. Indications are not wanting that the raiyat is ready to assimilate this better knowledge, especially as regards the use of agricultural implements and appliances, new staples, better seed, and improved methods of treating produce, if only these innovations are brought within the range of his scanty means, and recommended by successful practice."

* * * * * *

"There are, scattered throughout Bengal, large and valuable properties owned by the Government; the settlement proceedings which from time to time are undertaken bring others upon our hands; year by year the State takes upon itself the management of estates belonging to minor or other disqualified proprietors. The policy of Government in regard to these estates is in theory an enlightened and progressive policy. It cannot, however, be stated that the practice has always coincided with the theory. Hitherto the charge of these estates has been committed to the care of officers without any training for such duties. The Lieutenant-Governor is ready to admit that these duties have often been performed with success; but he is also constrained to say that instances of failure, through imperfect technical education, have not been wanting. No more important duty can devolve upon the Government than the provision of thoroughly efficient managers for its own khas mahals and for the Wards' estates of which it takes charge. The management of these estates should be a model for the imitation of zamindars throughout the Province."

* * * * * *

"Indeed, every Government or Ward's estate presided over by a manager trained in the manner now to be stated, should become itself a nucleus of improved agriculture."

* * * * * *

"If there be a wide field for improvements in agriculture in Bengal, there is also much scope for better management of property coming under Government control, and more hope of an immediate return to labour bestowed in this direction."

* * * * * *

"At the present moment it is to be feared that managers of Wards' estates and Government khas mahals too often think that the collection of the demand and reduction of balances is the sole object of their official existence. The Lieutenant-Governor wishes to instil into the minds of all such officers a higher principle of duty, and by practice as well as by precept to teach them that it is as much their business to attend to the welfare of the tenantry entrusted to their charge as it is to collect rents."

3. As regards the management of Wards' estates generally, and the introduction of agricultural improvements in particular, the Famine Commissioners gave expression to their views, in the passage referred to in the preamble, in the following terms:—

"The estates of minors and other legally incompetent persons, which are under the management of the Court of Wards, have been spoken of as affording a proper field for the introduction of agricultural improvements into the country. The principle which should govern the conduct of Government in respect of these estates should be, in our opinion, that the managers it appoints should not make use of their position to carry on merely experimental farming, but should act as an enlightened but prudent landowner would act in respect to his own property, *by utilising the results of science and adopting any well-tested and clearly-demonstrated improvement*, either by works for adding to the permanent value of the estate, or by the adoption of improved methods of farming. When therefore any improvement in the method of cultivating or preparing any staple crop, or of rearing cattle, or in the construction of implements, *has been proved to be successful*, it might without objection be introduced to the people and popularised by means of its adoption on such estates, but it would obviously be unjustifiable to make their owners responsible for the cost and risk of carrying out experiments which the Government would not undertake itself."

The Government of India and the Secretary of State recorded their entire concurrence in the principles enunciated by the Famine Commission, subject to

the caution that "Wards' estates should not be made fields for experiments, or their surplus income applied to any purposes of which the results were uncertain." It thus appears that the Government of India and the Secretary of State gave their sanction to the principle that Managers of Wards' estates should act as an "enlightened and prudent landlord would act in respect of his own property, by utilising the results of science and adopting any well-tested and clearly-demonstrated improvement."

4. Two distinct funds are provided for the management, improvement, and protection of estates under the management of Government. These are—

I.—A fund of 12 per cent. deducted from the collections in the following classes of estates:—

(*a*) Government estates of all descriptions, whether held khas or farmed.

(*b*) Private estates managed direct by Government or let on farming lease.

Of the 12 per cent. set aside under the orders of the Government of India, 1 per cent. is intended to be devoted to purposes of education, which is made over to the Education Department, 1½ per cent. to communications, which is made over to District Boards, and 2 per cent. exclusively to sanitary improvements. The remaining 7½ per cent. is intended for the management proper and miscellaneous improvements in the estates. The rule is that only works of improvement which will benefit the estates, but cannot be expected to yield a direct return to Government as proprietor, should be charged against this fund.

II.—A separate fund, known as the Agricultural Public Works Grant, of which the amount is sanctioned yearly by Government on the estimates of the local officers submitted through the Board of Revenue. This grant is intended for such works as irrigation, drainage, or embankments, necessary for the increase or maintenance of the land revenue from Government or temporarily-settled estates.

The grant under this head, amounting to about Rs. 50,000 per annum, has recently been amalgamated with the 12 per cent. grant under head I.

5. The approved and frequently-enunciated policy of the Governments of India and Bengal in this matter, being as above described, the question may now be considered, what has been done to give effect to it? The Lieutenant-Governor regrets to observe that very little has been or is being done in this direction, especially in Wards' estates. The following statements show the approximate rentals of Government and Wards' estates under the management of Government officers during the past ten years, and the expenditure on agricultural and other improvements:—

Government Estates, including Estates managed for Proprietors.

Financial year.	Total rental (current) in round numbers.	Expenditure on—		Percentage of total expenditure on improvements (columns 3 and 4), on rental (column 2).
		Miscellaneous improvements.	Sanitary improvements.	
1	2	3	4	5
	Rs.	Rs.		
1886-87	28,89,000	58,000		2·01
1887-88	27,90,000	53,000		1·89
1888-89	28,95,000	83,000		2·87
1889-90	27,73,000	57,000		2·05
1890-91	29,18,000	37,000		1·26
1891-92	32,05,000	1,00,000		3·12
1892-93	33,98,000	79,000	46,000	
		1,25,000		3·67
1893-94	34,09,000	1,17,000	50,000	
		1,67,000		4·89
1894-95	34,84,000	56,000	54,000	
		1,10,000		3·15
1895-96	35,26,000	57,000	54,000	
		† 1,11,000		
Total	3,12,93,000	9,01,000		2·87

* The percentages have been calculated on the rental instead of on the collections, because, one year taken with another, the collections are nearly equal to the rental.

† Column 4, Appendix No. VIA. of the Board's Land Revenue Report for 1895-96, includes figures for Agricultural Public Works. The usual grant from Provincial revenues for this class of improvements is Rs. 50,000 per annum. This sum has therefore been deducted from the total of Rs. 1,07,000 shown in column 4 of Appendix VIA. of the Board's Report for the year 1895-96, in order to show the amount expended from the Improvement Fund in that year. For other years the figures given in the Board's Annual Reports are reproduced, as they did not include the expenditure from the Public Works grant.

Estates under the management of the Court of Wards.

Financial year.	Total rental.	Actual expenditure on improvements.	Percentage of expenditure on rental (*i.e.*, of column 3 on column 2).
1	2	3	4
	Rs.	Rs.	
1886-87	1,02,96,559	69,662	0·67
1887-88	1,02,46,459	43,259	0·42
1888-89	1,03,44,555	58,167	0·56
1889-90	1,00,15,159	66,930	0·66
1890-91	98,29,588	58,404	0·59
1891-92	91,53,100	92,861	1·01
1892-93	92,99,637	1,57,782	1 69
1893-94	97,32,203	1,58,406	1·62
1894-95	92,85,008	1,43,208	1·54
1895-96	93,43,103	1,83,880	1·96
Total ...	9,75,46,371	10,32,562	1·05

It thus appears that the total outlay on miscellaneous and sanitary improvements in Government estates during the past five years (from 1891-92 to 1895-96) was Rs. 6,13,000, or 3 6 per cent. of the current demand. This expenditure shows a great improvement on that of previous years, and is in itself sufficiently large in amount. All that is required in respect of these estates is to see that the works on which expenditure is incurred are of a suitable character, and that they are carried out with care and economy.

The expenditure on Wards' estates was only Rs. 10,32,562, or 1·05 per cent. on the total current demand. But it is to be remembered that this expenditure, in some cases, included outlay on construction of embankments, keeping up of water-courses, and similar works of protection which would ordinarily be carried out by every native landlord, and are absolutely necessary in order to prevent deterioration of the estates. Such works cannot properly be called improvements at all, being merely preventives against deterioration. If the expenditure on works for improving the condition of things that existed before the estates came under the management of the Court of Wards, as distinguished from expenditure necessary to prevent deterioration, were alone to be given, Sir Alexander Mackenzie fears the amount would be insignificant.

6. The orders quoted above in paragraph 3 were intended to give an impetus to the introduction of agricultural improvements in Government and Wards' estates, but His Honour fears that they have been often interpreted in the opposite sense; and that they have been appealed to, not as being authority for the introduction of improvements, but as a sufficient reason for refraining from doing or attempting to do anything in the direction contemplated by the Famine Commission. The orders of the Secretary of State were intended to discourage reckless innovation and undertaking of experiments for the mere sake of change, but did not prohibit the "utilisation of the results of science or the adoption of well-tested and clearly-demonstrated improvements." It is difficult to believe that any competent manager who has any real desire to introduce improvements can seriously maintain that he can find nothing in the estates under his charge that admits of improvement in such matters as irrigation, cattle-breeding, supply of good seed, supply of good drinking-water, and in sanitation generally, without at the same time laying himself open to the charge of wasting Wards' or Government funds on risky or useless experiments.

7. The Lieutenant-Governor is aware that some of the Wards' estates under the management of Government officers are encumbered with debt, and in such cases His Honour recognises that it is the primary duty of the manager to pay off such debt before attempting expensive improvements; but there are many

co

estates in these Provinces which are not in debt, in which, on the contrary, funds are being hoarded to little advantage, but in which little or nothing is being spent on such improvements as an enlightened and prudent landlord ought to and would undertake, and in such cases Sir Alexander Mackenzie apprehends that the failure of managers to propose and carry out works of improvement is due not so much to any difficulty in discovering suitable improvements to suggest as to misunderstanding of their duty, want of energy or unreasoning reluctance to depart from old grooves.

8. As the Government of India has more than once pointed out, enquiry and accurate ascertainment of the existing state of things should precede improvement; but when enquiry has been made by competent scientific experts, the time for action has come, and the results of such enquiry and the recommendations based upon them should not be cavilled at or set aside, without giving them a fair trial, by persons who are neither scientists nor experts. In the Reports referred to in the preamble, the results of elaborate investigations made by trained officers into the existing agricultural conditions in certain districts of Bengal were stated, and certain recommendations were made, but the Lieutenant-Governor understands that no action has been taken on them.

9. His Honour now desires that copies of the Reports noted in the margin be furnished to officers in charge of Government estates, and that the managers of all Wards' estates which are solvent and have a rental of Rs. 25,000 and upwards be directed to purchase copies of them, so that they may make themselves acquainted with the existing system of agriculture and with the suggestions made for the improvement of that system. In Dr. Voelcker's Report, and in the other Reports noted in the margin, will be found many suggestions for action which are beyond the region of experiment or speculation, and which may be acted upon with assured prospect of success.

(1) Dr. J. A. Voelcker's Report on Indian Agriculture (1893).
(2) Report on the Agriculture of the district of Burdwan, by Mr. A. C. Sen.
(3) Report on the Agriculture of the district of Dacca, by Mr. A. C. Sen.
(4) Report on the Agriculture of the district of Lohardaga, by Mr. B. C. Basu.
(5) Report on the Agriculture of the district of Cuttack, by Mr. N. N. Banerjee.
(6) Annual Reports of the Department of Agriculture.

The special attention of managers should be given to the paragraphs of Dr. Voelcker's Report noted below, and the manager of every Government estate and of every solvent Ward's estate should be required to submit annually a scheme for the introduction of such of the suggested improvements as are suited to the particular estate under his charge. These schemes should be examined by the Director of the Agricultural Department in so far as they relate to agricultural improvements, by the Superintendent of the Veterinary Department, in communication with the Department of Agriculture, in so far as they relate to improvement of cattle-breeding, and by the District Engineer or Sanitary Board when they relate to engineering or sanitary works, and after approval by these authorities and sanction by the Board of Revenue, should in future be energetically and carefully carried out. The care and energy and tact displayed by managers in this important part of their duties should form an important factor in judging their efficiency, and no manager should receive promotion or be reappointed to the management of Wards' estates who neglects his duty in this respect.

10. For works of improvement of the kind now indicated, *i. e.*, for agricultural and sanitary improvements, the Lieutenant-Governor directs that at least 3 per cent. of the rental in Government estates be allotted in addition to the annual grant for Agricultural Public Works made from Provincial revenues, and that the expenditure under each of these heads be shown separately in the annual reports. In the case of solvent Wards' estates the same percentage on the rental, or such larger percentage on the surplus that remains after payment of Government revenue, cost of management, &c., as the Board may determine, should be set aside by the Board for similar purposes; and managers should invariably explain, in future annual reports, their failure or neglect to spend on improvements the amounts so allotted.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette*, and that copies of it be forwarded to the Board of Revenue, the Commissioners

of Divisions, the Financial Department of this Government, the District Officers, and to the Director of the Department of Land Records and Agriculture.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Govt. of Bengal.

Paragraphs of Dr. Voelcker's Report referred to in paragraph 9 of the Resolution above.

Paragraphs 38 to 43, as to beneficial effects of planting trees and reservation of tracts for fuel and fodder reserves.
,, 56 to 80. Increase of water-supply to dry tracts, and prevention of harm by over-irrigation in wet tracts, increasing manure-supply.
,, 89, 94 to 96, on construction of reservoirs for water, and of tanks and wells.
,, 100 and 101. Removal of superfluous water, draining of swampy land, and making of irrigation reservoirs.
,, 103. Agency by which improvement of agriculture by better supply of irrigation may be effected.
,, 104. Making of wells.
,, 106. Repair of tanks.
,, 107 to 113. Tuccavi advances.
Chapter VII, paragraphs 116 to 155, on manures.
,, VIII, ,, 160 to 198, on importance of wood-supply for fuel and means of creating fuel reserves.
,, IX, on increase of fodder-supply.
,, X, fodder crops and hedges.
,, XI, improvement of breed of cattle.
,, XIII, selection of good seed, paragraph 308.
311, introduction of new varieties of seed.
312, ,, of new crops.
317, improvement of rice cultivation.
318, ,, of sugarcane cultivation.
319, ,, of potato cultivation.
Chapter XIV, paragraphs 330 to 336, on advantages of the Behcea mill and of evaporating pans, and extension of sugarcane cultivation.

ADMINISTRATION OF WARDS' AND ATTACHED ESTATES FOR 1895-96.

REVENUE DEPARTMENT.—LAND REVENUE.

Calcutta, the 9th October 1896.

RESOLUTION No. 896T.R.

READ—

Report of the Board of Revenue on the Administration of Wards' and Attached Estates for the year 1895-96.

The Board's Report reached Government with commendable punctuality on the 29th of August, two days before it was due.

The total number of estates of all descriptions under the management of the Board during the year 1895-96 was 140 against 146 in the preceding year; the decrease of 6 was in the number of encumbered estates, that of wards' estates remaining the same. There were 74 wards' estates and 55 encumbered estates so managed; the remaining 11 were trust estates, or estates attached under the Bengal Tenancy Act. Ten wards' and 6 attached and encumbered estates were under management for part of the year only, having been taken in charge or relinquished during the year.

Revenue and cesses due to Government

2. As desired by Government in the Resolution on the Report for 1894-95, the figures under the heads of rent and cesses due to superior landlords, and the collection and balances of rent and cesses due to the estates, have been shown separately for estates which were under management throughout the year from those which remained in charge for part of the year only. The total amount of revenue and cesses due by all estates to Government was Rs. 50,39,322, of which Rs. 49,97,899 were paid, leaving a balance, (after remissions amounting to Rs. 242,) of Rs. 41,181. The Pachete Estate in Manbhum, which was taken in charge during the year under the Encumbered Estates Act, was responsible for the greater part of the balance, namely, for Rs. 28,108, but this sum has been paid up since the close of the year. Of the seventeen other estates which are in arrears, nine owed very small sums. The causes of default are various; but only one of these estates, Barutter Hingly, was unable to pay from want of funds. There appears to have been no sufficient excuse for the failure of the Managers of the Burdhankotee and Ishan Chandra Rai Wards' estates in Rungpur and of the Satkhira estates in Khulna to pay up their Government revenue in due time, and the Lieutenant-Governor desires that an expression of his dissatisfaction be conveyed to these officers for their neglect in this respect.

Rent and cess due to superior landlords.

3. The current demand of rent and cesses due to superior landlords by estates in charge throughout the year was Rs. 3,41,549, and the arrear demand was Rs. 62,859. The payments under both current and arrear demand amounted to Rs. 3,46,807, leaving, after remissions, a balance of Rs. 54,648, the payments thus being equal to 101·5 per cent. of the current and 85·7 per cent. of the gross demand. Rupees 33,931, or nearly two-thirds of the entire balance, was due by the Satkhira Estate, which defaulted in this respect in the year 1894-95 also, and was unfavourably mentioned in the Resolution on the Report for that year. It is explained that Rs. 10,298 out of the entire balance against the Satkhira Estate were only nominally in arrear, and were due to disputes of account with co-sharers, which have since been finally settled; Rs. 3,244 on account of patni tenures, held in joint tenancy, could not be paid in before the close of the year in consequence of the co-sharers not coming forward to pay their quota until the sale day; Rs. 20,389 could not be paid for want of funds. The general results, except in Satkhira, where, however, some progress was made in clearing up confusion in the accounts, were not unsatisfactory, as the arrears were reduced by Rs. 8,211, and Rs. 1,480 were paid for the ensuing year in advance. The rent and cesses due by estates in charge for only part of the year amounted to Rs. 1,351, of which Rs. 550 were paid.

Rent and cesses due to the estates.

4. The following statement shows the demand, collection and balances of rent and cesses due to all the estates during the last five years :—

YEAR.	DEMAND.			COLLECTIONS.			PERCENTAGE OF—		Remissions.	Balances.
	Arrear.	Current	Total.	Arrear.	Current.	Total.	Current collections on current demand.	Total collection on current demand.		
1	2	3	4	5	6	7	8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.			Rs.	Rs.
1891-92 ..	77,67,017	91,53,100	1,69,20,117	30,69,365	60,69,371	91,38,736	66·3	99·8	12,12,179	65,69,202
1892-93 ...	62,03,663	92,99,637	1,55,03,300	29,04,156	61,90,739	91,00,895	66·6	97·8	3,05,695	60,96,710
1893-94 ...	68,78,027	97,32,203	1,64,10,230	29,84,402	64,12,911	93,97,313	65·8	96·5	4,35,740	65,77,177
1894-95 ...	65,50,095	92,85,008	1,58,35,103	29,83,014	61,60,326	91,53,340	66·4	98·5	5,67,884	61,13,979
1895-96 ...	61,59,879	93,44,103	1,55,03,982	29,16,194	59,93,431	89,09,625	64·1	95·3	5,90,112	60,04,245

The collections of rent and cesses in the year under report were worse than in any of the preceding four years both in the aggregate and relatively to the demand. The percentage of current collections on the current demand for all estates was only 64·1, and for estates in charge throughout the year 64·6, against the standard of 90 per cent. fixed by Government. The percentage of total collections on the current demand was 95·3 for all estates and 96·4 for those estates only which were in charge throughout the year. The Orissa Division was again the only one that worked up to the fixed standard; there the current collections were 98·5 per cent. of the current demand. The Presidency Division shows the worst results of all, the percentage of current collections on the current demand being only 42·1. In the Kasimbazar Estate in this Division collections reached a percentage of only 26·1, and that estate is principally responsible for poor divisional results; its collections in the previous year also were extremely poor. The low percentage of collections on the total demand in this estate is due to an attempt that was made to settle rents in pargana Sarail by the application of soil class rates to survey areas, resulting in large enhancements and violent disturbance of existing rentals without the consent of the raiyats. The latter adopted the tactics usual in such cases They kept away from the Settlement Officer, and when called upon to pay the rentals settled behind their backs, refused to pay any rent at all. The case affords a strong illustration of the futility of settlement proceedings conducted on such principles. The mistakes that were made are now being rectified, and revised rents, it is reported, are being realised. If Sarail is an instance of the evil results of a bad settlement, Kanika is an equally forcible example of the benefits of a good one. There the rents were moderately enhanced. The Settlement Officer carried the raiyats with him, and the result has been that the current collections amounted to 98·5 per cent. of the current demand and 98·1 on the total demand. There were practically no arrears at the close of the year—only Rs. 2,783 out of a total demand of Rs. 1,78,372, and only the trifling sum of Rs. 428 was remitted during the year.

The general falling off in collections throughout the provinces as a whole is attributed by the Board to the unfavourable harvests of the year, caused by the scanty rainfall in many parts of the country. The Lieutenant-Governor does not think that this explanation, though true so far as it goes, covers the whole ground. The gross collections fell short even of the current demand, and, as pointed out in previous Resolutions, but for remissions arrears would go on increasing. The existence of such a state of things shows a defect in the generally excellent and beneficent administration of the Court of Wards, and vigorous measures should be taken to remedy it. As the first step in this direction, the heavy arrears which a large number of estates carry on from year to year should be carefully scrutinized, in order to write off all irrecoverable or unjustifiable demands. This is a matter to which Government has repeatedly called the attention of all officers responsible for the management of estates. In the Resolution on the Board's Report for the year 1889-90, it was observed that—

"The Lieutenant-Governor considers that greater energy should be shown in the work of retrenching from the accounts, at an early period of the management, demands which cannot be recovered, because they were never vested, or because they are barred by limitation. The

existence of such demands affords the inferior collecting agency an opportunity for embezzlement."

So also in the Government Resolution in the Report for the year 1890-91:—

"The Lieutenant-Governor can only repeat what has often been previously said that every effort should be made to realize such amounts as are likely to be due and the bad debts remitted."

And again in the Resolution on the Report for 1892-93:—

"The Officiating Lieutenant-Governor, while agreeing generally with the above remarks, still thinks that much may be done in the direction of reducing arrear balances, by careful scrutiny of them, by striking off such balances as are not recoverable by law, and balances which, though recoverable by law, the raiyats were never likely to be able to pay."

The Report under consideration shows clearly that these orders have not been fully carried out. The Kasimbazar Estate, with a current demand of Rs. 3,79,352, has arrears amounting to Rs. 5,37,894. The Satkhira Estate in the same Division has an arrear demand of 2¾ lakhs, although the current demand is less than a lakh and-a-half. In the Burdwan Division, estate Barutter Hingly has an arrear demand of over Rs. 9,000 with a current demand of Rs. 5,877. In the Dacca Division, the Annada Chandra Roy and Kishori Mohan Rai estates have each accumulated arrears exceeding twice their annual rentals. The Shewhar Estate shows an arrear of more than two-fold the current demand. In the Tikari Estate, where rent is paid on the bhaoli system, and should therefore be realised promptly when the crops are harvested, the outstanding arrear is still about 81 per cent. of the current annual demand.

It appears to Sir Alexander Mackenzie that satisfactory relations between landlords and tenants cannot exist where, owing to confusion in the accounts, excessive and arbitrary demands or other causes, arrears are allowed to go on accumulating from year to year. Nothing can, in the Lieutenant-Governor's opinion, tend more to discourage habits of thrift, industry, and self-reliance on the part of tenants than the knowledge that it is hopeless for them to expect to pay off the accumulated arrears kept hanging *in terrorem* over them in their landlords' books. Under such circumstances they not unnaturally shirk payment of what they admit to be due and are able to pay and would pay if they felt that thereby they would become free from debt. The retention of irrecoverable arrears demoralises the tenant, while the landlord himself receives less than he would if these irrecoverable arrears were once for all struck off. A manager who shows accumulating arrears in his annual returns is self-condemned. Either the demand is fair and legally recoverable or it is not. If it is fair, a competent manager ought to be able to recover it in full or nearly in full year by year, and if it is not fair or legally recoverable, his first duty should be to put it on an equitable and satisfactory footing. The Lieutenant-Governor is aware that the Board have repeatedly issued injunctions to managers and local officers to act on these principles; but imbued, as local officers often are, with old traditions of zamindari management, it is difficult to get them to obey orders in this matter. A fair example of what these traditions are is furnished by the Paigamberpore estate with its arrear of more than four times the current year's rent, the greater part of which, it is observed with satisfaction, has at last been struck off. The statement given in paragraph 9 of the Board's Report shows that the bad and irrecoverable debts of estates in charge for the entire year, which amounted to Rs. 1,29,381 at the time of taking charge, have risen to Rs. 4,04,405; doubtful and disputed debts have similarly risen from Rs. 48,232 to Rs. 1,48,511. These figures speak for themselves. The total amount of balances due to all estates was Rs. 60,04,245, or over 64 per cent. of the gross current demand. Sir Alexander Mackenzie now directs that the manager of every estate in which the arrear is more than 25 per cent. of the current demand be called upon during the current year to prepare a statement classifying the arrears into—

(*a*) those barred by limitation;

(*b*) those for which the tenants deny liability, which should be sub-divided again into two sub-classes according as the tenants' objections are held to be (1) valid or (2) invalid;

(*c*) amounts admitted and legally recoverable, but impossible of realisation, because of the poverty of the tenants or other adequate cause;

(*d*) amounts which are legally recoverable and which the tenants are at the same time able to pay and ought to be made to pay.

Sums included in (*a*), *b* (2), and (*c*) should be struck off and prompt and effective measures should be taken to recover amounts included in *b* (1) and (*d*).

Where the tenants do not specify the year or kist to which payments are to be credited, they should be credited to arrears till the whole balance is cleared off, and only the surplus should be credited to the current demand; but before this is done, it is absolutely necessary that the manager should fully satisfy himself that the attested arrears are fairly and justly due, and that they are not, as they too frequently are, fictitious and arbitrary. Where tenants are able to pay and refuse to pay rents justly due from them, an example should be made of the more substantial defaulters by selling up their holdings and insisting on possession being given to the purchasers.

Debts due by estates.

5. Debts due by estates which were in charge for the whole year amounted at the commencement of the year to Rs. 28,02,870. Additional liabilities to the extent of Rs. 1,87,929 were ascertained or incurred during the year, the total liabilities of these estates being Rs. 29,90,799. The payments amounted to Rs. 7,23,458, including the repayment to Government by the Deo Estate of a loan of nearly 4½ lakhs. Reductions of debt to the extent of Rs. 35,193 were made by compromise, and the amount outstanding at the end of the year was Rs. 22,32,148. The debts due by estates taken in charge during the year amounted to Rs. 16,47,508, out of which the Pachete Estate in Manbhum is responsible for over 9½ lakhs. Only Rs. 28,491 of these debts were paid during the year.

Management charges and rates.

6. The cost of management, excluding construction and repairs of office buildings, was 7·8 per cent. of the total current demand for rent and cesses, against 7·9 per cent. in the year 1894-95. As in that year, the percentage is highest in Orissa, viz., 15, but no explanation of the highness of the cost of management is furnished. It is probably due to the large commission allowed to sarbarahkars. In the Burdwan Division the percentage was as low as 3·9, as the Burdwan Raj Estate collects most of its large demand under the patni system. There is the less excuse for accumulation of arrears where that system prevails. In the Chota Nagpur Division the cost of management was 8·9 per cent. on the current demand; in all the other Divisions the percentage was above 10. In the Presidency and Patna Divisions, though the collections were bad, the cost of management was 12·7 and 13·9 per cent. respectively.

The amount estimated to be required from all estates on account of the management rate under Act X of 1892 for clerical labour in Government offices and for supervision by superior Government officers was Rs. 1,49,000. The rate fixed for the year was, however, calculated to yield only Rs. 1,45,638, or Rs. 3,362 less than what was required. As there was a surplus of Rs. 1,219 in the accounts of the preceding year, the net deficit would have been Rs. 2,143. The actual deficit was, however, Rs. 5,192, partly on account of increase in the charges in Government offices, and partly because the gross receipts from all estates, which, from the basis on which the rate is assessed, fell short of the estimated collections by over 4 lakhs of rupees. The rules under Act X of 1892 require that the management rate should be realized half-yearly in advance, but the arrear demand at the close of 1894-95 was Rs. 22,378, and at the end of 1895-96, Rs. 33,922. The greater portion of this balance has been recovered since the close of the year. If the rules had been followed, the balance would have been to the credit of the estates, and not against them. It appears doubtful whether the practice of carrying on a running account of the rate from year to year is correct because, when some estates are released and others taken in charge, balances due to the former on account of advance realizations swell the credit of the remaining estates. The Board's attention is requested to this point.

The rate for professional audit of accounts of estates having an annual demand of Rs. 50,000 and over had to be slightly raised during the year,

under review, in order to avoid a deficit. The demand on account of this rate for the year was, however, increased by the inclusion of two estates liable to professional audit, which had previously been overlooked. The gross surplus of the year was Rs. 4,689; but there was an opening deficit of Rs. 4,125, so that the net surplus was only Rs. 564. The remarks made above regarding the objection to carrying on surpluses and deficits from year to year apply to this rate also.

Improvements.

7. The following statement shows the expenditure during the last five years on the various descriptions of improvements:—

	Subscriptions and donations to schools.	Subscriptions and donations to dispensaries.	Maintenance in efficient condition of estates, buildings, and other immovable property.	Improvement of land and property and benefit of ward.	Surveys and settlements.	Total.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1895-96	52,306	38,699	4,11,228	1,83,880	1,69,240	8,55,353
1894-95	50,217	38,564	1,68,808	1,43,208	1,64,705	5,65,502
1893-94	59,844	46,527	2,46,225	1,58,406	2,01,899	7,12,901
1892-93	64,059	36,524	2,16,870	1,57,782	97,104	5,72,339
1891-92	61,155	37,598	1,91,397	92,864	2,67,345	6,50,359

The total expenditure on all heads of improvements, inclusive of that on surveys and settlements, shows an increase of Rs. 2,89,851 as compared with the previous year, and is principally due to an increased outlay on buildings and remunerative works. The expenditure under both these heads was larger than in any of the preceding four years, nearly the whole of the increased outlay on buildings being in the construction by the Burdwan estate of new offices for Messrs. Finlay, Muir and Company in Calcutta. This expenditure might more fittingly have been shown in the column relating to the improvement of property. Taking this item into account, the Burdwan Raj Estate appears to have spent by far the largest amount on reproductive works. The Bhawanipur Estate comes next, with an outlay of Rs. 21,974, and the Kasimbazar Estate spent Rs. 20,543 under this head. The nature of the works is not stated, except that it is reported experiments in crops, principally potatoes and sugarcane, were conducted in 12 estates. The Burdwan Raj Estate sets a good example in maintaining a farm, which is supervised by the Department of Land Records and Agriculture. This farm is reported to have done useful work in teaching improved methods to cultivators and in introducing new staples; especially the Naini Tal potato appears to have become popular in the neighbourhood. The Manager who was at first doubtful of the utility of this farm now writes:—

"Whereas generally good potatoes could scarcely be had in the Burdwan market, now good Naini Tal potatoes are actually sent out of Burdwan. The farm has induced raiyats in the neighbourhood to adopt the method of planting sugarcane in trenches and of ratooning sugarcane."

The Lieutenant-Governor is pleased to see that the remarks of Government on the importance of improvements and the Board's endeavours in this direction have had the effect of increasing the amount spent in this manner. But there is clearly room for further advance, and His Honour would have been glad to have been furnished with more precise information regarding the nature of the improvements shown in column 5 of the above statement. Sir Alexander Mackenzie attaches great importance to the introduction of agricultural improvements in Wards' and Government estates, and has separately recorded his views on the subject in a Resolution of this date.

Now that surveys and settlements of the principal estates have been completed, the Lieutenant-Governor hopes that the work of introducing

suitable agricultural and sanitary improvements for the future benefit of the wards and their tenants will be taken seriously in hand, and that funds will not be allowed to lie idle or be invested in Government paper which might be profitably utilised in lasting improvements on the estates.

Education.

8. The total amount of subscriptions and donations by wards' estates to schools was only Rs. 52,306, or a little more than one-half per cent. on the annual demand. Government contributes one per cent. of the annual demand on its own estates to education, and there appears to be no sufficient reason why the Court of Wards as a model landlord should not do so likewise.

Surveys and settlements.

9. The survey and settlement of the Talipabad, Kujang and Kanika and Dakhin Shahbazpur Estates were completed during the year, but final reports of the first three only have been submitted to Government. Exclusive of those estates which come within the scope of the general operations in Orissa, Bihar and Chittagong, 17 estates were under survey and settlement; in 6 of these aggregating 1,107·61 square miles in area, the survey and settlement are under the supervision of the Director of Land Records.

Certificates and Civil Suits.

10. The following statement shows the working of the certificate procedure during the year 1895-96 and the previous four years :—

Divisions.		Number pending from last year.	Number filed during the year.	Total.	Disposed of during the year.	Pending more than six months.	Pending less than six months.	Total.	Amount of demand covered by the certificates.	Total amount realised by certificates.

	1891-92	13,704	13,299	27,003	17,118	8,107	1,748	9,855	4,75,063	..

NOTE.—The difference between the number of certificates pending at the close of 1894-95 and the number shown as pending at the commencement of 1895-96 is due to the exclusion of 859 certificates on account of certain released estates.

The Board observe that "the number of certificates filed has increased, while the demand covered by them has decreased," but the total number of certificates for disposal, including both those filed during the year, and those which remained pending at the close of the previous year, was less than in 1894-95, and this explains the decrease in the total demand covered by the certificates. The average amount covered by each certificate was Rs. 39, as against Rs. 33 in the preceding year. The total amount realized by the certificates was 45·5 per cent. of the demand covered by them. The Board have during the year, with the approval of Government, issued a Circular relaxing previous orders so far as to allow the use of the certificate procedure in any unsurveyed estate in which there is no doubt as to the accuracy of the demand and which the Board may by a formal order declare to be ripe for the purpose. The number of disposals did not keep pace with the number of institutions in the Dacca, Patna and Presidency Divisions. The total number of certificates filed during the year and pending from previous years showed, however, a continuous and satisfactory decrease, being 13,094 at the end of the year under report against 27,003 in 1891-92.

11. The particulars of civil suits for the recovery of rent and cesses are shown in the following statement:—

Divisions.		Number of suits pending from last year.	Number filed during the year.	Total.	Disposed of during the year.	Pending more than six months.	Pending less than six months.	Total.	Amount of demand covered by the suits.	Amount decreed.	Amount recovered.
1		2	3	4	5	6	7	8	9	10	11
									Rs.	Rs.	Rs.
Burdwan		43	610	653	519	...	134	134	75,466	55,166	10,415
Presidency		19	777	796	772	13	11	24	62,824	53,976	12,943
Rajshahi		64	76	140	59	55	26	81	3,742	3,843	972
Dacca		66	101	167	61	56	50	106	24,031	23,826	4,944

Orissa			2	2		...	2	2	3.6		
Chota Nagpur		87	239	326	211	2	113	115	14,014	7,269	5,923
Total for	(1895-96	383	3,606	4,089	3,314	389	366	755	3,91,909	3,05,603	1,66,086
	(1894-95	309	2,564	2,873	2,425	245	213	458	3,61,115		...

NOTE.—The difference between the number of civil suits pending at the close of 1894-95 and the number shown as pending at the commencement of 1895-96 is due to the exclusion of 58 suits on account of two released estates and the omission of 3 suits in Saran, in respect of which an explanation has been called for.

There was an increase both in the number and the amount of civil suits. 42·6 per cent. of the demand covered by the suits was realized. The increase in the number of civil suits for rent is no doubt due to the restrictions recently imposed on the issue of certificates.

Certificates were filed and civil suits instituted for an amount equal to only 15 per cent. of the aggregate balances due to all estates.

Estates with a rent-roll exceeding Rs. 50,000.

12. There were 24 estates of this description in the charge of the Court of Wards during the year, of which the principal were the Burdwan Estate with a rent-roll of Rs. 45,91,373 and a charge on account of revenue and cesses due to Government amounting to Rs. 34,76,576; the Tikari Estate with a rent-roll of Rs. 7,15,806 and a Government demand of Rs. 2,54,106; and the Kasimbazar Estate with a rent-roll of Rs. 3,79,352 and a Government demand of Rs. 1,00,612 on account of revenue and cesses. The Burdwan Raj Estate continues to be successfully managed by Raja Banbihari Kapur. It maintains a college and a hospital at Burdwan, a higher class English school and a dispensary at Kalna and two smaller dispensaries at Sujamutha in Midnapore and Kujang in Cuttack. The amount spent on improvements was Rs. 21,194, exclusive of the outlay on building in Calcutta. Although the expenditure on agricultural improvements compares favourably with that of the preceding year, the amount is less than might well have been spent by such a vast and flourishing estate, even if due allowance be made for the fact that the bulk of the property is let out in patni tenures. The management charges in this estate on account of its exceptional conditions were only 3·6 per cent. of the current demand. The balance of rent and cesses due to the Tikari Estate is Rs. 5,07,701 after remitting Rs. 64,433 found to be unrealizable. Of these claims Rs. 3,54,235 are reported to be good and in process of recovery. It is noted that the Manager is engaged in scrutinizing this large balance, and the Lieutenant-Governor hopes that this work will be completed with reasonable expedition, that irrecoverable balances will be struck off and the good and recoverable balances realized. The Tikari Ward's Estate maintains a higher class English school and a charitable dispensary at Tikari. The arrear demand of the Kasimbazar Estate was extremely heavy, being Rs. 5,37,894 against a current demand of Rs. 3,79,352. The management charges were high in both the Tikari and Kasimbazar Estates. The expenditure of the latter estate on schools, dispensaries and improvements shows a satisfactory increase as compared with the preceding year. The rent-roll of the estate was increased during the year by Rs. 6,196 on account of the survey and settlement of the Sarail pargana in Tippera. In paragraph 17 of the Board's report it is stated that the revised rental exceeds the rental before settlement by Rs. 17,236; the apparent discrepancy is not explained, but it is probably due to the fact of the difference having been obtained in previous years. This increase was ultimately accepted by the raiyats, though they had combined for a time to oppose it. Taking the administration of the larger and richer estates collectively, the expenditure on improvements,

especially on drainage, sanitary and irrigation works, is far from adequate, and the Lieutenant-Governor would again invite the attention of the Board to the remarks made on this point in the Resolution on their Report for the preceding year and in the resolution on agricultural and sanitary improvements in Wards and Government estates of this date.

Estates taken in charge and released during the year.

13. Part III of the Board's Report deals with estates taken in charge and released during the year. It appears that five wards' estates and two encumbered estates were taken in charge, and five wards' estates and four encumbered estates were released. These figures do not agree with those given in paragraph 4 of the Board's Report regarding the number of estates of each class under management in the year, as compared with the year 1894-95. With the exception of the Pachete Estate in Manbhum, which was brought under the Chota Nagpur Encumbered Estates Act, VI of 1876, the estates taken in charge or released were of minor importance, and their management shows nothing that calls for special comment. The rent-roll of the Bhagwant Narain Sing Estate in Patna, on the date of assumption of charge, was Rs. 21,390, but had been reduced to Rs. 19,371 at the date of release by the commutation of produce-rents. On the other hand, the rent-roll of the Burway Encumbered Estate in Lohardaga was enhanced from Rs. 7,827 to Rs. 11,288 during the period of Government management. The Board describe the principles which have guided them in taking charge of and managing estates in the following passage of their Report:—

"During the past year the Board have been much impressed by the necessity for the exercise on the part of local officers of a sound discretion in recommending that estates should be taken under the charge of the Court of Wards. Though there are many estates to which the Court's management is well adapted, and in which it produces excellent results, there are others in which it is unsuitable and cannot be successful. This is especially the case with small estates, insolvent or bordering on insolvency; here the system is neither cheap enough, nor elastic enough; and occasionally friends who would help a private manager will not come forward to assist the Court of Wards. Another class of cases, of which it is often desirable not to assume charge, is those in which the title of the proposed ward is seriously in question; in such cases the family can undertake responsibilities and adopt expedients which the Court cannot. Mr. Stevens has thought that he has best consulted the interests of the wards themselves by refusing to assume charge, or by surrendering it speedily if assumed, in the case of unsuitable properties.

"In the management of wards' estates, the principle which the Board have desired to follow, and have wished their subordinates to follow, is that these are trust estates to be managed for the benefit of the disqualified proprietor, and that the Court may and ought to act as an intelligent and enlightened proprietor himself would act. Wards' estates are not to be made the means of working out theoretical 'fads' (to use a common but expressive word), but improvements are to be undertaken because they are really improvements to the estate, and of advantage to the proprietor and his tenants. For the Court of Wards or its subordinates to go beyond this would, in the opinion of the Board, be to abuse the control which the law has placed in their hands, and would make the department deservedly unpopular."

Sir Alexander Mackenzie fully agrees with these remarks, but thinks it necessary to add that he fears the natural and proper reluctance of the Board to spend money on "fads" is often interpreted by their subordinates as meaning unwillingness to spend money on real and substantial improvements which would be ultimately more beneficial to the proprietors and their successors than the accumulation of hoards which experience shows are only too often wasted when minors come of age for extravagant and useless purposes.

Encumbered estates in Chota Nagpur.

14. The number of these estates was 54 as against 58 in the preceding year. The collection of rent and cesses due to the estates is shown in the following statement:—

District.	Average annual demand.	Current demand.	Collections.	Percentage of collections on current demand.	Remissions.	Balances.	Advance collections on account of the ensuing year.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.		Rs.	Rs.	Rs.

Manbhum ...	1,58,529	10,74,671	12,33,200	33,482	.....	11,99,718	27,485
Singhbhum ...	1,35,602	3,579	1,39,181	29,962	.. ..	1,09,219	31,296
Total for 1895-96 ...	12,90,139	11,41,047	24,31,186	1,57,313	34,950	22,38,923	1,63,187
Total for 1894-95 ...	11,53,068	3,42,478	14,95,546	1,66,618	39,616	12,89,312	1,63,241

There was a falling off in payments in accordance with the sanctioned scheme, as compared with the preceding year, which is satisfactorily explained by the Commissioner.

15. The Lieutenant-Governor desires to thank the Board for the care and efficiency with which they have supervised the management of estates in their charge. The names of the officers specially mentioned by the Board for efficient management will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal.

M. FINUCANE,

Offg. Secy. to the Govt. of Bengal.

FLOODS IN THE ORISSA DIVISION.

The 8th October 1896.—The following papers are published for general information.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

No. 17P.T., dated Camp Puri, the 21st September 1896.

From—R. C. DUTT, ESQ., C.S., C.I.E., Offg. Commissioner of the Orissa Division,
To—The Secretary to the Government of Bengal, Revenue Department.

WITH reference to your No 3417Agri., dated 27th ultimo, and your telegram of the 5th instant, I have the honour to submit the following consolidated report on the effects of the late heavy floods in this Division, and the measures which have been taken to afford temporary relief, where such relief seemed to be urgently needed.

2. All the rivers of this Division rose after the 20th July last, and reached the maximum height on the 24th and 25th of that month, laying practically the whole country under water. Floods are more frequent in Orissa than in other Divisions, and when they subside within a few days, the damage done is easily repaired.

Floods frequent in Orissa

The people of Orissa are accustomed to such visitations; they take shelter for the time being in comparatively high lands with their property and cattle, and after the subsidence of the water, they repair or rebuild their huts and transplant new seedlings in places where the crops are destroyed. In some years, however, the floods are so heavy and so prolonged that the country remains under water for weeks together, and the crops are utterly destroyed or very seriously damaged. The present year has been a year of such exceptionally heavy and prolonged floods; the country was under water for nearly a month after the 24th and 25th July, and the loss therefore has been exceptionally severe.

In some years, as in the present, they are exceptionally heavy.

BALASORE.

3. The Subarnarekha floods to the north of this district and the Baiturni to the south, while smaller streams, like the Barabalang and the Salendi, cross it in the middle. The flood in the Subarnarekha river began on the 22nd July, reached its maximum height on the 24th and began to subside slowly after the 25th. The whole country was still under water on the 3rd August last, when the Collector, Mr. De, paid a visit to these parts, and the higher lands did not emerge till about the 11th idem.

Northern parts of Balasore district.

4. On account of its rise on the 24th July, the Subarnarekha breached the Bhagrai embankment, the canal flood embankment, the Jumkunda embankment and the embankment No. 3, with the result that the whole tract from Bhagrai to Mirgoda was under deep water when the flood was at its highest on the 25th. The Executive Engineer also made two cuts in the Bhagrai embankment to drain out the water. The tract of the country known as the Sulsa Pant is specially low, and is thus described by Mr. De after his visit to this place—

"At Madhata the first signs of the flood were visible in the collapsed condition of a number of shops and go owns, which had been built at the foot of the Panchpali embankment. This embankment is the southern boundary of the Sulsa *Pant*, a low-lying tract about nine miles in length and one or one-half mile in width; bounded on the east and west by natural sandy ridges, and on the north and south by the Jamkunda and Panchpali

embankments maintained by the Public Works Department. This tract has formed the subject of a good deal of correspondence lately; surrounded as it is on all sides it is protected from ordinary floods, but as the level of the land in the *pant* is lower than that of the outside, owing to the latter being raised by successive deposits of silt, the question of draining the lower parts of the *pant* has become one of great difficulty."

The huts of the raiyats here had been mostly demolished by the floods, and they were living either in new huts erected on the embankments, or under the thatches of the old huts, the walls of which had disappeared. Small holes had been cut in the thatch to serve the purpose of doors.

5. Less damage had been done to the villages on the chars of the Subarnarekha, as the level of these villages is higher than that of the *Pant*; but nevertheless the crops in the low-lying lands had been submerged. Near the Bhágrai outpost the crops had been utterly destroyed in about sixteen villages, and seriously damaged in some fifty villages. The water of the tanks also had been spoilt by flood-water, and cholera had broken out in some places.

6. Eight villages in pargana Bhelorachaur, sixteen in pargana Jellasore, thirty-five in pargana Nampochaur, and eight villages in pargana Kamarda had lost nearly all the crops at the time of the flood. When the waters had subsided a little, endeavours were made to repair the damages done and to transplant fresh seedlings, when the Subarnarekha rose again in the last week of August. This second flood caused a great deal of damage, sweeping away nearly the whole of the newly-transplanted rice. There is little prospect of any rice crop being obtained from the low land of the parganas of Bhelorachaur, Jellasore, Nampochaur and Kamarda. But the loss is likely to be made good to some extent by the *rabi* crop which is expected.

7. All that it was possible to do appears to have been done to give immediate relief to the people of the affected tracts described in the last three paragraphs. At Bhagrai the head-constable rendered much assistance to the people, by removing them and their cattle to places of safety when the embankments were breached. On receipt of news that there was some difficulty in obtaining supplies of food in these parts, the Collector of Balasore, Mr. De, promptly sent to the spot 50 maunds of rice, 5 maunds of dál and 2 maunds of salt, purchased from the residue of a famine fund which is in his hands. Babu Kailash Chandra Rai Mahashoy, a liberal and respected zamindar, offered to provide all the rice, dál and salt required for distribution to his raiyats in taluk Madhupara, in the Sulsa *pant*; and Seth Karim Chand Premji, a Marwari merchant and contractor of Balasore, sent 20 maunds of rice for distribution to the people in distress. The Collector provided boats where communication was difficult on account of breaches. And after the second flood of the Subarnarekha river had subsided, he allotted Rs. 200 out of the amount placed at his disposal from Babu Ramlall Mukherjee's endowment for small grants, to the poorest raiyats for helping them towards re-building their houses and supporting their families.

8. I have taken every opportunity to instruct the Collector to help the raiyats, as far as possible, to transplant fresh seedlings where the crop on the ground has been destroyed; and indeed the raiyats of those parts, accustomed to such floods, have helped themselves to a great extent in this way, and have transplanted rice a second and a third time after the first plants were destroyed. The flood, however, about the latter end of August has done great injury by destroying the newly-planted rice, and in many of the low tracts of lands affected by the Subarnarekha floods very little rice will be obtained.

9. Instructions have also been given to grant loans under the Agriculturists' Loans Act, and steps are being taken accordingly. And the Collector has also made a list of the tanks, the water of which has been spoilt by the flood-water, and in consultation with the Civil Medical Officer of Balasore has sent a sufficient quantity of permanganate of potash to disinfect the water kept for drinking purposes.

10. To sum up, the loss caused in the northern parts of the district has been severe, and the damages done in low tracts cannot be remedied.

But *rabi* crops are expected to be grown in these parts. In the higher lands new seedlings have been transplanted after the first plants were destroyed or damaged, and unless the late rains fail, some outturn, though considerably below the average, may be expected. Temporary help has been given to the most needy among the raiyats, in rice and pulse, and in money grants for re-building huts, and also in the shape of advances under the Agriculturists' Loans Act. There has been very little loss of life or live-stock, although the damage to crops has been exceptionally severe. I do not expect anything like a scarcity if the rains continue a few weeks longer.

Central parts of Balasore district.

11. The central parts of the district along the Barabalang and Salandi rivers have suffered much less than the northern parts. No detailed report with regard to these places is therefore required. Fresh seedlings were transplanted after crops on the ground were damaged, and an outturn, less than the average, may be expected.

Southern parts of Balasore district, Bhadrak subdivision.

12. The southern parts of the district were seriously affected by the floods of the Baiturni river. The Collector went to Chandbally on the 15th August last and made enquiries from the Subdivisional Officer of Bhadrak, the Police Sub-Inspector, the Chakla kanungos and others. He also visited the country along the Coast Canal, the Matai and the Baiturni rivers. He found that the land on both sides of the Matai river, where it joins the Coast Canal, was under water, and the crops were destroyed. About a twelve-anna portion of the paddy crop had been destroyed in the parganas of Aukora, Bhera, Bayang, Kanika, and Kaima. Some lives had also been lost, and 10 or 12 corpses were found in the Matai and the Baiturni rivers. It is, however, not certain whence these dead bodies had been floated down, whether from the district of Cuttack, or from the Tributary State of Keonjhar. There was however no distress or scarcity of food, and the raiyats, except in Aukora and Bhera parganas, did not even want loans. The *bhadoi* crop is estimated at 10 annas.

13. Rai Hari Pallabh Bose, Bahadur, of Cuttack, who has estates in these parts, has come forward and expressed his willingness to stand security for his raiyats to the extent of the loans which may be advanced to them under the Agriculturists' Loans Act. In doing this, the Rai Bahadur has acted with his accustomed liberality, and his action will enable the Collector to effectually help the raiyats. In other instances, where the zamindars have not expressed such willingness, I have instructed the Collector to grant loans on the joint applications of raiyats, according to the Government rules on the subject. On the whole, though the loss in the southern parts of the district has been severe, there is no reason for anxiety, and if the rains continue a few weeks more, a crop, though considerably less than an average one, will be reaped.

CUTTACK.

14. The district of Cuttack has suffered from the floods of the Mahanadi, the Brahmini and the Baiturni, all of which rose simultaneously. The water was highest on the night of the 24th July last, and began to subside very slowly from the following day. It began to rise again a few days later on, and went down again. There were subsequent rises and falls till the latter part of August, and the floods did not finally subside till towards the close of that month.

15. The flood in the Mahanadi river was within a few inches of that in 1892, which is one of the highest on record; while the floods in the Brahmini and Baiturni rivers were higher than was ever known before. But it is rather to the duration than to the height of the floods that the damages in the present year are mainly due. The telegraph masts across the Mahanadi and Kathjuri rivers were swept down, and telegraphic communication was stopped for some days. Letters from Calcutta were also delayed for days, and thus for a time we were practically cut off from the outer world.

16. Kendrapara subdivision, which extends to the east as far as the Bay, has suffered most from these floods. In the Kanika estate they were higher than any previous flood since 1867. The Brahmini and the Baiturni unite and form the Dhamra river, which flows through the estate, and the overflowing of this river has done considerable damage to the estate. In about four-fifths of the estate, the standing crops and the seedlings in seed plots were wholly destroyed, while the loss was partial in the remaining portion. The damage was not less in the Kujang estate belonging to the minor Maharaja of Burdwan. There was a succession of high floods, with the result that the crops and seedlings in low lands were under water for about a month, and were of course utterly destroyed. The crops on the high lands which were not destroyed, bear a very small proportion to those destroyed. In the large and important parganas of Aul and Utikan the damages were not so great. The breach in the embankment of the Patamundi Canal did serious but not extensive damages, as the water passed away sufficiently quickly. Some lands were covered with sand, and altogether a 12-anna of the crops in this subdivision has been destroyed.

Kendrapara subdivision.

17. The damages in the Jajpur subdivision were also considerable, and were most serious in those parganas which now form the basin of the Budha, the Kha-suah, the Brahmini and the Birupa rivers. The area of the tract is estimated at 150 square miles. The total loss in the Jajpur subdivision is estimated at an 8-anna portion of the standing crops.

Jajpur subdivision.

18. In the Sadar subdivision the protected area was not materially affected by the floods. But in the unprotected areas the damage was very great, and things are much the same as in the Kendrapara subdivision.

Sadar subdivision.

19. Writing on the 4th August, Mr. Growse, the Collector of Cuttack, said:—

"Floods are so common in the district that as a rule people are prepared for them, and take steps at the first warning, but in some cases they made difficulties, and delayed in removing their families till the last minute. All over the country there are several families, indeed whole villages, bivouacing out in the open on canal banks and river embankments. This is not, however, unusual in years of high floods. In many cases there must be some difficulty in their getting and cooking food; but on the whole, I have no cause to fear deaths from starvation."

After visting the interior, including some parts of the Kendrapara subdivision, Mr. Growse reported thus about the middle of August:—

"Generally speaking, however, I think I am safe in saying that, although considerable and unusual damage has been done to houses, a few cattle lost, and, in rare cases, damages done to stocks of grains which were not properly protected, there has been no general or wholesale destruction of houses and cattle, and only a few human lives lost by drowning while crossing flooded rivers in dug-outs."

20. Soon after the high flood of the 24th July, Mr. Growse was compelled to send a supply of *chura* and rice, and straw for bullocks, to some people who were stranded and rendered houseless to the south of the Kathjuri river. Similar relief was sent to two other places in the Sadar subdivision where the people were similarly circumstanced, and needed relief urgently. I have instructed the Collector to meet the expenses out of the sum of Rs. 500 which I placed at his disposal out of the Ramlall Mukherjee Endowment Fund. As a rule, however, such help was not needed; the raiyats relied on their stocks of paddy which had been left uninjured, and also received timely help from zamindars and well-to-do people in the interior. The Sub-Manager of Kujang distributed rice and salt to the great relief of those actually in distress during the high floods. A sum of Rs. 400 has been sanctioned in this estate for gratuitous relief, and a sum of Rs. 20,000 for taccavi advances. The Manager of Kanika has similarly got Rs. 200 for gratuitous relief and Rs. 5,000 for

season, the stock of rice in the country ought to be richer than in ordinary years. In the second place the railway line is under construction in Orissa, and will give employment to as many thousands of people as will ever be in need of work, even if there be some distress in particular localities. Our anxiety to provide special relief works is greatly relieved when the railway authorities offer fair wages to all who may seek employment. The railway authorities have been trying, not with complete success, to get an adequate number of steady labourers for their earthwork during the last twelve months and more, and they will be glad to give employment to labour on a large scale, if some partial distress in some localities in Orissa brings thousands of willing labourers to their earthworks in the next cold weather.

30. I have submitted separate reports to Government with regard to the damages done by the floods in Angul and the Tributary States of Orissa. It is needless therefore to go into that subject in the present report.

No. 869T.—R., dated Darjeeling, the 6th October 1896.

From—M. FINUCANE, Esq., Offg. Secretary to the Government of Bengal, Revenue Dept.,

To—The Commissioner of the Orissa Division.

IN acknowledging the receipt of your letter No. 17P—T., dated the 21st September 1896, reporting on the effects of the recent floods in the Orissa Division, I am directed to say that the Lieutenant-Governor notices with satisfaction the care and sound judgment with which you and the District Officers of Cuttack, Puri and Balasore met such local and temporary distress as was caused by them.

REPORT ON THE WINTER RICE CROP IN BENGAL, 1896.

THE following is published for general information.

M. FINUCANE,

The 12th October 1896. *Offg. Secy. to the Govt. of Bengal.*

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

First Forecast of the Winter Rice Crop in Bengal, 1896.

1. *Explanatory.*—The first forecast of the winter rice crop is a report on the state of the crop about the middle of September. In many of the districts from which forecasts were received before or about the middle of September, the rice crop was reported to be suffering from want of rain. It was therefore thought necessary to enquire how the crop had been affected by the heavy rain which fell in the third week of September in most parts of Bengal. The result of the enquiry has been incorporated in the district forecasts, the majority of which now furnish information with regard to the state of the winter rice crop as late as the end of the third week of September. The date up to which information has been obtained has been noted below each district in the district forecasts appended to this note.

2. *Character of the season.*—The following is a brief description of the rainfall during the current season:—

The ante-monsoon showers which usually fall in April and May in East, North and Central Bengal, and are necessary to the cultivation of winter rice in lowlying areas, were on the whole favourable this year. The rainfall during these months is not of much importance to the cultivation of the winter rice crop in other parts of Bengal.

The month of June was marked by excessive rain, due to a series of cyclonic storms, in all districts lying to the south of the Ganges, viz., in Orissa, Chota Nagpur, South Bihar and the districts of the Burdwan and Presidency Divisions. The rainfall during June was normal or nearly so in East Bengal and the southern districts of North Bengal, namely, Rajshahi, Pabna, and Bogra; while the remaining districts of North Bengal and the whole of North Bihar received very little.

Throughout July, August, and the first fortnight of September there was an unusually light rainfall insufficient for the requirements of the winter rice crop in most parts of the country, notably in Bihar and North Bengal, and only a few districts in the south of these Provinces received a full share of rain during these months. The rainfall in Orissa during this period was, on the other hand, excessive; and, combined with heavy rain in Central India, led to a series of floods which destroyed the standing crops over a large area.

The great deficiency of rain in July, August, and the early days of September, when heavy rain is needed for the uninterrupted progress of the transplanting operations and for the growth of the young crop, has resulted in a curtailment of the area brought under cultivation, and in great injury to the standing crop in most parts of Bengal. The heavy rain which set in about the middle of September and continued for nearly a week has improved the prospects of the crop to a certain extent, but it came almost too late to cause any material extension of the area transplanted with rice.

The winter rice crop is also reported to have suffered in parts of East Bengal from insufficiency of flood water due to the failure of the rivers to attain their usual level and to inundate the comparatively high-lying lands. In the important rice-producing tract bordering on the Sunderbans in the Khulna district, the crop is reported to have dried up or to have been killed by salt water, which the rainfall of the present year was insufficient to wash down.

It may be further noted that the comparatively favourable forecasts received from several districts in Bihar and Upper Bengal are dependent for realisation on favourable rain in the month of October, which they are by no means certain to receive.

3. *Area cropped.*—The total area cropped with winter rice this year is estimated at 29,597,900 acres against 30,402,500 acres in 1895. The decrease amounts to 804,600 acres, or 2·64 per cent. on the area cropped in 1895. The last year was, it will be remembered, a year of short rainfall which prevented the full area from being brought under cultivation. The shortcomings of the present year will be more apparent by comparing this year's areas with those of 1894, when the full normal area is believed to have been brought under cultivation. The total area cropped with winter rice in 1894 was estimated at 31,416,100 acres, or an excess of 1,800,000 acres over the estimated area for the current year. The decrease in area is almost general over the entire Province, but is most marked in the districts named in the margin, where it amounts to 50,000 acres and upwards. Only a few districts, *e.g.*, Midnapore, Darbhanga, and Palamau, appear to exhibit a considerable increase in this year's area as compared with the area cropped in either of the two preceding years. It is hardly necessary to point out that the present estimates of areas cannot be implicitly relied upon. There can be no doubt, however, that the short rainfall of the present year has prevented a large area from being brought under cultivation.

	Acres.
Burdwan ..	261,000
Birbhum ..	64,000
Hooghly ...	95,000
Murshidabad ...	77,000
Jessore ...	63,000
Dinajpur ...	279,000
Jalpaiguri ..	57,000
Bogra ...	75,000
Mymensingh	69,000
Monghyr ...	71,000
Bhagalpur .	96,000
Purnea ..	183,000
Sonthal Parganas ...	55,000

4. *Estimated outturn.*—It will be seen on reference to the district returns that only one district—Palamau—has returned a bumper or 20-anna crop. The estimate is perhaps too high. The crop is expected to give an average or 16-anna outturn in eight districts,* a 12 to 15-anna crop in seventeen districts,† and an 8 to 12-anna crop in the rest of these Provinces, with the exception of Darjeeling and Saran, where the outturn is estimated at 6½ and 7 annas, respectively.

* Burdwan, Birbhum, Bankura, Midnapore, Bogra, Chittagong, Angul and Khondmals, and Singhbhum

† Hooghly, 24-Parganas, Rajshahi, Rangpur, Dacca, Backergunge, Tippera, Noakhali, Patna, Gaya, Muzaffarpur, Bhagalpur, Sonthal Pargannas, Balasore, Hazaribagh, Lohardaga and Manbhum.

Taking these Provinces as a whole, the outturn of the present crop may be estimated at between 12 and 13 annas, the same as the estimated yield of the crop of the past year (1895). As noted above, the estimate is dependent on favourable rain being received in October. Should there be no rain between this and the 15th October, the estimated outturn will have to be much reduced, especially in Saran and Champaran.

5. *Areas of short outturn.*—A statement is annexed to this note, showing the districts and subdivisions where the outturn of the winter rice crop is estimated at or below 8 annas: the statement also shows the estimated outturn of the winter rice crop of last year as well as the average estimated outturn of the *bhadoi* food-crops of the current and the previous year. It will be seen that the *bhadoi* food-crops have been very poor in almost every district or subdivision where the winter rice crop has more or less failed through insufficiency of rain or through flood, and that in many of the affected areas, notably in Central Bengal, Shahabad, and Siwan, the winter rice crop of 1895 gave a generally poor outturn.

B. C. BASU,

Assistant Director of Land Records and Agriculture, Bengal.

COUNTERSIGNED.

R. C. LYON,

Offg. Director of Land Records and Agriculture, Bengal.

DARJEELING,
The 4th October 1896.

Preliminary Forecast of the Winter Rice Crop of 1896

1	2	3	4	5	6	7	8	9	10	11
District, with date of submission of forecast.	Subdivision.	Total area of subdivision in acres.	Total area estimated to be under cultivation, in acres.	Approximate normal area under winter rice in acres.	Approximate area under winter rice last year, in acres.	Estimated area under winter rice this year, in acres.	Taking 16 annas to represent the average outturn, how many annas represented the outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
							Annas.	Annas.		
Burdwan 22-9-96.	Sadar	794,880	635,500	434,300	217,100	247,900	6	16	Burdwan, Satgachia and Jamalpur thanas have been greatly benefitted by the canal water, but the rest of the Sadar subdivision has suffered from insufficient rain. In Kalna, the rainfall was not altogether seasonable; the full normal area could not, therefore, be cultivated. In Katwa, the deficiency of rainfall during the sowing time prevented more lands being cultivated, but the outturn is expected to be much better than that of last year, if more rain falls later on. Owing to seasonable rainfall, a greater area than last year's has been sown in Raniganj and the outturn is expected to be better. The recent rain since the middle of September has improved the prospects of the crop in the district, and the outturn will not be far below the average.	
	Kalna	276,480	234,900	128,900	96,000	96,000	5			
	Katwa	235,280	199,600	140,800	105,600	123,200	6			
	Raniganj	420,440	354,700	225,300	169,000	200,000	10			
	District Total ...	1,726,080	1,233,800	928,400	587,700	667,100	7	16		
Birbhum 15-9-96.	Sadar	709,120	900,000	413,000	300,300	390,000	12	16	Owing to insufficient rain at the time of transplanting, the normal area could not be cultivated. There has lately been abundant rain; and if the rain continues, there is no reason why an average crop should not be obtained.	
	Rampur Hat ...	412,800		241,000	150,000	200,000	13	16		
	District Total ...	1,121,920	900,000	654,000	510,300	590,000	12½	16		

1	2	3	4	5	6	7	8	9	10	11
District, with date of submission of forecast.	Subdivision.	Total area of subdivision in acres.	Total area estimated to be under cultivation, in acres.	Approximate normal area under winter rice in acres.	Approximate area under winter rice last year, in acres.	Estimated area under winter rice this year, in acres.	Taking 16 annas to represent the average outturn, how many annas will represent the outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
							Annas.	Annas.		
Bankura ... 10-9-33.	Sadar	1,229,440	428,800	364,800	331,700	356,900	10	16	The rainfall of the year throughout the whole district was copious during the sowing season, and in consequence the acreage under winter rice well nigh reached the average. A full average outturn may also be looked for.	
	Vishnupur ...	448,000	214,000	135,600	70,000	180,000	7	16		
	District Total ...	1,677,440	642,800	550,400	371,700	536,900	9¼	16		
Midnapore 22-9-33.	Sadar	2,120,960	1,229,100	760,000	700,000	758,700	12	16	Owing to seasonable rainfall, the area brought under cultivation this year has been considerably increased, and except in Contai, the outturn is likely to be better for the same reason. In Contai, and in a small area in the Sadar and Ghatal subdivisions, the crops have partially suffered from floods. The shorter outturn in Contai is due principally to loss caused by flood. The estimate is too low.	
	Tamluk	330,400	279,600	230,500	179,000	232,500	0	16		
	Contai ...	543,360	456,300	364,700	364,400	365,300	13	14		
	Ghatal	298,080	146,500	151,800	95,800	151,900	6	16		
	District Total ...	3,292,800	2,111,500	1,501,000	1,329,500	1,495,100	12	15¼		
Hooghly ... 18-9-33.	Sadar	282,809	176,800	141,440	92,000	92,700	10	14	The decrease in the area sown, as well as in the expected outturn in the Sadar subdivision, may be accounted for by the want of timely rainfall which prevented to some extent the transplantation of the seedlings. As regards the other subdivisions, there has been a considerable increase in the area sown this year owing to favourable rainfall, and to the same cause may be attributed the expected increase in the outturn.	
	Serampore ...	219,520	160,000	100,000	44,000	100,000	10	14		
	Jahanabad ...	258,560	167,700	83,800	75,000	80,000	8	14		
	Howrah	110,720	60,000	61,800	32,700	37,800	9	16		
	Ulubaria	215,040	128,000	108,800	67,000	80,000	8	14		
	District Total ...	1,087,360	702,500	495,800	276,800	350,800	9	14¼		

24-Parganas 16-9-96.	Sadar	..	583,760	492,700	303,800	243,000	250,000	10	13	The difference between the normal area and the area sown this year is due partly to want of sufficient rain at the sowing time and partly to floods in the south. But the subsequent rains did much good to the winter rice crop, and the outturn is expected to be better than that of the last year.
	Basirhat		313,600	199,400	117,100	37,000	100,000	8	14

Khulna ... 15-9-96.	Sadar	1,006,336	293,400	239,600	298,600	228,600	10	12	Owing to insufficient rain in August, the paddy sown or planted in the tract of land bordering on the Sundarbans has dried up or been killed by the salt water. Hence though a 13 or 14 anna crop may be expected in the northern part of the district, not even a 4-anna crop can be expected in the south of the district, unless there is heavy rain in the next few days which will allow the land to be replanted.	There was heavy rain in this district after the date on which the forecast was submitted.

							Annas.	Annas.		
Saran ... 23-9-96.	Sadar	658,560	561,500	144,000	144,000	144,000	12	6	Owing to absence of rain in July 1896, the transplantation was late. Many of the seedlings have since dried up. The break of rain in August and beginning of September and the prevalance of west winds has injured the crop. If the rain continues at intervals, the outturn estimated may be obtained. The recent rain (since the 15th September) was not sufficient to do permanent good to the crop, and more rain is required.	
	Siwan	830,560	450,000	176,000	180,000	170,000	10	6

Champaran 21-9-96.	Sadar	971,520	634,000	229,000	229,000	200,000	18	11	The reduction in area this year is due to want of rain for 4 weeks from July 20th to August 18th, which caused many of the seedlings to wither and curtailed the season for transplantation. The low estimated yield is due to late transplantation and want of rain in the end of August and first half of September. Good rain will still be required to secure even this yield.	
	Bettiah ...	1,288,320	788,000	448,000	448,000	360,000	16	11		
	District Total ...	2,259,840	1,422,000	677,000	677,000	560,000	15½	11		
Muzaffarpur. 23-9-96.	Sadar	780,800	614,000	272,000	272,000	272,000	10	12	There was almost no rain for some time, and the crops suffered a great deal. The outturn is therefore expected to be less than normal. The Collector reported on the 22nd September that more rain was still wanted, and that unless there was good rain, the outturn would be largely reduced.	
	Hajipur	493,440	338,000	130,000	130,000	130,000	9	12		
	Sitamarhi ..	648,960	493,000	330,000	330,000	330,000	12	12		
	District Total	1,923,200	1,445,000	732,000	732,000	732,000	10½	12		

Darbhang 16-9-96.	Sadar ...	782,080	324,600	372,000	281,300	300,000	12	12	The figures received from the Police show a reduced area as compared with last year's. I believe this to be incorrect, and have altered the figures. Late rain for transplantation and subsequent drought account for the low outturn. Very good rain is now falling, but much is still required.
	Samastipur ...	468,960	291,600	165,600	125,000	150,000	10	14	
	Madhubani ...	868,360	934,500	651,700	630,000	630,000	12	10	
	District Total ...	2,134,400	1,550,100	1,189,300	1,036,300	1,080,000	11¼	11¼	
Monghyr 22-9-96.	Sadar ...	997,760	698,200	279,000	279,000	209,300	12	10	Owing to want of sufficient and timely rain, the area sown was about ¼th less than that of the last year. The outturn this year will also be low. The recent rainfall has improved the prospects of the crop from 8 to 10 annas in the Sadar and from 9 to 12 annas in the Begusarai subdivision.
	Jamui ...	1,010,520	515,300	364,300	364,000	363,000	4	12	
	Begusarai ...	492,160	369,500	14,700	14,700	14,700	12	12	
	District Total ...	2,500,440	1,582,800	658,000	657,700	587,000	7¼	11¼	
Bhagalpur 21-9-96.	Sadar ...	597,760	464,000	230,000	230,000	200,000	12	14	Scanty rainfall accounts for the figures in columns 7 and 9.
	Banka ...	756,480	588,000	527,400	527,400	500,000	11	12	
	Madhipura ...	752,640	598,000	318,800	318,800	300,000	12	14	
	Supaul ...	597,760	447,000	202,000	202,000	202,000	12	14	
	District Total ...	2,704,640	2,097,000	1,298,200	1,298,200	1,202,000	11¼	13¼	
Purnea 22-9-96.	Sadar	1,645,440	700,000	280,000	282,000	200,000	10	8	The decrease in the area sown is due to the fact that transplantation of winter rice seedlings could not be effected on high lands on account of drought. The decrease in the estimated outturn is due to scanty rainfall. The recent rain will not affect the estimate of outturn.
	Kishanganj ...	881,440	530,000	240,000	240,000	240,000	12	10	
	Araria	688,640	410,000	320,000	320,000	240,000	14	10	
	District Total ...	3,195,520	1,730,000	840,000	842,000	680,000	12	9¼

	District Total ...	3,500,160	1,827,200	895,400	840,200	840,000	10	13		
Cuttack ... 16-9-96.	Sadar	901,120	393,100	389,400	341,900	341,900	14	12	Heavy floods in July and August last submerged large cultivated areas, and destroyed the crops, hence the outturn, in spite of every attempt at transplantation, cannot equal that of last year. The floods also have caused a considerable decrease in the area under cultivation, but it is so difficult to estimate the amount of the decrease that the figures in column 7 have been left the same as last year's. If further reliable figures can be obtained, they will be submitted hereafter. The estimated outturn depends on favourable rain during the next six weeks.	
	Jajpur	706,560	320,700	288,000	288,000	288,000	16	8		
	Kendrapara ...	643,200	410,200	327,700	300,000	300,000	16	12		
	Banki ...	74,240	37,200	23,000	23,000	23,000	14	8

Balasore ... 15-9-96.	Sadar ...	741,120	448,000	409,600	353,100	311,100	16	13	The decrease in area and outturn is due to heavy floods.
	Bhadrak ...	581,120	389,100	300,800	300,800	300,800	16	2	
	District Total ...	1,322,240	837,100	710,400	653,900	611,900	16	13	
Angul and Khondmals. 3-9-96.	Whole district ...	1,075,840	346,300	123,600	126,500	126,500	12	16	The rainfall has up to date been favourable to winter rice, which may yield a full harvest if occasional showers be received in October and November.
Puri ... 30-9-96	Sadar	979,200	460,800	323,800	320,000	309,000	14	10	The slight decrease in area in due to the rainfall being somewhat irregular at the sowing time. In a large portion of the district, the lowlying lands were affected by the floods of July and August. Replantation is, however, rapidly going on; and if the weather continues as favourable as it is now, the outturn may be a little more than that estimated. In high lands the state of paddy is good. In Khurda the work of transplantation is going on in parts where the seedlings were washed away by the flood, and the crops in other parts are in a flourishing state owing to the favourable condition of the present weather.
	Khurda	603,520	351,500	180,600	180,600	180,600	16	14

RESOLUTION ON THE ADMINISTRATION REPORT OF THE ORISSA PORTS FOR THE YEAR 1895-96.

No. 1659Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 10th October 1896.

RESOLUTION.

READ—

The Administration Report of the Orissa Ports for the year 1895-96.

The following statement shows the receipts of the year, as compared with those of the previous year :—

Particulars.	1894-95.	1895-96.	Increase.	Decrease.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Port dues on vessels ...	1,675	3,515	1,840	...
Port dues on mail steamers ...	11,626	16,477	4,851	...
Miscellaneous ...	489	170	...	319
Total receipts ...	13,790	20,162*	6,372	...

* NOTE.—Excludes Rs. 12,000 on account of contribution from Government to the Balasore Port Fund.

There was an increase in the receipts from port dues at all the ports. At False Point the increase is attributed to the larger export of rice, consequent on its cheapness in the district during the year, while at Balasore the increase is said to have been caused by the levying of the port dues once in 30 days instead of once in 60 days, as was formerly the practice.

2. The expenditure during the year under review, as compared with that of the year previous, is shown in the table below :—

Particulars.	1894-95.	1895-96.	Increase.	Decrease.
		3	4	5
	Rs.	Rs.	Rs.	Rs.
Establishment	10,428	8,978	...	1,450
Light-house establishment	3,952	4,274	322	...
Vessels and boats establishment	2,762	2,135	...	627
Dockyard services and supplies	7,981	7,695	...	286
Miscellaneous ...	184	791	607	...
Other charges ...	604	144	...	460
Total charges	25,911	24,017		1,894

3. As in previous years, the expenditure has exceeded the receipts, but from the figures given above, it will be noticed that while the receipts have increased, the expenditure has been reduced. The largest item of increased expenditure, as compared with that of the previous year, was at False Point,

where, under the head of "Dockyard Services and Supplies," a sum of Rs. 3,738 was expended as compared with Rs. 900 in the previous year. At Balasore under this head there was a large decrease, the expenditure being Rs. 3,957 against Rs. 7,081 in 1894-95. This decrease is attributed to the curtailment of the supply of stores to the Port Fund Department, but it is probably due also in some measure to the amalgamation of the appointments of Port Officer and Customs Officer at Balasore which was effected in November.

4. The following table shows the number and tonnage of vessels that entered and cleared during the year, as compared with those of 1894-95 :—

	Year.	Entered.		Cleared.	
		Number.	Tonnage.	Number.	Tonnage.
False Point ...	1894-95	46	74,220	47	75,694
	1895-96	54	97,459	54	97,459
Balasore ...	1894-95	312	80,743	325	82,834
	1895-96	373	1,13,012	387	1,12,989
Puri ...	1894-95	21	26,224	21	26,224
	1895-96	32	42,831	31	40,674

Four hundred and fiftynine vessels in all entered the ports during the year, of which 381 were steamers, and of these all except two were engaged in the coasting trade. Of the 78 sailing vessels, 11 were engaged in foreign and 67 in the coasting trade.

At all the ports there was an increase both in the number and tonnage of vessels which entered and cleared.

5. The following figures show the value of the trade of the ports during the years 1894-95 and 1895-96 :—

	Private Trade.		Government Stores.		Total.	
	1894-95.	1895-96.	1894-95.	1895-96.	1894-95.	1895-96.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Exports	55,11,034	90,02,970	7,584	7,282	55,18,618	90,10,252
Imports	62,36,499	62,93,114	2,39,009	2,61,807	64,75,508	65,54,921
Total ...	1,17,47,533	1,52,96,084	2,46,593	2,69,089	1,19,94,126	1,55,65,173

There was a total increase in the value of both exports and imports. The increase in the exports was due to the expansion of the rice trade. The increase in imports at False Point is said to be due to the introduction of kerosine oil from New York, while at Puri the increase is attributed to the importation of treasure for the purchase of rice.

6. A regular steam service was maintained between Calcutta and Chandballi during the year. Up to the 11th February 1896, five steamers belonging to the India General Steam Navigation Company and to Messrs. Macneill and Company were employed on the run, and after that date another steamer was put on by the former company.

7. Communication between Cuttack, Chandballi and Balasore was kept up throughout the year by the canal steamers of the India General Steam Navigation Company and the Rivers Steam Navigation Company, as in the previous year.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, *Colonel*, R.E.,

Secretary to the Govt. of Bengal.

LIBERALITY OF RAJA RAM NARAIN SINGH BAHADUR OF KHAIRA, DISTRICT MONGHYR.

No. 910T.M., dated Darjeeling, the 9th October 1896.

From—H. H. RISLEY, Esq., C.I.E., Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Bhagalpur Division.

I AM directed to acknowledge the receipt of your letter No. 158P.W.—Ct., dated the 24th September 1896, in which you report that Raja Ram Narain Singh Bahadur of Khaira, in the district of Monghyr, made over to the Magistrate of the district a sum of Rs. 15,000 to be applied to public purposes at his discretion.

2. In reply, I am directed to request that you will be so good as to convey to the donor the thanks of His Honour for his liberality and public spirit. This letter will be published in the *Calcutta Gazette*.

MEASURES FOR PREVENTION OF PLAGUE.

MUNICIPAL DEPARTMENT.—MUNICIPAL.

Darjeeling, the 10th October 1896.

RESOLUTION—No. 937T.—M.

Telegram to Chairman, Howrah Municipality, dated 10th October 1896.

In the Government letter No. 770T.—M. of the 30th September, a copy of which is annexed to this Resolution, the Corporation of Calcutta were addressed on the subject of the reported outbreak of plague in Bombay, and it was suggested that the following measures should be taken under sections 321 to 334 of the Calcutta Municipal Act:—

(1) To declare bubonic plague or any form of typhus fever with glandular swellings to be a dangerous disease, regarding any case of which information should at once be communicated to the Commissioners or their Health Officer under section 321.

(2) To select a site for a temporary Plague Hospital away from the main thoroughfares, and to arrange for its prompt erection should the need arise.

(3) To provide special carts for the conveyance of cases to Hospital, and to arrange for the disinfection of both carts and drivers.

(4) To divide the Town into Sanitary Circles of manageable size, and to place in charge of each a Medical Inspector with full powers to carry out the measures ordered by the Commissioners or Government for preventing the spread of the disease.

(5) To draw up Regulations under section 334 of the Act, in order to give effect to such special measures as might be necessary to prevent, check or mitigate an outbreak of plague.

The Corporation were further informed that the Government would be prepared to appoint a Medical Board to assist the Corporation in devising measures to deal with the disease.

2. While trusting that no necessity for the above measures would arise, the Lieutenant-Governor expressed his entire approval of the steps taken under the Commissioners' orders to give special attention to the cleansing and sanitation of Calcutta. A copy of the letter was sent to the Commissioner of Burdwan, who was directed to instruct the Magistrate of Howrah to move the Municipality to take the necessary action to cleanse and sanitate the town.

3. A case of mild bubonic plague is now reported to have occurred in Howrah, the patient being a Eurasian lad of 17, who arrived from Bombay on the 26th September, and is believed (though this is not certain) to have brought the disease with him. It may be hoped that the case is an isolated one, and that no general outbreak of the disease will take place. But the occurrence of even a single case in a crowded area where the sanitary conditions are such as to favour the spread of contagion, if not actually to generate the disease, convinces the Lieutenant-Governor that the time has now come to adopt further preventive measures.

4. It has accordingly been decided to appoint the following gentlemen to form a Medical Board for the purpose of determining the action to be taken by all executive authorities, whether official or municipal, with the object of preventing and checking the plague throughout Bengal:—

Hon'ble H. H. Risley, C.I.E., Secretary to Government, Financial and Municipal Departments ... ... *President.*
Hon'ble P. Playfair, C.I.E. ...
Hon'ble J. G. H. Glass, C.I.E., Chief Engineer ...
Surgeon-Colonel Ross, Inspector-General of Civil Hospitals ... } *Members.*
Surgeon-Captain Dyson, Sanitary Commissioner
Dr. Mahendra Lal Sirkar, C.I.E. ...
Surgeon-Captain Robson-Scott, Officiating Deputy Sanitary Commissioner, Presidency Circle ... ... *Secretary.*

5. All cases of illness which are believed to be plague should at once be reported to the Board by the Magistrate of the district where they occur, and in Calcutta by the Health Officer of the Corporation. The orders issued by the Board on matters affecting health and conservancy should be deemed to be the orders of Government and carried out with all possible despatch by all executive authorities. Steps will hereafter be taken, if necessary, to legalise all action taken during the present emergency. Nothing should meantime prevent the Board from ordering, or the executive authorities from carrying out, any reasonable measure of precaution, segregation or disinfection which may appear called for.

6. The areas which the Board will have in the first instance to deal with in order to arrest the spread of the plague, are the following:—

(1) The Town of Calcutta.
(2) The Port of Calcutta.
(3) The Municipality of Howrah.
(4) The small Municipalities adjacent to Calcutta and Howrah.
(5) The lines of railway.

7. *The Town of Calcutta.*—The plague has already been declared to be a dangerous disease under section 321 of the Municipal Act, and it is further understood that the measures indicated in the Government letter of 30th September have already been adopted, or are in course of adoption by the Corporation. The Commissioners have asked the Government to select for them a Chief Superintendent to organise and control the conservancy and nuisance branch of the Health Department for three months on a salary of Rs. 1,000 a month. Dr. Banks, Civil Medical Officer of Puri, who possesses in a high degree the requisite qualifications, has been appointed to the post, and directed by telegram to join at once. Sites have been selected in Maniktola for an isolation hospital and a special burning-ghat and burial-ground for plague patients. The Town is being divided by the Health Officer into Sanitary Circles, and Regulations under section 334 of the Act are about to be submitted for the sanction of Government. The Lieutenant-Governor feels sure that the Commissioners, the Executive Officers of the Corporation, and their subordinates will work

cordially with the Medical Board and carry out promptly and fully all the recommendations of that body.

8. *The Municipality of Howrah.*—The Chairman of the Municipality has been instructed by telegram to isolate the patient now suffering from the plague, to destroy his clothes, and to disinfect the house in which he has been living. The Municipality have asked by telegram for the appointment of an officer of the rank of Surgeon-Captain as Health Officer of the town on a salary of Rs. 1,500 a month and carriage allowance; but the Lieutenant-Governor considers that the needs of Howrah can best be met by transferring the present Civil Surgeon, who is in weak health, to a lighter station, and deputing a younger officer, Surjeon-Major Walsh, to carry on the combined duties of Civil Surgeon and of Health Officer with the assistance of an experienced supervisor of the Public Works Department, who will receive Rs. 500 a month with horse allowance and house rent. The Deputy Sanitary Commissioner of the Western Circle was ordered to Howrah to assist in sanitary measures two days before the case of plague was reported to Government.

9. *The adjacent Municipalities.*—The Chairmen of the Municipalities noted in the margin should now report to the Medical Board, through the Magistrate of the district, what steps they propose to take to prevent the plague spreading to their jurisdictions. The Deputy Sanitary Commissioners will be directed to visit these Municipalities as soon as possible, and to explain to the Chairmen personally what ought to be done.

10. *The Port of Calcutta.*—The Government of India have been moved by telegram to sanction the introduction, with such modifications as may be necessary, of the revised rules for quarantine against plague which were introduced in August 1894 for the protection of Calcutta from the importation of plague from Hongkong. It has also been suggested that under section 19 of the Sea Customs Act the export of rags and second-hand clothing from Bombay should be prohibited. Steps are being taken to provide accommodation for plague patients near the quarantine anchorage at Diamond Harbour, and all suspected vessels will be carefully examined and disinfected by the Port Health Officer before communication with the shore is permitted.

11. *The lines of Railway.*—Under section 71 of the Railway Act IX of 1890, a railway administration may refuse to carry persons suffering from any infectious or contagious disease, and under section 117 any such person may be removed by a railway servant from the carriage in which he is travelling. On the 1st October, the Governor of Bombay was asked by telegram whether, in event of the disease increasing, he would be prepared to move the Railway Company to prevent suspected persons from leaving Bombay by rail; and on the next day, His Excellency replied that the Municipal and Railway authorities were in consultation, and that if the disease increased the necessary measures would be taken. The East Indian Railway have already posted native doctors at Asansol, Allahabad and Tundla to scrutinise all passengers, especially those coming from Bombay, while tickets are being checked. The Assistant Superintendent of Emigration at Raniganj and Asansol has been instructed to give all possible assistance to the railway officials in the matter. The Government of the North-Western Provinces and Oudh, and the Administration of the Central Provinces, have also been addressed on the subject.

ORDER—Ordered that copies of the Resolution be forwarded to the members of the Medical Board named in paragraph 4, the Chairman, Calcutta Corporation, the Commissioner of Police, Calcutta, the Bengal Chamber of Commerce, the Trades Association, Calcutta, all Commissioners of Divisions, all Magistrates (direct), and to the Marine Department.

Ordered also—That the Resolution be communicated to the Government of India, Home Department.

Ordered further—That the Resolution be communicated to newspapers and published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

No. 770T.—M., dated Darjeeling, the 30th September 1896.

From—H. H. RISLEY, Esq., C.I.E., Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Chairman of the Corporation of the Town of Calcutta.

I AM directed to acknowledge receipt of your letters noted on the margin, regarding the reported outbreak of plague in Bombay, and in reply to forward, for the information of the Commissioners, copies of a telegram despatched by this Government to the Government of Bombay, and of the replies thereto. The telegram of to-day's date from His Excellency the Governor shows that the character of the disease is still open to question; that active measures are being taken by the Bombay Government to deal with it; and that all unnecessary panic or excitement regarding it is much to be deprecated. At the same time it is obviously desirable to take every reasonable precaution to prevent any outbreak of the disease in Calcutta, and to detect at the earliest possible moment any cases that may occur. Under the provisions of section 37 (5) (*h*) of Bengal Act II of 1888, the preventing or checking the spread of dangerous disease is one of the obligatory duties of the Municipality, and sections 321 to 334 of the Act contain the detailed provisions of law on the subject. The Lieutenant-Governor will be quite ready to sanction any measures which the Commissioners may desire to initiate under those sections. To begin with, it appears desirable to declare that bubonic plague or any form of typhus fever with glandular swellings is a dangerous disease, regarding any case of which information shall at once be communicated to the Commissioners or their Health Officer under section 321.

No. 4042, dated the 25th September 1896.
No. 4056, dated the 26th September 1896.

2. The next step is for the Commissioners to select a site for a temporary Plague Hospital away from the main thoroughfares, and to arrange for its prompt erection should the need arise. The Hospital should be built of matting and T-iron or bamboos in blocks to contain 10 patients each. Provisional contracts could no doubt be arranged for the rapid construction of such a building if required.

3. I am to say, with reference to a query irregularly addressed by the Health Officer to Government direct, that the Campbell Hospital cannot be used for the purposes of a Plague Hospital.

4. The Commissioners should, if the disease breaks out, have special carts (drawn by bullocks and specially marked) provided, one at each police-station, for the conveyance of cases to Hospital. Provision for disinfecting both carts and drivers in the vicinity of the Hospital after each journey would be necessary.

5. If the disease appears, the Town will have to be divided into Sanitary Circles of manageable size, and a Medical Inspector placed in charge of each, with full powers to carry out the measures that may be ordered by the Commissioners or Government for preventing the spread of the disease. Action under section 334 of the Act will then be necessary, and the Government will be prepared to appoint a Medical Board to assist the Municipality in devising measures to deal with the outbreak.

6. The Lieutenant-Governor trusts, however, that no necessity for such measures will arise. Meantime he entirely approves of the steps that are being taken under the Commissioners' orders to give special attention to the cleansing and sanitation of the Town. The Municipality of Howrah will be directed to to take similar steps.

7. It is premature at present to propose any interference with, or medical inspection of railway passengers. Orders on the subject of arrivals by sea will be issued by the Marine Department.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS OF CALCUTTA FOR THE YEAR 1895-96.

MUNICIPAL DEPARTMENT.—MUNICIPAL.

Darjeeling, the 10th October 1896.

RESOLUTION No. 927T.M.

READ—

The Administration Report of the Commissioners of Calcutta for the year 1895-96.

Read again—

The Report for the year 1894-95, and the Resolution recorded by Government thereon.

The Report which was due to Government on the 31st July was not received till the 14th September, a delay of six weeks, of which no explanation is given. This omission is the more to be regretted, as the delay in the submission of the Annual Report of the Commissioners has often been commented upon, and was specially noticed in the Resolution on the Report for the previous year. The Lieutenant-Governor is constrained to repeat what was then said that with the means at their disposal the Commissioners ought to be able to submit their Report in proper time, and he trusts that they will endeavour to do so in future.

2. Mr. J. G. Ritchie held the post of Chairman of the Corporation throughout the year, having been confirmed in it on the death of Mr. H. Lee. Since the close of the year he resigned the appointment, and was succeeded by Mr. H. C Williams, by whom the present Report is submitted. Changes have also taken place in the offices of Vice-Chairman and Engineer. Babu Gopal Lall Mitter, who for many years held the post of Vice-Chairman, retired in January last, and was succeeded in that office by Babu Nilamber Mukerji. Mr. Kimber, who held the post of Engineer to the Corporation since the 1st July 1876, retired in April 1896, and Mr. Hughes, late Chief Engineer, Public Works Department, has been appointed to succeed him. Since the close of the year the Hon'ble Prince Sir Jehan Kadir Mirza Muhammad Wahid Ali Bahadur, K.C.I.E., one of the appointed Commissioners, has died, and the Lieutenant-Governor shares the regret expressed by the Commissioners at the loss of one of their most esteemed colleagues.

3. *Meetings and attendance of Commissioners.*—The total number of meetings of all kinds held by the Commissioners was 215 against 183 in the previous year. This total included 51 general meetings against 27 in the previous year, 53 meetings of the General Committee, 72 of Standing Committees, 13 of Special Committees, and 26 of Sub-Committees. The Lieutenant-Governor is glad to notice an improvement in the attendance of Commissioners at meetings. The number of Commissioners attending more than 50 meetings rose from 17 to 33. The most regular attendants were Babu Radha Churn Pal, 136 meetings; Babu Norendra Nath Sen, 126; Maulvi Badruddin Haider, Khan Bahadur, 118; Babu Priya Nath Mullik, 113; Babu Jadoo Nath Sen, 111; Babu Nolin Behary Sircar, 109; Babu Devapersad Sarvadhikari, 108; Babu Lal Behary Bysack, 100; and Babu Joygobind Law, 100. The average percentage of attendance among the elected Commissioners was 58 against 55 in the previous year, that among appointed Commissioners 43 against 46 last year, the attendance of those representing the Port Commissioners, the Trades Association and the Bengal Chamber of Commerce combined being 43 against 46 in 1894-95.

4. *Proceedings of Commissioners.*—The principal subjects which came before the Commissioners in general meeting were the temporary scheme for connecting

the Suburbs with the Town system of sewers, the disposal of the sewage of Fort William, the establishment of a dhobikhana, the improvement of cow-sheds, and the final settlement of the question of the statutory three lakhs to be expended annually on suburban improvements. Some delay occurred in the adoption of Mr. Baldwin Latham's temporary scheme for dealing with the sewage of the Suburbs, but towards the close of the year the estimates were passed and the works were commenced. Pending their completion, the night-soil of the Suburbs was trenched up to the 1st March 1896, on certain land belonging to the Port Commissioners, and since then at the Bhatchala ground near the Budge-Budge road, a site which was abandoned in July 1895 in consequence of flooding. The disposal of the sewage from the Fort is a question of some moment, owing to the inconvenience and danger to the health of the Town of the existing system of carting the sewage through the streets to the depôts at Sealdah and Hastings, and it is satisfactory to know that the Commissioners have taken the matter into consideration. The suggestion to construct a sewer which will connect the Fort with the Town system of sewage seems to offer the best solution of the difficulty. Besides obviating the necessity of carting the sewage through the streets, this will prevent the discharge of liquid sewage into the Hooghly, a source of pollution of the river which has long been complained of. The scheme for the establishment of a dhobikhana or Public Wash-house, which was initiated by Sir Henry Harrison in 1889, has at length been sanctioned, and the work is said to be progressing. The insanitary condition of many of the cow-sheds in the town has for years past been a source of danger to the public health, and the Lieutenant-Governor trusts that the Sub-Committee appointed to enquire into the subject will lose no time in devising some effective means of dealing with a state of things which has a constant tendency to disseminate epidemic diseases. The question of the adjustment of the three lakhs to be spent annually on the Suburbs has been finally settled, and the following statement shows how the account has been made up from the year of the amalgamation up to the close of the year 1895-96:—

	Rs.	A.	P.	Rs.	A.	P.
During 1889-90—						
Interest on water-supply expenditure	78,390	0	0

5. *Loans.*—The loan liability of the Corporation at the commencement of the year was as follows:—

	Rs.	A.	P.
Unpaid balance of 6 per cent. debenture loan of 1866	5,000	0	0
5 per cent. debenture loans	1,44,01,900	0	0
4½ ditto ditto	30,48,300	0	0
	1,74,55,200	0	0
Balance of consolidated loans from Government ...	48,61,793	0	4
Total ...	2,23,16,993	0	4

A new loan of 18 lakhs, bearing interest at 4 per cent. and repayable in 15 years, was raised by the Commissioners during 1895-96 and devoted to the following purposes:—

	Rs.
For Harrison Road	4,50,000
„ drainage (miscellaneous)	4,00,000
„ extension of water-supply	9,00,000
„ town and busti improvement	50,000
Total ...	18,00,000

Rupees 2,60,425-7-8 of the consolidated loans from Government were repaid during the year, leaving a balance of Rs. 2,38,56,567-8-8 as the loan liability of the Corporation at the close of the year. Against this they had in their reserve funds and in the special fund for the repayment of the loan of 1866 a total sum of Rs. 15,61,606-5-4. Since the close of the year the Corporation have, with the sanction of the Government of India, raised a further loan of 20 lakhs bearing interest at 3½ per cent. and repayable after 15 years.

6. *Income and Expenditure.*—The following statement compares the receipts and expenditure of the Municipality for the past two years:—

Receipts.

	1894-95. Rs.	1895-96. Rs.
General rate at 9½ per cent. ...	16,93,235	17,45,205
Sewage rate at 2 „ ...	3,56,618	3,67,683
Water rate at 6 „ ...	10,69,443	11,02,295
Lighting rate at 2 „ ...	3,56,483	3,67,437
Total of consolidated taxation at 19½ per cent.	34,75,779	35,82,710
Taxes on trades and professions, carriages and animals, &c.	5,41,531	5,45,274
Municipal market receipts	1,30,823	1,36,996
Receipts from the sale of water ...	1,06,905	1,25,541
Conservancy receipts	65,003	67,759
Road Department receipts	35,621	36,477
Slaughter-house receipts	44,522	45,062
All other receipts	1,12,293	1,30,964
Total ...	45,12,477	46,70,783

Expenditure.

	1894-95.	1895-96.
	Rs.	Rs.
Interest on loans ...	5,35,717	5,45,761
Contribution for repayment of loans	2,10,777	2,15,517
General establishment	3,82,427	4,01,893
General office expenditure	87,494	1,02,469
Road Department	4,36,533	4,28,744
Street watering	90,583	86,874
Gowkhana	2,10,665	1,93,343
Conservancy	1,43,909	1,59,152
Busti cleaning	97,978	98,261
Sewer cleaning and relaying charges ..	71,957	97,553
Hospital and vaccination charges ..	69,908	71,421
Suburban improvements	1,22,170	1,70,228
All other expenditure from the general fund	2,58,257	4,15,759
Sewage rate charges	2,62,439	2,72,309
Water rate charges	10,63,845	11,50,578
Lighting rate charges	4,28,277	4,17,297
Total ...	44,72,936	48,27,159

The total income exceeded that of the previous year by Rs. 1,58,306, the increase being shared by all funds, especially the general fund and the water-rate fund, which showed increases of Rs. 84,335 and Rs. 52,062 respectively. The increase in all the funds is ascribed to enhancement on revaluation and better collections. The total expenditure exceeded that of the previous year by Rs. 3,54,223. The increases were chiefly under office establishment, Rs. 18,559; general office expenditure, Rs. 14,982; Conservancy, Rs. 15,242; Sewer cleaning, Rs. 25,596; Town improvements, Rs. 50,000; Suburban improvements, Rs. 48,058; and working water-works pumping stations, Rs. 68,665. In all cases the excess expenditure has been satisfactorily explained.

7. *Financial position.*—The year opened with a net cash balance after adjustment of Rs. 4,18,315 at credit of the Revenue Funds and a deficit in the Capital Fund. During the year the total receipts of the Revenue Funds, as shown in paragraph 6 above, amounted to Rs. 46,70,783, and the expenditure to Rs. 48,27,159, leaving a net balance of Rs. 1,56,376 to be carried to account; while the receipts of the Capital Funds, including a new loan of Rs. 18,00,000, amounted to Rs. 21,19,530, and the expenditure to Rs. 17,74,868, leaving a net credit balance on the capital account of Rs. 3,44,662. Excluding advances and the value of stores, the net cash balance at credit of the Revenue Funds was Rs. 2,86,819, or Rs. 1,31,496 less than at the close of the previous year.

8. *Assessment and collection of the consolidated rate.*—The revaluation of houses, lands and bustis in the town after the disposal of appeals filed under section 135 of the Calcutta Municipal Act resulted during the year in a net increase of Rs. 2,99,557. The assessed annual valuation of the town on the 31st March 1896 therefore stood at Rs. 2,01,40,565 against Rs. 1,98,41,008, the figure at which it stood on the 31st March 1895. Considerable progress was made in the disposal of objections against enhanced assessments, with the result that out of a total of 1,996 cases, including 1,382 remaining over from the previous year, 1,105 were disposed of, leaving 891 pending at the close of the year.

The current demand of the consolidated rate was Rs. 38,15,233 against Rs. 37,61,513 in the previous year, showing an increase of Rs. 53,720 due to the revision of assessments, but there was an outstanding balance of Rs. 5,88,845 remaining from the previous year, so that the gross demand for the year was Rs. 44,04,078. The gross collections amounted to Rs. 35,85,192, or a percentage of 81·40 on the gross demand, against a percentage of 81·50 in the previous year. The incidence of the consolidated rate per head of the population was Rs. 5-14 against Rs. 5-12-8 in the previous year, and that of the total municipal taxation Rs. 6-15 against Rs. 6-11-6.

9. The following statement shows the progress of demand and collections during the past five years:—

Years.	Outstanding balance of consolidated rate bills on 1st April.				Total.	Current demand for the year.	Gross demand, including balance.	Gross collection.	Percentage on gross demand.	Arrears, *i.e.*, column 8—column 9.
	Collector.	Joint-Collector.	Warrant Officer.	Assessor.

1894-95 ...	82,745	24,496	3,23,463	75,900	5,06,666	37,61,513	42,67,579	34,79,917	81·50	7,87,662
1895-96 ...	1,08,607	28,475	3,64,255	87,508	6,88,845	38,15,233	44,04,078	35,86,128	81·40	8,17,950

Out of the total arrears shown in column 11, Rs. 2,11,148 were remitted or cancelled during the year, leaving uncollected a sum of Rs. 6,06,802, the bills for which were distributed as follows:—

	Rs.
Collector	84,436
Joint Collector	27,687
Warrant Officer	3,81,568
Assessor	1,13,111
Total ...	6,06,802

Of the total collections made in each department, 85·44 per cent. of the demand were received in the Collector's department, 83·09 per cent. in the Joint-Collector's department and 33·10 per cent. in the Warrant Department, against 85·33, 82·54 and 32·50, the percentages of the previous year. The work of the Collector's department continued to improve, although the amount transferred to the Warrant Department exceeded that of the previous year by Rs. 30,342. The collections amounted to Rs. 27,40,685 against Rs. 26,76,776 in the previous year, and the balance outstanding at the close of the year after adjustments was Rs. 84,436 against Rs. 1,08,607. The work of the Joint-Collector's department also shows some improvement. During the year Rs. 6,25,358 were realised against Rs. 6,09,413 in 1894-95, Rs. 73,939 was transferred to the Warrant Department against Rs. 75,503, and Rs. 27,687 remained outstanding at the close of the year against Rs. 28,476. The general question of the efficacy of the present methods of collecting municipal dues in Calcutta has been raised by the Corporation in a separate letter which is being considered in communication with the Government of India. In that letter the Commissioners show that the outstanding balance of the consolidated rate has risen within the last seven years from Rs. 2,92,198 to Rs. 6,06,024; while the annual reports show that during the last three years the amounts remitted and cancelled have come to Rs. 6,36,330, or an average of Rs. 2,12,077 per annum. A system under which a proportion of the total demand varying from 5·26 to 6·17 has to be remitted as irrecoverable every year, can hardly be supposed to be free from serious defects; and the Commissioners themselves admit that the organization of the Warrant Department "has not been as complete and efficient as it should be." It is understood that a Sub-Committee has been appointed to inquire into this branch of the question, and the Lieutenant-Governor trusts that they will not stop short there, but will seriously consider whether a large proportion of the arrears which have accrued cannot be traced to the practice of deferring the issue of notices of demand until after the close of the quarter on the first day of which the rates became due.

10. *License and Registration Department.*—The following statement compares the gross receipts under the several heads in this department during the past two years:—

	1894-95.			1895-96.		
	Rs.	A.	P.	Rs.	A.	P.
I.—Tax on trades and professions ...	3,44,183	14	9	3,45,564	12	2
II.—Tax on carriages and animals ...	1,44,004	4	1	1,44,739	8	7
III.—Cart registration fees ...	72,760	8	0	77,616	8	0
IV.—Fees for the removal of trade refuse	61,351	2	0	64,537	2	0
V.—License fees for cow-sheds, &c. ...	53	0	0	53	8	0
VI.—Registration fees for hackney carriages, &c.	19,382	2	0	19,354	6	0
VII.—Miscellaneous receipts ...	688	14	0	1,031	6	0
VIII.—Fines under section 90 of the Calcutta Municipal Act ...	8,027	11	4	7,283	2	9
XI.—Fines under section 80 of the Calcutta Municipal Act ...	1,043	0	0	1,220	8	0
Total ...	6,51,494	8	2	6,61,400	13	6

There was an increase of Rs. 10,000 in the total receipts to which all heads, except VI and VIII, contributed. The total number of licenses for professions, trades and callings issued during the year was 27,562 against 25,098 in the previous year. The number of licenses issued for carriages was 5,245 against 5,236, and that for animals 6,877 against 6,785. The number of hackney carriages registered was 3,607 against 3,594, the increase being in the number of second class carriages. During the year an attempt was made to bring about an improvement in the style and condition of hackney carriages by offering prizes of different values for the best turn-out in each class, but the competition does not appear to have been very keen, as there were only 16 competitors, all of whom obtained prizes.

11. *Survey.*—The work of the Surveyor's Department is satisfactorily reported on. Fifty-nine surveys were made during the year in connection with proposed improvements and boundary disputes, and about 229 cases of encroachments and demarcation of properties abutting on public grounds, besides 378 miscellaneous cases, were enquired into and reported on.

12. *Market, lighting, printing.*—The total receipts from the Municipal Market during the year amounted to Rs. 1,33,833 against Rs. 1,31,043 in the previous year, and the profit derived by the Commissioners from this source, after paying all expenses, was Rs. 1,13,049 against Rs. 1,11,933 in the previous year. A desirable addition to the market in the shape of a new poultry range, which is estimated to cost Rs. 44,000, is now under construction. The numbers of gas and oil lamps in Calcutta at the close of the year were 6,254 and 2,046, respectively, against 6,079 and 1,953 in the previous year. The actual cost of lighting was Rs. 3,91,460 against Rs. 3,86,159, showing an increase of Rs. 5,501 due to the increased number of lamps. The electric lighting of Harrison Road is stated not to have been a success, and the subject will be re-considered in connexion with the general scheme for lighting Calcutta by electricity. The Printing Department continued to work well, and yielded a net profit to the Corporation of Rs. 4,488.

13. *Litigation.*—The number of fresh civil suits for the recovery of dues in which the Corporation appeared as plaintiff during the year was 80, the total amount involved being Rs. 32,327. They also appeared as plaintiff in 52 cases pending from the previous year. Of the 52 pending cases decrees were obtained in 49 cases, 1 was compromised and 1 was dismissed; the remaining case is expected to be amicably arranged. Of the 80 new suits instituted during the year, 49 were decreed, 5 were compromised, and 26 remained pending at the close of the year. The number of civil suits in which the Corporation appeared as defendant was 4. Of these, 1 was compromised, and the remainder were undisposed of during the year. There

were 15 appeals to the Small Cause Courts under section 137 of the Municipal Act against assessments of houses and lands, with the result that in 6 cases the assessment was reduced by the Court, 3 were arranged out of Court, 1 was withdrawn by the appellant, 4 were dismissed with costs, and 1 remained pending at the close of the year. The number of cases instituted by the Corporation in the Police Court was 19,785 against 16,941 in the previous year, showing an increase of 2,844, which was contributed by all departments, especially the License Department, which showed an increase of 2,227 in the number of cases instituted by it over the number of the previous year. Of the total number of cases instituted, 10,064 were successful, 796 were unsuccessful, 5,328 were withdrawn or struck off, and 3,597 remained pending at the close of the year. The cost of litigation undertaken by the Corporation during the year amounted to Rs. 22,413 against Rs. 33,203 in the previous year.

14. *Education.*—A sum of Rs. 3,250 was spent by the Commissioners in aid of primary education during the year, the money being distributed among 63 schools in several wards of the town. In view of the large expenditure which the Commissioners will now be required to incur for the improvement of the sanitary condition of Calcutta, the Lieutenant-Governor does not desire at present to press them to make any substantial addition to their contribution to the cost of primary education.

15. *Town and busti improvement.*—The total amount expended on town and busti improvements during the year was Rs. 74,084 against Rs. 76,138, Rs. 92,102, and Rs. 1,41,730 in the three preceding years. The Capital Fund from which this expenditure is met opened the year with a balance in hand of Rs. 12,139. The receipts during the year amounted to Rs. 1,03,589, and the balance at the close of the year was Rs. 41,663. Of the total amount expended Rs. 53,041 represents expenditure on town improvements which consisted chiefly in the widening of Council House Street and Dalhousie Square, south, and opening several new roads, and Rs. 21,043, expenditure on busti improvements, such as the construction of roads and sewers, construction of bathing platforms, tank filling, &c. Rupees 15,441 was spent in the improvement of the bustis in Hastings. Towards the close of the year a destructive fire broke out at Kidderpore, which reduced some 11 blocks of bustis to ashes. In reconstructing these the opportunity has been taken by the Commissioners to remodel the bustis and introduce sanitary improvements, and they have sanctioned an expenditure of Rs. 10,000 from the municipal fund for filling hollows and cutting drains.

16. *Engineer's Department.*—The supply of filtered water was increased by 585,683 gallons a day, and that of unfiltered by 885,201 gallons. About three and a half miles of pipe were added to the distribution system for filtered water, making the entire length of water main 310½ miles. The number of premises connected was 26,312. The average daily supply of filtered water was 20,284,181 gallons, giving a daily consumption per head of the population of 50·09 gallons for the Town proper and 20·11 gallons for the added area. The length of the unfiltered water mains was increased by one and a half miles, and the total length of these mains is now a little over 75 miles, with which are connected 1,216 premises, 151 public conveniences, 86 bathing platforms, 289 sewer flushing chambers, and 2,911 ground hydrants for road watering and sewer flushing purposes. The daily supply of unfiltered water was 5,692,151 gallons, giving a daily consumption per head of 13·43 gallons.

17. *Health Department.*—The number of births recorded during the year 1895 was 10,945, which is the lowest on record since 1889. The ratio per mille of population was 16·0 against 16·8 in 1894 and 18·4, the average of the previous five years. The number of deaths on the other hand rose from 22,441 in 1894 to 27,031 in 1895, and was the highest on record since 1889. The ratio of deaths was 39·6 against 32·9 in 1894 and 29·82, the average of the quinquennium 1889 to 1893. The increase in the mortality is said to be due to an exceptional rise in fevers and small-pox and an increase of cholera and bowel-complaints. Of the total number of deaths recorded 11,345 were from fevers against 8,963 in 1894, 2,099 from cholera against 1,955, 2,220 from small-pox against 405, 3,269 from dysentery and diarrhœa against 3,136, and 8,098 from all other causes against 8,242. The

Health Officer ascribes the high rate of mortality from fevers in the town proper to the defective condition of the sewerage system, and in the suburban area to the naturally waterlogged condition of the soil, which is rendered worse by the existence of numerous tanks and dhobas, the waste of water consequent on the introduction of the water-supply, and the want of drainage, all of which causes indicate the direction in which remedial measures are required. Of the 2,099 deaths from cholera 1,302 occurred in the town proper and 797 in the suburbs. The mortality was highest in March and April, in which months the numbers of deaths were 326 and 394 respectively.

Every precaution was taken to prevent the use of water found to contain *coma bacilli* and to check the spread of the disease in infected localities. Monsieur Haffkine's method of inoculation as a prophylactic against cholera was carried on during the year, and 2,038 operations were performed. In a note appended to the health report for the year, Dr. Simpson examines the evidence as to the efficacy of this process, and expresses his opinion that "by precise observations it has been proved that the anti-choleraic inoculations reduce the mortality in the first four days by an average of 3·24 times, and that the people inoculated after this period acquire a protection which for a year at least renders them 22·62 times safer than the uninoculated." There was a severe epidemic of small-pox in Calcutta during the year under report. The disease which had taken its rise at the latter end of 1894 continued to rage till it reached its climax in March and April 1895, the numbers of deaths in these months being 770 and 564, respectively. Of the 2,220 deaths recorded 420 were reported as inoculated, 501 as vaccinated, 3 as previously having had small-pox, and 1,217 as unprotected. During the epidemic additional medical aid was employed by the Corporation and all necessary measures were adopted to arrest the progress of the disease. Vaccination was vigorously pushed on in infected localities, and houses in which cases of small-pox had occurred were promptly disinfected, the bedding and clothes of patients being destroyed. The number of persons vaccinated during the year was 54,982 against 17,335 in 1894, 88·88 per cent. of the primary vaccination cases proving successful. The mortality from dysentery and diarrhœa was higher than that of any year since 1889, but no explanation is given of the supposed causes.

18. *Drainage.*—The important question of the drainage of Calcutta and the Suburbs has only within the last few months passed out of the stage of preliminary discussion between the Corporation and the engineering experts whom they have consulted from time to time. For this reason, although the subject has been discussed in the newspapers and incidentally referred to in the administration reports of the Commissioners for the last five years, no continuous history of the various phases of the discussion, and no final expression of the views of the Corporation as a whole, has yet been laid before Government. Had such a record of facts and opinions been before Sir Charles Elliott, when he recorded his Resolution of the 8th November 1895, it seems to the present Lieutenant-Governor to be doubtful whether the general condemnation of the supposed inaction of the Commissioners in respect of the drainage question, which is contained in the first paragraph of the Resolution, would not have been qualified by some reference to the intrinsic difficulty of the problem, and the conflicting opinions expressed by the technical advisers of the Corporation. The Report on the Calcutta Drainage Works, by Messrs. Hughes and Kimber, makes it clear that the drainage question, in its present form, dates from October 1890, when Mr. Baldwin Latham, a Sanitary Engineer of high reputation in England, was invited to inspect and report on the drainage of Calcutta. He arrived in Calcutta on the 11th February 1891, and left
certain
at Rs. [illegible]. From that time till the present, Mr. Latham's suggestions, as further developed by himself in 1891 and 1895, and supplemented by Mr. Hughes's report on the Suburbs in September 1894, have been under examination and the Corporation now have before them what may be taken to be the final conclusions of their professional advisers. In their joint report on the drainage question, Messrs. Hughes and Kimber, after full consideration, and with a knowledge of the facts necessarily much more

minute than Mr. Latham could have acquired during his brief visit to Calcutta, reject, as based upon incomplete or erroneous data, the main feature of his scheme, and conclude that it is impossible to construct an open low-level reservoir for the discharge, by gravitation, of the combined sewage and rainfall of Calcutta. In the Lieutenant-Governor's opinion this fact, taken with the reduction of the estimate made by Mr. Kimber from 170 lakhs to less than 79 lakhs, is, in itself, sufficient to show that, so far as the drainage question is concerned, neither the Corporation nor their Chairman can fairly be charged with unreasonable delay in arriving at a decision on an engineering problem of exceptional difficulty. Had they accepted and proceeded to carry out Mr. Baldwin Latham's scheme, with no more deliberation than was enjoined on them by irresponsible opinion in Calcutta, they would have committed themselves to a project which would have cost more than double of that now put before them, and which might not in certain essential features have fully met the circumstances of the case. It may be added that many of the attacks which have been made on the supposed dilatoriness of the Commissioners in this matter, owe their origin to the widespread belief in Mr. Baldwin Latham's statement that—

"Sewers like the Calcutta sewers, that are likely to be gorged with mixed sewage and rainfall, must let the sewage out into the sub-soil, which becomes a reservoir for its reception when the flow increases in the sewers. This constant interchange of sewage, rainfall, sub-soil water, and tidal water between the sewers and the ground is, in by judgment, extremely prejudicial to the health of Calcutta, and energetic means should be at once taken to remedy this evil."

The accuracy of this opinion has all along been disputed by Mr. Kimber, who replied to it, in 1891, that he had stripped sewers of all sizes in Calcutta, and had never found any indication whatever of the penetration of sewage into the adjacent soil. Messrs. Hughes and Kimber at present find no reason whatever to accept Mr. Latham's statement, that the interchange of sewage and ground water takes place on a scale which can be measured at the outfall, and they say that this statement is based on incorrect data supplied to him in Calcutta. If their conclusion is correct, it bears out the opinion expressed in paragraph 17 of the Government Resolution on the report for 1894-95, that the hypothesis that leakage from the sewers is the cause of the increased death-rate from fevers does not seem to have been established.

The project drawn up by Messrs. Hughes and Kimber has not yet been submitted for the sanction of Government under section 71 of the Act; but the Lieutenant-Governor understands that the Commissioners approve of it generally and are anxious to commence work as soon as possible. During the five years over which the discussion of the general drainage question has extended, the Commissioners have undertaken several works urgently required in connexion with the drainage of the area added to Calcutta in 1889, which admitted of being carried out independently of the main scheme, and were, it is understood, designed so as to form part of it. Of these works, which cost altogether nearly four lakhs, the most important were the temporary project for draining the Suburbs, the drainage of the Entally block, the sluices at Chetla, Garden Reach and Chowlputty, and several large sewers.

19. The Health Officer again draws attention to the urgent need there is for suitable building regulations for Calcutta, in the following remarks which are taken from paragraph 7 of his report :—

"The pressing necessity of proper building laws for Calcutta has not been referred to in the body of this report, much of my last annual report amounting to 22 pages being taken up with this subject. The omission is not because the framing and carrying out of these laws is less urgent this year than last year, but because there is nothing more to say on the subject. In previous reports beginning with that of 1886, I have, in a most prominent manner, drawn attention to the irreparable injury which is being done to the public health of Calcutta by the continuous growth of the city without the control of laws and bye-laws to effectively regulate the building of healthy houses and the formation of healthy streets. The present laws and bye-laws only accentuate the evil, and I do not think Calcutta could be worse off if there were no regulations. It is impossible for a city to grow up in a healthy state in a haphazard manner such as is permitted in Calcutta, where areas have sprung up and are springing up all over the town in defiance of every canon of sanitary law. If 10 years ago the law had been amended on sound principles, Calcutta would have been a

very different place from what it is now; for, notwithstanding the improvements which have been effected by the construction of Harrison Road at a great cost, I have no hesitation in saying that, as regards crowding and unhealthy areas generally, the town is in a worse condition in 1896 than it was in 1886, and must continue to retrograde in this respect until active and effective measures are taken to prevent the creation and perpetuation of insanitary localities. Time without the application of a remedy merely increases the evil, and the only possible way to stop this retrogression is the adoption and enforcement of a Building Act based on the lines found necessary in other large metropolitan towns inhabited by civilized communities. It is idle to imagine that a city will grow up without laws regulating its growth. If a town has its breathing space contracted more and more as years go on, and if by absence of controlling laws the development of abnormal growths renders it an impossibility for its waste products to be carried away efficiently by sewerage and scavenging, the result must be a decline in health.

"There are difficulties no doubt in the way of framing suitable laws, and I would repeat the advice I gave last year that, before a Building Act is passed, a searching and preliminary enquiry should be made as to laws on which such an Act should be framed, which, while securing a healthy city, shall be in conformity with the customs of the people and with tropical requirements. This seems to me to be a subject for the Government to enquire into, aided perhaps by a few Commissioners. I laid down in my last Annual Report certain principles for guidance which would no doubt be helpful to a Commission such as that which I suggest."

These remarks, and the observations recorded by Sir Charles Elliott in paragraph 19 of the Resolution on last year's report, deserve, more especially at the present time, the most serious consideration on the part of the Commissioners. The extracts from Dr. James's report on the outbreak of plague at Hongkong in 1894, which are annexed to this Resolution, bring out very clearly the intimate connexion which exists between crowded and insanitary buildings and the growth and dissemination of the germs of deadly epidemics. If after considering the subject, which has now been before them for several years, the Commissioners come to the conclusion that a special Building Act for Calcutta is called for in the interests of the health of the town, the Lieutenant-Governor will be prepared during the cold weather to appoint a representative Commission to formulate the principles upon which such an Act should be based.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

Extracts from a report on the epidemic of Bubonic Plague, which occurred in Hong-Kong in the months of May, June and July, 1894, by SURGEON-MAJOR H. E. R. JAMES, F.R.C.S., *Army Medical Staff.*

THE plague now under consideration is undoubtedly the Bubonic Plague of history; and such deviations from type and modifications as have occurred in it are probably racial and climatic.

It seems to have certain favourite visiting places, and to have almost invariably recurred in every place which it has once visited.

Certain peculiarities of meteorological conditions have generally preceded outbreaks, and epizootic diseases of (generally) domestic animals have often been previous to, or coincident with, the epidemic.

The prolonged drought had reduced the water supply to a minimum, there was as yet no sign of rain, and the temperature was gradually rising. Thus local conditions tended to favour the spread of the disease, and it was not surprising to learn two or three days later that it had assumed an epidemic form. The fall of rain within a week failed to produce the expected result; the disease still continued to claim new victims, and to increase in virulence with the increasing moisture of the atmosphere and with the stirring up of the soil caused by the flow of storm water.

The first historical notice of the plague refers to an epidemic in Libya, A.D. 98; but there are references in much more ancient writings to pestilences whose nature is not described, but which were rapid and destroyed large numbers of people in a few days. It occurred in Egypt and Syria and extended to Asia and Europe in the 6th century, and was established in Europe for 1,300 years. A variety called the "Black Death," supposed to have originated in North China, was rife in the 14th century. In the 15th century the plague occurred frequently in North Africa, Egypt, West Arabia, Syria, Asia Minor, Mesopotamia, Persia, India, China, and Europe. In the 17th century it lessened in area, disappearing from Italy, England, West Germany, Switzerland, Netherlands, and Spain. In

the 18th century it continued to decrease, only two outbreaks occurring, one in 1703 in Turkey, Hungary, Russia, Poland, Austria, Bohemia, and East Germany, and the other in Provence.

In 1841 it ceased in Europe.

In 1843 it had ceased in Africa, except Egypt, and in 1844 it ceased in Egypt.

The later records are :—

1853.	West Arabia.
1858=59.	Tripoli in North Africa.
1863.	Persian Khurdistan.
1867.	Right bank of Euphrates.
1870.	Persian Khurdistan.
1871=73.	Yunnan.
1873=74.	Left bank of Euphrates.
1874—77.	Bagdad, Euphrates Valley, West Arabia, Tripoli.
1876.	Persia, S. E., near Persia Caspian, N.-W. India.
1877.	S. W. Caspian, Transcaucasia, Astrakhan.
1878.	Persia, Khuldistan, Astrakhan.

From this list it will be seen that it shows a tendency to recur in places where it has been once rife, and to be carried by trade routes from these centres. The considerable communication by crusades and pilgrimages between Christian Europe and Palestine on the one hand, and Mahommedan Asia and Arabia on the other, the former during the Middle Ages and the latter later, have probably served to convey the germs to the homes of pilgrims, as is the case with cholera. A careful consideration of the events of the various epochs would, I think, trace its carriage in every case to the affected district from one or two spots where it is, or has been, endemic, *e.g.*, the Euphrates Valley and Southern China. It appears to be confined to the northern hemisphere and only to flourish between 20° and 40° north of the equator, and not to have existed in the new world at all hitherto.

* * * * * * * * *

Every step of its course here has been corroborative of its contagiousness and its choice of the poorest classes as victims; and of the great preventive power of good ventilation, good food supply, and absence of overcrowding.

As proofs of its being contagious and not atmospheric, conveyed by persons and not originating *de novo* in the soil, and finally due to a microbe which decreases in virulence by continuous cultivation from the parent stock, I adduce the following facts :—

1. The disease is endemic in the province of Yunnan and cases occur every year there, those attacked having buboes with but little constitutional disturbance, and all recovering. After a prolonged drought it assumes a more virulent form, and then becomes epidemic, the persons attacked generally dying. People residing in the same house as the victims very generally contract the disease.

Therefore it is of varying virulence, and generally contagious.

2. Other provinces not having communication with an affected place, but similarly suffering from drought, and subject to the same atmospheric conditions, do not suffer, though their geological conditions are identical, and places with very different atmospheric and geological conditions do suffer if there is personal communication between them and an affected place.

There was an epidemic at Pakhoi in the present year.

There was a prolonged absence of rain at Pakhoi, Canton, and Hong-Kong simultaneously.

The plague made its appearance first at Pakhoi, then at Canton and its vicinity, then at Hong-Kong, and then in the dependencies of Hong-Kong in the order given.

Persons trade between Pakhoi and Canton, between Canton and Hong-Kong, and between Hong-Kong and its dependencies.

The first cases occurring in Hong-Kong were traced to Canton without exception.

The first cases occurring in the dependencies of Hong-Kong were traced to Hong-Kong without exception.

These facts prove that the disease is not atmospheric, that it is not telluric, and that it can be conveyed by persons and be communicated to those with whom they have intercourse.

3. At the commencement of the epidemic, and as it spread, the cases were almost without exception fatal. As the number of cases lessened the symptoms became much modified; death occurred later in fatal cases, and the proportion of deaths to cases was not nearly so large as at first.

This shows a decreasing virulence of the poison.

Professor Kitasató and his colleagues and Dr. Yessin discovered an organism in 25 out of 30 cases in the blood examined, and in all cases in the spleen and buboes of those affected by plague. This organism was a bacillus, the inoculation of a pure cultivation of which was fatal to all animals inoculated, the symptoms and pathological appearances being identical

with those of the persons affected; these bacilli multiplied, and were discovered in the blood, spleen, and solid organs of the animals experimented upon.

In those cases where a history was obtained the origin of the attack was generally traced to intercourse with affected persons, or visits to, or sojourns in, their dwellings.

The dry season of 1894 was a very long one and water ran low everywhere (it was only turned on for two hours in the 24 in Victoria).

In the month of April no rain had fallen, and the plague broke out in Canton. There was an epizootic at the same time among the rats and pigs.

* * * * * * * * * *

Numerous recommendations had been made by the medical staff collectively and individually to the Sanitary Committee to (1) close all houses in which the plague had occurred; (2) to form a temporary town of matsheds or junks into which the former occupants of the infected houses might be sent, and where they would be under observation, and their movements be restricted by a cordon or patrols; (3) that every house in the town should be searched daily, the town being divided into districts and sub-districts for the purpose; (4) that the Tung Wa hospital should no longer be used as a receiving place for plague patients as, owing to the instigation of certain members of its committee (Chinese), every art was being practised there to smuggle corpses and patients away without their being detected.

* * * * * * * * *

The houses in which cases of plague had occurred were disinfected by chlorine gas obtained by acting on chloriated lime with dilute suphuric acid, and this disinfection was carried out, under supervision of the Government analyst, by the soldiers. The burying party and their operations were supervised by Captain Hastings, and, as the Chinese were not trustworthy, and took advantage of the flight of coolies from Hong-Kong to demand exorbitant wages, six Europeans from the Sailors' Home volunteered and carried out the burials. The corpses were removed from the Tung Wa in a waggon which carried from six to ten at one time. All were coffined in lime, and their mats, &c., were burned. By this time the organisation was fairly complete, and the disinfecting parties were able to disinfect every house on the same day as a case occurred. The amount of rubbish found in a Chinese house is very great. All that was not good or useful to the Chinese, and that was likely to contain plague germs, was burned on the spot, if the street was wide enough, and if not, taken to some waste ground and burned in a furnace.

Empty houses were rented by the Permanent Committee, and such people as could not afford, or did not wish to leave the colony, whose houses had been shut, were put into them. The great majority of the cases came from the district of Taiping-Shan, and out of about 20 blocks of houses, until a period was reached at which only a few of these houses were open, the remainder having yielded three cases of plague and being closed for that reason It was decided then to examine and close all such houses in this district as were objectionable on sanitary grounds, and the result was that they were all closed, and the streets were built up and the inhabitants removed to other houses. This proved a most salutary measure, for out of about 600 families removed, only nine cases of plague have since been found, those admitted within eight days (the period of incubation) having been excepted.

* * * * * *

The things to be undertaken are:—

I. The evacuation of all basements as dwelling-houses.
II. The redraining of such houses as are defective in that respect (this will take more time).
III. The increase of water supply, which is promised to be complete by May 1895.
IV. The laying down of imperishable and non-absorbent floors in all basements and ground floors.
V. The inspection and closing of wells which are not protected.
VI. The removal of all mezzanine floors, which are contrary to regulations (this is already being done).
VII. The registration of coolie-houses, an order to bring them under frequent inspection.

* * * * * * * * *

Symptoms.—*Fever*, ushered in by chills, occasionally running to 104° or above it. *Constipation* the rule, but *diarrhœa* occasional, giving place to former. *Vomiting* not uncommon. *Headache* often severe and referred to various regions, temporal more especially. *Tongue* furred—at first white, then yellow, then brown to black, and very dry. Sordes on teeth. Pain in the region of a group of *lymphatic glands* generally femoral, inguinal, cervical or axillary, occasionally mesenteric or bronchial, in the order of frequency above, and generally confined to one group. The cervical glands are most commonly affected in children, in my experience. The pain is acute, and of a stabbing character, and the region is very intensely tender. The site is determined in some instances by a wound or scratch; but this is, of course, often wanting. The gland or group next becomes enlarged (the affection of the glands may precede, accompany, or follow, in one case by as much as six days, the onset of the fever), and great local infiltration takes place. *Cerebral symptoms* are generally marked, and in fatal cases very severe; delirium, convulsions, and coma following one another in

quick succession. Sleeplessness is a frequent and very exhauting symptom. I have seen *hæmorrhages* from nose, stomach, vagina, and bowel, and in a very few cases subcutaneous extravasations and petechiæ. The *pulse* is at first rapid, and in a severe case soon becomes running, and the heart fails very suddenly, often giving rise to a fatal syncope. The patient may be walking in the street and suddenly reel and fall, and be found to be dead.

The *blood* is rapidly deprived of hæmoglobin, and after a few days becomes thick and tarry. After death it is liquid. There is sometimes *staining* of the skin and *conjunctivæ*, as in jaundice. The *spleen* is always somewhat enlarged, the *liver* sometimes *Urine* contains albumen in some cases. There is involuntary micturition in cases of comatose or semi-comatose people, occasionally retention. The *appearance* of a plague-stricken person is suggestive. In some cases the face is anxious, in the majority apathetic, the eyes fixed and staring, saliva dribbling from the mouth, and often incontinence of urine. The skin is dusky or yellowish, and the patient may be rather wildly delirious or with clonic spasms, or comatose. A cursory glance at a patient with the more common apathetic countenance is somewhat deceptive, as he may look as if nothing were the matter, and yet die a moment later. Latterly in this epidemic there have been cases in which the bubo does not exist, but which have been proved to be cases of plague both by the finding of Kitasato's plague bacillus and by the high rate of mortality.

Complications are pericarditis and myocarditis, congestion of lungs, and abscesses other than glandular, some cases of hypopion have been seen.

Course.—The temperature rises somewhat suddenly and is unaffected by quinine or other antipyretics. The tendency to hyperpyrexia is not very great.

The bubo, if any, may have commenced before the fever, or may be coincident with, or follow it. The appetite is lost, and there is much thirst, diarrhœa or vomiting may appear, the diarrhœa generally ceasing shortly and being succeeded by obstinate constipation. On the second day the symptoms are well established and the patient is probably delirious. It is not uncommon for death to occur at this time. In some cases it has happened within 12 hours of seizure, but these are not common, and it is difficult to get a correct history from the relatives. But I have a personal knowledge of one case, that of a chair coolie, who was to all appearance quite well, and at his occupation till 4-30 P.M., felt ill at 5 and lay down, was sent to hospital with a well-marked bubo and high fever on the next morning at 9 A.M., and was dead at 10 A.M. on the third day. The temparature remains high for a variable period, unaffected by quinine and antipyretics and falls gradually on about the sixth day. Delirium may be very violent, and give place to convulsions and coma, but in the cases of apparently sudden death the patient is quite sensible throughout to all appearance, and in many of these cases it has been impossible to detect any bubo after death. (The opportunities of *post-mortem* examination are few, and it is unknown whether some of the visceral lymphatic glands have been the seat of affection in such cases.) The pulse often begins to fail after two or three days, and the blood loses its hæmoglobin very quickly When once the bubo has commenced, it swells up very rapidly, but the amount of peripheral effusion and the tenderness of the part prevent an accurate estimate of the size of the gland or glands. It appears to be as large as a hen's egg in some instances. If incised at this time, there is found to be a bloody extravasation in and around it, and much serious infiltration in the tissues about. The pain and tenderness gradually subside as the case goes on.

Buboes suppurate in about 78 per cent. of cases if they survive.

About the fourth or fifth day the patient is at his worst, and the symptoms are most intense. The tongue is dry and black, the pulse running, the head-ache or other cerebral symptoms intense, the hæmoglobin down perhaps to 35 per cent. Semi-consciousness, or convulsions, or coma; the temperature 104° to 105°, and death most frequently happens on the 6th day. There may have been hæmatemesis or epistaxis or hæmorrhages from other cavities, and the skin may show petechiæ or extravasation. There may be hypostatic congestion of the lungs and dyspnœa. If recovery is to take place the temperature gradually subsides, and the bubo may suppurate. Favourable signs are: moderate fever, maintenance of pulse, mild cerebral symptoms, absence of complications, and tiding over the 10th day; gradual return of appetite, and perhaps suppuration of bubo, but this is a matter generally of lapse of time. When opened it is very slow of healing, and the glands are often caseous; the discharge is bloody at first, and thin and ichorous later on.

There has been no time to know what sequelæ may occur, but strength returns very slowly, and the patient has to be kept isolated for a month at least from date of attack, as the blood contains bacilli for three weeks in almost all cases.

Treatment.—This is adapted to combat symptoms. In the beginning a calomel purge, and if fever is high antipyrine or phenacetin are generally given, though their effect is very slight Bromide of potassium or ammonium is generally necessary to procure sleep, as insomnia is a most common and distressing symptom. A free use of stimulants is absolutely necessary, and the recumbent position must be strictly maintained, as death in apparently promising cases has occurred more than once or twice on the patient getting up when the nurse's back was turned.

There was in the Alice Memorial branch an experimental treatment adopted, the injection hypodermically of iodide of mercury, according to the formula of Dr. Sims Woodhead, for which success is claimed.

Musk has been given, but it is more costly and not more efficient than alcoholic stimulants.

The patients is placed on a milk and beef tea diet and carefully watched. Ice is allowed to allay thirst, and ice bags, &c., applied to head.

On its suppurating the bubo is opened, but it is unnecessary to made incisions previous to its suppurating as recommended by some, and in cases where this has been done, no benefit has accrued, and it is to be deprecated as it only increases the exhaustion of the patient.

Poultices and applications of belladonna to the bubo allay the pain, and other symptoms must be treated as they arise.

* * * * * * * * *

Diagnosis.—This during an epidemic is a matter of little or no difficulty when the case is a well marked one, but towards the end of this epidemic very atypical and anomalous cases occurred whose nature was proved by the finding of bacilli and by their generally fatal issue.

The diseases which may be confounded with it are *typhus fever*, *malarial fever*, and cases of *bubo* due to other causes and accompanied by fever. Doubtful cases should be placed under observation and examinations of the blood for bacilli should be made, as the finding of these is the only proof absolute of the disease being plague.

The leading symtoms are great gravity of constitutional disturbance, bubo, and furred tongue, the latter very typical.

The period of incumbation is from three to five days, or possibly seven.

The mortality differed in Europeans and Chinese, in the former 2 out of 13 attacked, in the latter 9 out of 13 nearly dying, or 15 and 70 per cent: respectively.

The characters of the plague bacillus are as follows, as described by Professor Kitasato, its discoverer :—

They are one of three organisms of the nature of bacilli which are found *in the blood*, the others being that of anthrax, and relapsing fever.

They have capsules, and the poles are more easily stained than the middle part.

The first *cultivations* showed bacilli differing only from the original ones in being slightly longer, and staining better in the middle.

Mice *inoculated* from spleen and blood died in two days, with œdema around the point of inoculation, and the same bacilli reproduced in the blood and internal organs.

All animals inoculated from cultivations died in from 1 to 4 days, according to size, with the same symptoms.

These bacilli were found in all persons examined who had died of plague, in the buboes, spleen lungs, liver and blood in the heart, in fact everywhere, and every cultivation from them produced the same bacilli.

They show very little *movement*, and are strongest in blood serum, which they do not liquefy.

The colonies in tube cultivations have a globular appearance, and are like glass wool.

They *grow* best at a temperature of 28° to 30° C. They were not seen by Professor Kitasato to form *spores*.

The disease was produced in mice, rats, and guinea pigs by *inoculation*, and in mice and guinea pigs by *feeding* with pure cultivations of bacillus, and small pieces of spleen of persons dead of plague.

The dust in houses where cases of plague had occurred was introduced by inoculation into mammals and produced plague in the case of one mouse, and tetanus in the majority.

(Trismus is a very common cause of death here, and tetanus bacilli very frequent in the dust of all houses.

The bacilli die on *desiccation* and exposure to the sun after four hours.

Heat.—At 80° C. those heated for 30 minutes were destroyed; at 100° C. they were dead in a few minutes.

Carbolic Acid.—½ per cent. and ¼ per cent. solution for one hour did not kill; a 1 per cent. solution killed in one hour.

Quicklime.—½ per cent. retarded growth; 1 per cent. killed.

Here it may be stated that Dr Yersin, the French bacteriologist, discovered that at a depth of seven inches sufficient plague bacilli to produce a very large cultivation were obtained from the floor of a house in Taiping-shau infected with plague.

The animals inoculated with these bacilli did not die, but the characters of appearance of the bacilli were identical with those of the plague bacilli. They were evidently not virulent. They have been found again in other houses, but produced no symptoms on animals inoculated with them.

Whether they are attenuated cultivations of the real plague bacillus or a distinct bacillus is a matter hitherto of conjecture.

Further results are expected of Professor Kitasato's researches, which will doubtless appear in due time.

He recommends disinfection of houses attacked by 2 per cent. solution of carbolic acid or quicklime, of clothing by steam at 100° C. Burial of dead at 3 metres from surface, disinfection of fæces with quicklime. Removal of dead rats and mice with proper precautions, and isolation of plague patients for one month after apparent recovery. Care in the obtaining of food to avoid infected sources.

There are many houses built *back to back* to economise space; and this arrangement is a very bad one, as it leads to certain insanitary conditions:—

1st. Obstruction of ventilation.
2nd. Obstruction of light.
3rd. To the drains necessarily passing under the floor of the house; 60 feet being a frequent length of piping required for the house drains.

In high houses the light and air are almost entirely excluded from the lower storeys, and people who live in the houses contract the ventilating shaft by roofing it partly over, either to gain in floor space above or keep the rain from falling into the small yard below.

* * * * * * * *

Personal Prophylaxis.—The bacillus, so far, is known to gain access by (*a*) *respiration*, (*b*) *inoculation*, and (*c*) *food*. It is, therefore, a sufficiently remarkable fact that only one person in attendance on the sick or burying the dead has been attacked, though very many have had a day or two of indisposition, *e g.*, sore throat, vomiting, diarrhœa, while the hospitals were full, and of the working parties when the work of house cleaning and disinfection was going on. The person who had been in attendance on the sick, and who contracted plague and died of it, was a nun, who developed slight fever five days after the branch of the hospital at which she was working had closed. It is a slightly doubtful case as to its real origin, but probably the disease was contracted in nursing. No doubt, all of us who were in constant communication with the sick inhaled germs continually, and Captain Vesey certainly got his attack in consequence of inhaling dust charged with bacilli during his work of house cleaning, at which he was indefatigable. The disease was practically confined to people who lived in ill-ventilated and dark rooms, and had poor food, and cohabited with infected persons or lived in infected surroundings, and to those having an unusually close contact with the sick—(certain of the Europeans attacked had had sexual intercourses with prostitutes, a good many of whom suffered from plague)—and these cases would be under cause (*b*). People who were (*a*) well fed and housed generally escaped, unless they happened to get a concentrated dose and were in a receptive conditon; (*b*) people who had a knowledge of the conditions of reception, and who took precautions, such as washing with antiseptics, avoiding direct inhalation, and who worked in well-ventilated apartments, and inhaled fresh air at intervals, also escaped.

It is, therefore, indicated that these are the conditions to observe, viz, :—

I. To avoid contact and direct inhalation of a patient's breath, as far as duty permits.
II. To wash the hands and mouth with proper antiseptics after work, and change the clothes.
III. To avoid work in connexion with the sick and their surroundings, if not in good health.
IV. To have hospitals and abode well ventilated, and to get fresh air as much as possible. These precautions are sufficient to prevent any likelihood of contracting disease by respiration.
V. If working on dwellings and clothing of patients to cover mouth and nostrils with a handkerchief dipped in carbolic acid solution, 1 in 40.

Inoculation.—Professor Kitasato and Dr. Yersin proved the inoculability of the disease upon rabbits and guinea pigs. It has also been noticed that the site of the bubo seems to be determined by the existence of a scratch or cut of the area from which the affected glands absorb. The Chinese coolies always go barefoot or with grass shoes, and abrasions and cuts are very common on their feet. The vast majority of buboes were in the femoral region. It is possible that these, or some of them, got their attack by inoculation.

The precautions for prevention of this mode of contraction are sufficiently obvious.

By Food, including water. The affection of human beings by this mode of access of the germ has not been proved, but it is highly likely. Professor Kitasato fed mice, guinea pigs, &c., on cultivations of the bacillus, and also on buboes, portions of spleen, &c., of affected animals and persons, and produced the disease in this way.

The precautions against attack thus may be as follows :—

I. To boil all water.
II. To eat no uncooked food.
III. To be sure of the impossibility of contamination of all food matters by servants, shop-keepers, or merchants.

General Prophylaxis.—The drainage, water supply, food-supply, ventilation of streets and dwellings, removal of dust have to be most particularly looked after. In this place night-soil and urine are used for the manuring of fields and market gardens by the Chinese. This may be a source of danger to consumers of vegetables.

All wells not protected from contamination should be closed.

The source of food-supply, as bakeries, butcheries, &c., should be carefully watched.

Overcrowding of dwellings should be prevented. Streets should be kept scrupulously clean, and rubbish of any description must be removed and not allowed to accumulate.

All combustible rubbish should be burned, and incombustible rubbish taken out to sea The sewers should be flushed at frequent intervals.

Dead rats and other animals should be treated as possible sources of infection, as the bacteriologists have found plague bacilli in them; and as large numbers of them had died, first previously to the epidemic among human beings, and since then during its continuance it is reasonably imaginable that the epizootic among them may be the effect of the same bacillus, as is beyond doubt the cause of the plague.

(In most epidemics of this disease there has been an epizootic among rats and sheep preceding it. An epizootic occurred among pigs in Canton.) The floors of all dwelling-houses should be of material impervious to gas or water, as it is possible that the bacillus thrives in the ground, at all events near the surface in infected houses, and it is probable that it regains its virulence there, and in favourable seasons flourishes and gives off quantities of germs and spores, hence the floors should be made incapable of absorbing fluid from above and permitting the egress of gases carrying microbes from the ground beneath. House drains should be trapped and well constructed.

It is probable that the germs may be carried by the clothing of persons sick of plague, and such absorbent articles as are in contact with them or have received their dejecta and breath. Such articles when possible should be destroyed or disinfected by heat.

The patients should be immediately isolated and segregated in hospital and the apartment occupied by them thoroughly disinfected, their clothing, &c., being dealt with as described above.

The other occupants of an affected house should be watched, and if several cases occur in a house the remainder of the persons, if any there, should be removed from such house to temporary quarters to be under observation. The period of observation should be eight days.

All obstructions to ventilation should be summarily removed from houses.

If there are houses which have contained patients in such numbers and sequence as to make it likely that the plague is indigenous there by reason of the germs multiplying in its structure, such houses should be evacuated and closed, and the woodwork destroyed and burned within the walls: the floor or the ground should be disinfected by quicklime and re-cemented, and it should stand empty with doors and windows open for fourteen days at least. The woodwork may then be renewed and the house reoccupied.

WEATHER AND CROP REPORT.

For the week ending the 12th October, 1896.

Burdwan.—Rainfall nil all over the district. Weather fair and hot. Harvesting of *aus* and jute and sowing of *rabi* going on. Prospects of *aman* bad in Raniganj thana for want of rain. Rain badly wanted in all the thanas. Sugarcane doing well. Supply of fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	11½ to 17	per rupee.
Kalna	12	
Katwa	12 to 13½	
Raniganj	12 to 14	

Midnapore.—No rain during the week. Weather seasonable and cool for this time of the year. Indigo has been sown. Jute is being reaped. Sugarcane hopeful, but paddy is withering in places for want of moisture. Outlook anxious. Cattle-disease reported from town, Garbeta and Binpur. Fodder and water sufficient. Coarse rice selling as follows:—

	Srs.	
Sadar	14	per rupee.
Contai	16 to 17	
Tamluk	13	
Ghatal	13 to 15	

24-Parganas.—Rainfall nil. Weather hot in the day and cool in the night. Steeping of jute continues. Prospect of *aman* paddy favourable. Rain is badly wanted. Ploughing for *rabi* crops is going on in the Barasat and Basirhat subdivisions. Stray cases of small-pox among cattle reported from thana Port Canning. Condition of cattle generally good. Fodder and water sufficient. Common rice sells as follows—

	Srs.	c.	
Sadar	10 to 12	8	per rupee.
Diamond Harbour	11	6	
Barasat	9	0	
Basirhat	10	0	

Murshidabad.—No rain. Weather seasonable. Sowing of *kalai* and indigo going on. Harvesting of *aus* continues. Rain wanted for *aman*. State of sugarcane good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	11	per rupee.
Kandi	12¾	
Jangipur	11½	

Khulna.—No rain. Weather fine and cool. *Aman* paddy not yet transplanted in south of district for want of rain. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	c.	
Khulna	10	0	per rupee.
Bagirhat	9	13	
Satkhira	9	8	

Dinajpur.—Rainfall nil. Weather seasonable. Standing crops doing well. Common rice selling from 10 to 12 seers a rupee. No cattle-disease. Fodder and water sufficient.

Rangpur.—Average rainfall ·05. Transplantation of *aman* finished. Washing of jute still going on. Preparation of land for tobacco has begun. Prospects fair. Common rice selling from 9 to 12 seers per rupee. Fodder and water sufficient.

Pabna.—Rainfall nil. Weather hot and dry. *Aman* crop very poor. Rice selling at 7 to 8 seers at Sirajganj and 8 to 9 seers per rupee at Pabna. Fodder available.

Dacca.—Rainfall nil. Weather seasonable. Prospects of *aman* fair. Fodder available. No cattle-disease. Common rice selling at 9 seers per rupee.

Chittagong.—Rainfall 1·08. Weather very hot. Prospects of *aman* fair; but a little more rain is needed. Water and fodder sufficient. Rice sells at 11 seers per rupee.

Patna.—Rain urgently wanted for the rice crop and *rabi* sowings, which are being retarded in high lands. Prices stationary since last report. Common rice selling in Patna at 10½ seers per rupee. Fodder and water sufficient.

Gaya.—Prospects fair. Rain urgently wanted. *Rabi* lands being prepared. Common rice sells at 9¼ seers, against average of 14 seers per rupee.

Champaran.—No rain. Winter rice withering on high land. Rain in a week will give a six or seven-anna crop. *Bhadoi* harvest well advanced with 8 to 9 annas' outturn. Price of common rice at Sadar 11 seers, against average of 15¾ seers per rupee. Fodder and water sufficient.

Darbhanga.—No rain during the week. Rain badly wanted for paddy. Fields are being prepared for *rabi*. Prices high as last week.

Bhagalpur.—Report not received.

Purnea.—No rain. Harvesting of *bhadoi* paddy finished. Prospects of winter rice fair. More rain would be beneficial. Steeping of jute in progress. Land is being prepared for winter crops. Cattle-disease abating. Fodder and water sufficient. Common rice selling as follows:—

				Srs.	
Sadar	...	...	...	11	per rupee.
Araria	...	...	...	11	
Kishenganj	...	...	...	9	

Cuttack.—Rainfall nil. Weather getting cool. Rain very badly wanted. *Laghu* rice ripening. *Sarad* rice is still being transplanted. *Rabi* being sown. *Laghu* rice damaged by insects. Condition of cattle good. Fodder sufficient. Common rice sells as follows:—

				Srs.	c.	
Cuttack	...	...	...	15	12	per rupee.
Jajpur	...	...	..	17	1	
Kendrapara	...	...	...	18	6	
Banki	...	...	...	21	0	

Hazaribagh.—Days warm; nights cool; cloudless sky. Rain urgently wanted at Sadar to save higher lands. Giridi reports fair prospects. Price of rice varies from 6 to 12 seers per rupee according to local demand. Goladars laying in supplies for a rise in prices.

General Summary.—With the exception of a shower at Chittagong, there was practically no rain in any other reporting district during the week. Rain is urgently wanted for the winter rice crop, which is beginning to wither on high lands in the Patna Division and in other parts. The reports from North and East Bengal continue satisfactory. In Cuttack insects have done damage to the *laghu* rice, which is ripening. The harvesting of early rice and the washing of jute are still going on in some districts. The preparation of lands for *rabi* crops is proceeding. Cattle-disease is still reported from Midnapore. It is abating in Purnea. The price of common rice continues abnormally high throughout the Province: but there has been no material rise since last week.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 13th October, 1896.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

STATEMENT SHOWING THE STOCKS OF RICE IN AND AROUND CALCUTTA.

Names of Marts.	Stock in hand as compiled on—												
	1st week of Oct. 1895.	1st week of Nov. 1895.	1st week of Dec. 1895.	1st week of Jan. 1896.	1st week of Feb. 1896.	1st week of March 1896	1st week of April 1896.	1st week of May 1896.	1st week of June 1896.	1st week of July 1896.	1st week of August 1896.	1st week of Sept. 1896.	1st week of Oct. 1896.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF SEPTEMBER 1896.

DURING August unusually settled weather prevailed over the Bay, and the most important disturbances were due to the land depressions, not because they gave rise to stormy weather, but because of the general and at times heavy rain which accompanied them.

There have been even fewer disturbances in September, and the pressure distribution which had become established towards the end of August, was maintained with little interruption throughout the month. The most prominent feature of the pressure distribution was the relatively high readings in west of the Bay compared with the north-east of the province and Assam, an arrangement which caused continuous westerly winds in the western districts. In consequence of these westerly winds the monsoon current was to a large extent confined to the eastern half of the province, and over that part rainfall has been above the normal. In the central districts very nearly the normal fall was received, but towards the west rainfall became much more scanty, especially is the west of Behar, where only about 2 inches fell during the whole month.

The rainfall in all districts would have been much below the normal, but for a depression which occurred about the middle of the month. It began in the east of the Bay and moved northwards until it reached the Sunderbans, after which its course was more erratic. Being a shallow depression, a moderate rise of pressure in Burma and Assam caused it to move towards the west, slowly for two days, the centre passing close to Saugor Island and Balasore. It then turned to the north-west, then north, and finally it moved eastward into North Bengal, where it filled up before reaching the Himalayas.

As the depression remained shallow and did not give rise to strong winds, conditions were favourable for rainfall, and during the five days which elapsed from the time when it was over the Sunderbans till it filled up in North Bengal, every part of the province was affected by it, except the extreme western districts, where winds remained westerly and very little rain fell.

After the depression filled up the pressure distribution of the early part of the month was renewed, westerly winds became general, and such rain as fell was confined to the east and centre of the province. The rainfall was chiefly due to the local thunderstorms which are of frequent occurrence towards the end of monsoon season.

On the 1st of the month the area of lowest pressure extended along the foot of the hills from Bihar over north Bengal into Assam. Readings increased more rapidly towards the south than is usual at the beginning of September, and the isobars ran almost east and west. The distribution over the Bay differed very little from the normal, but inland defect increased towards the north-east, varying from a few thousandths of an inch in Orissa to more than a tenth of an inch in North Bengal and Assam. In effect this was the same as if a shallow depression lay over the province with the area of lowest pressure in North Bengal. Westerly winds prevailed over the Bay and the province, except in the extreme north, where they blew from the east or north-east. Very little rain was falling and temperature was above the normal, most so in the west.

Though pressure was rising during the three following days, changes were uniform and the distribution retained the same features. The only change of importance was the increasing rainfall in the eastern districts. It began in Arakan and South-East Bengal on the 2nd, and extended northwards, being most marked in North Bengal on the 4th. This rainfall caused lower temperatures at eastern stations, but elsewhere excess had increased, and varied from 2° in the central districts to 5° in the west.

The steady, slow rise of pressure ceased on the 5th, when the difference from the normal varied from excess of a tenth of an inch in the circars to a small defect in the extreme north-east. The fall which followed continued for two days only, the 6th and 7th, after which there was a slow rise for two days. Then a fall began and led to the depression which a a few days later caused the heavy rainfall about the middle of the month.

On the 12th barometric readings were very uniform over the province and the north of the Bay, and the chief sign of the commencing disturbance was the steepening gradient in the south of the Bay. Heavy rain had began in the south of Burma, but though the low pressure area extended northwards into North Bengal and Assam, as shown by the variation from the normal, fine weather prevailed in Bengal with light westerly winds and high temperature. The shallow depression was more to the north on the 13th, pressure being lowest in Arakan, the Sunderbans and the north-east of the Bay. The cyclonic circulation was more regular, but even over the Bay wind force was not more than moderate.

Up to this time the depression had been very shallow and diffused, with the gradient moderately steep towards the south. On the 14th a brisk rise of pressure, occurred in Burma and Assam, by which the depression became better defined, and was forced westwards. The

centre was near Saugor Island, where there was defect of ·166 inch, and rainfall became rather heavy and general in East Bengal. During the following 24 hours considerable development occurred, owing to the double change which obtained. The brisk rise of pressure continued in the east and extended to the north of the province, and a slow rise had prevailed elsewhere, except in the south-western districts, where there had been a slow to brisk fall. The disturbance having concentrated and deepened, a much more regular cyclonic circulation of winds followed, and cloudy showery weather became general over the whole province. Over the Bay also weather became more disturbed, but it was not felt to any great extent at the coast stations.

On the 14th and 15th the depression moved westward across the north of the Bay; it then began to recurve: on the 16th it was moving north-westward towards Chota Nagpur with the centre not far from Chaibassa, and on the 17th to the north-east, when the area of lowest pressure was over the centre of the province. The cloudy showery weather had continued during these days over the whole province, but there had nowhere been very heavy falls of rain. With the change of motion to the east, however, very heavy rain set in at first in the west of Bihar and afterwards in North Bengal. On the 17th the average rainfall reported from stations in the west of Bihar was 4 inches, and on the 18th the greater part of North Bengal received an average fall of 6 inches, very nearly a half of the normal fall for the whole month.

The depression was filling up on the 18th and moving slowly to the east or north-east. By the 19th it had almost disappeared, and though a regular cyclonic system of winds remained with a centre near Rampur Boalia, weather in North Bengal was much more settled and rainfall had to a large extent ceased.

With the clearing skies, temperature rose, and westerly winds soon became general, as the pressure distribution tended to become similar to what prevailed in the early part of the month. It was established on the 22nd and became more marked on the 23rd, when the differences from normal pressure varied from excess of ·05 inch in the circars to defect of ·08 inch in North Bengal and the north of Assam.

During the remainder of the month pressure steadily rose over Bengal, a rather large excess accumulating. The effect of this rise at first, especially as a slow fall was at the same time going on in the south of the Bay, was to give the distribution greater uniformity. But as the rise continued more rapidly over the land than over the sea, a shallow depression formed in the Bay. The depression remained diffused, and was gradually forced southwards till it filled up and disappeared about the end of the month.

Though a steady rise of pressure continued in Bengal during the last few days, and readings were very high, the light changeable winds interacted, with the result that thunderstorms and local showers were of frequent occurrence, especially in South-West Bengal and Orissa, where rainfall was almost general. There was also a fall of temperature, which was confined chiefly to the eastern half of the province, where there was defect of about 2° on the 30th.

Pressure as there was only one shallow depression during the month, there were no large changes of pressure. The distribution, which was a marked feature of the early part of the month, and was renewed later, has, in consequence, affected to a considerable extent the average values. These averages are above the normal by ·02 inch in Orissa and Chota Nagpur, and below elsewhere by amounts increasing towards the north-east, where defect is ·03 inch.

Temperature has generally been above the normal over a great part of the province, excess always increasing towards the north-west, where at times it was as much as 6°. From the 14th to the 16th, when cloudy rainy weather prevailed, there was a large fall of temperature at all stations, but especially in the north of the province, at first in Bihar and afterwards in North Bengal, where, owing chiefly to the low day readings, defect was between 5° and 10° for several days. At other times comparatively cool weather prevailed in the east of the province, where showers were more frequent, most so during the first few and the last few days of the month. Owing to the very low temperatures in the middle of the month, means are not affected to such an extent as might be expected from the continuous excess at other times. Mean maximum temperatures are normal in the extreme east, and 1° or 2° above in all other districts, except Bihar, where there is excess of 4°. Average night readings are practically normal. The mean daily temperature for the month is normal in Assam, half a degree above in North and East Bengal, 1° above in South-West Bengal and Orissa, and nearly 2° above in Chota Nagpur and Bihar.

Rainfall.—Owing to the heavy rainfall in the middle of the month, the total amounts for the month do not differ much from the normal, except in a few districts in the west of Bihar and Chota Nagpur, where only a small fraction of the usual amount was received. The fairly uniform distribution of the rainfall was due to the unusual course taken by the depression, its slow motion and absence of strong winds, all of which circumstances were favourable for heavy general rain. As it moved from the north-east of the Bay and the adjacent part of East Bengal westwards as far as the north of Orissa, then north-westward

towards Chota-Nagpur, and from there north-eastward into North Bengal; there was no part of the province which did not come under its influence, except the north-western districts. General rain fell for four or five days, but the heaviest falls occurred in the west of Bihar and in North Bengal, when the depression was filling up.

The pressure distribution at other times caused the weak monsoon current to tend towards the east of the province, and the showers which fell with moderate frequency caused the slight excess in the east of the province as compared with the western and central districts.

The average fall in Chota Nagpur is 5·36 inches, in Bihar 6·4, South-West Bengal 7·45, and in Orissa 9·48. These are all below the normal, the first two by rather more than 2 inches and the last two by about 1 inch. The fall in East Bengal is 12·66 and in North Bengal 14·63 inches, both amounts being between 1 and 2 inches in excess.

As will be seen in a table given below, the average fall from the beginning of the year up to the end of September is below the average in all districts except Orissa, where there is 15 per cent. excess. Bihar has received 78 per cent. Bengal proper from 81 to 89 per cent., and Chota Nagpur 93 per cent.

During September Champaran and Saran districts received on an average about 2 inches only, and several of the rainfall stations in these districts reported only a fraction of an inch. Over almost the whole of the western half of Bihar defect was more than 3 inches and increased towards the west to 8 inches. In Chota Nagpur, defect varied from 2 to 5 inches, and in the central parts of Bengal proper there was a variable defect generally under 2 inches. The area of excess falls includes the greater part of East and North Bengal and the east of Bihar, the difference from the normal being small except in Rangpur, Cooch Behar and some of the hill stations, where there was excess of from 5 to 15 inches. In Orissa there was a small defect, except in the Cuttack and Puri districts, where there was a moderate excess.

The following table gives a condensed summary of the rainfall statistics of the present year up to date for each meteorological division, the first nine columns giving the actual average falls in each division for each month expressed as a percentage of the normal, while the tenth column gives the actual rainfall of the first nine months as a percentage of the normal rainfall for that period :—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	Actual rainfall of first nine months of 1896 expressed as a percentage of the normal fall for the period.
South-West Bengal ...	31	18	18	36	97	128	95	71	86	89

Orissa ...	3	0	50	31	78	162	131	128	88	115
Chota Nagpur ...	6	9	0	0	49	139	112	89	65	93

The following tables contains full data for the comparison of the actual and normal rainfall of the month of September in all districts of the Province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance or weight being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the monthly meteorological tables. The first column gives the normal or average district rainfall as determined from the rainfall observations of the past 25 years; the second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district; the third column expresses the ratio of the actual district fall of the past month to the normal rainfall as a percentage, and the fourth column states as a percentage how much the district rainfall for the month varied from the normal :—

Percentage Table for September 1896.

Division.	District.	Normal district rainfall for September.	Actual district rainfall for September 1896.	Percentage of actual to normal rainfall.	Percentage excess (+), defect (−).

	Miles.	
The highest velocity of the wind in one hour		9
	%	
The mean relative humidity		77
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office		81
	Inches.	
The total fall of rain from 4th to 10th October 1896		Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office		1·90
The total fall from 1st January to 10th October 1896		53·17
The average fall of the corresponding period for 24 years, Surveyor-General's Office		61·36

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓ dew.

No. 6584G.—The 7th October 1896.—Mr. H. F. Samman, I.C.S., Assistant Commissioner, Golaghat, on being relieved by Mr. L. J. Kershaw, I.C.S., is transferred to Goalpara, and placed in charge of that subdivision.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT,—(LAND REVENUE).

NOTIFICATION—No. 919T.R.

The 14th October 1896.—Under the powers conferred upon him by section 101 (1) of the Bengal Tenancy Act, VIII of 1885, and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to direct that a survey be made and a record of rights be prepared in respect of all lands included within the external boundaries of thanas Banipatti and Khajauli, in the district of Darbhanga.

The particulars to be recorded in the survey and record of rights shall be the following:—

(*a*) The name of each tenant.

(*b*) The class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, occupancy raiyat, non-occupancy raiyat, or under-raiyat; and if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenure.

(*c*) The situation, quantity and boundaries of the land held by him.

(*d*) The name of his landlord.

(*e*) The rent payable.

(*f*) The mode in which that rent has been fixed, whether by contract, by order of Court, or otherwise.

(*g*) If the rent is a gradually increasing rent, the time at which, and the steps by which, it increases.

(*h*) The special conditions and incidents, if any, of the tenancy.

(*i*) The name of each proprietor (including rent-free owner), with the character and extent of his interest, and the situation, quantity and boundaries of the land held by the proprietors.

(*j*) The name of each rent-free occupant, the situation, quantity and boundaries of the land held by him, and whether he holds rent-free by the permission of the proprietor of the land, or of his predecessor in title, or independently of such permission.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No. 928T.R.

The 14th October 1896.—Three applications having been filed before the Collector of the 24-Parganas by the Manager of the Bhawanipore Ward's Estate, under section 18 of the Bengal Embankment Act II (B.C.) of 1882, for the construction of three sluices at Satpukur, Brindal, and Kulpi, in the Diamond Harbour subdivision of that district, in miles 113-114, 52-53, and 69-70 of the Government Embankments Nos. 77, 68, and 71, mentioned in Schedule D annexed to Bengal Act VI of 1873, the Collector, after holding the necessary enquiry into the matter under section 10 of Act II (B.C.) of 1882, submitted a report in favour of the proposal, which received the support of the Commissioner of the Presidency Division and of the Board of Revenue, by whom it has been submitted to Government for orders. The Lieutenant-Governor, having considered this report and the Board's recommendation of the projects, is pleased to order, under section 14 of the said Act of 1882, that the sluices in question shall be constructed at an estimated cost of Rs. 1,14,141, Rs. 34,130, and Rs. 66,289, respectively (total Rs. 2,14,560), in accordance with the plans prepared by the Executive Engineer, Northern Drainage and Embankment Division, and approved by the Chief Engineer, Irrigation Department, Bengal.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No. 952T.R.

The 16th October 1896.—In the first line of the Government Notification No. 1107L.R., dated the 27th February 1894, published at page 214, Part I of the *Calcutta Gazette* of the 28th idem, *for* section 101 (2) (*c*), *read* section 101 (2) (*b*).

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No. 971T.R.

The 17th October 1896.—Under section 1, clause 3 of the Bengal Tenancy Act VIII of 1885, the Lieutenant-Governor, with the previous sanction of His Excellency the Governor-General in Council, and in continuation of the Bengal Government notification No. 99, dated the 7th January 1896, published at page 28, Part I of the *Calcutta Gazette* of the 8th idem, is pleased to extend sections 7, 40, 52 and 192 of the Act to the division of Orissa.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

NOTIFICATION—No. 4065L.R.

The 20th October 1896.—The following rules of the Postal Department relating to rent money orders are published for general information.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

RULES RELATING TO RENT MONEY ORDERS.

SECTION I.

The Form of Rent Money Order.

1. The rent money order form is divided into four parts, viz.—

(*a*) The money order.

(*b*) The receipt. This is printed below the money order, and will be retained by the Postal Department.

(*c*) The acknowledgment. This is the tenant's receipt.

(*d*) The coupon. This is the counterfoil or landlord's portion of the receipt.

2. Parts (*a*) and (*b*) require no description, as they are exactly like the corresponding portions of the ordinary inland money order form. Part (*c*) is much larger than the acknowledgment of an ordinary money order form. On one side of this part are printed headings to provide for the entry of full particulars of the remittance, and on the other side are spaces for the name and address of the remitter. Part (*d*) is the same size as the acknowledgment, and contains the same headings as part (*c*). On the back of part (*d*) are special instructions relating to rent money orders.

3. This form is to be used for rent money orders only, and for no other purpose.

4. Forms of rent money order should be freely distributed among the rent-paying classes, and every facility should be given to tenants to obtain these forms.

5. Every Postmaster, Sub-Postmaster and Branch Postmaster will be personally responsible that a sufficient supply of rent money order forms is always available in his office. In case of emergency, supplies may be obtained by telegraph direct from the Stock Depôt. Divisional Superintendents and Inspectors, when visiting offices, will see that a sufficient supply of rent money order forms is available, and mention the fact in their inspection reports.

SECTION II.

Issue of Rent Money Orders.

6. Rent money orders are issued from every head, sub and branch post office in all districts in the Lower Provinces of Bengal in which the Bengal Tenancy Act is in force,* and such other districts as the Local Government may from time to time extend the provisions of the said Act under the rules which govern the issue of ordinary inland money orders. The following rules contain additional instructions which relate specially to the issue of rent money orders.

*Burdwan.	Dacca.
Birbhum.	Mymensingh.
Bankura.	Faridpur.
Midnapore.	Backergunge.
Hooghly.	Bhagalpur.
Howrah.	Champaran.
Rajshahi.	Darbhanga.
Dinajpur.	Gaya.
Jalpaiguri.	Malda.
Rangpur.	Monghyr.
Bogra.	Muzaffarpur.
Pabna.	Noakhali.
24-Parganas.	Patna.
Nadia.	Puri.
Murshidabad.	Purnea.
Jessore.	Saran.
Khulna.	Shahabad.
Tippera.	

7. The rule prohibiting the inclusion of pies (fractions of an anna) in the amount of an ordinary money order does not apply to rent money orders, which may contain any fraction of an anna not less than one pie.

Note.—The sub-items which go to make up the *total* of the rent money order may contain fractions of a pie.

8. There must be a separate money order for each tenure or holding. Rent for two tenures or holdings may not be sent by one money order.

9. The office of issue, when requested to do so, will help the remitter to make the requisite entries, and, if necessary, will make entries for him in the form of rent money order; but no fee or any gratification for this service may be demanded or accepted, either directly or indirectly, by any official of the Postal Department.

10. Persons remitting money by rent money orders should be informed that, unless they have received special instructions from the landlord on the subject, they should make the orders payable to the landlord, or to his agent, or to the manager (if one has been appointed), according as the rent has previously been paid to the landlord, or to his agent, or to a manager. The name of the payee must in each case be entered on the money order. In the absence of special instructions from the landlord, a rent money order should always be made payable at the place at which the tenant has previously paid rent. If the rent has

collected in the tenant's village by an agent whose office is not in the village, the money order should be made payable at the agent's permanent office, or at such other place as the landlord may appoint.

11. The office of issue is responsible that no rent money order is issued of which the coupon and acknowledgment are blank, or are not completely filled up. The Post Office has no means of ascertaining the correctness of the information supplied by the remitter; all that is necessary is that the Postmaster or money order clerk should see that entries are made against every heading in the coupon and acknowledgment. No rent money order may be accepted for issue in which there is any erasure or correction in the name or month or year of the kist for which a remittance is made. If the remitter wishes to make any alteration, or tenders a money order in which there is any alteration or erasure in the entry of the name or month or year of the kist, he must be instructed to fill up a fresh money order. When a rent money order with deficient entries on the coupon, or no entry at all, is presented for issue, the issuing Postmaster should point out the omissions and help the remitter to the best of his power to supply them.

12. The office of issue must also see that no entry is made by the remitter beyond the entries provided for in the form of rent money order. In some cases the tenant enters the annual rent or the area or the nature of his holding. Such entries are not provided for in the form and were intentionally not provided for and should not be allowed. If a remitter tenders a rent money order containing any entry for which the form does not provide, the Postmaster or money order clerk should refuse to accept the form and should ask the remitter to fill up another form. Under Rule 9 the Postmaster or money order clerk will, if requested to do so, help the remitter to fill up a fresh form correctly.

13. The word "rent" should be written before the number of every rent money order, and this mode of distinguishing rent money orders should be adopted whenever the number is entered. The number assigned to a rent money order by the head office or sub-office of issue will also be entered at the top of the coupon and acknowledgment by the money order clerk of the head office, or the Sub-Postmaster of the sub-office of issue, as the case may be.

14. One line of the return of rent money orders issued (Form 2—Rent) should be filled in by every head and sub-office at the close of each day. On the 1st of the following month the return should be totalled and sent to the Head Postmaster. The Head Postmaster will compile a general return (Form 3—Rent) and submit it to the Postmaster-General not later than the 10th of the month following that to which it relates. Branch offices will not submit any returns, as rent money orders issued from such offices will be included in the returns of their account offices.

SECTION III.

Payment of Rent Money Orders.

15. Before a rent money order is made over to the postman for payment, the money order clerk or Postmaster of the office of payment will carefully examine the name or month and the year of the kist entered in the coupon and acknowledgment, and satisfy himself that they have been clearly entered and bear no marks of erasure or correction.

16. If the examination prescribed in Rule 15 shows any discrepancy or alteration in the entries of the kists in the coupon and the acknowledgment, the money order must not be paid to the payee, but should be returned to the office of issue for repayment to the remitter with the following certificate endorsed in red ink by the Postmaster of the office of payment across the acknowledgment:—"Entry of kist defective; returned for payment to remitter—(*signature*) Postmaster." The office of payment will at the same time note the error in the error book, and send a copy of the entry to the Superintendent in whose jurisdiction the office of issue is situated, in order that the official in fault may be punished.

17. On receipt of the copy of the entry in the error book, the Superintendent will take such action as appears to him suitable, having regard to the special instructions to offices of issue in Rule 11 of these rules.

18. A rent money order should always be paid at the landlord's office at the place of payment entered in the money order. If the money order is drawn out as payable to the landlord himself, payment may be made to him or to any person authorised by him in writing to act as his agent, or to receive payment of money orders in his favour. If the money order is drawn out as payable to two or more joint landlords, the receipt and acknowledgment must be signed by both or all of the landlords, or by an agent authorised in writing by both or all of the landlords. If the money order is drawn out as payable to an agent or manager, payment may only be made to the payee named, and not to any one else. In making over money to postmen for payment of rent money orders, the Postmaster of the office of payment must observe the limit fixed for the amount to be entrusted at one time to a single postman or village postman. The date stamp of the office of payment should be impressed on the acknowledgments just before the money orders are given to the postmen for payment.

19. In all other respects rent money orders will be dealt with in the office of payment exactly like ordinary inland money orders.

20. One line of the return of rent money orders paid and refused (Form 4—Rent) should be filled in by every head and sub-office at the close of each day. On the 1st of the following month the return should be totalled and sent to the Head Postmaster. The Head Postmaster will compile a general return (Form 5—Rent) and submit it to the Postmaster-General not later than the 10th of the month following that to which it relates. Branch offices will not submit any returns. The rent money orders paid by branch offices will be included in the returns of their account offices. All rent money orders paid, whether paid to the original payees or repaid to the remitters, are to be shown in these forms under "Rent money orders paid."

SECTION IV.

Disposal of Rent Money Orders not accepted by the payee.

21. If a rent money order is refused by the payee, the Postmaster of the office of payment will certify in red ink across both the coupon and acknowledgment that the payee has declined to receive payment. This certificate must always be recorded on refused rent money orders whether the payee has or has not noted his refusal in writing, and the certificate will be signed by the Postmaster. The postman who presented the order with the amount thereof to the payee will write his name and the date of presentation under the Postmaster's signature. This certificate will be recorded in the form given below. The refused money order will then be treated in the usual way and returned to the office of issue (with the coupon stitched to it) for repayment to the remitter. The coupon will be made over to the remitter (tenant) when the amount of the order is repaid to him. The acknowledgment will, when the office of payment is a Head Office, be retained in that office. In the case of any other office of payment, the acknowledgment for a refused money order will be retained by that office until the 1st of the following month, when it will be attached to the return of rent money orders paid and refused, and be forwarded to the Head Office. The acknowledgments relating to refused money orders will be filed in monthly bundles in the Head Office and should be kept in the Post Office safe. The Postmaster will be responsible for their safe custody for three years from the last day of the agricultural year in which the money orders were issued. On the expiry of the three years the acknowledgments should be destroyed:—

Form of Certificate.

Presented to the payee, but refused on_____

(Date) *Postman.* (Date) *Postmaster.*

22. In all other respects refused rent money orders will be dealt with exactly like ordinary inland refused money orders.

SECTION V.

Disposal of Rent Money Order Acknowledgments.

23. The acknowledgments appertaining to paid rent money orders will, if they are to be delivered from the head office of payment, be made over to the postmen at the next delivery and be dealt with as prescribed in Rule 25. The acknowledgment portion of rent money orders paid by sub and branch offices should not be cut off by the actual office of payment, but the paid money orders should be forwarded with the acknowledgments attached to them to the head office of payment. It is not therefore necessary for sub and branch offices to keep the Form Rent 6 (Book of rent money order acknowledgments returned).

24. Nor need branch offices keep the Form Rent 7 (Book of rent money order acknowledgments delivered). The acknowledgments of all rent money orders to be delivered from a branch office should in future be sent by the head office of payment to the Account office of the branch office. These acknowledgments should be detailed by the Account office in the special book of rent money order acknowledgments delivered (Form Rent 7), and be forwarded by the Account office to the branch office entered on the reverse of the branch office daily account. The Branch Postmaster will note the numbers of the acknowledgments in the branch office journal, obtain the postman's signature against each entry, and then hand over the acknowledgments to the postman for delivery.

25. The postmen will enter the acknowledgments in detail in their books, and will obtain the remitter's signature or mark therein when delivering each acknowledgment.

26. Acknowledgments appertaining to rent money orders, the remitters of which have removed beyond the delivery range of the original office of issue, will be forwarded direct to the remitters at their new addresses (if known) enclosed in postal service registered covers.

27. Acknowledgments which cannot be delivered in consequence of the remitters not being found will be returned by the postman to the Postmaster or money order clerk (as the case may be), who will sign for them in the postman's book or village postman's register.

28. Undelivered acknowledgments will be kept in the office of issue (if a head office) for a period of six months, and, if still unclaimed, will be forwarded under a postal service registered cover to the Postmaster-General.

29. In sub and branch offices undelivered acknowledgments will be retained for a period of ten days, and, if still unclaimed, will be forwarded to the head office under a postal service registered cover. Such acknowledgments will be kept in the head office for a further period of six months, and, if still undelivered, will be forwarded under a postal service registered cover to the Postmaster-General.

30. A rent money order acknowledgment received by the Postmaster-General under the provisions of the two preceding paragraphs will be kept by him for a period of three years from the last day of the agricultural year in which the money order was issued, and, if not claimed within that period, will be destroyed.

31. Postmasters, Sub-Postmasters and Branch Postmasters of offices of issue will be responsible that acknowledgments are delivered to remitters of rent money orders without any unnecessary delay and *free of charge*. It will be useful to make enquiries as to the punctual and free delivery of acknowledgments from tenants who may call at post offices to have rent money-orders issued.

32. It is ruled that void rent money orders are to be dealt with in accordance with Rules 602, 603 and 604 of the Post Office Manual, Volume I, 6th Edition, and Rules 467, 468 and 469 of the Post Office Manual, Volume II, 4th Edition.

List of Forms appertaining to Rent Money Orders.

Number of each form.	Name of each form.	REMARKS.
1	2	3
1 / Rent	Rent money order	Loose form. Printed in black on white paper.
2 / Rent	Return of rent money orders issued.	Loose form. To be supplied to all head and sub-offices, which are authorised to issue rent money orders.
3 / Rent	District return of rent money orders issued.	Loose form. To be supplied to all head offices.
4 / Rent	Return of rent money orders paid and refused.	Loose form. To be supplied to all head and sub-offices
5 / Rent	District return of rent money orders paid and refused.	Loose form. To be supplied to all head offices.
6 / Rent	Book of rent money order acknowledgments returned.	Bound in books of 20 pages each. Supplied to all head offices which pay money orders.
7 / Rent	Book of rent money order acknowledgments delivered.	Bound in books of 20 pages each. Supplied to all head and sub-offices which issue money orders, except those marked N. D. in the alphabetical list.
8 / Rent	Rent acknowledgment envelope ...	To be used by all offices which pay money orders. Printed in black ink on white paper.

Address

Rent Money Order Rules.

1. The remitter must enter his name and full address in this side in the place shown, and must also fill up the whole of the reverse side, except the part marked as to be filled up by the Post Office.

2. The Rent Money-Order system only applies to rents payable in cash.

3. The amount of a Rent Money-Order may include rupees, annas and pies, but not a fraction of a pie.

4. There must be a separate Money-Order for each tenure or holding. Rent for two tenures or holdings may not be sent by one Money-Order.

5. In the absence of special instructions from the landlord, the remitter should make the Money-Order payable at the place at which rent has previously been paid, and to the landlord himself or his agent, according as rent has previously been paid to the landlord or an agent.

6. The limit of amount of a Rent Money der and the rates of commission are the same as for ordinary Money-Orders.

FINANCIAL DEPARTMENT.

NOTIFICATION—No. 804T.F.

The 12th October 1896.—Maulvi Wahabuddeen, the Assistant Customs Officer of Dhamra held charge of the office of the Port and Customs Officer of Chandbali in addition to his own duties, during the absence, on leave, of Mr. W. G. Mayston.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION—No. 805T.F.

The 12th October 1896.—Mr. W. G. Mayston, Port and Customs Officer of Chandbali, was on leave, under article 291 of the Civil Service Regulations, from the 1st June 1896 to 1st July 1896, both days inclusive.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION—No. 817T.F.

The 14th October 1896.—Babu Mohendra Nath Mukerjea, Deputy Collector, acted as Deputy Collector of Income Tax in the district of Lohardaga from the 25th August to the 15th September 1896, *vice* Babu Kedar Nath Mukerjea, transferred, and under section 40 of Act II of 1886, was vested with the powers of a Collector under the Act.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION—No. 864T.F.

The 17th October 1896.—In exercise of the powers conferred by sections 11, clauses (*a*) and (*b*), and 12 of the Sea Customs Act (VIII of 1878), the Lieutenant-Governor of Bengal is pleased to declare Nillah on the Naaf river to be a port for the carrying on of coasting trade with the customs ports of Akyab and Chittagong only, and for no other purpose, and to define the limits of the said port as follows:—

On the South—A straight line drawn from the south-eastern end of Shapur Island in the direction of a pillar on point Cypress as far as the mid-channel of the Naaf river.

On the North—A straight line drawn from the mouth of the Ucha stream in the direction of the mouth of the Gaungdaung stream as far as the mid-channel of the Naaf river.

On the West—A line drawn parallel to and fifty yards to the west of the high-water mark of the Naaf river.

On the East—A line drawn down the mid-channel of the Naaf river.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION—No. 865T.F.

The 17th October 1896.—In exercise of the power conferred by section 6 of the Sea Customs Act (VIII of 1878), the Lieutenant-Governor of Bengal is pleased to appoint Meeah Babu Khan, the Superintendent of Customs at the Port of Maungdaw in Burma, to be Superintendent of Customs at the port of Nillah, in the Chittagong district of Bengal, and to exercise the powers conferred and to perform the duties imposed by the said Act on such officers.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION—No. 877T.F.

The 17th October 1896.—Rule 5 (4) of the Rules for the examination of candidates for appointment in the clerical service of the Government of Bengal and attached offices, published with Government Resolution No. 864T.F., dated the 10th October 1894, at pages 2372 to 2375 of the Supplement to the *Calcutta Gazette* of the 17th idem, and subsequently amended by Notification No. 6547M.A., dated the 13th December 1894, which was published at page 1259, Part I of the *Calcutta Gazette* of the 19th idem, is hereby cancelled.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION—No. 5104S.R.

The 19th October 1896.—Maulvi Ashfaq Husain, Deputy Collector, is appointed Deputy Collector of Income Tax in the district of Patna, with retrospective effect from the afternoon of the 12th September 1896, *vice* Babu Prokash Chandra Roy, on leave, and, under section 40 of Act II of 1886, is vested with the powers of a Collector under the Act.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

MEDICAL DEPARTMENT.

No. 1004T.M.—The 13th October 1896.—Surgeon-Major J. H. T. Walsh, Officiating Civil Surgeon of Gaya, is appointed to act as Civil Surgeon of Howrah during the absence on deputation of Surgeon Lieutenant-Colonel R. D. Murray or until further orders.

No. 1006T.M.—The 13th October 1896.—Surgeon Lieutenant-Colonel A. Tomes, Officiating Civil Surgeon of Howrah, is appointed to act as Civil Surgeon of Gaya until further orders.

No. 1008T.M.—The 13th October 1896.—The services of Dr. C. Banks, Civil Medical Officer of Puri are temporarily placed at the disposal of the Calcutta Corporation for special duty in connection with the Bubonic Plague.

No. 1024T.M.—The 15th October 1896.—Military Assistant Surgeon P. Fitzpatrick of the Presidency General Hospital is appointed temporarily to act as Civil Medical Officer of Nadia, during the absence, on deputation, of Surgeon Captain J. F. Evans, or until further

Secy. to the Govt. of Beng

JUDICIAL DEPARTMENT.

No. 5807A.

No. 1151A.D.—The 16th October 1896.—The order of the 12th September 18 appointing Babu Ram Gopal Chaki, Subordinate Judge of Dacca, to be Subordinate Jud of Cuttack, and vesting him with certain powers within the local limits of the Sadar Mun of Cuttack and within those of the original jurisdiction of the District Judge of Cuttac is cancelled.

No. 462J.D.—The 13th October 1896.—Mr. Joseph Carlo Aguilar is appointed to be a Honorary Magistrate of the Independent Bench at Begusera, in the district of Monghy and is vested with the powers of a Magistrate of the third class.

No. 476J.D.—The 13th October 1896.—Mr. H. S. Johnstone, Superintendent, Calcutt Police, has been granted by Her Majesty's Secretary of State for India an extension of leav for six months on medical certificate.

No. 517J.D.—The 15th October 1896.—Under the authority vested in him by the fina clause of section 357 of the Code of Criminal Procedure, Act X of 1882, the Lieutenant Governor empowers Babu Mati Lal Basu, an Honorary Magistrate of the Chapra Indepen dent Bench, in the district of Saran, to take down evidence in criminal cases in the Englis language.

No. 521J.D.—The 15th October 1896.—The Lieutenant-Governor accepts the resigna tion tendered by Babu Radha Nath Roy of his appointment as an Honorary Magistrate o the Sadar Independent Bench, in the district of Backergunge.

No. 522J.D.—The 15th October 1896.—Babu Gobinda Prosad Das is appointed to be a Honorary Magistrate of the Sadar Independent Bench, in the district of Backergunge, and i vested with the powers of a Magistrate of the third class.

Under the authority vested in him by the final clause of section 357 of the Code o Criminal Procedure, Act X of 1882, the Lieutenant-Governor empowers Babu Gobind Prosad Das to take down evidence in criminal cases in the English language.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Be

[Third Publication.]

NOTIFICATION—No. 2181 D.

The 3rd October 1896.—The following rules made by the Lieutenant-Governor under the power vested in him by section 4 of Act III (B.C.) of 1879 for the information and guidance of the Inspectors of Steam-boilers and Prime-movers making inspections under the Act are hereby published for general information:—

Iron Boilers.

1. The Inspector is required by the Act to fix the pressure to be allowed on boilers. In performing this very responsible and onerous duty he must be very careful, as in the event of accident it will be necessary for him to prove clearly that he used due caution. On the one hand he must be careful as regards safety, and on the other hand he must not unduly reduce the pressure on a boiler.

The Inspector to fix pressure on safety valves.

The Inspector himself having fixed the limits of the weight, is then required to declare that in his judgment the boiler and machinery are sufficient for the service intended and in good condition, and that they will be sufficient for twelve months or such other period as he may, in his judgment, determine. For his guidance, the following directions are given, and he should not depart from them in any case, without first reporting particulars to the Commissioners, and asking for instructions.

2. The Inspector should fix the working pressure for boilers by a series of calculations of the strength of the various parts, and according to the workmanship and material.

Working pressure to be fixed by calculations.

And in the event of any novelty in construction, or of any departure from the practice of staying and strengthening noted in these Instructions, he should report full particulars to the Commissioners before fixing the working pressure.

In the case of boilers made in India, the Boiler Inspection Department may receive for examination plans and particulars of boilers before the commencement of manufacture, by these means hoping to prevent questions arising after the boilers are finished.

No Inspector shall declare a boiler to be safe unless he is fully informed as to its construction, material, and workmanship. He should therefore be very careful how he ventures to give a certificate.

3. In the case of new boilers the Inspector may allow a stress not exceeding 7,000 lbs. per square inch of net section on solid iron screwed stays supporting flat surfaces, but the stress should not exceed 5,000 lbs. when the stays have been welded or worked in the fire.

Respecting stays.

The areas of diagonal stays are found in the following way: Find the area of a direct stay needed to support the surface, multiply this area by the length of the diagonal stay, and divide the product by the length of a line drawn at right angles to the surface supported to the end of the diagonal stay; the quotient will be the area of the diagonal stay required.

When gusset stays are used, their area should be in excess of that found in the above way.

4. When the tops of combustion boxes or other parts of a boiler are supported by solid rectangular girders the following formula should be used for finding the working pressure to be allowed on the girders, assuming that they are not subjected to a greater temperature than the ordinary heat of steam, and in the case of combustion chambers that the ends are fitted to the edges of the tube plate and the back plate of the combustion box.

Girders for flat surfaces.

$$\frac{C \times d^2 \times T}{(W - P) D \times L} = \text{Working pressure.}$$

W = Width of combustion box in inches.
P = Pitch of supporting bolts in inches.
D = Distance between the girders from centre to centre in inches.
L = Length of girder in feet.
d = Depth of girder in inches.
T = Thickness of girder in inches.
N = Number of supporting bolts.

$$C = \frac{N \times 1{,}000}{N+1} \text{ when number of bolts is odd.}$$

$$C = \frac{(N+1)\ 1{,}000}{N+2} \text{ when number of bolts is even.}$$

The working pressure for the supporting bolts and for the plate between them should be determined by the rule for ordinary stays.

5. The pressure on plates forming flat surfaces is found by the following formula:

Flat surfaces of boilers.

$$\frac{C \times (T+1)^2}{S - 6} = \text{Working Pressure.}$$

T = Thickness of the plate in sixteenths of an inch.
S = Surface supported in square inches.
C = Constant according to the following circumstances.
C = 100 when the plates are not exposed to the impact of heat or flame, and the stays are fitted with nuts and washers, the latter being at least three times the diameter of the stay and two-thirds the thickness of the plates they cover.*
C = 90 when the plates are not exposed to the impact of heat or flame, and the stays are fitted with nuts only.
C = 60 when the plates are exposed to the impact of heat or flame, and steam in contact with the plates, and the stays fitted with nuts and washers, the latter being at least three times the diameter of the stay and two-thirds the thickness of the plates they cover.
C = 54 when the plates are exposed to the impact of heat or flame, and steam in contact with the plates, and the stays fitted with nuts only.
C = 80 when the plates are exposed to the impact of heat or flame, with water in contact with the plates, and the stays screwed into the plates and fitted with nuts.
C = 60 when the plates are exposed to the impact or flame, with water in contact with the p and the stays screwed into the plates, having ends riveted over to form substantial heads.
C = 36 when the plates are exposed to the impact of heat or flame, and steam in contact with the plates, with the stays screwed into the plates, and having the ends riveted over to form substantial heads.

In cases where plates are stiffened by T or L irons, and a greater pressure is required for the plates than is allowed by the use of the above

* If the diameter of riveted washers be at least ⅓rds the pitch of the stays, and the thickness not less than the plates they cover, the constant may be increased to 150.

When doubling plates are fitted of the same thickness as the plates they cover, and not less in width than ⅓rds the pitch of the stays, the constant may be increased to 160.

When doubling plates cover the whole of the flat surface the case should be submitted for the consideration of the Commissioners.

constants, the case should be submitted for the consideration of the Commissioners.

When a circular flat end is bolted or riveted to a cylindrical shell, S in the formula may be taken as the area of the square inscribed in the circle passing through the centres of the bolts or rivets securing the end, provided the angle iron or flange is of sufficient thickness.

When the riveted ends of screwed stays are much worn or when the nuts are burned, the constants should be reduced, but the Inspector must act according to the circumstances that present themselves at the time of inspection, and it is expected that in cases where the riveted ends of screwed stays in the combustion boxes and furnaces are found in this state it will be often necessary to reduce the constant 60 to about 36.

Compressive stress on the tube plates.

The Inspector should not in any case allow a greater compressive stress on the tube plates than 8,000 lbs. per square inch, which is that used in the following formula :—

$$\frac{(D-d)\,T \times 16{,}000}{W \times D} = \text{Working pressure.}$$

D = least horizontal distance between centres of tubes in inches.
d = inside diameter of ordinary tubes in inches.
T = thickness of tube plate in inches.
W = extreme width of combustion box in inches from front of tube plate to back of fire-box, or distance between combustion box tube plates when boiler is double ended and the box common to the furnaces at both ends.

Boilers set in brickwork.

6. Having regard to many cases in which serious defects have been discovered, the Inspector should take care that boilers, the outside of which cannot be seen, are cleared of all covering and fittings for inspection whenever the Inspector considers it necessary. It will often be found necessary to reduce the pressure, unless the boilers are partially cleared from their seats to enable the Inspector to judge of their condition. If the owners in any special case have any good reasons for not wishing to clear them when the Inspector requires it, the Inspector should submit the whole of the case in detail to the Commissioners for their consideration. The Inspector must recollect that he is not to certify as sufficient any boiler respecting which he cannot thoroughly satisfy himself.

The Inspector should record in his inspection book the dates on which boilers are inspected, when and to what extent cleared from brickwork, and whether the boilers were set or not when examined, and if not set, where they were examined. Boilers which have been cleared should in all cases be subjected to the hydraulic test before the brickwork is rebuilt.

Cylindrical boilers.

7. Boilers well constructed, well designed, and made of good material should have an advantage in the matter of working pressure over boilers inferior in any of the above respects, as unless this is done the superior boiler is placed at a disadvantage, and good workmanship and material will be discouraged. The following rules are therefore prescribed.

When cylindrical boilers are made of the best material with all the rivet holes drilled in place and all the seams fitted with double butt straps, each of at least five-eighths the thickness of the plates they cover, and all the seams at least double riveted with rivets having an allowance of not more than 75 per cent. over the single shear and provided that the boilers have been open to inspection during the whole period of construction, then 5 may be used as the factor of safety. The tensile strength of the iron is to be taken as equal to 47,000 lbs. per square inch with the grain, and 40,000 lbs. across the grain. But when the above conditions are not complied with, the additions in the following scale must be added to the factor 5, according to the circumstances of each case :—* *

A†	·15	To be added when all the holes are fair and good in the longitudinal seams, but drilled out of place after bending.
B†	·3	To be added when all the holes are fair and good in the longitudinal seams, but drilled out of place before bending.
C.	·3	To be added when all the holes are fair and good in the longitudinal seams, but punched after bending instead of drilled.
D.	·5	To be added when all the holes are fair and good in the longitudinal seams, but punched before bending.
E*	·75	To be added when all the holes are not fair and good in the longitudinal seams.
F.	·1	To be added if the holes are all fair and good in the circumferential seams, but drilled out of place after bending.
G†	·15	To be added if the holes are fair and good in the circumferential seams, but drilled before bending.
H.	·15	To be added if the holes are fair and good in the circumferential seams, but punched after bending.
I†	·2	To be added if the holes are fair and good in the circumferential seams, but punched before bending.
J*	·2	To be added if the holes are not fair and good in the circumferential seams.
K	·2	To be added if double butt straps are not fitted to the longitudinal seams, and the said seams are lap and double riveted.
L	·1	To be added if double butt straps are not fitted to the longitudinal seams, and the said seams are lap and treble riveted.
M	·3	To be added if only single butt straps are fitted to the longitudinal seams, and the said seams are double riveted.
N	·15	To be added if only single butt straps are fitted to the longitudinal seams, and the said seams are treble riveted.
O	1·0	To be added when any description of joint in the longitudinal seams is single riveted.
		To be added if the circumferential seams are fitted with single butt straps and are double riveted.
Q	·2	To be added if the circumferential seams are fitted with single butt straps and are single riveted.
R	·1	To be added if the circumferential seams are fitted with double butt straps and are single riveted.
S‡	·1	To be added if the circumferential seams are lap joints and are double riveted.
T	·2	To be added if the circumferential seams are lap joints and are single riveted.
U	·25	To be added when the circumferential seams are lap, and the strakes of plates are not entirely under or over.

* * If the iron be tested and the elongation measured in a length of 10 inches is not less than 14 per cent. with, and 8 per cent. across the grain, and the inspectors otherwise satisfied as to quality of the plates and rivets, then 4·5 may be used instead of 5, and the minimum actual tensile strength of the plates used in calculating the working pressure.

V‡	·3	To be added when the boiler is of such a length as to fire from both ends, or is of unusual length, as in the case of flue boilers; and the circumferential seams fitted as described opposite P, R, and S, but of course when the circumferential seams are as described opposite Q and T, V ·3 will become V ·4.
W*	·4	To be added if the seams are not properly crossed.
X*	·4	To be added when the iron is in any way doubtful, and the Inspector is not satisfied that it is of the best quality.
Y††	1·65	To be added if the boiler was not open to inspection during the whole period of its construction.

Where marked* the factor of safety should be increased still further if the workmanship or material is very doubtful or is very unsatisfactory.

† When the holes are to be rimered, or bored out in place, the case should be submitted to the Commissioners as to the reduction or omission of A, B, G, and I as heretofore.

‡ When the middle circumferential seams are double strapped and double riveted or lap and treble riveted, and the calculated strength not less than 65 per cent. of the solid plate S, ·1 and V, ·3 may be omitted. The end circumferential seams in such cases should be at least double riveted.

†† When inspecting boilers that have not been open to inspection during construction, the case should be submitted to the Commissioners as to the factors to be used.

In any special case, a report should be forwarded to the Commissioners.

The strength of ordinary joints is found by the following method:

$$\frac{\text{(Pitch} - \text{Diameter of rivet)} \times 100}{\text{Pitch}} = \left\{\begin{array}{l}\text{Percentage of strength of plate at joint as compared with the solid plate.}\end{array}\right.$$

$$\frac{\text{(Area of rivet} \times \text{No. of rows of rivets)} \times 100}{\text{Pitch} \times \text{thickness of plate}} = \left\{\begin{array}{l}\text{Percentage of strength of rivets as compared with the solid plate.*}\end{array}\right.$$

Then take iron as equal to 47,000 lbs.† per square inch and use the smaller of the two percentages as the strength of the joint, and adopt the factor of safety as found from the preceding scale.

(47,000 † × percentage of strength of joint) × twice the thickness of the plate in inches.

Inside diameter of the boiler in inches × factor of safety. Pressure to be allowed per square inch on the safety-valves.

In the case of ordinary zigzag riveting the strength through the plate diagonally between the rivets, is equal to that horizontally between the rivets, when diagonal pitch $= \sqrt{5}$ horizontal pitch + $\sqrt{5}$ diameter of rivet.

Plates that are drilled in place should be taken apart and the burr taken off and the holes slightly countersunk from the outside.

Butt straps should be cut from plates and not from bars, and should be of as good a quality as the shell plates, and for the longitudinal seams should be cut across the fibre. The rivet holes may have been punched or drilled when the plates are punched or drilled out of place, but when drilled in place should be taken apart and the burr taken off and slightly countersunk from the outside

* If the rivets are exposed to double shear, multiply the percentage as found by 1·75.

† See note, page 2.

When single butt straps are used, they should be ... thicker than the plates they cover.

The diameter of the rivets should not be less than the thickness of the plates of which the shell is made, but it will be found when the plates are thin, or when lap joints or single butt straps are adopted, that the diameter of the rivets should be in excess of the thickness of the plates.

Dished ends should be stayed as flat surfaces; but when they are theoretically equal to the pressure needed, when considered as portions of spheres, the stays when solid may have a stress of 14,000 lbs. per square inch of net section, but the stress should not exceed 10,000 lbs. when the stays have been welded or worked in the fire.

Stays for dished ends.

Truly hemispherical ends subjected to internal pressure may be allowed double the pressure that is suitable for a cylinder of the same diameter and thickness.

Hemispherical ends, man-holes, doors and domes.

All man-holes and openings should be stiffened with compensating rings of at least the same effective sectional area as the plates cut out, and in no case should the plate rings be less in thickness than the plates to which they are attached. The openings in the shells of cylindrical boilers should have their shorter axes placed longitudinally. It is very desirable that the compensating rings round openings in flat surface be made of L or T iron. Cast-iron doors should not be passed for pressures exceeding 100 lbs. per square inch; for pressures of 100 lbs. and under‡ they should work out to the following formula:—

$$\frac{C \times T^2}{L \times W} \quad \text{W. P.}$$

C = 100 for doors bolted on the outside to a faced joint.
C = 80 for doors bolted from the inside with dog bars.
T = Thickness of flange of door in ¼th inch.
L = Length of opening for door.
W = Width.
W. P. = Working Pressure.

The neutral part of boiler shells under steam domes must be efficiently stiffened and stayed, as serious accidents have arisen from the want of such precautions.

8. New boilers are to be tested by hydraulic pressure according to the following scale, in the presence and to the satisfaction of the Inspector.

Hydraulic test.

Boilers intended to work up to 100 lbs. pressure per square inch, or any pressure below that, are to be tested to double the working pressure:

Above lbs. 100	up to lbs. 125	to be tested to lbs.	200
125	150	,,	230
150	175	,,	250
175	200	,,	270
200	225	,,	290
225	250	,,	310
250	275	,,	330
275	300	,,	350

Any boilers intended for working pressure above these to be tested to not less than 50 lbs. above such working pressure.

In the case of old boilers the Inspector must use his own judgment as to the necessary pressure to be applied.

‡ Inspectors in passing cast iron doors should see that they are in every way sound, and that the joint faces of boiler plate and door are perfectly fair.

The Commissioners would recommend steam users, when ordering new boilers, to specify that all man-hole and mud-hole doors be made of wrought iron or steel, as cast-iron is often found unsound in section, although apparently sound on surface, and are so apt to severe fracture owing to careless fitting.

9. Circular furnaces with the longitudinal joints welded or made with a butt strap double riveted, or double butt straps single riveted :—

Circular furnaces.

$$\frac{90{,}000 \times \text{the square of the thickness of the plate in inches}}{(\text{Length in feet} + 1) \times \text{diameter in inches}}$$

= working pressure per square inch, provided it does not exceed that found by the following formula :

$$\frac{9{,}000 \times \text{thickness in inches}}{\text{diameter in inches}} = \left\{ \text{Working pressure per square inch.} \right.$$

The second formula limits the crushing stress on the material to 4,500 lbs. per square inch.

The length is to be measured between the rings if the furnace is made with rings.

If the longitudinal joints instead of being butted are lap-jointed in the ordinary way, then 75,000 is to be used instead of 90,000, excepting only where the lap is bevelled and so made as to give the flues the form of a *true* circle, when 80,000 may be used.

When the material or the workmanship is not of the best quality, the constants given above should be reduced, that is to say, the 90,000 will become 80,000, the 80,000 will become 70,000, the 70,000 will become 60,000 ; when neither the material nor the workmanship is of the best quality, such constants will require to be further reduced, according to circumstances and the judgment of the Inspector, as in the case of old boilers. One of the conditions of best workmanship is that the joints are double riveted with single butt straps, or single riveted with double butt straps, and the holes drilled after the bending is done and when in place and the plates afterwards taken apart, the burr on the holes taken off and the holes slightly countersunk from the outside.

The following examples will serve to show the application of the constants for the different cases that may arise :

Furnaces with butt joints and drilled rivet holes.	90,000 where the longitudinal seams are welded.
	90,000 where the longitudinal seams are double riveted and fitted with single butt straps.
	80,000 where the longitudinal seams are single riveted and fitted with single butt straps.
	90,000 where the longitudinal seams are single riveted and fitted with double butt straps.
	85,000 where the longitudinal seams are double riveted and fitted with single butt straps.
Furnaces with butt joints and punched rivet holes.	75,000 where the longitudinal seams are single riveted and fitted with single butt straps.
	85,000 where the longitudinal seams are single riveted and fitted with double butt straps.
Furnaces with lapped joints and drilled rivet holes.	80,000 where the longitudinal seams are double riveted and bevelled.
	70,000 where the longitudinal seams are double riveted and not bevelled.
	70,000 where the longitudinal seams are single riveted and bevelled.
	65,000 where the longitudinal seams are single riveted and not bevelled.
Furnaces with lapped joints and punched rivet holes.	75,000 where the longitudinal seams are double riveted and bevelled.
	70,000 where the longitudinal seams are double riveted and not bevelled.
	65,000 where the longitudinal seams are single riveted and bevelled.
	60,000 where the longitudinal seams are single riveted and not bevelled

10. The strength of joints of cylindrical superheaters and the factors of safety are found in a similar manner as for cylindrical boilers and steam receivers, but instead of using 47,000 lbs. as the tensile strength of iron, 30,000 lbs. is adopted, unless where the heat or flame impinges at or nearly at right angles to the plate, then 22,000 lbs. is substituted.

Cylindrical superheaters.

When a superheater is constructed with a tube subject to external pressure, the working pressure should be ascertained by the rules given for circular furnaces, but the constants should be reduced as 30 to 47.

11. As the uptakes of vertical boilers and others of this type are especially liable to injury from overheating, unless careful precautions are taken while steam is being raised, the Inspector should in all cases endeavour to persuade makers and owners to make the strength of the uptakes considerably in excess of that required for ordinary superheaters subject to external pressure.

Uptakes of vertical boilers.

When flaming coal is used extra care is required and extra strength absolutely necessary.

Steel Boilers.

12. The following should guide the Commissioners' Inspectors when inspecting steel boilers.

Maker's tests.

The steel-makers or boiler-makers should test one or more strips cut from *each* plate for tensile strength and elongation, and stamp both results on a part of the plate where they can be easily seen when the boiler is constructed.

A few rivets of each size should be selected, and should be turned and tested for tensile strength. The tensile strength should be from 28 tons with a contraction of area of about 60 per cent.

Rivet tests.

The tensile strength of the plates *not* exposed to flame should be about 28 tons, and should not exceed 32 tons per square inch of section, and 28 tons should be the strength used in the calculations for cylindrical shells if the plates comply with the conditions as stated herein; but when the minimum tensile strength of shell plates exceeds 28 tons, and allowance is wished for the excess, the case should be specially submitted for the consideration of the Commissioners. The tensile strength of furnace, flanging, and combustion box plates should range from 26 tons to 30 tons per square inch.

Tensile strength, &c.

All plates that are punched, flanged, or locally heated should be carefully annealed after being so treated.

Annealing.

The rivet holes in the furnaces and longitudinal seams of cylindrical shells should be *drilled*, but if it is wished to punch them, makers should afterwards bore the plates or anneal them in a proper furnace.

Perforating and annealing.

Solid steel screwed stays which have *not* been welded or otherwise worked after heating may be allowed a working stress of 9,000 lbs. per square inch of net section, provided the tensile strength is from 28 to 32 tons per square inch, and the elongation in 10 inches about 25 per cent. and not less than 20 per cent. Steel stays which have been welded or worked in the fire have been found to be unreliable. Therefore, they should *not* be passed.

Stress on stays.

If the flanging plates and those exposed to flame comply with the foregoing conditions, the constants in the Commissioners' rules for iron boilers may be increased as follows:—

Constants for flat surfaces.

The constants for flat surfaces when they are supported by stays screwed into the plate and riveted, 10 per cent.

The constants for flat surfaces when they are supported by stays screwed into the plate and nutted, or when the stays are nutted in the steam space, 25 per cent. This is also applicable to the constants for flat surfaces stiffened by riveted washers or doubling strips, and supported by nutted stays.

The constants for combustion box girders, 10 per cent.

Furnaces, plain and corrugated.

The furnace constants about 10 per cent when plain. When new, corrugated and machine made and practically true circles, the working pressure is found by the following formula, provided that the plain parts at the ends do not exceed 6 inches in length, and the plates are not less than $\frac{5}{16}$ inch thick:—

$$\frac{14,000 \times T}{D} = \text{Working pressure.}$$

T = Thickness in inches.
D = Mean diameter in inches.

Compressive stress on tube plates.

greater compressive stress should not be allowed on tube plates than 10,000 lbs. per square inch, which is that used in the following formula:—

$$\frac{(D - d) \times 20,000}{W \times D} = \text{Working pressure.}$$

D = Least horizontal distances between centres of tubes in inches.
d = Inside diameter of tubes in inches.
T = Thickness of tube plate in inches
W = Extreme width of combustion box in inches from front of tube plate to back of fire-box, or distance between combustion-box tube plates when boiler is double ended and the box common to the furnaces at both ends.

Plate and rivet section.

The rivet section, if of iron, in the longitudinal seams of cylindrical shells where lapped and at least double riveted should not be less than $1\frac{1}{8}$ times the net plate section; but if steel rivets are used, their section should be at least $\frac{7}{8}$ of the net section of the plate if the tensile strength of the rivets is not less than 28 tons and not more than 32 tons per square inch. Therefore, in calculating the working pressure, the percentage strength of the rivets may be found in the usual way by the Commissioners' rules, but in the case of iron rivets the percentages found should be divided by $1\frac{1}{8}$ and in the steel rivets by $\frac{7}{8}$, the results being the percentages required. If the percentage strength of the rivets by calculation is less than the calculated percentage strength of the plate, calculate the working pressure by both percentages. When using the percentage strength of the plate, use the nominal factor of safety suitable for the method of construction as by the Commissioners' rules for iron boilers, but when using the percentage strength of the rivets, use 4·5 as the factor of safety. The less of the two pressures so found is the working pressure to be allowed for the cylindrical portion of the shell.

Local heating to be avoided.

Local heating of the plates should be avoided, as many plates have failed from having been so treated.

Welding, &c.

Steel plates which have been welded should not be passed if subject to a tensile stress, and those welded and subject to a compressive stress should be efficiently annealed.

In other respects the boilers should comply with the rules for iron boilers.

The use of steel should be discouraged in the unshielded uptakes of all boilers including vertical boilers

Makers of steel.

When the steel is not to be made by any of the following makers, the case will receive the special consideration of the Commissioners, and this should be specially noted by the Inspectors:—

Messrs.	W. Beardmore & Co.	
,,	J. Brown & Co.	
,,	C. Cammel & Co.	
	D Colville and Sons.	
	The Consett Iron Co., Ld.	
	The Glasgow Iron and Steel Co., Ld.	
	The Landore Steel Co.	
	The Leed Forge Co.	
,,	The Moor Steel and Iron Co., Ld.	For plates and angles, stay and rivet bars.
,,	Palmer's Shipbuilding and Iron Co., Ld.	
,,	John Spencer and Sons Ld.	
,,	The Steel Co. of Scotland.	
,,	The Weardale Iron and Coal Co.	
,,	The West Cumberland Iron and Steel Co.	
,,	The Lanarkshire Steel Co., Ld.	For stay and rivet bars.
,,	Nettlefolds.	
,,	Wright, Butler & Co.	

Tracings of boilers may be received for examination upon payment of the usual fee of Rs. 20.

BOILERS—GENERAL.

Small boilers.

13. Small boilers must be inspected and be fitted the same way as the main boilers and have a water and steam gauge, and all other fittings complete, and as regards safety-valves, must comply with the same regulations as the main boilers.

Stop-valves.

14. No boiler or steam chamber is to be so constructed, fitted, or arranged, so that the escape of steam from it through the safety-valve can be wholly, or partially, intercepted by the action of any other valve.

A stop-valve should always be fitted between the boiler and the steam pipe, and, where two or more boilers are connected with a steam receiver or superheater, between each boiler and the superheater or steam receiver. The object of this is obvious, viz., to avoid the failure of all the boilers through the failure of one. The necks of stop-valves should be as short as practicable.

Guages, &c.

15. Each boiler should be fitted with a steam pressure gauge and a glass water-gauge and two test

cocks, or two glass water-gauges fitted independently. When a factory has more than one boiler, each boiler should be treated as a separate one, and have all the requisite fittings.

Inspectors are to be most careful not to give any official sanction to any new arrangement or construction of steam-boilers, without first obtaining the permission of the Commissioners in writing, nor are they allowed to give any written approval of any invention or arrangement, unless by direction of the Commissioners; and whenever they know that any invention or new arrangement is to be fitted, they should, as soon as possible, with a view to preventing subsequent delays and questions, obtain plans and submit the same for consideration.

16. On every inspection of a steam boiler the Inspector shall, if the boiler is large enough, go inside it, and make a thorough examination of it.

When the boilers are not large enough for the Inspector to get into, he should see them tested by hydraulic pressure at every annual inspection unless he is thoroughly satisfied as to the condition of the boiler. In the case of old boilers the Inspectors must use their own judgment as to the necessary pressure to be applied. This is in no way to interfere with the instructions to test all new boilers in accordance with clause 8, nor the proper internal examination of all boilers that are large enough for the Inspectors to get into.

Whenever it is only removable stays that prevent getting in, he must order their removal, and he must see them properly replaced before granting his declaration.

If any part of a main boiler near the uptake fire-boxes or furnaces is so constructed that the Inspector cannot examine it, he is not to give a declaration, but shall report the case to the Commissioners.

If for special reasons, and for special reasons only, the Inspector cannot go inside a small boiler, he must distinctly state on the face of his declaration his reasons for not being able to do so.

17. If the boiler is too hot for the Inspector to examine the inside efficiently, and with safety and convenience, he should decline to examine the boiler, and absolutely refuse to grant a certificate until he can make an efficient internal examination.

Inspector not to go into hot boilers.

18. Before testing a boiler the Inspector shall examine it, take the necessary measurements, and calculate what the working pressure should be in accordance with the regulations, and only test it with reference to that pressure in accordance with Rule 8. If the test is not satisfactory, the pressure must be proportionately reduced.

Strength of boiler to be ascertained and working pressure fixed by calculation.

This instruction applies to superheaters and steam chests, as well as to boilers.

This course will enable any necessary alterations to be made by the owners and prevent delay or disappointment. The Inspector who grants the certificate should not increase the working pressure without first consulting the Commissioners.

The Inspector who grants the certificate must examine the boilers thoroughly, and, in the absence of special instructions from the Commissioners, will be held responsible for the pressure allowed.

19. The Inspector shall see all new boilers, and boilers that have been cleaned for a thorough repair, tested by hydraulic pressure in accordance with Rule 8 previous to the boilers being set, and before they are covered in, to test the workmanship, &c.; but the working pressure is to be determined by the strength of stays, thickness of plates, and strength of riveting, &c., and not by the hydraulic test.

Hydraulic test.

The hydraulic test should in no case exceed twice the calculated working pressure of the boiler, and it is never to be applied until the boiler has been examined and until the strength has been calculated, from the necessary measurements taken from the boiler itself.

When the boilers are set the Inspector may, at any time he thinks it necessary, before he gives a certificate, have them tested by hydraulic pressure to satisfy himself as to any doubtful part, or of places not easy of access, care being taken in the case of old boilers not to overstrain them; but the test must always exceed the working pressure.

The hydraulic test should, before a certificate is granted, be applied to all boilers that have not previously had a working certificate.

When a boiler is partially inspected by one Inspector, and the inspection is completed and a certificate granted by another, if the Inspector, who witnesses the test of the boiler by hydraulic pressure, has an opportunity of examining it inside and outside after the test, such Inspector should determine the pressure to be allowed on the boiler in question, taking care to inform the makers, owners, or agents, and the Inspector who is ultimately to grant a certificate, what pressure should in his opinion be allowed on it. In the event of the original Inspectors having no opportunity to examine the boiler inside and out after the hydraulic test, the Inspector must re-test the boiler by water and examine the boiler inside and out before determining the working pressure and granting a certificate.

The amount of the hydraulic pressure test, and the date on which it was last applied to the boiler, should be inserted in the Inspector's certificate, and recorded in the dimension sheet of that boiler.

Examination of steam pipes, &c.

Inspectors should pay particular attention to the examination and testing of steam pipes and economisers.

Socket expansion joints.

In all cases in which a socket expansion joint is fitted to a bent steam pipe, the Inspector should require a fixed gland and bolts to be fitted, in order to prevent the end of the pipe being forced out of the socket. This regulation should be complied with in all cases of bent pipes fitted with socket expansion joints. Fixed glands and bolts should be fitted to the expansion joints of straight steam pipes, as cases have occurred, particularly with small straight pipes, in which the ends of the pipes have been forced out of the sockets.

Cast-iron in boilers.

20. In all boilers in which the Inspectors find that cast-iron is employed in such a manner as to be subject to the pressure of steam or water, they shall report the circumstances to the Commissioners in order that they may receive instructions how to act. Cast iron should not be used for stays.

Pressure fixed by one surveyor not to be increased by another.

21. A pressure once allowed on a boiler is not, *under any circumstances whatever*, to be increased unless the Inspector has previously written for and obtained the sanction of the Commissioners.

In case an Inspector is of opinion that an increased pressure may with safety be allowed, he shall communicate with the Inspector who last inspected the boiler; and if, on learning the reasons why the existing pressure was formerly allowed, the Inspector is still of opinion that it may be increased, he should communicate all the facts of the case to the Commissioners; but, as above stated, the pressure shall not in any case be increased until the question has been decided by them.

It may in some cases be found that a strict application of the rules would give a lower limit of working pressure allowable than has previously been granted in such cases. The Inspector will, of course, be careful not to make any serious reduction, without reporting the matter for consideration.

SAFETY-VALVES.

Safety and stop-valve chests to have short necks.

22. The Inspectors are instructed that in all *new boilers*, and whenever *alterations can be easily made*, the safety-valve and stop-valve should be placed directly on the boiler; and the neck, or part between the valve and the flange which is bolted on to the boiler, should be as short as possible.

The Inspector should note that it is not intended by this instruction that old boilers which have been previously passed with such an arrangement should be thrown out of work for the alterations to be carried out.

Of course in any case in which an Inspector is of opinion that it is positively dangerous to have a length of pipe between the boilers and the safety-valve, it is his duty at once to insist on the requisite alterations being made before granting a declaration.

The Inspector shall declare, amongst other things, the limits of the weight to be placed on the safety-valves, and that the safety-valves are such and in such condition as required by the Act.

Area of safety-valves.

23. The area per square foot of fire-grate surface of safety-valves, or (when there is more than one safety-valve on the boiler) the combined area of the safety-valves should be not less than that given in the following tables opposite the boiler pressure intended, provided the valves are not less than two inches in diameter.

When, however, the valves are of the common description, and are made in accordance with the tables, it will be necessary to fit them with springs having great elasticity, or to provide other means to keep the accumulation within moderate limits.

In ascertaining the fire-grate area, the length of the grate should be measured from the inner edge of the dead plate to the front of the bridge, and the width from side to side of the furnace on the top of the bars at the middle of their length.

Number of safety-valves to each boiler.

If there is only one safety-valve on a *main* boiler the Inspector should not grant a certificate without first referring the case to the Commissioners for special instructions.

Fitting small safety-valves.

In the case of small boilers, if it is wished to fit valves smaller than two inches diameter, the case should be submitted for the consideration of the Commissioners.

SALVE AREAS.

Boiler pressure.	Area of valve per square foot of fire-grate.	Boiler pressure.	Area of valve per square foot of fire-grate.	Boiler pressure.	Area of valve per square foot of fire-grate.

Examination of safety-valves.

24. The Inspector in his examination of the boilers and appurtenances is particularly to direct his attention to the safety-valves, and whenever he considers it necessary, he is to satisfy himself as to the pressure on the boiler by actual trial.

The Inspector is to fix the limits of the weight to be placed on the safety-valves, and the responsibility of issuing a certificate before he is fully satisfied on the point is very grave. The law places on the Inspector the responsibility of "declaring" that the boilers are in his judgment sufficient with the weights he states. The Inspector is to examine the whole of the valves, weights, and springs at every inspection.

The responsibility of seeing to the efficiency of the mode by which the valves are fitted, so as to be as much as practicable under the control of the engineer when steam is up, rests with the Inspector.

Safety-valves should be fitted with lifting gear, so arranged that the valves on any one boiler can at all times be eased without interfering with the valves on any other boiler.

Care should be taken that the safety-valves have a lift equal to at least one-fourth their

diameter; that the openings for the passage of steam to and from the valves, including the waste steam pipe, should each have an area not less than the area of valves required, and that each valve-box has a drain pipe fitted at its lower part. In the case of lever valves, if the lever is not bushed with brass, the pins must be of brass: iron and iron working together must not be passed. Too much care cannot be devoted to seeing that there is proper lift, and free means of escape of waste steam, as it is obvious that unless the lift and means for escape of waste steam are ample, the effect is the same as reducing the area of the valve or putting on an extra load. The valve seats should be secured by studs and nuts.

The Inspectors are, as far as is in their power, to make these points generally known to the owners of steam boilers.

Inspector to see valves weighted.

25. When the Inspector has determined the amount of pressure, he is to see the valves weighted accordingly and the weights or springs fixed in such a manner as to preclude the possibility of their shifting or in any way increasing the pressure. The limits of the weight on the valves is to be inserted in the certificate, and should it at any time come to an Inspector's knowledge that the weights or the loading of the valves have been shifted, or otherwise altered, or that the valves have been in any way interfered with, so as to increase the pressure, without the sanction of the Commissioners, he is at once to report the facts.

Spring safety-valves.

26. If the following conditions are complied with, the Inspector need raise no question as to the substitution of spring loaded valves for dead weighted valves:—

(1) That at least two valves are fitted to each boiler.
(2) That the valves are of the proper size, as by clause 23.
(3) That the springs and valves are so cased in that they cannot be tampered with.
(4) That provision is made to prevent the valves flying off in case of the springs breaking.
(5) That the requisite safety-valve area is cased in and locked up in the usual manner of the Government valves.
(6) That screw lifting gear is provided to ease all the valves, as by clause 24.
(7) That the size of the steel of which the springs are made, is in accordance with that found by the following formula:—

$$\sqrt[3]{\frac{S \times D}{C}} = d:$$

S = the load on the spring in lbs.
D = the diamater of the spring (from centre to centre of wire) in inches.
d = the diameter or side of square, of the wire in inches.
C = 8,000 for round steel.
C = 11,000 for square steel.

(8) That the springs are protected from the steam and impurities issuing from the valves.
(9) That when valves are loaded by direct springs, the compressing screws abut against metal stops or washers, when the loads sanctioned by the Inspector are on the valves.
(10) That the springs have a sufficient number of coils to allow a compression under the working load of at least one quarter the diameter of the valve.

PRIME MOVERS.

27 As regards prime movers, the Inspectors are to make a general external examination at each annual inspection, but they are not to order the mill or factory to be stopped for examination of the prime mover, unless there is reason to believe that defects exist which render such prime mover dangerous.

The Inspectors, in making their examination of the prime movers, should call the attention of the owner of the mill or factory in any case where they find the wheel gearing or belting so exposed as to endanger the lives of the operatives. And in the event of their not taking steps to have the dangerous parts closed in, the case should be reported to the Commissioners.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

PUBLIC WORKS DEPARTMENT.

ESTABLISHMENT.

The 19th October 1896.

No. 191.—The following notification issued by the Government of India in the Public Works Department is republished for information:—

No. 412, dated the 6th October 1896.—Mr. M. H. Jackson, Executive Engineer, 2nd grade, Bengal, on furlough, is permitted to retire from the service of Government, under the provisions of Public Works Department Resolution No. 2873G., dated 2nd November 1893, with effect from the 23rd September 1896.

No. 192.—Notification.—The Lieutenant-Governor is pleased to make the following promotion in the Engineer Establishment with effect from the date specified:—

NAME.	From	To	With effect from	Nature of promotion.
1	2	3	4	5
Searight, G. L. ...	Executive Engineer, 3rd grade, temporary rank.	Executive Engineer, 3rd grade.	23rd September 1896.	Permanent.

J. G. H. GLASS,
Secy. to the Govt. of Bengal.

IRRIGATION DEPARTMENT.

The 19th October 1896.

No. 193.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for an Overseer's bungalow in the village of Kulikhati, taluq Krishnapura, pargana Ankurah, zilla Balasore, it is hereby declared that for the above purpose a piece of land measuring, more or less, 5 ghoonts 11 bishwas of standard measurement, bounded on the—

North—By the waste lands of mauza Kulikhati.
South—By the compound of the Public Works Department Office of the place,
East—By the waste lands of mauza Kulikhati,
West—By a narrow road lying north to south,

is required within the aforesaid village of Kulikhati.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

No. 194.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for a retired line of embankment in the village of Nabason, pargana Medan Molla, zilla 24-Parganas, it is hereby declared that for the above purpose a piece of land measuring, more or less, 4 bighas 4 cottahs and 10 chitaks of standard measurement, bounded on the north and south by the Government embankment, and on the east and west by the land of village Nabason, is required within the aforesaid village of Nabason.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

The 20th October 1896.

No. 195.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that, land is required to be taken by Government at the public expense for a public purpose, viz. for the construction of Bhagabangola retired line, Bhagirathi embankment, Schedule D, No. 94, in the villages of Jaunpur, Dighah, Bajidpur, Kashipur, Baiga, Tatlah, Kanapukur, Talia, Shaikpara, Rambag and Bhagabangola, pargana Azimnagar Katra, huda Bahadoorpore, Kumar Protapchakla, huda Bahadoorpore, Gankar, Alinagar Echlampur, zillah Murshidabad, it is hereby declared that for the above purpose a piece of land measuring, more or less, 218 bighas of standard measurement bounded on the—

North—By Bhagabangola road and Boashatigola land of Tinkari Saha of Baluchar, in mauza Baigha Dighu, Gobra Nala, Dewansarai-Baluchar road, land of Shatap Chand Nahar of Baluchar, zamindar, in mauza Kalicoop and Jaunpur.

East—By the district road to Bhagabangola.

South—By the Kaloo Khalicoop district road to Bhagabangola, Gobra Nala, land of Tinkari Saha of Baluchar in mauza Bigah and Dighee and land of Babu Shatap Chand Nahar in mauza Kalicoop and Jaunpur, district road to Baluchar or Dewansarai.

West—By Government embankment, waste land of Rao Jogendra Narayan Roy, zamindar of Lalgola, garden of Ramlal Mondal, garden of Dhakee Hazee, Bhagabangola bazar, Government abandoned embankment, house of Ram Lal Ghosh, garden of Shahebjan Sheikh, house of Jaiva Bibee, house of Rakhal Haldar, house of Ichmal Mandal, house of Ahamad Mahaldar, house of Ali Mahaldar, house of Fatoo Mahaldar, house of Banoo Mahaldar, house of Ramjan Mahaldar, house of Moshom Khalipa, house of Rahimbox Sheikh, house of Logis Mahaldar, garden of Chatoo Sabjee, garden of Ramjoo Hazi, garden of Thaloo Sheikh, garden of Mali Sheikh, garden of Bowshee Road, garden of Gandoo Saha, Shambhunath's tank, garden of Maumohan Sing, garden of Delbar Sarkar, garden of Miajan Mandal, garden of Shariat Sheikh, mulberry land of Bachoo Sheikh, garden of Ajad Sheikh, garden of Atbari Haighobona, garden of Akbar Mandal, house of Dino Chamar, garden of Lojib Sarkar, garden of Behari Saha, garden of Manirdi Sheikh, garden of Keamat Sarkar, garden of Rasik Halsana, garden of Garib Mandal, house of Jhatoo Sheikh, house of Keamut Sarkar, house of Bhaloo Sheikh, house of Aradut Sheikh, Kanapukur village road, garden of Mohar Sarkar, garden land of Kutab Sheikh, land of Babu Prasanna Kumar Majumdar of Baluchar, zamindar of Talia, Government Bhagirathee left bank embankment,

is required within the aforesaid villages of Jaunpur, Dighah, Bajidpur, Kashipur, Baiga, Tatlah, Kanapukur, Talia, Shaikpara, Rambag and Bhagabangola.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A plan of the land may be inspected in the office of the Collector of Murshidabad.

A. D. McARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

[Fifth Publication.]

The 21st September 1896.

No. 177.—Notification.—It is hereby notified that, in exercise of the powers conferred on him by section 99 of Act III (B.C.) of 1876, the Lieutenant-Governor of Bengal proposes to substitute the following for rules 6 and 7 of the revised water-rate rules for the Saran Canals published under Notification No. 106 in the *Calcutta Gazette*, dated 26th March 1894:—

6. Leases will be granted for the year 1896-97 for any one of the four canals to any person, approved by the canal officer, who has a beneficial interest in the use of the water. The charge for the use during the whole year, or any part of it, of each of the canals will be—

				Rs.
No. III.—The Daha	river	...	...	10,000
„ IV.— „ Gundaki	„	...	...	5,500
„ V.— „ Dhanai	„	...	...	6,500
„ VI.— „ Gangri	„	...	...	8,000
	Total		...	30,000

The water-rate must in each case be paid in full into the Government Treasury either at Gopalganj or Chapra, before a lease will be granted, or before water will be admitted into a canal. An application for a lease for the year 1896-97 must be made in the form of Appendix I.

7. Leases will be granted for a period of three years ending on the 31st March 1899 to any person, approved by the canal officer, who has a beneficial interest in the use of the water.

The charge for the use during the period of three years of each of the canals will be—

Canals.	Payment to be made.		
	Before water is admitted in 1896-97.	Before the 15th April 1897.	Before the 15th April 1898.
	Rs.	Rs.	Rs.
No. III.—The Daha river	9,000	8,000	7,000
„ IV.— „ Gundaki „	5,000	4,500	4,000
„ V.— „ Dhanai „	6,000	5,500	5,000
„ VI.— „ Gangri „	7,000	6,000	5,000
Total	27,000	24,000	21,000

Water will not be admitted into any canal during any particular year until the water-rate of that year has been paid in full into the Government Treasury, either at Gopalganj or Chapra. An application for a lease for a term of three years must be made in the form of Appendix II.

[Fifth Publication.]

The 22nd September 1896.

No. 178.—Notification.—The Lieutenant-Governor of Bengal proposes, under sections VI and XI of Act V (B.C.) of 1864, to make the following additional rule, with effect from 1st December 1896, for boats, &c., passing out of the Dhappa Lock, to be included with those published under Notification No. 144, of the 23rd May 1893, at pages 493 and 494, Part I of the *Calcutta Gazette* of the 31st idem:—

Additional toll.—All boats, steamers and flats, after passing out of the Dhappa Lock, must proceed outsidet he toll limit at Bamonghatta within 48 hours, otherwise a fresh toll will be levied in accordance with the rules in force.

Quarantine imposed in Spain on all vessels sailed from Bombay after 10th September last.

The 19th October 1896.

No. 124 Marine.—The following telegram dated the 17th October 1896 from the Government of Bombay, relative to the imposition of quarantine regulations at Goa is published for general information.

A. D. McARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

Copy of a telegram dated the 17th October 1896 from the Government of Bombay to the Government of Bengal.

British Consul, Goa, telegraphs—From yesterday five days' quarantine against passengers from Bombay arriving by rail or sea, same applies to passengers from south travelling by Shepherds steamers.

The 19th October 1896.

No. 125 Marine.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, namely, for a trenching ground in connection with the petroleum depôt at Budge-Budge in the village of Bahirgur, pargana Ballia, zilla 24-Parganas, it is hereby declared that for the above purpose a piece of land measuring, more or less, 6 bighas of standard measurement, bounded on the north by lands belonging to Mohes Shaw and Ram Chand Pramanic, on

the east by lands belonging to Netai Sepoy and Behary Dutta, on the south by lands belonging to Kangali Daw and Kunchil Pramanic, on the west by the Budge-Budge Road is required within the aforesaid village of Bahirgur.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

A. D. MCARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

The 20th October 1896.

No. 126Marine.—With the previous sanction of the Governor-General in Council, the following rules for quarantine against plague have been made by the Lieutenant-Governor of Bengal in exercise of the power conferred by section 1, Act I of 1870.

These rules have effect as a temporary measure from 21st October 1896 in the Port of Calcutta:—

I. The Commander of every vessel, including buggalows or other native craft arriving from Bombay, shall, on arrival at the Sandheads, hoist a yellow flag, and indicate by signal the port from which she has come, and shall keep such flag and signal flying until permitted to take it down as hereinafter provided. The pilot on going alongside a vessel from Bombay shall direct the flag prescribed above to be hoisted if it has not already been done.

II. The Commander shall not, without first having obtained permission as hereinafter provided, allow any communication except orally with the shore or any other vessel or boat, excepting only with the boat supplying the Pilots* from the Pilot Brig, and in that case communication shall be limited to receiving on board the Pilot, his Leadsman, servant and baggage.

* *N.B.*—Pilotage is compulsory for all vessels over 100 tons in the Port of Calcutta.

III. If there is any case of sickness on board, and the Pilot has reason to believe that it is plague, he shall telegraph to the Port Officer from Saugor, and not proceed beyond Diamond Harbour without the permission of the Port Officer.

IV. If the Pilot has no reason to believe that there is any one suffering from plague on board, he shall bring the vessel up the river to Mateeabrooj, and shall anchor it there till the Health Officer has visited it.

V. The Health Officer, as soon as he has received information of the arrival of the vessel at Mateeabrooj, shall visit it, and ascertain by enquiry from the Commander or the Medical Officer on board, or other sources of information, whether any person on board is suffering or has suffered from plague.

VI. If the Health Officer is satisfied that no one is suffering from plague, or has suffered from plague since the vessel left Bombay, and if the vessel has been allowed pratique at any intermediate port including Colombo, he shall allow the passengers to land, but shall detain the vessel at Mateeabrooj till such measures have been taken for the disinfection of the mails and cargo and hold as he may consider necessary.

VII. When he is satisfied that the necessary measures have been taken for the disinfection of the mails, cargo and hold, he shall allow the mails and cargo to be landed, and shall by writing under his hand, to be delivered to the Commander, permit such vessel to haul down the yellow flag, and to proceed upwards in the Port, and to hold free communication with the shore and with vessels and boats in Port.

VIII. If the vessel has not been allowed pratique at Colombo or other intermediate ports, or if through her not carrying a qualified Medical Officer, or for other reasons, the Health Officer is not satisfied that no one on board has suffered during the voyage from plague, he shall direct the Commander to take the vessel to the quarantine anchorage at Mateeabrooj or elsewhere duly appointed by the Port Officer, there to remain for a period of eight days from the date of arrival in harbour. The Health Officer shall also direct the Commander to prohibit, during the period for which the vessel remains at the quarantine anchorage as aforesaid, all communication, except such as is hereinafter provided for, between such vessel and the shore or other vessels or boats in the harbour.

IX. If the Health Officer, as the result of the enquiry made under paragraph V above, shall have reason to believe, at the time when the vessel arrives in the harbour, that any person on board is suffering from plague, or if during the time the ship is in quarantine at Mateeabrooj under Rule VIII, any case of the disease breaks out, he shall direct the Commander to take the vessel to the quarantine anchorage at Diamond Harbour or elsewhere duly appointed by the Port Officer, there to remain for a period of fifteen days from the day of arrival in the harbour; and shall further direct that during such fifteen days, intercourse between the vessel detained under this Rule, or Rule III, and the shore or other vessels or boats in the harbour, shall be prohibited as provided in Rule II.

X. If during the period a vessel is at the quarantine anchorage aforesaid, any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of the last case occurring, and be subject to all the prohibitions provided for in Rule IX.

XI. When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots

as may from time to time be selected by the Port Officer as places of quarantine, there to remain for a period of eight days if under Rule VIII, or if the vessel has been placed in quarantine for fifteen days, for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

XII. It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine, to be subsequently removed by members of their crews.

A. D. MCARTHUR, *Colonel* R.E.,
Secy. to the Govt. of Bengal.

The 20th October 1896.

No. 127 Marine.—The following telegram dated the 19th October 1896 from the Administration of Burma relative to the imposition of quarantine regulations at Rangoon against arrivals from Bombay is published for general information.

A. D. MCARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

Copy of a telegram dated the 19th October 1896 from the Chief Commissioner of Burma to the Government of Bengal.

309. Eight days' quarantine imposed at Rangoon against Bombay arrivals: pratique at Colombo and other British Ports recognised.

The 20th October 1896.

No. 128 Marine.—The following Notification No. 4502, dated the 12th October 1896, issued by the Government of Bombay, is republished for general information.

A. D. MCARTHUR *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

NOTIFICATION.

GENERAL DEPARTMENT.

Bombay Castle, 12th October 1896.

No. 4502.—In exercise of the power conferred by Act I of 1870, the following Rules for quarantine against plague have been made by the Government of Bombay, with the previous sanction of the Governor-General in Council: they have effect from the 3rd instant in the Ports of Aden, Perim and the Somali Coast as a temporary measure:—

I.—The Commander of every vessel, including buggalows or other native craft, arriving at Aden, Perim and the Somali Coast from Assyr between Lith and Lohaja shall, before entering the harbour, hoist a yellow flag (or if entering a port at night time, show whatever quarantine light signals are customary in the port) and indicate by signal the port from which such vessel has come, and shall keep such flag and signals flying until permitted to take them down as hereinafter provided. The pilot on going alongside a vessel from Assyr between Lith and Lohaja shall direct the flag prescribed above to be hoisted, if it has not already been done.

II.—Such Commander shall not, without first having obtained permission as hereinafter provided, allow any communication, except orally, with the shore or any other vessel or boat, excepting with the boat supplying pilots, and in that case communication shall be limited to receiving on board the pilot, his servant and baggage.

III.—On any such arrival being signalled, the Health Officer of the Port shall, as soon as possible, go alongside the vessel and ascertain by enquiry from the Commander whether any person on board is suffering, or has during the voyage suffered, from plague, and if the Health Officer is satisfied by such enquiry that no person on board is suffering, or during the voyage has suffered, from plague, and if the ship carries a qualified Medical Officer, quarantine shall be dispensed with, and pratique granted.

If the vessel does not carry a qualified Medical Officer, he shall direct the Commander to take the vessel to the quarantine anchorange duly appointed and notified by the Resident, and there to remain for a period of eight clear days from the date of arrival in the harbour. The Health Officer shall also direct the Commander to prohibit, during the period for which the vessel remains at the quarantine anchorange as aforesaid, all communication, except such as is hereinafter provided for, between such vessel and the shore or other vessels and boats in the harbour.

IV.—If the Health Officer, as the result of the enquiry made under paragraph III above, shall have reason to believe at the time when the vessel arrives in the harbour that any person on board is suffering, or during the voyage has

suffered, from plague, he shall direct the Commander to take the vessel to the quarantine anchorage as aforesaid, and there to remain for a period of fifteen days from the day of arrival in the harbour; and shall further direct that during such fifteen days' intercourse between the said vessel and the shore or other vessels and boats in the harbour shall be prohibited as provided in Rule III.

V.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of termination of the last case either by death, recovery or removal from the vessel, and be subject to all the prohibitions provided for in Rules III and IV.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Resident as places of quarantine, there to remain for a period of eight days, or if the vessel has been placed in quarantine for fifteen days, for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.

VIII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine, to be subsequently removed by members of their crews.

IX.—All vessels arriving at Aden, Perim and the Somali Coast, which may have communicated with vessels coming from Assyr between Lith and Lohaja, shall be subjected to the same rules as vessels arriving at Aden, Perim and the Somali Coast from Assyr between Lith and Lohaja.

By order of His Excellency the Right Honourable the Governor in Council,

J. DEC. ATKINS,
Secretary to the Government.

[Third Publication.]
The 5th October 1896.

No. 112 Marine.—In exercise of the powers conferred on him by section 50 of the Inland Steam-vessels Act, VI of 1884, the Lieutenant-Governor proposes to make the following rules for the protection of inland steam-vessels from danger by explosion or fire, in supersession of the rules sanctioned under the notification of this Government, dated the 24th January 1888, which was published in page 26 of the Appendix to the *Calcutta Gazette* of the 25th idem. These rules will be taken into consideration on the expiry of a month from the date of first publication in the Gazette, and the Lieutenant-Governor will be glad to consider any suggestions or observations that may be made concerning them by any person within this period :—

1. Before an inland steam-vessel proceeds on a voyage, her cargo, and that of any flat or flats which are intended to be towed, shall be safely stowed away, and hay and other inflammable material shall be properly covered with tarpaulins, or other sufficient protection.

2. Sections 48 and 49 of the Act shall be posted up in some prominent place in every inland steam-vessel. Every person who takes any dangerous goods with him on board an inland steam-vessel shall, if required to do so, deliver up the same to the Master of the vessel for safe custody.

3. No person shall use naked lights of any description in the hold or on the cargo deck of any vessel; and no closed light shall be so used unless it be in charge of an officer of the vessel. Fires shall be permitted only in galleys or regularly constructed fireplaces.

4. Stations shall be assigned beforehand to the officers and crew, so that, in case of fire, they may divide into parties and take up those stations.

5. No gunpowder or other explosive shall be carried unless in a suitably constructed magazine compartment; and no fire shall be permitted on board any flat or steamer while gunpowder is being taken in or discharged.

6. Every inland steam-vessel of a burden of 100 tons and upwards shall be provided with sufficient hose to reach from her engines to her stem and taffrail, and shall be supplied with fire-buckets in the proportion of one for each of the crew, which shall be kept in a place where they are at once available. They shall also be provided with fire-engines, which shall be placed under the charge of an officer, who shall be responsible that they are ready for immediate use.

7. Every inland steam-vessel of less than 100 tons burden shall be supplied with fire-buckets in the proportion of one for each of the crew.

8. It shall be the duty of the master of every inland steam-vessel to give effect to and observe the above rules, and he or any other person committing a breach of these rules shall be punished with imprisonment for a term which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

A. D. McARTHUR, *Colonel*, R.E.
Secy. to the Govt. of Bengal.

EXCISE.

THE HON'BLE MR. W. H. GRIMLEY.

THE following rules regulating the importation of beer from Messrs. Meakin and Company's brewery, Simla, by rail only direct to Dinapur, having been authorized by Government, are published for general information—

I.—Each consignment shall be protected by a pass from the Deputy Commissioner of Simla, specifying (*a*) description of malt liquor, (*b*) original specific gravity, (*c*) quantity number of gallons), (*d*) number of casks in which liquor is contained, and (*e*) amount of duty paid.

II.—Duty on all liquor issued for sale to the public shall be paid at the rate of one anna per gallon to the Deputy Commissioner of Simla.

III.—The Deputy Commissioner of Simla will forward by post copies of duty-paid passes to the Collector of Patna, and will also inform him quarterly of the quantity of duty-free liquor originally issued for Commissariat uses transferred to duty paid.

By order of the Board of Revenue, L. P.,

E. H. WALSH, *Secretary.*

CALCUTTA, *the 8th October 1896.*

No. 1813B.

NOTICE is hereby given that the Elventh Sale of Opium, the Provision of 1894-95 and 1895-96, will be held at the Government Opium Sale-room, No. 2, Bankshall Street, on Monday, the 2nd November 1896, at 11 A.M., and will comprise 3,250 chests, viz.—

	Chests.
Opium manufactured at the Patna Factory consisting of season 1894-95...	1,625
Ditto ditto at the Ghazipur Factory consisting of season 1895-96	1,625
Total ...	3,250

2nd.—The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 14th November 1895, and published in the *Government* and *Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3rd.—The latest dates for deposit and clearance will be the 7th and 17th November 1896, respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room will be received after 1-30 P.M. of Saturday, the 7th November 1896, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Tuesday, the 17th November 1896.

4th.—In addition to the quantity above advertised for sale, the following quantities, more or less, of the Opium manufactured at the Patna and Ghazipur Factories will be brought to sale down to December next about the date specified below. The Board of Revenue, however, reserve to themselves the right of altering the date, should circumstances render it expedient to do so :—

DATES.	Manufactured at the Patna Factory ; about chests.	Manufactured at the Ghazipur Factory ; about chests.	Total ; about chests.
On or about Wednesday, 2nd December 1896	1,625	1,625	3,250
Total ...	1,625	1,625	3,250

NOTIFICATIONS.

SANITARY.

The 5th October 1896.

No. 259.—In exercise of the power conferred by section 3 of the Pilgrim Ships Act (XIV of 1895), the Governor-General in Council is pleased to appoint the sixth day of October 1896, as the day on which the said Act shall come into force.

No. 260.—In exercise of the power conferred by section 19, sub-section (1) of the Pilgrim Ships Act (XIV of 1895), the Governor-General in Council is pleased to order that every pilgrim ship shall contain, in the first or upper between-deck, at least twelve superficial feet and seventy-two cubic feet, and, in the second or lower between-deck, at least sixteen superficial feet, and ninety-six cubic feet, of space available for each pilgrim.

No. 261.—In exercise of the power conferred by section 5, clause (1), of the Pilgrim Ships Act (XIV of 1895), the Governor-General in Council is pleased to direct that, in the computation of pilgrims for the purposes of the said Act and the rules thereunder, two persons of the age of one year and upwards and under the age of twelve years shall, unless otherwise expressly provided, count as one pilgrim.

No. 262.—In exercise of the powers conferred by section 58 of the Pilgrim Ships Act (XIV of 1895), the Governor-General in Council is pleased to make the following rules:—

1. In these rules "the Inspector" means the officer appointed by the Local Government under section 8, or the person authorised by such officer as aforesaid under section 9, of the Pilgrim Ships Act (XIV of 1895), hereinafter referred to as "the Act," and "section" means a section of the said Act.

2. The Inspector shall, on receiving the notice required by section 8, himself proceed, or give written authority to some competent person on his behalf, to inspect the ship, her provisions, medical stores, equipments, ventilation, fittings, etc., and shall satisfy himself by such inspection that they meet all prescribed requirements.

3. The certificates A and B required under sections 11 and 12 shall be given in Forms Nos. I and II appended to the e rules and that required under section 24 in Form III.

4. No certificate under section 12 shall be granted between May 20th and September 20th in any year in respect of a ship of a tonnage of less than 500 registered tons, or which is not capable of steaming at least eight knots an hour in ordinary monsoon whether; nor shall such a certificate be given unless all the arrangements required by these rules have been made to the entire satisfaction of the Inspector.

5. The Inspector shall see that in all cases where the number of pilgrims exceeds 100, the Medical Officer of the ship is present at the official inspection and that such Medical Officer has had an opportunity of satisfying himself as to the completeness of the arrangements made for the accommodation and care of the pilgrims under these rules; and shall require such Medical Officer to furnish a certificate to that effect in Form X and to sign the second of the certificates prescribed by rule 57.

Boats, anchors and cables.

6. (*1*) Every pilgrim ship shall be provided with boats, two of which shall be life-boats, according to the following scale :—

REGISTERED TONNAGE OF STEAM-SHIP.	Number of boats not less than—	Minimum cubic contents of life-boats.	Minimum cubic contents of all the boats of the ship.
1	2	3	4
		Feet.	
Less than 800 tons	5	330	1,730
800 tons and less than 1,000 tons	6	330	2,045
1,000 tons and less than 1,250 tons ..	6	900	2,545
1,250 tons and less than 1,500 tons ...	6	900	3,000
1,500 tons and upwards	7	928	3,600

NOTE.—The cubic contents of the boats in the above table are ascertained by multiplying their outside length, their outside width and their inside depth together, and then the product by 0·6.

(*2*) Every boat shall be supplied with two fresh-water breakers, two small tin-lined lockers fitted under the side seats in the stern and each capable of holding about 50 lbs. of biscuit, and a tightly-spread canvas cover.

(*3*) Every boat shall be provided, to the satisfaction of the Inspector, with masts, sails, painters, oars, rowlocks or tholes, rudder and tiller, boat hooks, plugs and breakers, all properly secured.

(*4*) A hatchet or tomahawk shall be kept in each end of every life-boat, in good order and secured by a lanyard ; a life-jacket or belt for each oarsman, and one for the cockswain, shall also be provided : and a life-line in loops shall run round the outside of the boat and be securely made fast.

7. Boat drill shall be practised at least once a week.

8. Every pilgrim ship shall be provided with three bower anchors of such weight, and with cables of such length, size and material as are, in the judgment of the Inspector sufficient.

Instruments for purposes of navigation.

9. Every pilgrim ship shall be provided with—

(*a*) not less than three good ship's compasses and two boat's compasses and with a record of the deviation of her compasses on every point, entered in the log-book ;

(*b*) Admiralty or Indian Government charts and sailing directions suitable for the voyage she is about to undertake ;

(*c*) Not less than two chronometers and not than two sextants or quadrants and barometers, one of the latter being a mercurial barometer ;

(*d*) A deep-sea leadline and lead.

Apparatus for extinguishing fires and precautions against fire.

10. (*1*) Every pilgrim ship shall be provided with—

(*a*) hose capable of being connected with the engines of the ship, and adapted for extinguishing fire in any part thereof ; and

(*b*) fire-buckets in the proportion of three for every 130 tons of tonnage up to 600, and two for every 100 tons above 600 : Provided that not more than 50 fire-buckets need under any circumstances be carried.

(2) If fire-annihilators or fire-engines are carried, they shall be placed by the Master in charge of one of the principal officers of the ship and the ship's carpenter, who shall be held responsible that they, with the buckets and other fire apparatus, are kept in a state fit for immediate use.*

11. As soon as possible, after leaving port, the officers and crew shall be divided into parties and assigned to stations in case of fire ; and fire-drill shall be practised at convenient times and at least once a week.

* Fire-engines should be worked once a week to keep them in proper order.

12. Immediately before leaving port, the passengers shall be called on to deliver up whatever lucifer matches, gunpowder or other inflammable articles they may have with them.

13. No naked lights shall on any account be used in the hold or store-rooms or in the between-decks, except under trustworthy superintendence. No person shall be allowed to read in bed with a naked light. Smoking between-decks is strictly prohibited.

14. Cases containing spirits shall never be opened in the hold, but may be hoisted on deck for the purpose.

Appliances for saving life and making signals of distress.

15. Every pilgrim ship shall be provided, to the satisfaction of the Inspector, with a supply of life-buoys, with lines attached, of which not less than six shall be kept readily available on deck, and with inextinguishable lights fitted for attachment to the life-buoys. Every pilgrim ship shall also be supplied with an approved life-belt or other similar approved article of equal buoyancy suitable for being worn on the person, for each person on board, and such life-belts or other articles as aforesaid shall be so placed, to the satisfaction of the Inspector, as to be readily accessible.

EXPLANATION.—An "approved life-belt" means a belt which does not require to be inflated before use, and which is capable of floating in water for 24 hours with at least 15 lbs. of iron suspended from it.*

16. Life-buoys shall be secured by toggle and becket or any similar method allowing of ready release, but shall not be lashed or seized to the vessel.

17. Every pilgrim ship shall carry such quantity of rockets and blue lights or other signals as the Inspector may deem adequate.

Fittings and other appliances to be provided in the upper and between-decks.

18. The Inspector shall see that sufficient ventilators are provided for the between-decks to give each pilgrim *a*) in the first or upper between-deck 5 square inches, and (*b*) in the second or lower between-deck 10 square inches of ventilation-area exclusive of hatches and side scuttles, and so placed as to afford an equable diffusion of air through all parts. The ventilators of the second between-deck must act separately from those of the first between-deck, and, if pilgrims are carried on a second or lower between-deck, such lower between-deck shall be ventilated by artificial ventilation, such as Blackman's ventilator or a thermantidote approved of by the Inspector. The Inspector shall also see (*i*) that all air-holes affording a means of communication between the hold and the between-decks are closed so as to shut off, as completely as possible, the escape of foul air from the bilge, or steam from the cargo, into the between-decks; (*ii*) that the foul air from the hold and the between-decks respectively is carried in separate shafts above the uppermost deck; and (*iii*) that all ventilating shafts and tubes for the hold are so arranged as to act quite independently of those for the between-decks.

19. In the absence of hollow iron masts or other means of ventilating the hold, there shall be fitted at least four cowl-headed tubes (*of a size to be approved by the Inspector*) leading from the lower hold to the open air on the upper deck.

20. Every cowl-headed tube shall be provided with a strong plug for use, if necessary, in bad weather.

21. Such provision shall be made for affording light to the between-decks as the circumstances of the case may, in the judgment of the Inspector, require. The pilgrims shall, moreover, have the free and unimpeded use of the whole of every hatchway situated over the space appropriated to their use, and over each hatchway there shall be erected such a booby-hatch or other substantial covering as shall, in the opinion of such Inspector, afford the greatest amount of light and air and of protection from sun and wet as the case will admit of.

22. The upper deck of every pilgrim ship shall be either of wood, or of iron or steel sheathed with wood and caulked.

23. Each hatchway shall be provided with a large tarpaulin tent which can in bad weather be spread well over it and securely fastened so as to keep out rain and let in fresh air, and in fine weather be rolled up and put out of the way; and shall, except where arrangements exists for lowering the derrick boom in a way which will serve the purpose, also be fitted with a strong iron or wooden A-shaped frame for the support of such tent.

24. Every pilgrim ship shall have poop, quarter deck, waist and forecastle awnings complete and in good order, and six windsails distributed as the Inspector may direct. The awning and windsails shall be kept up so long as the weather does not render this impossible.

25. Strong ladders 2½ feet wide with hand rails of a convenient height shall be provided for every hatchway used as such and not merely as a ventilator; and, as additional means for women and children to hold on by, knotted hand-ropes shall be fastened conveniently near the ladders.

26. Hooks for hanging the required number of lanterns shall be fixed at convenient distances apart.

27. The space to be occupied by pilgrims must be kept clear from obstruction of any kind whatever, thoroughly clean and dry; and nothing, except life-belts with the consent of

* Life-belts should be cut out 2 inches under the armpits, and so fitted as to remain securely in place when put on.

the Inspector given under rule 15, shall be slung up or stowed away between the beams. Every day while the pilgrims are on deck the between-decks shall be carefully cleaned and scrubbed with dry sand mixed with suitable disinfectants.*

28. Bamboos, ropes or strong rails shall be securely fastened fore and aft to the midship stanchions on the between-deck.

29. No timber or cargo of any kind, and only the necessary fittings properly secured and live-stock for consumption on the voyage, shall be allowed on the upper deck, which shall, save as aforesaid, be exclusively reserved for the pilgrims.†

30. A set of water-vessels, such as buckets and tin mugs, required by topasses or others for use in the latrines, shall be exclusively set apart for such purpose; and they shall be marked or painted so as to be clearly distinguishable from those used for cooking or drinking purposes

Food, fuel and water-supply.

31. Every pilgrim ship shall be supplied in accordance with the following scale with food, fuel and water, of good quality, conveniently stored and in quantity sufficient to supply the pilgrims on board during the intended voyage (including such detention in quarantine as may be probable):—

For each pilgrim daily—

Rice	... 1 lb.	Tamariad ...	... 1 oz.
Flour or ship's biscuit	... 4 oz.	Condiments, chillies, garlic, coriander seed or turmeric	½ ,,
Pulse, dâl ...	... 4	Salt ...	½ ,,
Ghee or oil ...	... 1	Firewood, dry ...	... 2 lbs.
Onions ...	... 2	Drinking-water from iron tanks ...	... 1 gal.
Pumpkins, yams, or other vegetables ...	... 2		

Provided that, in the case of drinking-water, the allowance hereby prescribed shall be provided for each pilgrim irrespective of his age.

A table of the rations of food and water in Persian, Urdu and Gujarati shall be posted up in a public place on the ship to be approved of by the Inspector.

32. Excepting fuel and water, which shall always be found by the ship, the articles in the above scale need not be provided for those pilgrims who have satisfied the officer appointed in this behalf under section 18 that they have on board food sufficient for their own use.

33. Every pilgrim ship shall, in addition to the requirements of the two last foregoing rules, have on board, either as cargo or stores, food sufficient, in the opinion of the Inspector, to provide for the pilgrims in the event of an accident to the ship's machinery.

34. (*1*)) Every pilgrim ship shall be provided with caboose accommodation sufficient to cook for the total number of pilgrims on board, and such accommodation shall in no case consist of less than two cabooses or cooking ranges placed on deck, properly housed and covered, to which the pilgrims shall have free access between the hours of 6 A.M. and 9 P.M.

(*2*) All cooking ranges shall be made of substantial plate-iron lined inside with bricks and raised at least four inches from the deck, with an outlet or chimney at top for the escape of smoke. Each range shall contain five or six cooking places, and the Master shall see that fires, adequate for cooking, are kept lighted at them from 6 A.M. to 9 P.M. An additional range shall be provided for every 200 pilgrims carried in excess of 100. Cooking on board in pilgrims' private stoves is prohibited.

(*3*) The Inspector may require the Master to provide such number as such Inspector may think necessary of Muhammadan cooks, not exceeding three per hundred pilgrims (exclusive of pilgrims who have on board their own supplies and desire to cook for themselves).

35 The crew of the ship shall not be allowed to use the cooking ranges or latrines set apart for pilgrims while pilgrims are on board, but shall be provided with a separate cooking range and latrine.

36. Each ship shall be fitted with a condenser or distilling apparatus of sufficient capacity to produce at least one gallon of drinking-water a day for every person on board of whatever age, including the crew.

37. No certificate under section 13 shall be granted unless the condenser cannot only supply the minimum quantity of water prescribed under rule 36 for each person on board, but also yield every 24 hours 500 gallons of pure, cold water fit to drink.

38. The tanks for storing drinking-water on board shall not be placed near the latrines. They shall be protected from all filth, and shall be so closed that the distribution of the water can be effected only by means of pumps or from taps with lock and key fitted to the tanks.

39. The water of any tank pronounced bad by the Medical Officer of the ship shall be immediately rejected and pumped out and the tank cleaned out before being refilled.

40. If there is any doubt as to the quality of the drinking-water stored, or as to the possibility of its pollution, either at its source or in the course of the voyage, it shall be well boiled; and it shall be thrown into the sea as soon as it is possible to obtain a purer supply. All water taken on board at any port and intended to be issued as drinking-water shall invariably be boiled before it is distributed.

41. Every condenser or distilling apparatus shall have a separate engine for working the circulating cold-water pump, and under no circumstances shall this engine be used for any other purpose than that of feeding the boiler of the condenser.

* Calvert's powder in the proportion of 10 per cent. should be used.
† Pilgrims should be encouraged to use the upper deck as much as possible.

42. The arrangements for discharging the circulating water from the condenser shall be such that it can be delivered into buckets or connected with a hose for the purpose of washing decks, or extinguishing fire, as well as discharging over the ship's side. A suitable hose and connection shall also be provided.

43. Either upright or horizontal boilers may be used for condensers. Each boiler shall be furnished with a steam-gauge indexed to double the working pressure, a glass water-gauge and two separate gauge-cocks, one safety-valve and two mud-hole doors for the purposes of cleaning.

44. The boilers and all machinery connected with condensers shall be properly covered in, and every wooden bulkhead in the vicinity of the boilers of condensers shall be covered with sheet lead weighing 4½ lbs. per square foot and securely fastened to such bulkhead.

45. All the piping in connection with the condenser, especially the main suction and the condensed water discharge-pipe, shall be laid in position safe from accident or otherwise securely encased.

46. The Inspector shall satisfy himself by actual experiment that the condenser is capable of performing the work required of it.

47. The Chief Engineer or some other competent person, to be approved by the Inspector, shall be appointed to have charge of the distilling apparatus and machinery connected therewith during the voyage.

48. No ship shall put to sea before the decks have been cleared of any loose straw, hay or other inflammable material, and all the cargo has been properly stowed away.

Cargo.

49. No petroleum, as defined in the Petroleum Act (XII of 1886), or explosive as described in the Indian Explosives Act (IV of 1884), nor any inflammable oils, spirits, jute or coal (except such coal as is required for the voyage and the return voyage to India, nor any commodity likely, by reason of its quantity, quality or mode of stowage, to be prejudicial to the safety of the pilgrims, shall be taken as cargo or part of the cargo.

Allotment of upper deck space.

50. No cabin shall be provided for any pilgrim on the upper deck unless space remains unallotted on that deck after providing the accommodation required for the permanent and temporary hospitals, latrines, and six superficial feet for every pilgrim carried in the between-decks. Such space as remains unallotted after making provision for these requirements may be reserved for the accommodation of pilgrims in cabins containing not less than 12 superficial and 72 cubic feet of space. No pilgrim shall be furnished with reserved accommodation on the upper deck except in a cabin.

51. The deck space may be distributed between the 1st and 2nd class pilgrims as the Master or owner may desire: Provided that each pilgrim of the lowest class has six feet of deck space provided for him.

Amount and distribution of baggage.

52. Pilgrims' heavy baggage shall be registered and numbered under the supervision of the Master the day before the ship sails, and shall be deposited in the hold before the ship leaves her moorings. Pilgrims shall be allowed to keep with them only such articles as are absolutely necessary: Provided that the articles so kept do not exceed one maund (82 lbs.) in weight for each adult pilgrim or, in the case of pilgrims who, in accordance with the provisions of section 18, are allowed to provide their own food for the entire voyage, one maund and-a-half.

Hospital accommodation, medical stores, and arrangements for maintaining health, cleanliness and decency.

53. (*1*) The hospital accommodation required under section 21 shall be provided on the upper deck either in the poop or in a deck-house. A permanent hospital shall be provided containing not less than six bunks, and having a deck area of at least 144 superficial feet and dimensions of not less than 864 cubic feet. On every pilgrim ship on which there are 50 or more female pilgrims, there shall be a separate permanent hospital, containing not less than two bunks with a deck area of at least 72 superficial feet and dimensions of not less than 288 cubic feet, which shall be reserved for the use of women and children under 12 years of age. The hospitals shall be lighted and ventilated to the satisfaction of Inspector and shall be provided with permanent raised floors or platforms at least four inches off the deck. They shall be made as secure as any other deck-house, and the roof shall be well caulked and covered with painted canvas.* No case of small-pox, cholera, yellow fever or plague shall on any account be treated in a permanent hospital.

(*2*) Materials shall be carried for the construction on the upper deck of a separate temporary hospital for the treatment of such cases of sickness as it may be considered desirable specially to segregate (such as small-pox, cholera, yellow fever or plague) and for any general outbreak of sickness in the event of the permanent hospital accommodation becoming insufficient. The part of the upper deck upon which such hospital shall,

* The fittings used in constructing permanent hospitals should be of iron in preference to wood.

if required, be erected, shall be pointed out and measured off by the Inspector. The framework of the hospital shall be either of iron (in pieces that can be easily fitted together) or of wooden spars or bamboos. The roof shall be tented, and both that and the side walls shall be made of stout canvas and be perfectly water-tight, due provision being at the same time made for ventilation. The superficial area of the floor* shall be not less than 144 square feet, and the floor shall be raised at least 4 inches from the deck. In cases of sickness of the kind referred to in this rule, only the Medical Officer and the person or persons charged with the duty of looking after the patients shall have access to them, and, except the Medical Officer and medical attendants referred to in rule 69, none of those who have had access to such patients shall be permitted to come into contact with the other persons on board.

54. A suitable dispensary to be approved by the Inspector shall be provided on the upper deck.

Medical stores, etc.

55. The following articles shall be provided according to the following scale and supplied gratuitously to the pilgrims on board at the discretion and by the direction of the Medical Officer, namely :—

For any number of pilgrims not exceeding 100 (proportionate quantities to be provided for pilgrims in excess of that number)—

Sago	5 lbs.
Arrowroot in tin case	10 ,,
Preserved milk† (1 lb. tins)	1 dozen.
Liebig's extract of meat in 2 oz. tins or jars ...	1 lb.
Sugar	5 lbs.
Rum	1 quart bottle.

56. The following medicines and medical appliances shall be provided on the scale indicated below in the case of each at the discretion and by the direction of the Medical Officer :—

(Weights and measures of the British Pharmacopœia.)

Names of medicines, etc.	Scale for 100 passengers.	Notes.
1	2	3
Acidum, borium	2 oz	MISCELLANEOUS ARTICLES FOR ONE HUNDRED PILGRIMS.
,, carbolicum (cryst) ...	1 ,,	
,, nitro-hydrochloricum dilutum.	1 ,,	Fresh vaccine lymph, 6 tubes.
		Adhesive plaster (in tin case), one yard.
Acidum, sulphuricum dilutum	1 ,,	Calico, two yards.
,, tartaricum ...	2 ,,	Flannel, ditto.
Æther sulphuricus	½ ,,	Lint, four ounces.
Alumen (in powder) ...	2 ,,	Bandages (roller), ½ a dozen.
Ammonii carbonas ...	2 ,,	Paper for powders, etc., 1 quire.
Argenti nitras	¼ ,,	Corks for bottles, 1 dozen.
Borax	½ ,,	Cotton-wool (country) 1 lb.
Calomel	¼ ,,	Bed-pans (metal), one.
Chlorodyne	2 ,,	NOTE.—The preparations of ammonia, ether, chloroform, iodine, and all acids should be in well-stoppered bottles.
Choloroformum	1 ,,	
Cocainæ solution, 10 per cent.	½ ,,	
Copaiba	1 ,,	Chloroform should be in blue glass or covered from light by dark paper.
Creasotum	¼ ,,	
Glycerinum	1 ,,	All the drugs, etc., must be properly labelled with the quantities marked on each label.
Hydrargyrum cum creta ...	½ ,,	
Iodoformum	1 ,,	"Poisons" should be specially distinguished by labels with the word "Poison" on them.
Ipecacuanha valoid, fluid extract	½ ,,	
Linimentum camphoræ compositum.	2 ,,	
Lini farina	2 lbs. in tin case.	

* For flooring sheet iron is the best material.

† The contents of a pound tin of preserved milk mixed with half-a-gallon of water make good milk.

Convention, 1, B, III, 25.

Table showing the quantities of medicines, etc., to be supplied according to the above scale for more than 100 pilgrims.

Number pilgrims.	Quantity.
Above 100 to 250	½ more than the quantity prescribed according to scale per 100 pilgrims, and so on.
„ 250 to 350	Twice
„ 350 to 450	Thrice
„ 450 to 550	Four times
„ 550 to 650	Five times

57. The folowing certificates showing that medicines, etc., have been duly supplied and received according to the above scale shall be produced before the Inspector at the time of the inspection :—

(1) Certified that we have supplied medicines, etc., for _____ pilgrims proceeding to _____ in the S.S. _____ according to the above scale [or we have supplied medicines, etc., in making up deficiencies in existing stock up to the above scale].

Dated *Chemists.*

(2) Certified that I have carefully compared the above lists with the medicines, etc., examined by me on board the pilgrim ship _____ and am satisfied that they are all correct.

Medical Officer.

Dated *Ship* *Health Officer.*

58. (*1*) Every pilgrim ship shall carry a disinfecting stove approved by the Health Officer of the Port in British India at which the voyage is to commence.

(*2*) Articles of bedding, carpets and clothes used by patients who have been affected with cholera, as well as by persons who have had access to such patients, shall be immediately disinfected. Such of these articles as have little or no value shall be thrown into the sea, or, if the ship is in a port or canal, be destroyed by fire. All such articles as are not destroyed shall be carried to the disinfecting stove in impermeable bags sprinkled with a solution of corrosive sublimate.

(*3*) The excreta of the sick shall be collected in vessels containing a disinfecting solution, and the latrines in which these vessels are emptied shall be thoroughly disinfected after each operation.

(*4*) Articles which have come into contact with persons suffering from cholera shall be thoroughly disinfected in the following manner :—

(*a*) Articles so contaminated, or suspected of being so contaminated, shall, unless they are liable to be destroyed by exposure to heat, be disinfected in the disinfecting stove under pressure, the stove being maintained at a temperature (to be tested during each operation) of 220° Fahr. and the articles exposed to this temperature for 15 minutes.

(*b*) Articles liable to be destroyed by exposure to the heat of a disinfecting stove, such as metals, leather, tables, lockers, etc., shall be disinfected by being washed with a disinfecting solution.*

(*5*) Ships on which cases of cholera have occurred shall be disinfected in the following manner :—

(*a*) The cabins† and all parts of the ship occupied by cholera patients, or those suspected to be suffering from cholera, shall be emptied, and all articles removed disinfected as above.

(*b*) The interior sides, bulkheads, floors, and decks of the ship shall be washed with the corrosive sublimate solution with the addition of 10 per cent. of alcohol (*i.e.*, one gallon of methylated alcohol to every 10 gallons of the corrosive sublimate solution),‡ and two hours after washing, scrubbed, and then thoroughly washed down with plenty of water.

(*c*) The hold of the ship shall be strewn from time to time with a sufficient quantity of iron sulphate to neutralize the sulphuretted hydrogen, and the water in the hold shall then, unless the ship is in dock, be pumped out, and the hold washed with sea-water and sprinkled with the corrosive sublimate solution.

---

* One of the following disinfecting solutions should be used :

(*a*) Corrosive sublimate in the following proportion :

Corrosive sublimate, ½ oz.
Hydrochloric acid, 1 oz.
Water, 3 gallons.
Fuchsin or eosin, 5 grains.

(*b*) Pure phenic acid, five parts in 100 parts of water.

(*c*) Fresh slaked lime.

The different disinfecting solutions are useful for the following purposes :

(*a*) Linen clothes and articles soiled by the evacuations of cholera patients should be put into the corrosive sublimate solution.

(*b*) Persons in attendance on the sick should use the corrosive sublimate solution, when washing themselves, in the proportion of one part of the solution to 2,000 parts of water.

(*c*) Phenic acid should be used to disinfect articles which cannot be exposed to a temperature of 220° Fahr. or to contract with sublimate solutions, such as metals, instruments, &c.

(*d*) Slaked lime is specially useful to disinfect the evacuations of cholera patients; in the absence of slaked lime phenic acid will answer the same purpose. When slaked lime is used for disinfecting liquids, it should be used in the proportion of three pounds of lime to ten gallons of the liquid to be disinfected.

† For the purpose of fumigating cabins and confined space, one ounce of sulphur should be burnt for every 30 cubic feet of the space to be fumigated, the cabin or other space being completely closed during the operation and kept so for twelve hours.

‡ The washing should commence from the top, horizontally and downwards so that the whole surface becomes covered with a spraying of the solution in fine drops.

59. Pilgrims shall air their clothing, blankets, &c, as often as required to do so by the Medical Officer.

60. The following articles and appliances shall be supplied on the scale shown below :—

Iron boilers with covers—

For rice (large)	According to the number of pilgrims to be fed by the ship.
„ dal or curry (small)	

Iron ladles—

For rice (large)	According to the number of pilgrims to be fed by the ship.	
„ dall, &c. (small)		
Iron spoons, tinned	4	To each pilgrim ship.
Curry-stones, with mullers	4	
Sieves for cleaning rice, &c.	6	
Gallon measure	1	
Half-gallon measure	1	
Quarter-gallon measure	1	
Scales and weight or A spring balance	1	
Block-tin saucepans, for hospital use exclusively, from 1 pint to 1 gallon	3	
Hatchets for cutting wood	2	
Knives	2	

Safety lanterns with lock and key to each.	Besides 3 for hatchways, 2 „ latrines, 1 „ hospital, and 1 „ Surgeon, which are to burn all night,	there shall be one additional lantern for every 100 pilgrims on board, and each such lantern shall burn for three hours every night.
Oil with wicks, or candles to fit lantern.	Sufficient for seven lanterns to burn at least ten hours, and for the rest to burn at least three hours of every night of the voyage.	

Soap	1 lb. per pilgrim.	
Buckets (galvanised iron)	2 for every 100 pilgrims.	
Tubs (large) for bathing or washing ...	4	To each pilgrim ship.
*Tubs (smaller) for latrine use ...	4	
*Tin pots for latrine	12	
Tin pots for pilgrims suffering from sea-sickness	12	
Canvas bathing screens for the use of women	2	
A dirt-shoot, moveable	1	
Deck scrapers	12	
Sand	1 ton.	
Holystones or hard bricks... ...	50	
Swabs or squeezers	18	
Brooms (country)	50	

* All these should be specially marked for privy use.

61. (*1*) Every pilgrim ship shall be fitted with not less than two latrines, apart from those for the use of the crew, sufficiently screened from public view and readily accessible. If there be any females among the pilgrims, one latrine shall be screened off and set apart for the exclusive use of females. There shall be an additional latrine for every 100 pilgrims, or fraction of that number in excess of 100, and if there be more than 100 female pilgrims on board, the number of latrines reserved for their use shall be increased in the proportion they bear to the total number of pilgrims. The latrines shall be provided with seats at the rate of not less than three for the first 100 pilgrims and at the rate of three for every additional 100 pilgrims. No latrine shall be allowed either between-decks or in the hold.

(*2*) Every latrine shall be firmly secured in a convenient and accessible place on the upper deck and close to the bulwarks. It shall not project over the side of the ship, but shall be so placed that the soil-shoot of the latrine floor may lead directly out of a port or other opening, and well clear of the ship's side. Every latrine shall be divided into separate and private compartments. Each compartment shall be not less than three feet by two in size, and shall have a separate entrance with door and be fitted with a seat or a pair of foot-boards having a free opening or hole in the centre. Every such opening shall communicate directly with the floor beneath common to all openings. The floor continued into the shoot, and having a good fall towards it, shall be made either of a continuous sheet of metal, or of wood continuously lined with sheet lead or zinc. The floors and shoots of the latrines shall be painted with coal-tar liberally laid on. There shall be a troughed opening at each

of the ends or sides of the latrines a little above the level of the floor, but below that of the seats of foot-boards, to enable the floors to be freely flushed from the outside. Every compartment shall be well ventilated by means of such openings as will not interfere with privacy, and shall be sufficiently lighted by means of a lantern so placed in the latrine as to throw light into the compartment.

(3) All latrines shall be kept in good order, and cleaned and disinfected three times a day. They shall be constantly flushed by pipes laid on to them, the deck immediately about them being enclosed with a ridge of wood about two inches high to prevent the water used for flushing from finding its way to other parts of the deck.

(4) Not less than two sweepers shall be employed on every pilgrim ship, and one additional sweeper shall be employed for every 100 pilgrims in excess of 100 up to a maximum of five sweepers when the total number of pilgrims does not exceed 1,000. For every 100 or fraction of 100 pilgrims in excess of 1,000, one additional sweeper shall be employed up to a maximum of eight sweepers.

(5) Every pilgrim vessel shall be provided with at least two urinals.

62. Every ship shall be provided with not less than one place for washing on each side of the deck, sufficiently screened from public view, whereof a full proportion, as prescribed in the case of latrine accommodation, shall be set apart exclusively for females. A sufficient number of hand-pumps shall also be provided for supplying sea-water for purposes of ablution.

Medical Inspection.

63. The medical inspection of female pilgrims shall be carried out either by lady doctors or, under the supervision of the Medical Officer appointed by the Local Government under section 32, by women appointed by the Local Government in this behalf.

64. No articles found by the Medical Officer referred to in the last foregoing rule to have been contaminated by persons suffering from cholera or choleraic indisposition, or from a disease which in his opinion is dangerously infectious or contagious, or suspected by him to have been so contaminated, shall be taken on board a pilgrim ship until they have been disinfected under his orders in the manner prescribed by rule 58.

65. No pilgrim otherwise entitled shall be prevented from embarking, save for any of the causes specified in section 32, sub-section (2).

Issue of tickets and refunds of passage-money.

66. (1) The ticket which every pilgrim is, under section 35, entitled to receive—

(a) shall be sold from a book with counterfoils,

(b) shall be denoted by a serial number which shall also be stamped on the counterfoil, and

(c) shall be of canvas paper or parchment, and not less than 4½ inches long by 3 inches wide.

(2) On the ticket and its counterfoil shall be inscribed—

(a) the name of the holder, or, if the holder be a female, the name of the pilgrim whom such female is accompanying, and

(b) the cost in words in Urdu, or in some other vernacular language approved by the Local Government.

The cost of a ticket shall not include any taxes other than the fixed dues leviable at Camaran and Jeddah.

67. (1) Every intending pilgrim who, having purchased a ticket, has not been permitted to embark under the provisions of section 32, sub-section (2), or who, having been received on board a pilgrim ship, has been removed from it in accordance with the provisions of section 33, sub-section (2), or who is, from other unavoidable cause, such as the detention of any member of his family under either of the provisions aforesaid, prevented from proceeding to the Hedjaz, shall be entitled to receive back from the owner or agent of the ship the amount paid by him as passage money.

Bombay Act III of 1887

(2) It shall be the duty, in the case of pilgrims at Bombay, of the Protector of Pilgrims appointed under the Protection of Pilgrims Act, 1887, and in the case of pilgrims at any other port, of such officer as the Local Government may appoint in this behalf, to see that refunds of passage-money are promptly made to intending pilgrims entitled to them under this rule.

(3) The officer making an inspection under section 32 or section 33 shall, in case of such refund becoming due, impress on the pilgrim's ticket the words "Not permitted to proceed on voyage;" and such pilgrim shall thereupon be entitled, on presentation of the ticket so cancelled at the office of the owner or agent, to a refund of the passage-money paid by him.

The Master, Owner, etc.

68. Besides complying with the foregoing rules, so far as they concern him, the Master shall give the notice required under section 8 in Form No. IV appended to these rules, and shall produce, before the Inspector at the time of his inspection, a certificate in the following form:—

"Certified that it is proposed to issue tickets to pilgrims and to provide accommodation as follows:—

"On the voyage of the pilgrim-ship proceeding to —

Class of pilgrims.	Maximum number of tickets to be issued.	Special accommodation and privileges (if any) to be reserved for each class.

(Signed)_____

Master.

69. In the event of a ship being engaged to carry more than 100 pilgrims, the owner, agent or Master shall appoint to it a Medical Officer licensed under rule 79. Such owner, agent or Master may make an application to the Local Government, in form No. V appended to these rules, for a licensed Medical Officer to proceed in medical charge of the pilgrims with the ship, and the Local Government shall comply with such requisition. A second Medical Officer licensed under rule 79 shall be similarly appointed if the number of pilgrims exceeds one thousand. The owner, agent or Master shall also in the case of a ship engaged to carry more than 100 pilgrims appoint at least one male and, if there are any female pilgrims to be embarked, also one female attendant to assist the Medical Officer In addition to the above attendants a compounder shall be engaged by the owner, agent or Master, if the ship is to carry more than 400 pilgrims. Such compounder and attendants must be approved of by the Health Officer at the port of departure and arrangements shall be made to the satisfaction of the Inspector for providing them with adequate accommodation on board ship.

70. The Master shall afford the Medical Officer every facility for examining the provisions, water and medical stores, and for making himself generally familiar with the arrangements made for the accommodation of the pilgrims about to be carried.

71. The Master shall cause the statements required by sections 22 and 25 to be prepared in Form No. VI appended to these rules.

72. The bond required by section 31 when a ship clears from any port in British India other than Aden for any port in the Red Sea shall be executed in Form No. VII appended to these rules.

73. Before sailing the Master shall obtain from the Port Health Officer a bill of health as prescribed in Form No. VIII appended to these rules.

74. The Master shall post up in the between-decks and in such other places accessible to the pilgrims as may be convenient copies of the Act and of these rules and all notices which he may be required so to post by the Commissioner of Police or other authorized officer at the port of first departure. All such copies shall be in English, French or German, and in Persian, Urdu and Gujrati. The Master shall afford every facility to the Port Officer, or other duly authorized officer or person, for making the official inspection of the ship her equipment, ventilation, fittings, provisions and medical stores, and shall himself be present at such inspection.

75. The Master shall be jointly responsible with the Medical Officer for the care of the pilgrims on the voyage. He shall see the special accommodation and privileges, if any, to which the pilgrims are entitled, are reserved to them without hindrance or diminution throughout the voyage; that the space in the upper and between-decks is not encroached upon; that all rules and regulations for securing cleanliness and order are carried out, and, as far as possible, that all reasonable requisitions of the Medical Officer are complied with.

76. The Master shall appoint one of the officers of the ship to the charge of the provisions and stores, to see to the punctual issue according to scale of the day's rations and water, and to assist the Medical Officer generally.

77. The Master shall, in the event of any pilgrim who is unaccompanied by any near relation dying on the voyage, if the ship returns direct from the Hedjaz to any British Indian port, take charge of the effects of the deceased and make them over, on the

arriving in such port, with such particulars as to the name and residence of the deceased as he may have been able to gather, to the Commissioner of Police in Bombay, Madras or Calcutta, and elsewhere to the Magistrate of the District, or, in his absence, the Magistrate in charge. If the death occurs on the voyage to the Hedjaz, and the ship does not return direct to British India, the Master shall make over the effects, with particulars as above, to the British Consul at Jeddah.

78. The Master shall cause the supplementary statement, required by section 24 when additional pilgrims are taken on board at an intermediate port, to be prepared in Form No. VI appended to these rules, the heading being altered to "Supplementary Statement required by section 24 of the Pilgrims Act, 1895."

The Medical Officer.

79. (*1*) Besides complying with the foregoing rules so far as they concern him, the Medical Officer of every pilgrim ship required by the Act to carry a Medical Officer shall be licensed by the Local Government and appointed by or on behalf of the owner of the pilgrim ship. Every person desiring to obtain a license to act as such Medical Officer shall apply for a license to the Local Civil Administrative Medical Officer of the province in which the port of first departure lies. At Jeddah such license may be granted, for the return voyage only, by the British Consul at that port.

(*2*) The license shall be renewable yearly, and shall be in Form No. IX appended to these rules.

(*3*) No person shall be eligible for appointment as a Medical Officer who is unable to write either English or French or German or Italian.

80. The Medical Officer shall, if not already attached to the ship, immediately on his being appointed to it, proceed on board, report himself to the Master, examine and check the medicines and medical stores, and inform himself generally as to the arrangements made for the accommodation of the pilgrims.

81. The Medical Officer shall also report himself personally to the Inspector with a view to receiving any instructions which that officer may have to give him in connection with his duties and the official inspection of the ship.

82. The Medical Officer shall be present at the final inspection, and, after it has been held and the ship and her arrangements approved, he shall, if satisfied regarding the arrangements for the care and comfort of the pilgrims made in accordance with the rules, furnish a certificate to that effect in Form No. X appended to these rules.

83. The Medical Officer shall provide himself with all the necessary instructions and forms required for the voyage.

84. The Medical Officer shall attend any Medical Officer appointed to inspect the pilgrims before embarkation under section 32, or after embarkation under section 33, and shall, with a view to special care or precautions on the voyage, watch those who may appear to be in an infirm or sickly state, and make a note regarding them in his diary.

85. The Medical Officer shall not leave the ship after the medical inspection has been completed. He shall see that the place set apart for the accommodation of the pilgrims is not encroached upon; that all the pilgrims have access to the upper deck; that good drinking-water is readily accessible and duly supplied; that the latrines are attended to by the ship's topasses; that a supply of water is at hand for use in the latrines; that suitable hours have been fixed, in communication with the officer in charge of the stores, for the regular issue of daily rations to such of the pilgrims as have to be fed by the ship; and generally that every proper care is taken to secure cleanliness and good sanitary arrangements on board.

86. The Medical Officer shall satisfy himself that any additional passenger waiting to be taken on board at an intermediate port is not suffering from, or shows no signs or symptoms of choleraic indisposition or any disease which is, in his opinion, dangerously infectious or contagious.

87. The Medical Officer shall be jointly responsible with the Master for the care of the pilgrims on the voyage, and shall co-operate with the Master and Officers of the ship for the welfare of the pilgrims.

88. During the voyage from any port in British India (except Aden) the Medical Officer shall for the first five days, daily inspect the pilgrims and observe them individually to assure himself that none of them is affected with cholera, small-pox, yellow fever or plague.

89. The Medical Officer shall, if he has any doubt as to the quality of the drinking-water, draw the attention of the Master, in writing, to the provisions of rule 40.

90. The Medical Officer shall, should any case of infectious or contagious disease occur, satisfy himself that disinfection is performed in the manner prescribed by rule 58, and shall record in his diary the fact that he has done so.

91. (*1*) The Medical Officer shall keep up regularly, from day to day throughout the voyage, the following records in connection with his duties, *viz.*:

(*a*) a Medical Diary of the principal events of the voyage, briefly and accurately recording all facts in connection with the medical history of the pilgrims, including a record of any advice he may give to the Master, and of compliance with, or neglect of, such advice;

(*b*) an Admission and Discharge Book of every case brought under treatment in Form No. XI appended to these rules; and

(*c*) a Register of Deaths in Form No. XII appended to these rules.

(*2*) These records shall be written in either English, French, German or Italian.

92. On arrival at the port of debarkation in the Red Sea, the Medical Officer shall submit his diary and returns to the Consular authority there for transmission to the Government of India, and shall forward simultaneously a copy of them to the Inspector at the port in British India from which the voyage commenced, and on arrival at any British Indian port to the Chief Customs-officer, or to any officer authorized under section 26 to receive the statements referred to in that section.

No. I.

Certificate (A) under section 11 of the Pilgrim Ships Act, 1895.

I, , duly appointed and authorized to grant certificates under section 11 of the Pilgrim Ships Act, 1895, do hereby certify that the ship , register tonnage tons, being a pilgrim ship within the meaning of the said Act, and now riding at anchor at , and ready to proceed on a voyage to , is sea-worthy, properly equipped, fitted, and ventilated, and that she is capable of carrying pilgrims.

No. II.

Certificate (B) under section 12 of the Pilgrim Ships Act, 1895.

I, , duly appointed and authorized to grant certificates under section 12 of the Pilgrim Ships Act, 1895, do hereby certify that the ship of , being a pilgrim ship within the meaning of the said Act, and having on board pilgrims, lists of whose number and sex have been furnished by , the Master of the said ship, and ready to proceed on a voyage to , the intermediate ports at which she is intended to touch being , has the proper complement of officers and seamen; that she is principally propelled by steam; that (in cases when tonnage or steam-power have been prescribed) she is of the prescribed tonnage and steam power; that she has sufficient and suitable cooking, hospital washing and latrine accommodation on board; that the provisions, fuel and pure water and other stores prescribed for such ships by the rules under the said Act, are of good quality and properly stowed or packed, and are sufficient according to the scale for the time being fixed by the said rules; and that the said provisions, fuel and water are sufficient for days, the probable duration of the said voyage, and also sufficient to provide the pilgrims with food in the event of an accident to her machinery; that is to say, water and fuel sufficient for the whole number of pilgrims and provisions sufficient for pilgrims, the remaining, *viz.*, pilgrims, finding their own provisions.

I also certify [in the case of a ship to carry more than 100 pilgrims] that she has on board the Medical Officer [or Officers as the case may be] required by section 27 of the Act, and the attendants prescribed by rule 69 of the rules thereunder.

I also certify that the Master of the said ship holds Certificate A as required by section 11 of the Pilgrim Ships Act, 1895, and that there is no cargo on board contrary to the provisions of rule 49 of the rules thereunder.

I do further certify that the full space required by the said Act has been appropriated to pilgrims on board.

No. III.

Supplementary Certificate B under section 24 of the Pilgrim Ship Act, 1895.

No. 1633G.

Extract from the Proceedings of the Government of India, in the Foreign Department, dated Simla, the 9th October 1896.

Read—

Resolution of the Government of India in the Home Department, No. $\frac{\text{Examinations}}{18-82}$, dated the 18th January 1896.

OBSERVATIONS.—The above Resolution recorded in the Home Department extends to military officers permanently in civil employ the rules in force for the encouragement of the study of oriental languages among the Junior Members of the Indian Civil Service. The Resolution states that separate orders will be issued by the Foreign Department regarding the examination of officers of the Political Department in vernacular languages and on the particular proposal of the Chief Commissioner of Coorg.

RESOLUTION.—The Governor-General in Council has decided to adopt the suggestion made by the Chief Commissioner of Coorg. In future, therefore, the rules of the 2nd January 1880, will apply to all officers of the Political Department of the Government of India, including military officers in permanent political employ. Officers of the Political Department, including military officers in permanent political employ, will also be eligible, under the rules obtaining in the adjoining Presidency or Province, for rewards for passing examinations in the vernacular languages spoken in the Agency or Province in which they are serving.

2. In the case of military officers in permanent political employ the limit of time specified in rule VI of the rules of 1880 within which an officer can earn a reward for passing the Higher Standard, High Proficiency and Honour examinations respectively, may, for special reasons, be extended by the Government of India on the recommendation of the Resident or Agent to the Governor-General under whom the officer is serving.

3. The Governor-General is Council will be glad if the Governments of Madras and Bombay will cause similar orders to be issued in respect of officers in local political employ.

ORDER.—Ordered that a copy of this Resolution be forwarded* to Local Governments and Administrations and Political Officers under the Foreign Department; and to the Military Department for information and guidance.

Ordered also that a copy of this Resolution be forwarded to the Home Department for information and any action considered necessary with reference to that Department's Resolution above quoted.

SANITARY.

The 12th October 1896.

No. 300.—The following rules for quarantine against plague which have been made by the Bombay Government in exercise of the power conferred by section 1, Act I of the 1876, with the previous sanction of the Governor-General in Council, are published for general information.

The Rules have effect from the 5th October 1896, as a temporary measure, in the Ports of Aden, Perim, and the Somáli Coast :—

I.—The Commander of every vessel, including buggalows or other native craft, arriving at Aden, Perim, and the Somáli Coast from Bombay shall, before entering the harbour, hoist a yellow flag (or if entering a port at night time, show whatever quarantine light signals are customary in the port) and indicate by signal the port from which such vessel has come, and shall keep such flag and signals flying until permitted to take them down as hereinafter provided. The pilot on going alongside a vessel from Bombay shall direct the flag prescribed above to be hoisted, if it has not already been done.

II.—Such Commander shall not, without first having obtained permission as hereinafter provided, allow any communication, except orally, with the shore or any other vessel or boat, excepting with the boat supplying pilots, and in that case communication shall be limited to receiving on board the pilot, his servant and baggage.

III.—On any such arrival being signalled, the Health Officer of the Port shall, as soon as possible, go alongside the vessel and ascertain by enquiry from the Commander whether any person on board is suffering, or has during the voyage suffered, from plague, and if the Health Officer is satisfied by such enquiry that no person on board is suffering, or during the voyage has suffered, from plague, and if the ship carries a qualified Medical Officer, quarantine shall be dispensed with, and pratique granted.

If the vessel does not carry a qualified Medical Officer, he shall direct the Commander to take the vessel to the quarantine anchorage duly appointed and notified by the Resident, and there to remain for a period of eight clear days from the date of arrival in the harbour. The Health Officer shall also direct the Commander to prohibit, during the period for which the vessel remains at the quarantine anchorage as aforesaid, all communication, except such as is hereafter provided for, between such vessel and the shore or other vessels and boats in the harbour.

IV.—If the Health Officer, as the result of the enquiry made under paragraph III above, shall have reason to believe at the time when the vessel arrives in the harbour that any person on board is suffering, or during the voyage has suffered, from plague he shall direct the Commander to take the vessel to the quarantine anchorage as aforesaid, and there to remain for a period of fifteen days from the day of arrival in the harbour; and shall further direct that during such fifteen days intercourse between the said vessel and the shore or other vessels and boats in the harbour shall be prohibited as provided in Rule III.

V.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of termination of the last case either by death, recovery or removal from the vessel and be subject to all the prohibitions provided for in Rules III and IV.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Resident as places of quarantine, there to remain for a period of eight days, or if the vessel has been placed in quarantine for fifteen days, for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.

VIII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine to be subsequently removed by members of their crews.

IX.—All vessels arriving at Aden, Perim, and the Somáli Coast which may have communicated with the vessels coming from Bombay, shall be subjected to the same rules as vessels arriving at Aden, Perim, and the Somáli Coast from Bombay.

That the subjoined Resolution which was passed at an Extraordinary General Meeting held on Friday, the 18th day of September, be and the same is hereby confirmed as Special Resolution.

That it is desirable to reconstruct the Company in order to provide for the carrying into effect of a scheme for the conversion of the share capital of the present Company, amounting to Rs. 15 00,000 in 15,000 shares of Rs 100 each into Rs. 7,50,000 Preference shares entitled to a preferential dividend at the rate of 6 per cent. per annum, and Rs. 7,50,000 Ordinary shares ranking for dividend after the liability on the Preference shares has been discharged. Such Preference shares to have a preferential claim for re-payment of capital should the Company be wound up, and after the Ordinary shares have been repaid to be entitled to a moiety of any surplus that may remain, and that this Company, be accordingly wound up voluntarily in manner following, that is to say:—

(1) That Messrs. H. J. Weston, Shirley Tremearne, R B. Turner, G. A. Orriston, H M. Rustomjee, and W. Morrison be and they are hereby appointed liquidators without remuneration for the purpose of such winding up.

(2) That the said liquidators be and they are hereby authorised to consent to the registration of a new company to be named the Goosery Cotton Mills Company, Limited, with a Memorandum and Articles of Association which have already been prepared with the privity and approval of Directors of this Company.

(3) That the draft agreement submitted to this meeting and expressed to be made between this Company and its liquidators of the one part, and the Goosery Cotton Mills Company, Ld., of the other part, be and the same is hereby approved, and that the said liquidators be and they are hereby authorised pursuant to section 204 of the Indian Companies Act of 1882 to enter into an agreement with such new Company (when incorporated) in terms of the said draft and to carry the same into effect.

Carried unanimously.

With a vote of thanks to the Chair, the Meeting terminated.

SHIRLEY TREMEARNE, Chairman.

(749—1)

IRRIGATION DEPARTMENT.

Notice.

IT is hereby notified for general information that the Bhangore khal on the Eastern Canal, from Bamonghatta at 10½ mile to Kulti at 23rd mile of the inner boat route, will be closed to traffic from the 8th January to 15th June 1897. During the closure boats coming from the eastern districts to Calcutta will require to use the outer boat route *viâ* the Mutla river.

A. S. THOMSON, Under-Secy. to the Govt. of Bengal.

Calcutta, the 20th October 1896.

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series *including postage*, Rs. 22-8.

	Without postage.	With postage

Obtainable at the Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depot.

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

Notice.

IT is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that will be supplied only if available.

THE following Weather Reports of the Bengal Meteorological Department, issued by orders of the Government of Bengal, can be supplied to the public at the prices annexed:

1st.—Bay of Bengal and Bengal Daily Weather Report, giving meteorological observations taken at 64 stations on or near the coast of the Bay, and in Bengal and Assam, with a chart and summary. This is published in connection with the Bay of Bengal Storm Signal Service. The report giving 8 A.M. observations of the day is distributed by peon in Calcutta soon after midday. Price to subscribers in Calcutta Rs. 3 per mensem, payable in advance for six months.

This report will be issued every year from 1st May to 31st October. From 1st November again the Bay of Bengal Report containing observations taken at 28 stations will be issued up to 30th April.

2nd.—A Monthly Statement of Meteorological Observations taken at 49 observing stations, and of rainfall recorded at 327 subdivisional and other stations, together with summaries of the more important features of the meteorology of the past month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Monthly Summary Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal, 5, Russell Street, Calcutta, for the Bay of Bengal and Bengal Daily Weather Report, and to the Accountant and Treasurer, Bengal Secretariat, for the Monthly Report.

C. LITTLE,

Offg. Meteorological Reporter to the Govt. of Bengal.

Notice.

NOTICE is hereby given that the terms for the purchase of publications from the Bengal Secretariat Book Depôt except for Government offices or offices under the control of Government Officers are strictly cash, and on no other terms will any publication be supplied, or advertisement, notice, &c., inserted in either of the Gazettes.

In the case of insolvency notices, cash must be sent with such notices when forwarded by Mofussil courts or offices and for those forwarded by the Official Assignee cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat.

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

☞ Applications for Acts of the Bengal Legislative Council required on the public service should be addressed to the REGISTRAR, Office of the Legislative Department, Government of Bengal.

Copies are available for purchase at the Bengal Secretariat Book Depôt.

Notice.

The 29th March 1886.—The subscription to, and postage for the *Calcutta Gazette* will henceforth be at the following rates, payable in advance:—

For the Mofussil.

	Per annum. Rs. A. P.		Per annum. Rs. A. P.

NOTICES TO MARINERS.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 204.

[First Publication.]

AUSTRALIA—MORETON BAY.

Front leading light, North-West channel.

THE Portmaster, Brisbane, has given notice (No. 19 of 1896) that the northern edge of the seaward sector of white light from the front leading light on Bribie Island, bearing S. 17° W., passes about six (6) cables east of the Bray Rock. A dim light may be visible from that bearing as far in as the land, which must not be mistaken for the bright white light, and mariners are cautioned accordingly.

B. P. CREAGH, *Comdr.*, R.I.M.,
Port Officer of Calcutta.

Published for general information.

O. C. LEES,
Under-Secretary, Marine Department.

[First Publication.]

AUSTRALIA—HOVELL BAR, ELLIS CHANNEL.

Eastern approach to Thursday Island Harbour.

THE Portmaster, Brisbane, has given notice (No. 20 of 1896) that, owing to changes in the depth over the Hovell Bar, the deepest water now lies to the southward of the two buoys marking the Bar hitherto painted black. These buoys are now painted red, and are to be left on the starboard-hand at a distance of 150 feet when approaching Thursday Island Harbour; after which proceed as before.

B. P. CREAGH, *Comdr.*, R.I.M.,
Port Officer of Calcutta.

NEW ZEALAND, NORTH ISLAND—KAIPARA HARBOUR.

Bar signals at Pouto Point.

THE British Admiralty has given notice (No. 522 of 1896), that the undermentioned signals by flags of the International Code, to indicate the state of Kaipara bar, would be made at the Pilot station, Pouto Point; but probably they are only available for the information of outward bound vessels:—

1. Flag *P* indicates that the bar is workable by all vessels, steam or sailing.
2. Flag *S* indicates that the bar is workable by steam-vessels or vessels in tow of steam-vessels.
3. Flag *B* indicates that the bar is unworkable.

Approximate position, Pouto point, lat. 36° 21½′ S., long. 174° 11½′ E.

INDIA WEST—BOMBAY COAST.

Exhibition of lights at Jaigarh (Jyghur).

THE British Admiralty has given notice (No. 468 of 1896) that on 15th July 1896, a light would be exhibited from an iron structure recently erected on the north-west point of Jaigarh headland :—

Jaigarh headland light is a fifth order, dioptric, *fixed white* light, elevated 134 feet above the sea, 32 feet above the ground; and visible seaward from South, through east, to North, a distance of 13 miles in clear weather.

Approximate position, lat. 17° 18′ 0″ N., long. 73° 11′ 0″ E.

Also, that, on the same date, a *fixed red* port light would be shown from the northern bastion of Jaigarh fort, about 1¾ miles eastward of Jaigarh headland lighthouse.

CHINA, NORTH EAST COAST—WEI HAI WEI HARBOUR.

Chao Pei Tsui light discontinued, and sunken wrecks.

THE British Admiralty has given notice (No. 469 of 1896) that the illuminating apparatus of Chao Pei Tsui lighthouse is destroyed and the light (*flashing white*) is consequently discontinued.

The lighthouse is standing intact.

Approximate position, lat. 37° 28′ N., long. 122° 15′ E.

Also, that the wrecks of four Chinese vessels-of-war lie sunk, southward of Leu kung tau, in the undermentioned positions :—

1. *Lai yuen*, with west end of Observatory island bearing N. by W. ½ W., distant $1\frac{1}{10}$ miles; and east end of Leu kung tau E. by N. ½ N.
2. *Chao yuen*, with west end of Observatory island bearing N.W. ½ N., distant $1\frac{3}{10}$ miles; and east end Leu kung tau E. ½ N.
3. *Chen yuen*, with Channel island bearing S.S.E., distant $1\frac{1}{10}$ miles; and east end of Leu kung tau E. ½ N.
4. *Chi yuen*, alongside the pier at the coal stores, west end of Leu kung tau.

[Second Publication.]

AUSTRALIA—MORETON BAY.

New lights and buoys in the North-West Channel.

THE Port Master, Brisbane, has given notice (No. 18 of 1896) that, on and after 7th September, the following lights, gas buoys, and additional buoys will be exhibited and in position for use in entering or leaving Moreton Bay by the North-West Channel, viz.—

Light on Caloundra Head.—The light is of the 4th order dioptric condensing; it is placed in a circular tower 38 feet high from ground to lantern top, standing on the summit of the hill, 11¾ cables west from Bray Rock. The focal plane of the light is 171 feet above high-water level, and the light is visible a distance of about 16 miles.

It shows a fixed white light to seaward between the bearings of S. 1° E. and N. 61° W., a fixed red light over the North Banks between the bearings of N. 61° W. and N. 30° W., and an intensified white sector down the North-West Channel between the bearings of N. 30° W. and N. 23° W.

Note.—The light may be partially obscured by trees between the bearings of S.S.W. and S. by W.

Leading Lights on Bribie Island.—These lights bear in line S. 55° W. The front light is of the 4th order dioptric condensing; it is placed in a skeleton wooden tower 62 feet high from ground to lantern top, and the tower stands 80 yards back from high-water line, bearing S. 10° W., distant 4·73 miles from Bray Rock. The focal plane of the light is 56 feet above high-water level, and the light will be visible about 12 miles.

It shows a fixed white light to seaward between the bearings of S. 17° W. and S. 77° W., intensified over an arc of 15°, the centre of which is on the line of lights; it is obscured between the bearings of S. 77° W. and N. 46° W., and shows an intensified white sector down the North-West Channel between the bearings of N. 46° W. and N. 40° W.

The back leading light is holophotal, showing a fixed white light over an arc of about 15° to seaward, the centre of which passes over the front light. It is placed on a skeleton wooden tower 97 feet from ground to top of lantern, and is 1,060 yards distant from the front light. The focal plane of the light is 95 feet above high-water level, and the light will be visible about 15 miles.

Two gas buoys, painted black with can-shaped superstructures, replace the two black buoys hitherto marking the western extremity of the Spitfire Banks and the western side of Yule Bank respectively; and one gas buoy painted red with conical superstructure replaces the red buoy hitherto marking the northern extremity of the Western Banks.

From the black buoys a fixed white light is shown; and from the red buoy an occulting white light, visible 4 seconds, eclipsed 2 seconds, is shown. The focal plane of the lights is 10 feet above water level, and the lights will be visible about 3 to 4 miles.

Additional Black Buoys.—Three additional black buoys, marking the eastern side of the North-West Channel, are placed on a line joining the buoys marking the northern extremity of the North Banks and the western extremity of the Spitfire Banks on the following bearings, viz.—

Buoy in 8 fathoms—
Caloundra Light-house, bearing N.W. by N. ½ N., Mount Beerwah, bearing W. ½ S.

Buoy with top-mark in 10 fathoms—
Caloundra Light-house, bearing N.W. by N., Mount Beerwah, bearing W. ½ N.

Buoy in 9 fathoms—
Caloundra Light-house, bearing N.W. ½ N., Mount Beerwah, bearing W. ½ N.

Buoy Numbers.—The black buoy marking the northern extremity of the North Banks will be numbered NW1, as before; the additional buoys will be numbered NW3, NW5, and NW7, respectively. The Spitfire Bank gas buoy will be numbered NW9, and the Yule Bank gas buoy will be numbered NW11. The Western Banks gas buoy will be numbered NW4.

Buoys Nos. 1 and 5 will carry top-marks.

Directions by Night.—Vessels from the southward, after rounding Cape Moreton, should steer a course for Caloundra Light, keeping both the Yellow Patch and the Caloundra Light white until the Bribie leading lights come in line, bearing S. 55° W. Keep the latter in line, passing through the red sector from Caloundra Light until in the white sector from that light, then haul up and bring the light astern, bearing N. 25° W., until through the obscured sector of the front leading light; and when the white sector from the latter is entered keep within its limits until the Spitfire Bank gas buoy is visible, when steer to pass it on the port hand at a distance of about 3 cables; thence steer to pass the Western Banks gas buoy on the starboard hand at a distance of about 3 cables off; then steer to pass the Yule Bank gas buoy on the port hand at a distance of about 4 cables, and then steer for Cowan Cowan Light, bearing S.E. ¾ E., until the bright white sector from Comboyuro Light is entered, when bring that light astern bearing north, and continue, passing through the obscured sector from Cowan Cowan Light until the Cowan Cowan Light opens out bright again, when bring it astern, and keeping within the limits of that sector steer a course across the Bay for the anchorage near the Pile Light.

Vessels from the northward must approach the entrance, keeping Caloundra Light white until the leading lights are in line, when proceed as directed above.

Directions by Day.—Vessels from the southward after rounding Cape Moreton should steer for Caloundra Head, keeping Cape Moreton Light-house open east of the Outer White Patch until the light towers on Bribie Island come in line, bearing S. 55° W., or until the S.E. Glasshouse Mountain (marked 920 feet on chart) comes in line with the front leading light-house. Steer in on that line until Coolum Hill (600 feet high) is shut in its own width with Caloundra Head—its top showing over the near land—or until Caloundra Light-house bears N.-W. by N. ¾ N.; then steer S. 33° E., rounding the black buoy with top-mark on the north extreme of the North Banks, passing three more black buoys on the port hand, the middle one of which carries a top-mark, and the Spitfire Bank gas buoy. Pass the latter at a distance of about 2 to 3 cables, and steer to pass the red gas buoy on the western banks on the starboard hand at a similar distance; then steer to pass the Yule Bank gas buoy on the port hand at a distance of 3 to 4 cables; and then steer for Cowan Cowan Light-house, keeping Cone Hill just open south of the tower until the red buoy on the East Knoll Bank is visible, when steer to pass it on the starboard hand at a distance of about 4 cables, and continue until Mount Campbell, bearing N.E. ½ N., is just open south of Cowan Cowan Light. Keep these marks in that position, and continue on across the Bay to the roadstead.

Vessels from the northward should not bring Coolum Hill west of the summit of Cartwright Point before running down the line of leading marks; then proceed as directed above.

Charts affected: Nos. 1029, 1068, 1670A.

PACIFIC—SOUTH-WEST.

Search for La Brillante shoal and Melaine rock.

THE British Admiralty has given notice (No. 513 of 1896) that a thorough search has recently been made for La Brillante shoal and Melaine (Melanie) rock by Commander J. W. Combe, H. M. Surveying Vessel *Waterwitch* :—

(1) In the case of La Brillante shoal, while it may be taken for granted that the search has disproved the existence of a danger, the soundings indicate that there is a small bank (of probably 20 to 30 fathoms) still to be found in about lat. 23° 14′ S., long. 170° 6′ E., the presence of which would account for the various reports of shallow water in the vicinity.

(2) In the case of Melaine rock, the report of which was most vague, the search is considered to have disposed of its existence either in lat. 21° 26′ S., long. 170° 57′ E.; or in a position 5 to 10 miles W. by N. from Matthew island.

Melaine rock and the rock marked *E. D.*, in the last position, have therefore been expunged from the Admiralty Charts; and a depth of 22 fathoms, with *La Brillante* written against it, has been placed on the charts in lat. 23° 14′ S., long. 170° 6′ E.

FINANCIAL RESOLUTION.

FINANCIAL DEPARTMENT—FINANCE.

Darjeeling, the 10th October 1896.

RESOLUTION—No. 769T.—F.

THE Lieutenant-Governor is now in a position to review the actual financial results of the year 1894-95, the revised estimate for the year 1895-96, and the budget estimates for the year 1896-97. The final accounts of the first year, with the Accountant-General's memorandum thereon, have been received; and although the accounts of the second year have not yet been finally closed, the approximate unadjusted figures for twelve months given in his accounts for March 1896 are sufficient for practical purposes. The figures of the first four, and in some cases five, months of the current year have also been received, and these afford sufficient materials for a revised forecast of the probable financial position of the Province in the last year of the contract. In the Financial Resolution No. 5191F., dated the 27th December 1892, the financial and administrative results of the working of the Provincial contract for the five years 1887-88 to 1891-92 were reviewed. The existing contract came into force on the 1st April 1892, and will expire with the current year. As a new financial contract with the Government of India will

now be made, it will be convenient, after reviewing the budget estimate for 1896-97, to examine the general results of the working of the present contract during the five years covered by it.

PART I.

Accounts of 1894-95.

2. The actuals of 1894-95, furnished by the Accountant-General in his Memorandum on the accounts of the year, are compared in the following table, with the approximate actuals adopted in the Financial Resolution No. 5583F., dated the 5th November 1895:—

Receipts.		Heads.	Outgoings.	
Figures adopted in November 1895.	Actuals reported by the Account-ant-General.		Figures adopted in November 1895.	Actuals reported by the Account-ant-General.

4,76,306	4,77,469	Buildings and Roads ...	27,29,837	27,29,837
11,500	11,500	Contributions	12,49,917	12,49,917
4,46,19,722	4,46,23,191	Total ...	4,29,20,640	4,29,25,233
26,24,038	26,24,038	Opening balance	.....	.....
.....	... ..	Closing do.	43,23,120	43,21,996
4,72,43,760	4,72,47,229	Grand Total	4,72,43,760	4,72,47,229
.....	.....	Provincial surplus ...	16,99,082	16,97,958

3. The approximate actuals adopted in the Financial Resolution of the 5th November 1895 assumed that the year 1894-95 had opened with a balance of Rs. 26,24,038, and closed with a balance of Rs. 43,23,120; that the total amount available for expenditure was Rs. 4,72,43,760, and that Rs. 4,29,20,640 had been spent. The actual result was less favourable by Rs. 1,124 only. The amount available for expenditure was Rs. 4,72,47,229, and the amount actually expended Rs. 4,29,25,233. The closing balance was Rs. 43,21,996.

4. There was an increase of Rs. 3,469 on the revenue side, and of Rs. 4,593 on the expenditure side. The following statement shows the chief differences in respect of which the accounts were better (+) or worse (—) than the approximate actuals:—

	Revenue side.	Expenditure side.
	Rs.	Rs.
Land Revenue	—2,458	+17,745
Stamps	+1,110	— 1,020
Provincial Rates	—1,471	—17,105
Interest	+4,316	.....
Stationery and Printing	.....	—2,701
Civil Works in charge of Civil Officers	+1,163	.....

5. The decrease on the revenue side under *Land Revenue* was due to no adjustment having been made in the Accountant-General's final accounts of the share of the Government of the North-Western Provinces in the cost of a prison van constructed for the conveyance of convicts, for which a credit for Rs. 2,234, being a moiety of the charge, was taken under Land Revenue in the revised

estimate. The adjustment has, however, been made by a debit to that Province in the Exchange Accounts Current with Bengal. The increase under *Stamps* was in the sale of plain paper for use with court-fee stamps, while that under *Interest* was owing to the recoveries from the Howrah Municipality on account of advances made to it for drainage works having exceeded the estimate. The increase under *Civil Works* was in the receipts from ferries.

6. On the expenditure side the decrease under *Land Revenue* was partly under Land Records and Agriculture, owing to an adjustment of part of the cost of the office establishment of the Director of Land Records and Agriculture against the Imperial head of Bihar settlement operations, but chiefly under Management of Government estates in consequence of smaller outlay having been incurred on improvements. The increase under *Provincial Rates* was in valuation and revaluation charges, owing to no provision having been originally made for revaluation work in the district of Patna, while that under *Stationery and Printing* occurred in the Stationery Office at the Presidency.

PART II.

Approximate Actuals of 1895-96.

7. The following table compares the approximate actuals of 1895-96 with the revised estimates adopted by the Government of India:—

			Provincial Surplus (+)	+ 12,29,000	+ 14,67,153

8. Taking the Civil and Public Works heads together, the Provincial receipts of the year amounted to Rs. 4,58,27,096 against the revised estimate of Rs. 4,56,39,000, and the Provincial expenditure to Rs. 4,43,59,943 against the revised estimate of Rs. 4,44,10,000; so that the year closed with an approximate credit balance of Rs. 57,89,149 against Rs. 55,51,000 anticipated when the revised estimate was framed. The main cause of the improvement in the financial position of the Province was the increase in the Provincial share of the net earnings of the Eastern Bengal State Railway system, as shown below:—

	Revised estimate.	Actuals.
	Rs.	Rs.
Receipts	1,39,00,000	1,43,15,686
Working expenses	56,75,000	56,09,676
Net receipts	82,25,000	87,06,010
Provincial share	41,13,000	43,53,005

The increase was due to the heavy jute traffic during the last quarter of the year.

Receipts, 1895-96.

9. The chief fluctuations on the Receipt side, besides those under Railways, are explained below:—

Land Revenue.—The revised estimate of total Land Revenue receipts for 1895-96 was placed at Rs. 3,88,85,000, which included Rs. 75,000 for recoveries from landholders on account of survey charges, which are met from Imperial funds; but although only Rs. 22,692 were recovered on this account, the actual collections amounted to Rs. 3,90,19,438. The 12 per cent. on collections from Government estates came to Rs. 5,02,365 against Rs. 4,77,000 adopted in the revised estimate passed by the Government of India. The Provincial share of land revenue was therefore one-fourth of Rs. (3,90,49,438—22,692—5,02,365) + Rs. 5,02,365=Rs. 1,01,33,460. The adjustments between Imperial and Provincial revenues will, when the account is finally closed, probably result in a net deduction of Rs. 7,16,840 from the Provincial share, as shown below:—

	Revised estimate passed by the Government of India.	Approximate actuals.
	Rs.	Rs.
From Imperial to Provincial—		
(*a*) Grant for the Hijili Canal	1,53,000	1,46,000
(*b*) Grant for transfer of Imperial buildings to local authorities	36,000	34,181
(*c*) Assignment for Gnatong Police ...	16,000	16,000
(*d*) Towing charges of *Rhotas*	10,000	10,000
(*e*) Cost of transfer of Mackillop's Hill to Lebong Cantonment	11,000	11,000
(*f*) Cost of additional Customs establishment ...	2,12,000	2,31,008
(*g*) Refund of special contribution	3,00,000	3,00,000
(*h*) Salary of Mr. Davis, probationer gardener ...	.....	584
	7,38,000	7,48,773
From Provincial to Imperial—		
(*j*) Lump contribution under the contract ...	14,39,000	14,39,000
(*k*) Interest on advances for the Hijili Canal ...	26,000	25,863
(*l*) Charges for recalculating certain meteorological data	.....	750
	14,65,000	14,65,613
Net transfers from Provincial to Imperial ...	7,27,000	7,16,840

Provincial Rates.—The budget estimate of total revenue from Provincial Rates for 1895-96 was originally passed for Rs. 42,81,000, but in the revised estimate this was raised to Rs. 43,10,000. The approximate actuals, however, amounted to Rs. 42,74,453, thus:—

	Budget.*	Revised.	Actuals.
	Rs.	Rs.	Rs.
Public Works Cess	41,46,000	41,70,000	41,36,985
Rates for the management of private estates	1,35,000	1,40,000	1,37,468
Total ...	42,81,000	43,10,000	42,74,453

Interest.—The actuals amounted to Rs. 2,12,995 against the revised estimate of Rs. 2,40,000, as shown below:—

	Revised estimate.	Actuals.
	Rs.	Rs.
Class I.—Interest on advances to cultivators ...	23,000	23,344
„ II.— Ditto under special laws	30,000	34,746
„ III.—Interest on loans to landholders and other notabilities	30,000	21,809
„ IV.—Interest on loans to Municipalities, District Boards and other public bodies	1,08,000	82,833
Interest on Government securities ...	14,000	11,654
Miscellaneous	35,000	88,609
Total ...	2,40,000	2,12,995

Marine.—The Pilotage receipts show a falling off of Rs. 20,000, and the total receipts under Marine amounted to Rs. 9,68,026, against Rs. 9,90,000, the revised estimate passed by the Government of India.

Irrigation—Major Works.—The total receipts under this head amounted to Rs. 15,15,315, against Rs. 14,50,000, the revised estimate, and Rs. 15,00,000, the budget estimate for the year, as shown below:—

	Budget estimate.	Revised estimate.	Actuals.
	Rs.	Rs.	Rs.
Orissa Project ...	3,28,000	3,28,000	4,17,222
Midnapore Canal ...	2,77,000	2,77,000	2,63,994
Tidal Canal ...	60,000	60,000	61,976
Sone Project ...	8,35,000	7,85,000	7,72,123
Total ...	15,00,000	14,50,000	15,15,315

The actual receipts came to Rs. 15,15,315, or Rs. 65,315 in excess of the revised estimate, owing principally to the recovery within the year of water-rates from the Orissa project, which, but for a change in the canal rules, would have been collected in 1896-97.

Irrigation—Minor Works and Navigation.—A sum of Rs. 7,25,000 was included in the budget estimate as the probable receipts from canals and works under the Public Works Department, but this was subsequently raised to Rs. 7,35,000 in the revised estimate. The actuals aggregated Rs. 7,10,547, or Rs. 24,453 less than the revised estimate. The anticipated revenue was not realized, owing to the very unsatisfactory state of the Nadia rivers, and to the Eastern Bengal State Railway tapping some of the marts which had hitherto used the Circular and Eastern Canals route.

Expenditure, 1895-96.

10. The total expenditure amounted to Rs. 4,43,59,943 against a revised estimate of Rs. 4,44,10,000, showing a saving of Rs. 50,057. The chief fluctuations are explained below :—

Forests.—The total charges of the Forest Department amounted to Rs. 4,66,068, against Rs. 5,90,000, the revised estimate for the year. The Provincial share of the charges was Rs 2,33,034. The saving was mainly due to the reduction of the grant made to the Conservator of Forests, towards the end of the year, to arrange for the supply of sleepers to the Rai Bareli-Benares Railway.

Jails.—The total expenditure of the Department was Rs. 22,58,387 against Rs. 21,95,000, the revised estimate for the year. The increase was chiefly under jail manufactures, the charges under this sub-head amounting to Rs. 7,82,905 against Rs. 6,82,000 included in the revised estimate.

Stationery and Printing.—The cost of stationery supplied from Central Stores in 1895-96 was Rs. 5,15,359, against Rs. 6,50,000 provided for in the revised estimate, and this is the main cause of the reduction in the aggregate expenditure of the Department from Rs. 12,28,000 to Rs. 10,88,080.

Irrigation—Major Works.—The total charges under this head were Rs. 12,98,405, against Rs. 13,50,000 provided for in the revised estimate. The decrease occurred on the Midnapore and Sone Canals.

Minor Works and Navigation.—A sum of Rs. 16,22,000 was originally provided for the cost of additional works and up-keep of canals and works in charge of the Public Works Department; but this estimate was subsequently raised to Rs. 17,00,000 by the transfer of the suspense balances, amounting to Rs. 1,06,760, of the Brahmini-Baitarni Division from Major Works, Imperial, to Minor Works and Navigation, Agricultural, Provincial. The actual total expenditure amounted to Rs. 15,64,533, or Rs. 1,35,467 less than the revised estimate. The decrease was due (1) to the provision for establishment not having been fully utilized, (2) to a reduction in the suspense balances of the Circular and Eastern Canals Divisions, and (3) to the inability of the Irrigation Department to spend the whole of the grant for remodelling the Hijili Tidal Canal.

Civil Works in charge of the Public Works Department.—The increase of Rs. 35,752 under this head is partly under original works, and partly under establishment, due to short outlay on works and repairs executed with other than Provincial Funds, and to the adjustment, under this head, of the pay of the Sanitary Engineer, Bengal.

Civil Works in charge of Civil Officers.—The charges under this head came to Rs. 1,86,378 against Rs. 1,25,000 passed by the Government of India in the revised estimate. The increase was due to (1) an additional grant made to the Calcutta Municipality on account of the Marcus Square Recreation Ground, (2) to the adjustment in the Civil Department of all Public Works charges in Angul, and (3) to the cost of fitting up the Chemical and Physical Laboratory of the Sibpur Engineering College, which was taken under this head.

PART III.

Budget Estimate, 1896-97.

11. Turning now to the estimates of the current year, and making use of the latest information available, the following table compares the figures which

were passed by the Government of India with those which the Lieutenant-Governor has now decided to adopt :—

Receipts.	Budget estimate.	Revised estimate now adopted.	Expenditure.	Budget estimate.	Revised estimate now adopted.

Receipts.

12. *Land Revenue.*—The Government of India accepted the estimate of total collections under this head, as passed by the Local Government for 1896-97, amounting to Rs. 3,89,47,000, which included Rs. 2,00,000 for anticipated recoveries on account of Bihar Survey and Settlement charges, which are wholly Imperial. The collections in the first five months of the current year were Rs. 68,85,000, against Rs. 69,48,000 in the corresponding period of last year, showing a decrease of Rs. 63,000. The average receipts for the past five years, excluding recoveries of Survey and Settlement charges, amounted to Rs. 3,87,63,000, while the corresponding receipts of 1895-96 were Rs. 3,90,26,746. These recoveries during the current year are estimated at Rs. 3,51,000, and this would justify a higher estimate; but looking to the prospects of the season,

the Lieutenant-Governor is doubtful whether the forecast of recoveries will be realised, and whether even the Land Revenue receipts proper for the year will come up to the amount collected last year. At present, however, it seems probable that the moderate estimate passed by the Government of India will be reached, and this will accordingly be retained. The adjustments between Provincial and Imperial will probably result in a net reduction of Rs. 13,82,000 in the Provincial share of revenue under this head, as shown below :—

	Budget estimate.	Estimate now adopted.
	Rs.	Rs.
From Imperial to Provincial—		
(*a*) Advance for the Hijili Tidal Canal ...	24,000	24,000
(*b*) Grant for transfer of Imperial buildings to the charge of local bodies	10,000	27,000
(*c*) Assignment for Gnatong Police	16,000	16,000
(*d*) Grant to meet the cost of additional Customs establishment	2,12,000	2,12,000
(*e*) Salary of a probationer gardener for the Royal Botanic Gardens	2,000	1,000
(*f*) Towing charges of the *Rhotas* ...	10,000	10,000
(*g*) Grant for the transfer of Observatory buildings to the charge of the Provincial Public Works Department	.....	1,000
Total ...	2,74,000	2,91,000
From Provincial to Imperial—		
(*h*) Lump contribution under the contract ...	14,39,000	14,39,000
(*i*) Interest on advance for the Hijili Tidal Canal	30,000	29,000
(*k*) Contribution towards the cost of a clock for the General Post Office	5,000	5,000
(*l*) Half of the deferred interest payable by the Port Commissioners, Calcutta, on the Kidderpore Dock loans	.....	2,00,000
Total ...	14,74,000	16,73,000
Net transfer from Provincial to Imperial ...	12,00,000	13,82,000

(*b*) The Government of India, while passing orders on the budgets for 1896-97, allowed a credit of Rs. 10,000 on account of the maintenance charges of certain Imperial Civil and Military Works transferred to the management of local agencies. Since then the construction, maintenance, and repairs of several other Imperial buildings have been entrusted to local bodies, with an aggregate grant of Rs. 18,417; but against this grant has to be set Rs. 1,400, the amount of savings effected by certain District Boards in their grant for annual repairs, and Rs. 115, the amount by which the annual grant to the district of the Sonthal Parganas has been reduced. On the whole, therefore, a credit for Rs. 27,000 will be provisionally taken under this head, subject to further adjustment on completion of the works.

(*e*) There is no probationary gardener at present in the Royal Botanic Gardens; but in case an officer should arrive from England later on in the year, a provision of Rs. 1,000 has been made on this account.

(*g*) The Government of India, in the Public Works Department Resolution No. 105B., dated the 20th March 1896, sanctioned the transfer of certain 2nd and 3rd class Meteorological Observatories from the charge of the Meteorological Reporter to the Government of India to that of the Bengal Public Works Department with an assignment of Rs. 1,491 from the Imperial revenues. A credit of Rs. 1,000, in round numbers, has therefore been taken under this head.

(*l*) The Government of India have offered to remit the Rs. 4,00,000 due from the Port Commissioners of Calcutta as deferred interest on the Kidderpore Dock loans, provided that half of the sum is charged to Provincial revenues. The Lieutenant-Governor has accepted this offer; but as the Dock loans are an Imperial undertaking, it is understood that the Provincial contribution will be

adjusted under Land Revenue, and the Provincial share of the concession has accordingly been entered under this head.

13. *Salt.*—The Provincial receipts under this head amounted to Rs. 1,41,291 in 1894-95 and Rs. 1,78,408 in 1895-96. The receipts in the first four months of the current year show a falling off of Rs. 3,000 as compared with those of the corresponding period of last year. It is doubtful whether the total receipts for the year will exceed Rs. 1,70,000, and the estimate has accordingly been reduced from Rs. 1,75,000 to Rs. 1,70,000.

14. *Stamps.*—The Comptroller-General's latest statement shows that the receipts during the first five months of the current year exceeded those of the corresponding period of last year by Rs. 94,000. The actual receipts in 1895-96 amounted to Rs. 1,67,72,000, and the Lieutenant-Governor thinks that the estimate for 1896-97 may safely be raised from Rs. 1,67,80,000 to Rs. 1,68,00,000. The Provincial share will be Rs. 1,26,00,000.

15. *Excise.*—The estimate for 1896-97 amounts to Rs. 1,33,00,000 against Rs. 1,33,78,000, the actuals of 1895-96. The results of the settlement of excise licenses for 1896-97 up to the 31st May 1896 show an increase of Rs. 2,32,807 as compared with the figures of last year, and the receipts in the first five months of the current year were Rs. 1,03,000 in excess of those of the corresponding period of 1895-96, notwithstanding the fact that the closing of all madak and chandu shops from the 1st April last reduced the settlements by about Rs. 1,26,972. In view of these figures, the estimate of total revenue under this head will be raised from Rs. 1,33,00,000 to Rs. 1,35,00,000. The Provincial share will stand at Rs. 33,75,000.

16. *Assessed taxes.*—The Government of India placed both the revised estimate for 1895-96 and the estimate for 1896-97 at Rs. 46,50,000. The receipts in 1895-96 amounted to Rs. 46,60,080, and the collections in the first five months of the current year show an increase of Rs. 2,62,000 as compared with those of the corresponding period of last year. The increase is attributable partly to better assessments and partly to prompter payments. In view of these circumstances, the Lieutenant-Governor would raise the estimate from Rs. 46,50,000 to Rs. 47,50,000. The Provincial share will stand at Rs. 23,75,000.

17. *Forests.*—The Eastern Bengal State Railway System having indented for 30,000 sleepers, at Rs. 2 each, from the Forest Department, the Conservator of Forests has undertaken to supply them by the 1st February 1897. The estimate will therefore be raised from Rs. 12,70,000 to Rs. 13,30,000. The Provincial share will be Rs. 6,65,000.

18. *Registration.*—The total receipts of the Registration Department for 1896-97 were originally estimated at Rs. 13,65,000 against Rs. 13,41,493, the actuals of 1895-96. The collections in the first four months of the current year show an increase of Rs. 36,000 over those of the corresponding period of last year. The estimate will be raised from Rs. 13,65,000 to Rs. 13,80,000. The Provincial share will stand at Rs. 6,90,000.

19. *Law and Justice—Courts of Law.*—The actuals in 1894-95 were Rs. 8,72,850, and in 1895-96, Rs. 8,41,219. The collections in the first four months of the current year show a falling off of Rs. 7,000, as compared with those of the corresponding period of 1895-96. The estimate will be reduced from Rs. 8,80,000 to Rs. 8,30,000.

20. *Police.*—The approximate actuals in 1895-96 amounted to Rs. 1,89,891, and the receipts during the first four months of the current year show a falling off of Rs. 13,409, as compared with those of the corresponding period of last year. The estimate will be reduced from Rs. 2,01,000 to Rs. 1,80,000.

21. *Medical.*—The original estimate under this head amounted to Rs. 2,05,000 against Rs. 2,09,657, the approximate actuals of 1895-96. The receipts during the first four months of the current year amounted to Rs. 58,955, against Rs. 57,180 obtained in the corresponding period of last year. The estimate will be raised to Rs. 2,10,000.

22. *Scientific and other Minor Departments.*—The receipts under this head in 1895-96 amounted to Rs. 2,35,489, and the realizations in the first four months of the current year show an increase of Rs. 20,000 over those of the corresponding period of last year. The estimate will be raised from Rs. 2,34,000 to Rs. 2,45,000.

23. *Superannuation.*—The receipts under this head in the first four months of the current year amounted to Rs. 10,097, against Rs. 20,750 realized in the corresponding period of last year. The falling off is under Contributions for pensions and gratuities. The actuals in 1895-96 amounted to Rs. 76,008, and the estimate for 1896-97 has been reduced from Rs. 70,000 to Rs. 60,000.

24. *State Railways.*—The following statement compares the estimate passed by the Government of India for 1896-97 with the actuals of 1895-96 :—

		Actuals, 1895-96.	Budget estimate, 1896-97.	Estimate now adopted.
		Rs.	Rs.	Rs.
Gross receipts	...	1,43,15,686	1,30,00,000	1,45,00,000
Working expenses	...	56,09,676	56,75,000	60,00,000
Net receipts	...	87,06,010	73,25,000	85,00,000
Provincial share	...	43,53,005	36,63,000	42,50,000

The approximate gross earnings of the Eastern Bengal State Railway system, from the 1st April to the 29th August 1896, amounted to Rs. 51,30,000, against Rs. 48,59,167 obtained from the 1st April to the 31st August 1895, showing an improvement of Rs. 2,70,833. If the average receipts of two days are added to this, the total increase in five months will be about Rs. 3,74,000. The large receipts in 1895-96 were due to a favourable jute crop; but in view of the increase in the first five months of the current year, and of the brisk demand for jute in Calcutta, the Lieutenant-Governor thinks that the estimate may fairly be raised from Rs. 1,30,00,000 to Rs. 1,45,00,000. The Provincial share of these receipts has therefore been taken at Rs. 42,50,000.

25. *Irrigation—Major Works.*—The latest returns received from the Examiner of Public Works Accounts show that there has been an increase of Rs. 1,20,219 in the actual collections of the first four months of the current year, as compared with the receipts of the corresponding period of last year. The increase is chiefly in water-rates of the Sone Canals, due to the large increase in the area under *rabi* crops, the water-rates on which did not fall due till April 1896. The actuals in 1895-96 aggregated Rs. 15,15,315, and in 1894-95, Rs. 15,24,010; but as the *rabi* rates for the current year will not be fully realized before April of next year, the estimate for the current year can only be safely raised from Rs. 15,00,000 to Rs. 15,50,000.

26. *Irrigation—Minor Works and Navigation.*—The returns from the Examiner of Public Works Accounts show that there has been a falling off of Rs. 11,669 in the receipts during the first four months of the current year, as compared with those obtained in the corresponding period of last year. The total receipts in 1894-95 amounted to Rs. 6,95,613, and those in 1895-96 to Rs. 7,10,547. The estimate for 1896-97 will be reduced from Rs. 7,30,000 to Rs. 7,00,000.

27. *Summary of Receipts.*—The total estimated revenue of 1896-97 is now estimated at Rs. 4,51,44,000, against Rs. 4,46,36,000 anticipated by the Government of India in March last, showing an improvement of Rs. 5,08,000, which is more than covered by the actual increase under Eastern Bengal State Railway receipts.

EXPENDITURE.

28. *Land Revenue.*—The original estimate under this head will be raised by Rs. 10,468 to meet the charges on account of the pay and establishment of the Deputy Collector in charge of the tea and waste lands settlements in Jalpaiguri, wrongly included in the original estimates under the Imperial head of Settlement charges, and by Rs. 4,035 for temporary establishment employed under the special officer deputed to check the tauzi accounts of the Shahabad Collectorate. The estimate will be raised from Rs. 37,29,000 to Rs. 37,43,000.

29. *Salt.*—The estimate under this head, amounting to Rs. 1,03,000, includes Rs. 50,000 for the creation of a preventive establishment for the protection of salt revenue outside Orissa. The scheme has not yet been approved by the Government of India, and there is no prospect of any establishment being appointed during the current year. The provision has therefore been struck out, and the estimate will now stand at Rs. 53,000.

30. *Excise.*—Since the budget estimate for 1896-97 was passed, a temporary establishment for one year has been sanctioned for the prevention of the smuggling of garjat ganja into the districts of Cuttack, Balasore, and Puri, at an estimated cost of Rs. 290 a month for salaries, Rs. 800 a year for travelling allowance, and of Rs. 120 for contingencies. A small increase in the establishment of the Stamp Department of the Calcutta Collectorate, the whole cost of which is charged against Excise under the rules of the Accounts Department, has been sanctioned, and the salaries of the Superintendent and the Assistant Superintendent of the Department have also been raised. It is also proposed to employ a new detective staff, under the Excise Commissioner, to check the smuggling of contraband opium and liquor to and from French Chandernagore, in place of the police force now abolished. In view of these facts, the total grant under this head will be raised from Rs. 7,11,000 to Rs. 7,18,000. The Provincial share will then stand at Rs. 1,79,000.

31. *Customs.*—The estimate under this head will be raised by Rs. 16,000 for the construction of a new steam-launch sanctioned for the Calcutta Customs House, and by Rs. 4,000, the immediate increase of salaries which is expected to be paid during the current year in consequence of the regrading of the ministerial establishment of the Calcutta Customs House, and the substitution of fixed pay for incremental salaries. A scheme for giving effect to these changes has been submitted to the Government of India. The total grant will stand provisionally at Rs. 8,22,000.

32. *Forests.*—The total grant under this head, amounting to Rs. 7,70,000, will be raised by Rs. 25,000 to meet the cost of preparing and delivering 30,000 sleepers to the Eastern Bengal State Railway. The Provincial share of the estimate will now stand at Rs. 3,97,000.

33. *Interest on ordinary debt.*—At the request of the Local Government, the Government of India have recently sanctioned an additional grant of one lakh under Class I of the Provincial Loans Account for advances to landholders for the excavation of tanks and wells. An additional provision of Rs. 2,000 will be required to meet the interest payable to the Imperial Government on this sum. The estimate will now stand at Rs. 2,38,000.

34. *Law and Justice—Courts of Law.*—The estimate under this head, amounting to Rs. 89,81,000, will be raised by Rs. 2,400 to meet the salary of an additional Munsif sanctioned since the passing of the budget, and by Rs. 5,000 on account of the increase in the pay of peons, for which a proposal has been submitted to the Government of India. The total estimate will therefore stand at Rs. 89,88,000.

35. *Police.*—The estimate under this head will be reduced by Rs. 3,000, the amount which has been transferred to the Public Works Department for certain minor works in police buildings, and by Rs. 1,224 in consequence of the abolition of the detective staff in the district of Hooghly, referred to in paragraph 30 above. Against these reductions some provision is necessary for the grant of station charge allowance to the officers in charge of certain town police-stations, and also for increase to the pay of peons, for which a general proposal has been submitted to the Government of India. On the whole, the grant will stand at Rs. 60,40,000, as originally sanctioned by the Government of India.

36. *Education.*—The estimate under this head, amounting to Rs. 27,76,000, will be raised by Rs. 12,500, granted for the promotion of scientific research, and reduced by Rs. 12,552 on account of the following transfers from this to other heads:—

	Rs.
(*a*) To Public Works Department for erecting two wings and erecting a gallery in the Chapra Zilla School ...	8,496
(*b*) For constructing an additional boarding-house in the Purulia Zilla School	628
(*c*) For the conversion of the south part of the compound of the Patna College into a cricket-ground	1,000
(*d*) For the completion of the work of additions and alterations to the Puri Zilla School building	790
(*e*) To the District Board of Bhagalpur for the erection of iron gates, with necessary pillars, &c, for the Bhagalpur Zilla School	1,638
	12,552

The total estimated expenditure will therefore remain unchanged.

37. *Medical.*—The grant under this head will be raised by Rs. 1,704 on account of increase to the pay of peons, and by Rs. 2,500 promised to the Calcutta Municipality for M. Haffkine's method of inoculation against cholera. The estimate will thus be raised from Rs. 19,63,000 to Rs. 19,67,000.

38. *Scientific and other Minor Departments.*—An additional grant of Rs. 5,000 has been promised for improvements in the Royal Botanic Gardens, Calcutta, and a further sum of Rs. 5,000 for a third disintegrator in the Cinchona Factory. Against these additions the provision of Rs. 2,000, for the salary of a probationer gardener, will be reduced to Rs. 1,000 for the reasons stated in paragraph 12 above. The total grant will now stand at Rs. 4,58,000.

39. *Superannuation.*—The following table shows the Provincial charges under this head during the past six years:—

	Rs.	Increase. Rs.	Rs.
1890-91	15,13,000	.....	
1891-92	16,00,000	87,000	
1892-93	17,03,000	1,03,000	
1893-94	17,40,000	37,000	
1894-95	17,80,000	40,000	
1895-96	18,47,000	67,000	3,34,000

The increase during the last five years averaged Rs. 67,000 a year. The actuals in the first four months of the current year show an increase of Rs. 24,000, as compared with the payments during the same period of last year. The estimate will be raised from Rs. 18,90,000 to Rs. 19,07,000.

40. *Miscellaneous.*—The estimate under this head will be raised by Rs. 9,000, or from Rs. 2,47,000 to Rs. 2,56,000, to meet the increased charges of the Khedda establishment in Angul and Jalpaiguri.

41. *Irrigation—Minor Works and Navigation.*—An additional grant of Rs. 30,000 has already been sanctioned under this head for expenditure on the construction of two distributaries from the Eden Canal, a corresponding reduction being made in the grant of the Public Works Department for Provincial Civil Works. The estimate under this head will therefore stand at Rs. 18,33,000.

42. *Civil Works in charge of the Public Works Department.*—The grant for Provincial Civil Works for the current year was originally fixed at Rs. 43,00,000. It has since been reduced to Rs. 39,89,450 by the following additions and deductions:—

		Rs.
Original grant		43,00,000
Add—	Rs.	
For erecting two wings and a gallery in the Zilla School at Chapra ...	8,496	
For constructing an additional boarding-house in connection with the Purulia Zilla School	628	
For converting the south part of the compound of the Patna College into a cricket-ground	1,000	
For additions and alterations to the Puri Zilla School building	790	
For transfer of Observatory buildings ...	1,491	
For minor works of the Police Department	3,000	
		15,405
Deduct—		
Amount transferred to the Irrigation Department	30,000	
Grants to District Boards for Provincial Civil Works	1,94,609	
Grants to District Road accounts for Provincial Civil Works	69,021	
Grants to District Road Funds for Provincial Civil Works	8,111	
Grants to the district of Angul for Provincial Civil Works	24,214	
		3,25,955
Net deduction ...		3,10,550
GRAND TOTAL ...		39,89,450

An additional grant of Rs. 6,708 will have to be made for percentage charges for establishment, tools and plant on the Imperial Civil and Military works transferred to the management of Local Funds in 1895-96, and a further sum of Rs. 33,800 will probably be required for the purchase of a building for the accommodation of the Watgunge Police force in Calcutta. An extra grant of Rs. 2,840 has also been sanctioned for providing tauzi desk in the Alipore Collectorate. The total grant will now stand at Rs. 40,33,000 in round numbers.

43. *Civil Works in charge of Civil Officers.*—It has been decided that the Public Works charges in the district of Angul shall be adjusted in the Civil Department, and a grant of Rs. 24,214 has already been made for expenditure in that district by a corresponding reduction in the grant of the Public Works Department for Provincial Civil Works. A grant of Rs. 2,455 has also been sanctioned for the construction of a coolie hospital at Demagiri. Against these additions, a saving of Rs. 10,000 will probably be effected in the provision of Rs. 50,000 made for grants to Excluded Local Funds and Municipalities. The total grant will now stand at Rs. 2,47,000.

44. *Contributions.*—The grant to Local Funds for the current year was originally fixed in January 1896 at Rs. 9,40,157. To this were added special grants amounting to Rs. 2,01,843, and the total was passed for Rs. 11,42,000 in the budget. The additional grants since made to these Funds amount to Rs. 3,06,944 as shown below, while Rs. 4,979 have been refunded by them as the unexpended balances of the grants made in the previous years:—

		Rs.
To Local Funds for	Imperial Works	18,302
	Provincial Works	2,87,430
	Irrigation Works	312
To District Board of Puri for Primary Education	...	900
Total	...	3,06,944

These raise the total to Rs. 12,42,122. There are several applications pending for the restoration of the balances at credit of the Chaukidari Reward Funds, which were started as separate funds from the 1st April 1895. The transactions of these funds were formerly included in the Provincial account, and no separate balances were shown. The Accountant-General is in correspondence with the District Officers on the subject of the amount of these balances, and when this question has been settled, the amounts due, less any sums already paid as rewards in excess of local receipts, will be granted from the Provincial revenues. The claims of some District Boards for the unadjusted Government share of revaluation charges deducted from their cess collections have also been accepted. To meet these and other unforeseen demands, the estimate under this head will be placed at Rs. 13,16,000.

45. *Closing balance.*—According to the estimates passed by the Government of India, it was expected that the year would close with a balance of Rs. 34,40,000. According to the estimates now adopted, the closing balance will be Rs. 41,86,000.

PART IV.

Working of the Provincial Contract of 1892.

46. The current contract is based upon the assumption that, taking one year with another, the sum required by the Government of Bengal to meet the reasonable demands of the Province on heads of expenditure classed as Provincial is Rs. 4,07,91,000; and as the average annual income was estimated by the Supreme Government, in March 1892, at Rs. 4,22,30,000, the difference of Rs. 14,39,000 is the sum which the Local Government has to contribute to the Imperial Exchequer every year, the Province being thus left with an estimated income and expenditure exactly equal. The receipts under some heads are credited entirely to Provincial revenues, while the revenue under others is shared in varying proportions by the Imperial and Local Governments. The same system is applied to heads of expenditure, the general principle

being observed (with a few exceptions) that the proportion of receipts and of expenditure made over to the Local Government should be the same.

47. On the receipt side of the account, the Provincial Government gets the whole of the following items:—Twelve per cent. on the land-revenue collected from Government estates; rents of Salt Warehouses, fines and other minor receipts of the Salt Department; Provincial Rates; minor Customs receipts; interest on local loans; receipts from Courts of Law, Jails, Police, Marine, Education, Medical, Botanic Gardens, Cinchona, Fairs, and Emigration, and receipts in aid of superannuation; also receipts from Stationery and Printing, except the value of supplies to Railways and local bodies, and all receipts from Irrigation, Navigation, and Civil Works. It receives one-half of Assessed Taxes, Forest and Registration receipts, and of the net earnings of the Eastern Bengal Railway system after deducting the working expenses; one fourth of Excise and Land-Revenue heads, and three-fourths of the important head of Stamps.

48. On the expenditure side the Government of Bengal is required to meet all charges under the head of Land-Revenue, except Survey and Settlement; the Government share of expenditure on Provincial Rates, and all expenditure under the transferred heads of Customs, Salt, and Interest; also charges arising under the heads Courts of Law, Jails, Police, Marine, Education, Medical, and, with certain exceptions, Political; the whole of Scientific and Minor Departments, except Census, Ancient Manuscripts, and certain Veterinary charges; the whole of Stationery and Printing, except purchases of stationery for central stores; working expenses of Irrigation and Navigation Canals, and Civil Works, with the exception of Imperial Buildings. It is also responsible for one-half of the expenditure under Assessed Taxes, Forest, and Registration, for three fourths of Stamp expenditure, and a quarter of Excise.

49. Concurrently with the settlement of this contract, the general rules regulating Provincial finance were republished with the modifications they had undergone up to date, and it was also laid down that, if any considerable charge of an exceptional nature, which ought ordinarily to be borne by one Province, were paid in another Province, the question of a corresponding adjustment between the two would be specially dealt with. This latter provision was rendered necessary by the decision to stop inter-provincial adjustments. It was further arranged that on the score of the technical character of the work and the necessary uniformity in the working of all State Railways, the Provincial Government should not exercise any administrative or financial powers in regard to the Eastern Bengal State Railway; but that in order to provide for the construction of feeder roads and the general development of communication in the tracts served by the railway, half the net earnings should be Provincial; that the capital expenditure required to complete the Hijili Canal should be advanced on certain terms from Imperial funds; that the expenditure on Survey and Settlement operations during the term of the contract, being in its nature liable to great variations, and difficult to reduce to a uniform yearly average, should be met by Imperial revenues; and lastly, that if the recoveries on account of the Survey and Settlement operations in Bihar should fall short of the expenditure which is recoverable from the zamindars and raiyats, the difference should be charged to Provincial revenues.

50. The following statements illustrate the progress of the Provincial receipts and expenditure during the five years from 1892-93 to 1896-97:—

REVENUE.	Actuals, 1892-93.	Actuals, 1893-94.	Actuals, 1894-95.	Actuals, 1895-96.	Estimate, 1896-97.

	GRAND TOTAL ...	4,47,98,997	4,55,33,497	4,73,47,229	5,01,40,092	5,09,33,000

51. According to the above statement, the Provincial revenues have increased from Rs. 4,24,45,566 in 1892-93 to Rs. 4,32,78,325 in 1893-94, Rs. 4,46,23,191 in 1894-95, Rs. 4,58,27,096 in 1895-96, and Rs. 4,51,44,000 in 1896-97; while the expenditure on all accounts in each year has been Rs. 4,25,43,825, Rs. 4,29,09,459, Rs. 4,29,25,233, Rs. 4,43,59,943 and Rs. 4,67,47,000, respectively.

52. It would be misleading, however, to say that the revenue during the five years has increased from Rs. 4,24,45,566 to Rs. 4,51,44,000, or by Rs. 26,98,434, while the expenditure has risen from Rs. 4,25,43,825 to Rs. 4,67,47,000, or by Rs. 42,03,175, during the same period. Nearly one-half of the difference (Rs. 15,04,741) between the increase in receipts and the increase in expenditure is due to a new charge imposed on the Provincial revenues, in consequence of the payment of exchange compensation allowance sanctioned by the Secretary of State with effect from 1st April 1893, for which no corresponding assignment has been received from the Imperial revenues. There are other disturbing elements which vitiate any comparison of the total transactions of one year with those of another. Thus the reimposition of the import duties from 1894-95, and the consequent increase of Customs establishments, have swollen both sides of the account, for although the Province has no share in the duties reimposed, it has obtained an additional assignment to meet the cost of collecting them. Again, the special contribution of 3 lakhs made to the Imperial revenues in 1894-95, and its restoration to Provincial in the following year, affected the receipts of those years. Lastly, the contribution of 2 lakhs made to the Port Commissioners of Calcutta in 1896-97 for payment of deferred interest due by them on account of the Kidderpore Dock loans, referred to in paragraph 12 above, has reduced the total revenues of that year by adding 2 lakhs to the minus head of land-revenue adjustments. The fluctuations of exchange have also affected the exchange compensation allowance during the last four years it has been paid, to the extent shown in the following table:—

	Actuals, 1893-94.	Actuals, 1894-95.	Actuals, 1895-96.	Estimate, 1896-97.

Total Normal Expenditure	4,24,05,000	4,23,56,000	4,17,44,000	4,28,46,000	4,51,52,000
Total deduction for special expenditure including expenditure on railways	1,38,000	78,000	2,60,000	5,71,000	7,78,000
GRAND TOTAL	4,25,43,000	4,29,09,000	4,20,25,000	4,43,60,000	4,64,47,000

Deducting then these accidental elements, it will be seen from the statement above that the normal revenue of the Province amounted to Rs 4,38,47,000, Rs. 4,47,25,000, Rs. 4,61,78,000, Rs. 4,65,62,000, and Rs. 4,65,19,000; while the total charges, excluding elements not contemplated at the commencement of the contract, were Rs. 4,24,05,000, Rs. 4,23,56,000, Rs. 4,17,44,000, Rs. 4,28,46,000, and Rs. 4,51,52,000. The increase under receipts of nearly 9 lakhs in 1893-94 is made up of 3¼ lakhs under Stamps, 1⅓ lakhs under Excise, and 4¼ lakhs under Railways; while that of 14½ lakhs in 1894-95 includes 5½ lakhs under Stamps, 1 lakh under Excise, 1 lakh under Assessed Taxes, 1⅓ lakhs under Miscellaneous, and 8 lakhs under Railways, against a decrease

of 3 lakhs under Provincial Rates. The increase of nearly 4 lakhs in 1895-96 is wholly under Principal heads of revenue, especially under Excise. The reduction in the current year is nominal. The charges fell from Rs. 4,24,05,000 in 1892-93 to Rs. 4,23,56,000 in 1893-94 and to Rs. 4,17,44,000 in 1894-95. The decrease of 6 lakhs in 1894-95 is made up of 3½ lakhs under Provincial Rates, owing to a change in the mode of adjusting the cost of collecting the road cess mentioned in paragraph 60 below; of nearly 1½ lakhs under Stationery and Printing, and 1 lakh under Irrigation. The increase in expenditure of 11 lakhs in 1895-96 is made up of 2½ lakhs under Jail Manufactures, 1 lakh under Police for the improvements recommended by the Police Commission, 1 lakh under Cinchona Plantations, 1 lakh under Irrigation Minor Works owing to the transfer of the suspense balances of the Brahmini-Baitarni Division from Major Works Imperial to this head, and 6 lakhs for increased expenditure on Civil Buildings and Roads. The further increased provision of 23 lakhs made in the estimates of the current year is due to additional grants to the Forest Department for the supply of sleepers to the different railways, larger grants to the civil departments for expenditure of a nature which must increase with the natural development of the administration, and for increased grants to the Irrigation and Public Works Departments for increased expenditure on the maintenance of canals and for the construction of new buildings and roads. The more liberal provision for civil works during the last two years, though still falling short of the full requirements of the Province, makes up to some extent for the severe economy imposed by the financial necessities of the preceding three years.

54. *Land Revenue.*—The receipts from Land Revenue Proper have been as follows:—

	1892-93.	1893-94.	1894-95.	1895-96.	Revised estimate, 1896-97.
1	2	3	4	5	6
Gross Land Revenue	Rs. 3,84,96,092	Rs. 3,87,14,323	Rs. 3,89,09,419	Rs. 3,90,49,438	Rs. 3,90,98,000
Deduct 12 per cent. on estimated collections from Government estates (Provincial)	4,73,600	4,78,504	4,84,106	5,02,365	4,90,000
Deduct realisations on account of Bihar survey and settlement charges (Imperial)	...	8,023	512	22,692	3,51,000
Total deduction ...	4,73,600	4,86,527	4,84,618	5,25,057	8,41,000
Net amount divisible between Imperial and Provincial funds	3,80,22,492	3,82,27,795	3,84,24,801	3,85,24,381	3,82,57,000
Provincial share of above (one-fourth)	95,05,623	95,56,949	96,06,200	96,31,095	95,64,000
Add 12 per cent. collections	4,73,600	4,78,504	4,84,106	5,02,365	4,90,000
Total Provincial share ...	99,79,223	1,00,35,453	1,00,90,306	1,01,33,460	1,00,54,000

The increase in gross Revenue in 1893-94 over that of 1892-93 was chiefly due to the increased collection of fixed revenue in the districts of Purnea, Gaya, Puri, Champaran and Jalpaiguri, and to a special receipt of Rs. 30,000 in Chittagong from sale of timber in Government estates. The increase in 1894-95 was due chiefly to larger receipts from the sale of leases under the new waste land lease rules. The current demand on account of the land revenue of the Lower Provinces for the past five years is shown in the following table:—

Class of Estates.	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.
1	2	3	4	5	6
I.—Permanently-settled estates	Rs. 3,22,47,051	Rs. 3,22,63,793	Rs. 3,22,65,896	Rs. 3,22,81,833	Rs. 3,22,82,525
II.—Temporarily-settled ditto	26,76,086	27,10,912	28,10,713	28,21,580	28,35,046
III.—Estates held direct by Government	32,38,128	33,97,627	34,08,777	34,84,498	35,25,890
Total ...	3,81,62,175	3,83,72,332	3,84,85,386	3,85,87,851	3,86,43,461

The current demand, which is the real test whether the land revenue of a province is progressing, increased every year, partly under temporarily-settled

estates, but mainly under estates held direct by Government. The increase is due to the re-settlement of Government estates, the revision of khas mahal rent-rolls, and the transfer of estates to class III.

55. The details of the *adjustments* between the Imperial and Provincial accounts effected through the Land Revenue head, are shown below:—

	1892-93.	1893-94.	1894-95.	1895-96.	Revised estimate, 1896-97.

Net sum to be transferred ...	13,46,066	14,56,418	15,38,107	7,16,840	13,82,000

As has been explained in paragraph 46 above, the Provincial Government pays a yearly contribution of Rs. 14,39,000 under the terms of the contract with the Government of India. A special contribution of 3 lakhs was made to the Imperial Treasury in 1894-95, and was repaid to Provincial in the next year. The Government of India having now decided to remit four lakhs of deferred interest on the Kidderpore Dock loan, half of this sum has been shown as a credit from Provincial to Imperial under the head of Land Revenue adjustments. The Board of Revenue, Bengal, having in 1892 prohibited the importation of Shahjehanpur rum into Bengal, except under bond, the Government of the North-Western Provinces and Oudh claimed compensation, and Rs. 52,084 was transferred to the Imperial Revenues on this account in 1893-94. Under the terms of the contract, the Government of India have advanced the amounts required yearly for capital expenditure on remodelling the Hidgili Tidal Canal, and the Provincial Revenues pay interest on these amounts. After the contract had been concluded, the maintenance, repairs and construction of certain Imperial Civil and Military buildings were transferred to local agencies, with suitable grants from Imperial Revenues; but as these grants pass through the Provincial account, they are recorded under the adjusting heads of Land Revenue on the receipt side and "Contribution from Provincial to Local" on the expenditure side. The Secretary of State having

decided that a probationer gardener should learn work at the Sibpur Royal Botanic Gardens before being appointed in a permanent post, the Government of India agreed to meet the charges for his salary from the Imperial Revenues. Up to 1895-96 the Imperial Marine Department used to bear the charges for towing the yacht *Rhotas* while His Honour the Lieutenant-Governor was on tour, but from that year the charge has been Provincialized and debited to the Provincial Marine Budget, an assignment of Rs. 10,000 a year having been made from the Imperial Revenues. Mr. Kilby, the late Superintendent of the Preventive Service and the Sulkea Salt Golahs, having invented a patent scale for the weighment of salt, an honorarium of Rs. 75,000 was granted to him with the sanction of the Secretary of State, and the charge was divided between Imperial and Provincial Revenues. A portion of the Lebong spur, called Mackillop's Hill, was purchased by the Local Government at a cost of Rs. 11,000, but the land was afterwards required for the Lebong Cantonment, and the Supreme Government agreed to restore the amount from the Imperial Revenues. Under the orders of the Government of India in the Public Works Department, certain 2nd and 3rd-class Meteorological Observatory buildings have been transferred from the charge of the Meteorological Reporter of the Government of India to the charge of the Provincial Public Works Department, and an assignment of Rs. 1,491 has been given from the Imperial Revenues to meet the charge.

56. The expenditure charged under Land Revenue, which is wholly Provincial (except the charges for survey and settlement, which are Imperial), has risen from Rs. 33,76,419 in 1892-93 to Rs. 37,43,000 in 1896-97. The details are as follows :—

	1892-93.	1893-94.	1894-95.	1895-96.	Revised estimate, 1896-97.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
(1) Charges of district administration ...	29,48,391	30,45,679	31,11,712	31,79,886	32,42,000
(2) Management and improvement of Government estates ...	3,54,007	4,02,864	3,77,082	4,51,073	4,20,000
(3) Land Records and Agriculture ...	74,021	80,959	79,333	95,773	81,000
Total ...	33,76,419	35,29,502	35,68,127	37,26,732	37,43,000

The increase under (1) was due to the payment of exchange compensation allowance and also to additional establishment being required in the partition and certificate departments. The further increase in 1896-97 is mainly due to a special provision of Rs. 50,000 for the purchase of a sea-going vessel for the Commissioner of the Sunderbans. The increase under (2) in 1893-94 was for increased outlay on improvements, and the large increase in 1895-96 was caused by this expenditure being for the first time adjusted under Land Revenue instead of under Irrigation Minor Works. The increase of expenditure under (3) is for the payment of a local allowance of Rs. 250 per mensem to the Director of Land Records and Agriculture, sanctioned by the Secretary of State in his Despatch dated the 10th May 1894. The reduced charges in 1896-97 are accounted for by a portion of the cost of the settlement branch of the Director's Office being separately provided for under Bihar Settlement Operations.

57. *Salt.*—In 1893-94 the price of salt rose, and large amounts were cleared from the golahs, thus reducing the Provincial receipts from rent. This rise of price led to large importations in the following year when all the space available was taken up; while from 1894-95 onwards the attempt to monopolise the golahs and form a corner in salt rendered it necessary to store salt at the Kidderpore Docks. The continued rise in the provincial receipts from this source has thus far falsified the opinion that the transfer of salt business from sailing ships would obviate the necessity of keeping large stocks in the golahs.

On the expenditure side a special payment of Rs. 75,000 was made to Mr. Kilby in 1892-93 as an honorarium for his patent scales, and the charges in that year amounted to Rs. 1,24,595. Half of this was, however, paid from

Imperial Revenues, and adjusted under Land Revenue, as stated in paragraph 55 above. A sum of Rs. 10,056 was paid to the East Indian Railway Company in 1892-93 for the extension of a siding inside the Sulkea golah premises. In 1893-94 there was no expenditure on special objects, nor on the purchase of salt scales, and the total amounted to Rs. 26,838 only. The actual charges in 1894-95 came to Rs. 52,220, and it included Rs. 11,106 for the salary and allowance of Mr. Ashton, of the Northern India Salt Department, who was deputed to enquire into the illicit manufacture of salt in Bengal. Additional expenditure was also incurred in that year in the construction of temporary storage room at Sulkea, and hire of sheds at the Kidderpore Docks for the bonding of salt, to supplement the accommodation available at the permanent golahs.

58. *Stamps.*—Under the head of *Stamps* the development of the revenue has been steady and continuous. The total receipts which had risen from Rs. 1,31,16,000 in 1885-86 to Rs. 1,51,00,000 in 1891-92, again rose to Rs. 1,67,72,000 in 1895-96, and are estimated at Rs. 1,68,00,000 for the current year. The Provincial share of these receipts was Rs. 1,13,25,000 in 1891-92, Rs. 1,16,59,000 in 1892-93, Rs. 1,19,83,000 in 1893-94, Rs. 1,25,27,000 in 1894-95 and Rs. 1,25,79,000 in 1895-96, and is estimated at Rs. 1,26,00,000 for 1896-97. The increase has therefore been $3\frac{1}{3}$ lakhs in the first year, $6\frac{1}{2}$ lakhs in the second, 12 lakhs in the third, $12\frac{1}{2}$ lakhs in the fourth and $12\frac{3}{4}$ lakhs in the fifth, or a total increase of 47 lakhs in five years. This has occurred both under general stamps and court-fee stamps. The increase of revenue under the former class has been most marked under impressed stamps, and can only be assigned to the general expansion of trade, the increased value of land, and the desire of the people to have their transactions recorded in documents which can be used for litigation. The improvement under the latter class is attributed partly to increase in the number of civil and rent suits instituted, and partly to larger receipts on account of probate duty.

On the expenditure side the total charges rose from Rs. 5,95,555 in 1892-93 to Rs. 6,31,706 in 1893-94, Rs. 6,52,557 in 1894-95, Rs. 6,55,903 in 1895-96 and Rs. 6,67,000 in 1896-97. The charges for stamp paper supplied from the central stores fluctuate according to requirements, while the charges for the sale of stamps have increased with the growth of the revenue.

59. *Excise.*—During the period of the present contract, the revenue under this head has shown a steady and continuous development, as will be seen from the following table:—

	1892-93.	1893-94.	1894-95.	1895-96.	1896-97 (revised estimate).
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs	Rs.
(*a*) License and distillery fees and duties on the sale of liquors and drugs.	87,68,798	91,35,050	96,23,678	1,01,38,025	Details not available.
(*b*) Gain on sale-proceeds of excise opium.	16,09,420	16,42,103	16,88,952	17,72,313	
(*c*) Duty on ganja ...	12,05,829	13,57,855	12,37,953	14,54,286	
(*d*) Fines, confiscations and miscellaneous.	10,537	13,157	11,767	13,873	
Total ...	1,16,94,584	1,21,48,165	1,25,62,350	1,33,78,497	1,35,00,000
Provincial share (one-fourth)	28,98,646	30,37,041	31,40,587	33,44,624	33,75,000

The increase under head (*a*) has been due partly to the competition for excise shops and partly to the enhancement of the duty on wholesale licenses for the vend of imported liquor in the town of Calcutta. The increase under head (*b*) is attributable to larger consumption, and that under (*c*) to the orders

raising the duty on all kinds of ganja by Re. 1 per seer, with effect from April 1893.

Classified according to articles, the revenue has been as follows in the past five years:—

Articles of Excise.	Revenue.				
	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Country spirits	48,14,643	50,30,143	52,52,898	55,01,516	59,11,840
Rum	2,29,972	4,19,717	4,35,308	4,32,227	4,66,296
Imported liquors ...	2,23,644	2,07,092	2,33,102	2,81,588	2,87,996
Beer	174	193	224	538	485
Tari	9,57,405	9,50,379	10,16 376	9,97,852	10,34,081
Pachwai	3,04,168	3,31,557	3,46,518	3,82,336	4,37,284
Charas	7,768	9,097	10,776	15,888	17,985
Siddhi, sabzi, or bhang	48,664	53,558	55,752	55,394	59,498
Majum	1,962	1,984	2,069	2,119	1,710
Madak	86,313	79,689	78,379	80,436	77,332
Chandu	35,332	31,032	24,476	29,624	30,860
Spirits used for arts	772	1,066	337	390	1,097
Ganja	22,92,508	23,80,066	25,35,045	24,02,7 6	26,8 ,819
Opium	21,18,823	20,85,635	21,34,867	22,13,721	23,05,128
Miscellaneous	7,073	10,413	10,910	12,4'8	14,120
Total as i departmental books	1,11,29,813	1,16,00,021	1,21,37,096	1,25,67,855	1,33,77,980
Adjustments	+4,153	—6 037	+11,060	— 5,505	+ 517
Total in Accountant-General's books	1,11,33,966	1,15,94,584	1,21,48,165	1,25,62,350	1,33,78,497

The receipts from country spirits have continued to advance steadily, and now make up 44·3 per cent. of the total excise revenue. Hemp drugs come next with a percentage of 21·3, followed by opium and its preparations (18·1), tari (8·1), rum (3·3), pachwai (3·1), and imported liquors (1·7). Calculated on the population ascertained at the census of 1891, and allowing for natural increase of population at the rate of 7 per thousand per annum, the average incidence of the excise revenue was 2 annas and 11 pies per head against 2 annas 9 pies in 1894-95, while during the latter year the incidence in Bombay was 8 annas 7 pies and in Madras 6 annas 2 pies per head of the population recorded at the last census. The settlements of the licenses for the current year have again been favourable, the fees showing a net increase of Rs. 2,32,807, which is shared by all Divisions except Chittagong and Patna.

The charges of the Excise Department declined in the first three years of the contract, but for the current year an increased provision has been made to provide for the cost of uniforms for the detective staff, and also for possible changes in the system of taxing tari. The estimate for the current year stands at Rs. 1,79,000 (Provincial share).

60. *Provincial Rates.*—The head Provincial Rates, which is wholly at the disposal of this Government, consists of—

	1892-93.	1893-94.	1894-95.	1895-96.	Estimate, 1896-97.
	Rs.	Rs.	Rs.	Rs.	Rs.
(*a*) Public Works Cess	41,05,273	41,34,309	41,78,695	41,36,985	41,80,000
(*b*) Proportionate cost of collecting road cess	3,44,125	3,47,201	..	.....	...
(*c*) General management of private estates ...	70,869	1,31,551	1,28,984	1,37,468	1,40,000
Total ...	46,16,267	46,13,061	42,07,679	42,74,453	43,20,000

The variations under (*a*) were due partly to the varying proportions of the demand collected, and partly to the enhancement of the demand by the revaluation of districts. Up to 1893-94 the cost of collecting the road cess was included in the Provincial account, a credit *per contra* being taken on the receipt side for the recovery of such cost from the District Funds. This charge, however, is now debited direct to those funds, so that from 1894-95 there has been no receipts under (*b*). The increase under (*c*) has resulted from the revised rules enhancing the rates levied for the management of private estates under Act X of 1892.

61. *Customs.*—The increase in receipts under this head was in demurrage and weighment fees, and that in expenditure is partly for the payment of exchange compensation allowance, but chiefly for the additional establishments employed in consequence of the new Tariff Acts.

62. *Assessed Taxes.*—The head *Assessed Taxes* represents the receipts from the income-tax, which are divided equally between the Provincial and Imperial Revenues. The Provincial share of the receipts amounted to Rs. 21,13,982 in 1892-93, Rs. 21,75,207 in 1893-94, Rs. 22,81,635 in 1894-95, Rs. 23.30,040 in 1895-96, and Rs. 23,75,000 revised estimate) for 1896-97. The increase is due to the general revision and enhancement of assessments, specially in towns and centres of trade, to the development of the mining industry, to great activity in the building trade in Darjeeling, and to fluctuations in the profits of the jute trade from year to year.

63. *Forests.*—Under the head of *Forests*, figures of gross receipts are misleading, as the revenue of any year must depend largely on the expenditure of that year and *vice versâ*. The following figures compare the net revenue in each year:—

	1892-93.	1893-94.	1894-95.	1895-96.	Revised estimate, 1896-97.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs	Rs.
Receipts ...	7,44,882	8,01,611	7,95,673	9,18,709	13,30,000
Charges ...	3,81,292	4,03,929	3,97,394	4,66,068	7,95,000
Net revenue ...	3,63,590	3,97,682	3,98,279	4,52,641	5,35,000
Provincial share ...	1,81,795	1,98,841	1,99,139	2,26,321	2,68,000

The increase of Revenue in the Forest Department in the last two years of the contract period is due to the supply of sleepers to the East Coast Railway, to the Rai-Bareilly-Benares Railway and to the Eastern Bengal State Railway.

64. *Registration.*—The following table shows the operations of the Registration Department:—

	1892-93.	1893-94.	1894-95.	1895-96.	Revised estimate, 1896-97.
	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Receipts ...	14,33,801	13,89,137	13,56,504	13,41,492	13,80,000
Charges ...	7,26,203	7,85,497	8,05,360	8,02,542	8,59,000
Net revenue ...	7,07,598	6,03,640	5,51,144	5,38,950	5,21,000
ıare ...	3,53,799	3,01,820	2,75,572	2,69,475	2,60,000

in 1895-96, although the number of registrations increased from 1,102,321 to 1,144,508 during the same period. The large falling off in 1895-96 may also be ascribed to the better harvest of the year and the consequent diminution in the number of transactions for raising money. Some revival appears to have taken place in the first four months of the current year, as the receipts in these months show an increase of Rs. 36,000 on the receipts of the corresponding period of last year. The charges of the department have, however, risen with the increase in the number of offices, although the average expenditure per office has decreased from Rs. 2,153 in 1893-94 to Rs. 2,094 in 1894-95 and Rs. 2,024 in 1895-96. A further rise is expected owing to the opening of new offices for the maintenance of Land Records under Act III (B.C. of 1895.

65. *Interest.*—The actual receipts under this head amounted to—

	1892-93.	1893-94.	1894-95.	1895-96.	Estimate, 1896-97.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Class I.—Interest on advances under Land Improvement Loans Act and under Agriculturists' Act ...	26,576	31,736	26,439	23,314	24,000
Class II.—Interest on drainage and embankment advances	4,367	1,240	33,540	34,746	40,000
Class III.—Interest on loans to landholders and other notabilities ...	17,037	21,182	23,414	21,869	5,000
Class IV.—Interest on loans to Municipal and other public Corporations (excluding Presidency Corporations) ...	28,726	24,644	65,739	82,853	1,41,000
Total	77,306	78,861	1,49,192	1,62,732	2,10,000
Interest on Government securities	12,794	13,072	14,256	11,654	11,000
Miscellaneous	52,740	46,654	40,339	38,099	40,000
Grand total ...	1,42,570	1,38,187	2,03,787	2,12,485	2,61,000

The charges under this head represent the payments made to Imperial Revenues on the amounts advanced by the Government of India, the interest being calculated at 4 per cent. on the mean balance outstanding at the close of every year. The loss to the Provincial Government under the Provincial Loans Account scheme amounts to Rs. 1,86,002 in five years as shown below :—

	1892-93.	1893-94.	1894-95.	1895-96.	Revised estimate, 1896-97.	Total.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Receipts	77,306	78,861	1,49,192	1,62,732	2,10,000	6,78,091
Charges	1,21,599	1,43,259	1,69,463	1,91,772	2,38,000	8,64,093
	44,293	64,398	20,271	29,040	28,000	1,86,002

The gradual increase on the charge side is due to the larger mean balance outstanding at the close of each succeeding year. It is expected that the loss to the Provincial Government will be recouped when the drainage and embankment works, for which large advances have been made, are completed, and the interest now deferred is recovered along with the instalments of the capital sums advanced from the zamindars and others who are benefited by the work.

66. *General Administration.*—The charges under this head have risen from Rs. 16,36,512 to Rs. 17,09,000, which is mainly due to the payment of exchange compensation allowance as shown below :—

	1892-93.	1893-94.	1894-95.	1895-96.	Estimate, 1896-97.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Total charges	16,36,512	17,04,753	17,20,501	17,49,026	17,09,000
Exchange compensation allowance	...	49,228	90,000	93,863	81,000
	16,36,512	16,55,525	16,30,501	16,55,163	16,28,000

Excluding the charges for compensation allowance, the increase in 1893-94 was due partly to the payment in this Presidency of the salary of the Chief Commissioner
Allowances of
increase
the Commissioner of the Chittagong Division, and to the adjustment of the salaries and contingencies of the Secretariat Book Depôt, under the head of Civil Secretariat, to which it had been transferred from the Secretariat Press.

67. *Law and Justice—Judicial Courts.*—The receipts in 1891-92 amounted to Rs. 8,81,017, but during the five years following, they varied as follows:—Rupees 8,68,395 in 1892-93, Rs. 8,96,595 in 1993-94, Rs. 8,72,850 in 1894-95, Rs. 8,41,219 in 1895-96, and Rs. 8,30,000 (revised estimate) for 1896-97. These receipts are of a fluctuating character, and consist mainly of magisterial fines, which, except in 1893-94, show a gradual falling off. The details of the charges under this head are shown below:—

	1892-93.	1893-94.	1894-95.	1895-96.	Revised estimate, 1896-97.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
(*a*) High Court	11,24,598	11,47,961	11,76,880	11,18,722	11,71,000
(*b*) Law Officers	2,79,465	3,00,790	3,03,305	3,06,579	3,10,000
(*c*) Coroner's Court ...	12,805	13,014	13,581	10,930	14,000
(*d*) Presidency Magistrate ...	63,581	62,893	65,758	66,717	65,000
(*e*) Civil and Sessions Courts	44,75,646	46,28,537	46,77,125	46,54,414	46,67,000
(*f*) Courts of Small Causes ...	1,79,820	1,67,948	1,71,553	1,74,376	1,75,000
(*g*) Criminal Courts ...	22,46,447	23,49,220	23,61,977	23,74,910	24,43,000
(*h*) Pleadership Examination Charges	7,686	7,938	10,212	11,723	13,000
(*i*) Refunds	1,31,855	1,41,234	1,29,935	1,07,245	1,30,000
Total ...	85,21,933	88,19,530	89,10,389	88,25,616	89,88,000
Deduct—Charges for Exchange Compensation Allowance	...	1,60,449	3,02,000	2,96,987	2,53,000
	85,21,933	86,59,081	86,08,389	85,28,629	87,35,000

Excluding Exchange Compensation Allowance, the increase since 1893-94 under (*h*) was for fees to pleaders in criminal cases, while that under (*e*) was for additional Munsifs and their establishment, and for larger payments on account of remuneration to copyists.

68. *Jails.*—The receipts and charges of the Jail Department are shown below:—

	1892-93.	1893-94.	1894-95.	1895-96.	Estimate, 1896-97.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Receipts ...	9,13,136	8,08,117	8,52,066	8,57,187	8,58,000
Charges—					
Ordinary ...	14,08,045	14,55,589	14,92,819	14,75,482	15,51,000
Manufacture ...	7,05,487	6,19,889	5,14,706	7,82,905	6,85,000
Total Charges ...	21,13,532	20,75,478	20,07,525	22,58,387	22,36,000

The receipts of the Jail Department mostly depend on the demand for its manufactures, and the expenditure on raw materials fluctuates accordingly. The variations in the ordinary charges of the jails depend partly on the strength of the jail population from time to time, and partly on the prices of food-grains purchased for the prisoners. In the estimates for the current year provision has been made for increased expenditure on hospitals, sanitation, bedding and clothing of patients, as well as for the purchase of live-stock and tools and plant.

69. *Police.*—The receipts of the Police Department rose from Rs. 2,41,518 in 1892-93 to Rs. 2,43,600 in 1893-94, but have fallen since then to Rs. 2,36,677 in 1894-95, Rs. 1,89,891 in 1895-96, and Rs. 1,80,000 in 1896-97. The decrease in 1894-95 was attributed to smaller recoveries from the Frontier Police for supply of rations. Fines under the Village Chaukidari Act have been transferred from Provincial to Local accounts on the creation of the District Chaukidari Reward Fund with effect from the 1st April 1895, and this accounts for the decrease in the receipts of the years 1895-96 and 1896-97. On the expenditure side the actual charges amounted to Rs. 58,45,645 in 1892-93, Rs. 55,92,975 in 1893-94, Rs. 59,04,351 in 1894-95, Rs. 60,38,648 in 1895-96, and are estimated at Rs. 60,40,000 for 1896-97. The details are as follows:—

	1892-93.	1893-94.	1894-95.	1895-96.	Revised estimate 1896-97.
	Rs	Rs.	Rs.	Rs.	Rs
(*a*) Presidency Police ...	7,21,525	7,37,216	7,39,168	7,53,519	7,52,000
(*b*) Municipal „ ...	34,789	36,257	35,846	35,446	45,000
(*c*) Superintendence ...	1,38,079	1,51,894	1,74,138	1,64,883	1,51,000
(*d*) District Executive Force ...	40,24,007	40,79,531	43,10,124	43,96,828	44,14,000
(*e*) Village Police ...	23,012	22,507	28,773	22,671	18,000
(*f*) Special „ ...	4,94,323	4,56,792	4,94,927	5,34,537	5,33,000

(*h*) Cattle pounds ...	4,163	4,533	5,038	4,592	5,000
(*k*) Refunds	2,341	3,212	472	5,235	7,000
Total ...	58,45,645	55,92,975	59,04,351	60,38,648	60,40,000

Excluding Exchange Compensation Allowance, the increase under (*a*) in 1893-94 is due to larger outlay on account of hospital charges and arrear payments of contribution to the Port Commissioners of Calcutta for River Police. The increase in the last two years is due to the increase in the number of police guards sanctioned. The expenditure under (*b*) Municipal Police represents the Howrah Municipal Police charges, three-fourths of which is paid from Provincial Revenues, and the balance being borne by the Municipality. In the estimates of the current year the grant has been raised from Rs. 37,000 to Rs. 45,000, in order to relieve the Municipality of police charges to the extent of Rs. 8,000 to meet a portion of the sinking fund of the Howrah water-works loan. The increase under District Executive Force (*d*) is due to the expenditure involved in gradually giving effect to the recommendations of the Police Commission, which are summarised as follows:—

		Rs.
(1)	Raising the pay of constables from Rs. 6 to Rs. 7 in the five Divisions of Burdwan, the Presidency, Rajshahi, Dacca and Chittagong	49,098
(2)	Granting recruits free kits on joining ...	43,566
(3)	Increase of clothing allowance	21,219
(4)	Stopping deductions from pay towards Superannuation Fund	57,634
(5)	Granting special allowances to a prosecuting agency ...	21,120
(6)	Ditto allowances for the charge of a police-station ...	1,53,240
(7)	Ditto pony allowances to investigating officers	25,020
(8)	Increasing the number of sub-inspectors by reducing that of head-constables	2,82,484
(9)	Increasing the number of constables	50,343
(10)	Reorganization of the non-investigating police ...	30,338
	Total ...	7,33,962

Complete effect has already been given to the first six recommendations, and the rest have been partially carried out except the seventh, which the Inspector-General of Police desires to leave in abeyance for the present. The substitution of inspectors for head-constables, as investigating officers, is to be gradually carried out in ten years by increased annual allotment of Rs. 28,206. The Lieutenant-Governor has decided to spend on item No. 9 a further sum of Rs. 28,678, so that the total amount sanctioned is Rs. 79,021. Under item No. 10, a reduction of Rs. 2,115 has been made, and the total stands at Rs. 28,225. The net result is that out of the estimated additional annual cost of Rs. 7,33,962, which the recommendations of the Commission involve, the Government of Bengal has already sanctioned the expenditure of Rs. 5,37,521. An additional force, consisting of one inspector, five head-constables and 26 constables, has been sanctioned for duties in connection with the mills on the left bank of the river Hooghly. A school for the training of sub-inspectors has been opened in Bhagalpur The charges under Village Police depend on the amount of rewards paid, which were large in 1894-95, but since 1895-96 these payments have been entered in the local funds accounts. The charges on account of transport and rations for the Lushai Special Police were unusually high in 1892-93. In 1894-95 the charges on account of the Bengal Military Police were higher than in the previous year, chiefly on account of the recruitment of a new Military Police guard for service at Gnatong, sanctioned at the latter part of the year. In the year 1895-96 the Military Police companies at Dacca, Bhagalpur and Dumka were reorganized. The estimated charges for Angul Frontier Police have, for the first time, been shown under Special Police in 1896-97. The increase under "Railway Police" is due to the increase of police guards and constables sanctioned on the East Indian and Bengal and North-Western Railways and on new extensions.

70. *Marine.*—Under *Marine* the chief receipts are pilotage fees of vessels entering and leaving the Hooghly; the main heads of charges being the payment made to pilots, the cost of pilot vessels and their repairs, and of the Calcutta Port Officer and his establishment. The receipts are of a fluctuating nature, as they depend on the tonnage of vessels visiting the port. The total charges amounted to Rs. 9,44,397 in 1892-93, Rs. 9,41,139 in 1893-94, Rs. 8,93,093 in 1894-95, Rs. 8,73,766 in 1895-96, and are estimated at Rs. 9,21,000 for 1896-97. The charges for 1892-93 included Rs. 99,306, and those for 1893-94 Rs. 1,26,319, for the cost of the new pilot vessel *Alice* constructed in Bombay to replace the *Coleroon*. Additional charges were incurred in 1894-95 for salaries, allowances, and victuals of officers and men afloat on account of the new vessel. In the estimates for the current year, special provision has been made for the repairs of the *Rhotas* and for the hire of a steamer for towing the *Rhotas* for the Lieutenant-Governor's tour This charge has now been provincialized with an assignment of Rs. 10,000 from the Imperial Revenues, with effect from the year 1895-96. The contributions made to the Orissa Port Funds from the Provincial Revenues have been—

	Rs.
1892-93	15,000
1893-94	12,000
1894-95	15,000
1895-96	12,000.
1896-97	24,000

71. *Education.*—The charges of the *Education* Department rose from Rs. 25,37,481 in 1892-93 to Rs. 26,37,605 in 1894-95, and are estimated at Rs. 27,76,000 for 1896-97. The increase is partly for the payment of exchange compensation allowance, and partly for increased grants to the Sibpur Engineering College, and larger grants-in-aid to local colleges and schools. In 1894-95 the Director of Public Instruction, Burma, was on leave in Calcutta, and drew his salary and allowances in this Province, which led to some increase in that year. In 1895-96 twenty-five Departmental Sub-Inspectors were transferred to the District Boards with a grant of Rs. 30,555, so that the total charges fell to Rs. 26,07,827. In the current year the grant to the Civil Engineering College at Sibpur has been raised so as to provide for the practical training of mining students and for an agricultural class. A larger provision has also

been made for rewards to gurus in primary schools, for boarding charges, for the training of teachers, for the purchase of a kerosine engine for the Presidency College, and for the promotion of scientific research.

The State expenditure on education is not shown under one head, but is distributed over several budgets, viz, the Medical Budget for Medical Education, the Public Works Budget, which deals with the construction and repairs of school buildings, and the budgets of District Boards and Municipalities, which contain contributions from Provincial Revenues for scholastic purposes. The following abstract shows the true total of expenditure on Education in these Provinces during 1893-94, 1894-95, 1895-96 and 1896-97:—

Sources of provision.	1893-94.	1894-95.	1895-96.	Revised estimate, 1896-97.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Provincial Funds	30,20,304	30,39,108	32,83,183	40,02,595
District Funds	10,82,397	11,28,066	11,60,000	12,16,638*
Mohsin Fund	69,833	71,413	59,975	64,054
Municipalities	93,201	98,946	73,774	69,999
Contributions by private persons and endowments	18,794	12,434	1,75,157	8,644
Total ...	42,84,529	43,49,967	47,52,088	53,61,930

Out of the amounts contributed by District Funds, nearly the whole consists of grants made by Government to District Boards for the maintenance of schools under their control, and the true Provincial expenditure on Education, during the period in question, may therefore be shown as follows:—

Budgets.	1893-94.	1894-95.	1895-96.	1896-97.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Education	25,72,110	26,37,605	26,15,000	27,76,000
Medical	2,90,253	2,92,616	2,97,000	2,98,000
Public Works Department ..	1,57,941	1,08,887	3,71,182	9,28,595
Total ...	30,20,304	30,39,108	32,83,182	40,02,595
Add Contributions to District Funds	10,39,177	10,39,177	11,01,560	11,04,098*
Grand Total ..	40,59,481	40,78,285	43,84,742	51,06,693

* This includes Rs. 1,638 made over to the District Board of Bhagalpur for the erection of iron gates with masonry pillars, &c., for Bhagalpur Zilla School.

72. *Medical.*—The receipts of the *Medical Department* gradually rose from Rs. 1,70,263 in 1892-93 to Rs. 2,05,158 in 1894-95, and are estimated at Rs. 2,10,000 for 1896-97. The fees show a progressive annual increase, and the hospital receipts also began to increase from 1893-94 owing to the raising in January 1893 of the rate of contribution from the Hospital Port Dues Fund, for charges incurred on account of seamen sent to hospital. The charges of the Medical Department also rose from Rs. 16,12,491 to Rs. 18,13,034 in 1894-95, and are estimated at Rs. 19,67,000 for 1896-97. The increase is distributed over all the sub-heads, and is most marked under establishment, partly on account of the payment of exchange compensation allowance, and partly by

reason of a larger number of officers having been attached to the reserve staff. The increase under Sanitation and Vaccination is due to the greater activity of the department; and that under Hospitals and Dispensaries, to larger expenditure on the diet and clothing of patients. There has also been an increase under scholarships and stipends of Medical College and Schools. In the estimates for the current year provision has been made for the renewal of bedding, clothing and instruments in the Calcutta hospitals, and for grants of Rs. 23,500 to the new Bhawanipur Hospital, and of Rs. 14,000 to the Leper Asylum. Provision has also been made for a more highly-paid officer as Chemical Examiner.

73. *Political.*—The increase in the expenditure under *Political* for 1894-95 was due to payments having been made in that year on account of charges for Durbar presents purchased in 1893-94. In the estimates of the current year provision has been made for the demarcation of the Nepal boundary. The average charges of the five years amount to Rs. 22,000.

74. *Scientific and other Minor Departments.*—The chief items of receipts under this head are:—

(*a*) Sale-proceeds of quinine and other cinchona alkaloids.
(*b*) Emigration fees.

The receipts under (*a*) gradually rose from Rs. 1,17,917 in 1892-93 to Rs. 1,87,101 in 1895-96, chiefly owing to the success of the scheme for selling quinine in five-grain packets, through the agency of the post-office. Emigration fees rose from Rs. 34,000 in 1892-93 to Rs. 47,000 in 1894-95, but they again fell to Rs. 32,000 in 1895-96. In 1892-93 a special contribution of Rs. 25,000 was made by Sir Dinshaw Manockjee Petit of Bombay towards the cost of construction of the Veterinary School and Hospital at Belgachia and it was credited to this head.

The total charges under *Scientific and other Minor Departments* rose from Rs. 3,40,665 in 1892-93 to Rs. 4,51,978 in 1893-94 and to Rs. 5,26,594 in 1895-96, as shown below:—

	1892-93	1893-94	1894-95.	1895-96.	Revised estimate, 1896-97.

Total ...	3,40,665	4,51,978	4,23,067	5,26,594	4,58,000

A special contribution of Rs. 10,000 was made in 1893-94 towards the representation of Indian tea at the Chicago Exhibition. The regular charges

for salaries, establishment, &c., of the Veterinary School at Belgachia appeared for the first time in the accounts of that year. Larger payments were also made for the collection of objects of archæological interest in Orissa, and the charges under Provincial Museums were therefore high in 1892-93 and 1893-94. The Nimbong Cinchona Plantation has been purchased from Messrs. Kilburn and Company, and the purchase-money was paid during 1895-96 in two instalments of Rs. 5,000 and one of Rs. 71,000. In 1893-94 Rs. 15,763 was spent on the purchase of quinine, and in the revised estimates for 1895-96 Rs. 55,000 was provided for the purchase of cinchona bark and quinine. The expenditure under this head has been raised by the up-keep of the new cinchona plantation at Nimbong, as well as by temporary establishments required for the extension of the plantation at Mangpu. The expenditure under Miscellaneous represents charges incurred on taking casts of Asoka inscriptions. In the estimates for the current year, provision has been made for an annual grant of Rs. 2,000 to the Buddhist Text Society for the publication of their text. Rupees 50,000 have also been provided for the purchase of cinchona bark, which is rendered necessary by the growth of the demand for quinine in pice-packets.

75. *Superannuation.*—The increase in the expenditure under *Superannuation* is due to the amount of new pensions exceeding the lapses from deaths and transfers to other Provinces.

76. *Stationery and Printing.*—The increased demand from the public for the Indian Law Reports has raised the receipts under this head. The charges of the department are shown below:—

	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.
	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
(*a*) Stationery office ...	1,53,223	1,66,001	1,54,137	1,53,040	1,58,000
(*b*) Stationery purchased in the country	70,456	66,690	63,405	61,629	70,000
(*c*) Government Presses ...	3,63,405	4,15,035	4,04,243	3,56,309	3,67,000
(*d*) Printing at private Presses	371	619	551	745	1,000
(*e*) Stationery supplied from Central Stores ...	7,70,369	6,11,506	4,99,861	5,15,359	6,25,000
(*f*) Refunds	485	504	1,127	998	1,000
Total ...	13,58,309	12,60,355	11,23,324	10,88,080	12,22,000

The increase in 1893-94 under (*a*) was due to increased expenditure on account of packing, freight, and similar charges, and that under (*c*) was incurred partly because more printing work was done at the Secretariat Press, and partly because a larger quantity of stores was supplied to the Jail Press. The decrease under this head in 1895-96 is due to the transfer of the charges of the Book Depôt to the Civil Secretariat. The saving under Stationery supplied from central stores resulted from the reduced use of certain kinds of expensive paper, and from the economies effected in the consumption of forms.

77. *Miscellaneous.*—The receipts under this head vary within wide limits, and depend mainly on the amount of deposits lapsing to Government. The increase in 1893-94 was chiefly due to exceptionally high receipts from partition fees, and from the sale of railway lands in Muzaffarpur, and also to the fact that the rents of holdings in Hastings were for the first time entered in the accounts. The increase in 1894-95 was owing to the sale of old stores belonging to the Bihar Opium Agency and the higher fees paid for the survey of tea and arable lands in Jalpaiguri. The receipts from partition fees and unclaimed deposits were unusually high in 1894-95 and 1895-96. The fluctuations on the expenditure side are shown below:—

	1892-93.	1893-94.	1894-95.	1895-96.	Revised estimate, 1896-97.

Total ...	2,11,650	2,86,171	2,29,060	2,81,856	2,56,000

The charges under the head Contributions represent the outlay for maintaining and working the telegraph lines between Demagri and Chittagong and Dumka and Rampur Hât. The increase under Donations for charitable purposes in 1894-95 was due to additional grants to the District Charitable Society for the repairs of the Alms House buildings, and to the payment of the Government contribution of Rs. 8,000 towards the maintenance of the Albert Victor Asylum for lepers. In 1895-96 Rs. 35,000 was granted towards the site for a new Leper Asylum and the maintenance of the existing Asylum. During the current year it has been decided to treat the Asylum as a Government institution, the contribution paid by the Municipality being treated as a receipt in the Medical Budget estimates. The increase under Petty establishments in 1893-94 and 1896-97 is due to the adjustment, under this head, of the charges on account of Khedda establishments and contingencies. In 1894-95 the Western Duars were reserved for the Imperial Khedda Department. In the current year some increased provision has been made for Khedda establishments in both Jalpaiguri and Angul. The increase under rents, rates and taxes in 1893-94 was due to a special payment of Rs. 30,517 to Omrao Begum Shahzada Muhammad, being the arrear allowance for the maintenance of the tomb of Khaja Anwar Sahib from December 1881 to March 1893. The increase in 1895-96 and 1896-97 is due to the enhancement of the municipal assessment on the Bengal Secretariat, Calcutta, and to the inclusion under this head of charges on account of other buildings in Hooghly and Champaran. The expenditure on Special Commissions of Enquiry in 1895-96 represents the cost of the Labour Enquiry Commission.

78. *Famine relief.*—The Provincial expenditure of Rs. 1,118 in 1892-93 was incurred in the districts of Darbhanga, Muzaffarpur, Dinajpur and Purnea.

79. *State Railway—Net profits.*—Under the terms of the contract, the Provincial Government gets one-half of the net earnings of the Eastern Bengal

Railway System, after deducting the working expenses. The following statement illustrates the results of this arrangement during the last five years:—

	1892-93.	1893-94.	1894-95.	1895-96.	Revised estimate, 1896-97.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Gross receipts	1,18,29,951	1,24,94,814	1,43,86,293	1,43,15,886	1,45,00,000
Working expenses	56,16,291	54,25,131	57,21,845	56,09,676	60,00,000
Net receipts ...	62,13,660	70,69,683	86,64,448	87,06,010	85,00,000
Provincial share	31,06,428*	35,34,841	43,32,224	43,53,005	42,50,000

* Rupees 402 was deducted on account of payments made by the East Indian Railway in behalf of the late Nalhati State Railway.

The increase in gross receipts is mainly due to the increase in jute traffic. In 1893-94 the opening of the Barsoi-Kissenganj Branch and the Bengal Duars Railway increased the receipts to a certain extent. The transfer of the Goalundo-Narayanganj Steamer Service to the India General Steam Navigation Company, Limited, from the 1st July 1895, reduced the gross receipts in 1895 96.

The working expenses are debited to Imperial Funds, but the Provincial Government has an indirect interest in them, as it gets one-half of the net receipts from the Railway revenue. The decrease in 1893-94 was due to the debit to demands payable in 1892-93 of Rs. 2,62,468, being the depreciation on Bengal Central Railway rolling-stock by credit to Capital. The increase in 1894-95 was partly under locomotive and carriage and wagon expenses, but mainly for increase in the traffic. The decrease in 1895-96 is due to the transfer of the Steamer Service referred to above.

80. *Subsidized Company's land, &c.*—In the Provincial contract no provision was made for expenditure on railways, but the Government of India, while passing orders on the Public Works Budget for 1892-93, ordered that the expenditure in connection with acquisition of land for the Duars Railway should be met from the Provincial Revenues. Under the terms of the contract, all land required for the Duars Railway has to be provided free of cost to the Company, and the actual charges incurred on this account amounted to Rs. 25,357 in 1892-93, Rs. 2,585 in 1893-94, Rs. 353 in 1894-95, and Rs. 564 in 1895-96. It is believed that the accounts of the land acquisition proceedings have now been finally closed, and that there will be no expenditure on this account in the current year.

81. *Miscellaneous Railway expenditure.*—In the year 1893-94 the Provincial Government had to pay Rs. 1,207 to meet the charges incurred by the Manager, Eastern Bengal State Railway, in marking out the land required for the Sultanpur-Bogra Railway, which were adjusted under this head.

82. *Irrigation Major Works.*—The following table shows the net financial result of the working of the larger canals:—

	1892-93.	1893-94.	1894-95.	1895-96.	Revised estimate, 1896-97.

Total receipts ...	18,87,670	16,72,626	15,24,040	15,15,315	15,50,000
Total working expenses ...	13,95,343	14,55,178	13,72,972	12,98,405	14,65,000
Net receipts ...	4,92,327	2,17,448	1,51,068	2,16,910	85,000

The receipts in 1892-93 were abnormally high owing to the recovery of old outstandings and the prompt realisation of current demands. In 1893-94, some arrears due on the Midnapore Canal were collected, and the receipts in 1894-95 fell in proportion. Seasonable rain lessened the demand for water in 1895 96, and the receipts fell to Rs. 15,15,315, the lowest on record during the period of the contract. In the current year the returns furnished by the Examiner show a substantial increase under water-rates on the Sone Canals, due to the scarcity of water last year, and hence the estimate has been raised from Rs. 15,00,000, as passed by the Government of India, to Rs. 15,50,000, as explained in paragraph 25 above.

83. The receipts from *Minor Works and Navigation in charge of the Public Works Department* amounted to—

	1892-93.	1893-94.	1894-95.	1895-96.	Revised estimate, 1896-97.

The decrease under Calcutta and Eastern Canals is due to much of the traffic in jute being carried by rail and steamers. The Eastern Bengal State Railway now serves some of the marts which formerly sent their produce by the Circular and Eastern Canal routes, and much of the traffic, hitherto carried by boats, is now conveyed by steamers. There was heavy pilgrim traffic on the Orissa Coast Canal in 1893 94, and the revenue obtained in that year was the highest ever obtained. The falling off in the receipts from the Nadia Rivers is ascribed partly to the bad state of the rivers and partly to the dullness of trade.

84. The following table shows the expenditure on *Minor Works in charge of the Public Works Department*:—

GRAND TOTAL ...	13,94,161	14,81,075	14,57,829	15,64,533	18,33,000

The above table shows that the increase under this head is mainly under capital expenditure on canals, which rose from Rs. 1,12,502 in 1892-93 to Rs. 1,79,701 in 1894-95, to Rs. 3,22,814 in 1895-96 and to Rs. 5,27,000 estimate for 1896-97. The estimate for 1896-97 includes Rs. 3,50,000 for the improvement of the Bhangore khal. The suspense balances of the Brahmini Baiturni Division were transferred from Major Works, Imperial, to Minor Works and Navigation, Agricultural Works, Provincial, in the year 1895-96. The amount involved in this adjustment was Rs. 1,06,760. An additional grant of Rs. 30,000 has been sanctioned in the current year for the construction of two distributaries from the Eden Canal, and this accounts for the increase in 1896-97 under Works for which neither Capital nor Revenue Accounts are kept. The reduction in the expenditure under Agricultural Works from 1895-96 is due to the adjustment of the charges incurred by Civil Officers for improvements in Government estates, under Land Revenue instead of under this head as heretofore.

85. *Minor Works in charge of Civil Officers.*—The receipts under this head include (*a*) fixed recoveries on account of lands benefited by embankments, (*b*) recoveries on account of capitalized maintenance charges of the Dankuni drainage works, and (*c*) receipts of the Dankuni Canal. These receipts amounted to Rs. 1,24,702 in 1892-93 and rose to Rs. 1,28,071 in 1893-94. The increase is due chiefly to the recovery of arrears on account (*a*). There was a special credit of Rs. 77,699 in 1894-95, being the recoveries on account of capitalized maintenance charge of the Howrah drainage scheme, and the total receipts were Rs. 1,81,347. The recoveries on account of (*b*) are expected to be completed in the current year.

86. *Civil Works in charge of Public Works Department.*—The receipts under this head amounted to Rs. 1,63,060 in 1892-93, but rose to the abnormal figure of Rs. 3,07,209 in 1893-94, owing to the Government share of the profits of the Darjeeling-Himalayan Railway for the three years ending the 30th June 1892 having been paid by the Agents during that year. There was also a gross profit of Rs. 30,439 on the management of the Calcutta Workshops. In 1894-95 Rs. 34,817 were credited in the accounts as the profits from those Workshops. There were also special receipts from sale proceeds of buildings, and the total receipts amounted to Rs. 2,35,308. In 1895-96 the distillery buildings at Manicktolla were sold, and these sale-proceeds and the larger profits from the Calcutta Workshops raised the total receipts to Rs. 2,64,594. In 1896-97 provision has been made for the nominal receipts of the department amounting to Rs. 1,80,000, including Rs. 30,000, being the Government share of the profits of the Darjeeling-Himalayan Railway. The charges under this head amounted to Rs. 27,23,928 in 1892-93, Rs. 25,59,450 in 1893-94, Rs. 24,90,918 in 1894-95, Rs. 30,89,752 in 1895-96, and Rs. 40,33,000 (revised estimate) for 1896-97, as shown below:—

After the terms of the contract had been settled, several Provincial buildings and roads were transferred to Local authorities for repairs and maintenance, with additional grants from Provincial Revenues to meet the charges. The construction and repairs of several other buildings were also localised with additional grants from Provincial Revenues. As these additional grants are adjusted under the head Contributions from Provincial to Local, the charges of the Public Works Department have decreased, while those under Contributions have increased. The following important Public Works have been constructed during the term of the Provincial contract:—

Name of work.	1892-93.	1893-94.	1894-95.	1895-96.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.

Total ..	6,34,573	4,20,108	2,82,950	7,74,026

In the first part of the contract period, the expenditure on Public Works was necessarily restricted. The increased balance at the credit of the Provincial Government at the end of 1894-95 and the rapid growth of revenue, specially under Railways, enabled the Lieutenant-Governor to spend larger amounts on Civil Works in 1895-96, and to increase the allotment under this head for the current year.

87. *Civil Works in charge of Civil Officers.*—The increase in receipts under this head is from tolls on ferries. On the expenditure side a special payment was made in 1892-93 on account of the cost of purchasing the cantonment land on the Lebong spur, and the total charges amounted to Rs. 1,81,201. In 1894-95 the special payments of Rs. 50,000 for the purchase of land for a recreation ground at Marcus Square in Calcutta, of Rs. 50,575 for improvements in the Suburbs of Hastings and of Rs. 50,000 for additions and alterations to the Sibpur Engineering College were adjusted under this head, and the total expenditure amounted to Rs. 2,38,919. In 1895-96 an additional grant of Rs. 14,000 had to be made to meet charges due on the Marcus Square Ground. The Public Works charges in the district of Angul, and the cost of fitting up the Chemical and Physical Laboratory at the Sibpur Engineering College, were adjusted under this head, the total charges being Rs. 1,86,378. In the revised

estimate of the current year, which has been placed at Rs. 2,47,000, provision has been made for the expenditure of Rs. 24,214 in the district of Angul, and of Rs. 90,269 for electric-lighting and a blacksmith's shop at the Sibpur Engineering College.

88. *Contributions from Provincial to Local.*—The following table shows the expenditure under the several major heads of account which has been met from the contributions from Provincial Revenues to Incorporated Local Funds:—

District Funds.	1892-93.	1893-94.	1894-95.	Revised estimate, 1895-96.	1896-97 (estimate).

Do. to Police funds	.....	32,160	.....	.....	.....
Reserve for unforeseen demands	.....	.....	.....	.....	74,000
Total Grants from Government	13,50,207	13,56,179	12,49,917	13,66,000	13,16,000

In 1892-93 a special grant of Rs. 1,00,000 was made to the District Board of Darbhanga towards expenditure incurred by them on relief works. In 1893-94, special grants of Rs. 24,855 and Rs. 7,305 were made to the Village Chaukidari Fund and the Road Patrol Fund, respectively, to keep them solvent, and Rs. 21,881 was allotted to the Bhagalpur District Board on account of famine relief works. The estimate for the current year contains a special provision of Rs. 74,000 to meet unforeseen charges, such as those referred to in paragraph 44 above.

89. The general financial results of the contract of 1892 may be summarized thus:—The Provincial revenues, which were estimated at the beginning of the period at Rs. 4,22,30,000—14,39,000=Rs. 4,07,91,000, amounted on an average to Rs. 4,42,14,000, being an increase of Rs. 34,23,000: the charges, which were estimated at Rs. 4,07,91,000, came to Rs. 4,38,97,000, showing an increase of Rs. 31,06,000, and the balance at the end of 1896-97 is now estimated at Rs. 39,36,000 against Rs. 23,53,431 at the beginning of the year 1892-93.

ORDER.—Ordered, that a copy of this Resolution be submitted to the Government of India, Department of Finance and Commerce, for information.

Ordered also, that a copy of the above Resolution be forwarded to the Board of Revenue; to all Commissioners of Divisions; to the Accountant-General; to the Inspectors-General of Civil Hospitals, Police, Jails, and Registration; to the Directors of Public Instruction and Land Records and Agriculture; to the Conservator of Forests; to the Port Officer, Calcutta; to the Superintendent of the Royal Botanic Gardens, Calcutta; to the Manager of the Eastern Bengal State Railway, and to all Departments of this Government, for information.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE ORISSA DIVISION FOR THE YEAR 1895-96.

GENERAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 14th October 1896.

RESOLUTION—No. 530T.—G.

READ—

The Annual General Administration Report of the Orissa Division for the year 1895-96.

The Divisional Report is submitted by Mr. R. C. Dutt, C.I.E., a few days late in consequence of delay in obtaining complete information from the districts. The Division was in charge of Mr. G. Stevenson during the first two months of the year, of Mr. H. G. Cooke for the next four months, and of Mr. R. C. Dutt, C.I.E., for the rest of the year. In all three districts there were changes of District Officers; though in Balasore Mr. B. Dé was absent only for a month during which he was on leave.

2. *Tours and Inspections.*—The Commissioner was on tour for 130 days; all the District and Subdivisional Officers spent the required number of days on tour, or more, except the Collector of Cuttack, whose tours, owing to changes in the *personnel* of the District Officers and the prolonged illness of the Assistant Magistrate, fell short of the prescribed limit by two days. All the offices were duly inspected, excepting the district treasuries of Cuttack and Balasore and the sub-treasury at Bhadrak, which were not inspected by the Commissioner. No account is given of the inspection by Subdivisional Officers of their own offices. The Commissioner's and Collectors' tours and inspections appear to have been well planned, useful and thorough.

3. *Weather and crops: Public health: Material condition of the people.*—The total rainfall of the Division was well distributed and somewhat in excess of the normal, except in Balasore, where there was a slight deficiency. The Commissioner reports that the crops, and especially the rice crop, were good, and that cultivators did well, save in certain parts of Puri where some damage was done by floods. Though the rainfall was abundant, and the crops are reported to have been good, yet in the tabular statement contained in paragraph 22 of the Commissioner's report, the outturn of most of the important crops is given as only 12 to 13 annas and that of the rice crop as 15 annas. The Commissioner appears to have forgotten that according to the nomenclature used in official reports 16 annas represents an average crop and 15 annas therefore less than an average crop. The exports of rice appear to have been exceptionally large, but still prices ruled lower than in any of the past ten years.

The death-rate per mille shown for the Division in 1895 is 27·3 against 33·5 in 1894; it might be inferred, if any conclusions could be drawn from these figures, that there was some improvement in the general health, but the very low rate recorded in the year under report really points to laxity in registration rather than improvement in the public health. The rate of births reported is even lower than that of deaths. The material condition of the people was good. Some interesting and useful statistics relating to the transfers of raiyati holdings and indebtedness of the cultivators were collected by the Subdivisional Officer of Khurda. It was found that in 11 villages in which enquiry was made, 70 per cent. of the cultivators were more or less in debt to village mahajans, who are themselves for the most part substantial raiyats, and not professional money-lenders; that generally the land is not passing from the hands of the cultivating to the money-lending classes, though the right of transfer has been exercised without restriction for 60 years, and that the practice of subletting does not exist to any large extent. Mr. Romesh Chander Dutt from his experience in Orissa and elsewhere infers that the right of free transfer possessed and exercised by raiyats by custom in many parts of Bengal has been beneficial to their interest. This important question is separately under the consideration of Government. It is one on which it is dangerous to generalise, and regarding

which Government are not in a position to express a decided opinion at present. Statistics such as were collected in Khurda have been obtained for typical areas under survey and settlement.

4. *Manufactures : Trade and Commerce.*—The only manufacture of any importance is that of salt, carried on by Government at two factories on the Chilka Lake. The output was 1,78,000 maunds against 2,10,000 in 1894-95; the sales were, however, nearly double those of the previous year. Silver filigree work at Cuttack and fine muslin weaving at Goolnagar are special crafts which are declining.

The aggregate value of the sea-borne trade is estimated at 156½ lakhs of rupees, and shows an increase of 36½ lakhs over the previous year. The exports of rice by sea are valued at 74½ lakhs. The canal traffic is insignificant in comparison with the sea-borne trade. The rice and paddy carried along the canals in country boats amounted to about 4⅓ lakhs of maunds.

5. *Civil Justice.*—The number of suits instituted before Munsifs showed an increase, but the number of witnesses examined decreased; the percentage of witnesses detained for two days or more shows a very satisfactory decrease from 13·3 to 9·2. The account given of rent suits tried by Deputy Collectors is the reverse of satisfactory. The number of suits diminished, the number of witnesses examined increased by more than one-third, and the percentage of witnesses detained more than two days, though not in itself very high, rose from 1·97 to 2·93. The Commissioner says that the number of witnesses examined by Deputy Collectors was larger than in the preceding year, and the percentage of witnesses detained for more than two days increased on that account. This appears to the Lieutenant-Governor to be no explanation. The largeness of the number of witnesses examined is no reason for summoning and detaining witnesses for days on which they could not be examined.

6. *Crime : Police : Criminal Justice.*—The number of cognizable offences reported (including 1,500 sanitary cases) was 6,100, being less by 1,800 than in the previous year; there was, however, only a slight decrease in non-cognizable cases, which numbered 5,800 against 5,900 in the preceding year. The Commissioner attributes the decrease in crime to the prosperity brought about by good harvests; and his conclusion is probably correct seeing that the total number of offences against property (serious and minor) largely decreased. Counterfeit coins are reported to have been frequently met with in the district of Cuttack. A gang of coiners from Bijapur was discovered there with their implements and false coins, and the Commissioner has no doubt that most of the counterfeit coins in circulation were coined by such gangs from Western India. Two hundred and four cases were declared false; in 41 or 20 per cent. of these cases prosecutions were instituted, and were successful in 17 cases. The results of prosecutions in such cases show a satisfactory improvement. In 11·6 per cent. of cases reported the police refused enquiry, against 15·8 in the preceding year.

Six thousand and six hundred cases were brought to trial, against 8,000 in 1894. Of these, 5,000 were tried by Stipendiary Magistrates, who examined 18,000 witnesses, against 21,000 in the preceding year. The work of Stipendiary Magistrates having been so considerably lightened, it is unsatisfactory that the percentage of witnesses detained by them for more than two days should, as in the case of Deputy Collectors trying rent suits, have risen (from 1·4 to 2·3); and that the number of police cases remanded six times or more should have risen from 17 to 64. These facts indicate either want of energy on the part of Stipendiary Magistrates and Deputy Collectors, who, when they have summoned witnesses, should take care not to subject them to inconvenience by unnecessary delays, or want of forethought in summoning them for dates on which they cannot be examined. The Commissioner's special attention should be given to this matter in the current year. The results of appeals too have been less favourable everywhere, except in Khurda. Honorary Magistrates disposed of 1,600 cases and examined 3,200 witnesses. They detained 3·5 per cent. of the witnesses for more than two days, and three police cases were remanded six times or more. The attendance of Honorary Magistrates was generally good, except in the Sadar Benches of Cuttack and Balasore. The Commissioner advocates the adoption of a suggestion made by Mr. Maude, late District Officer of Cuttack, that more Honorary Magistrates should be appointed to sit in the interior of districts and try petty

complaints. Mr. Dutt recommends the appointment of an Honorary Magistrate with temporary powers in each newly-formed Union. His remarks on this point will be considered in the Judicial Department.

Fines to the amount of Rs. 32,000 were imposed by the Criminal Courts during the year; Rs. 28,000 out of the total demand were collected, and a sum of Rs. 7,000 was written off. At the close of the year there remained an outstanding balance of Rs. 17,000.

Fifty-three cases were tried at the Sessions Court, and convictions were obtained in all but nine—a result which is satisfactory as showing that commitments were carefully made, and that innocent persons and accused persons against whom there was not sufficient evidence were not subjected to the harassment of trial without adequate cause, and that the time of the Sessions Courts was not unnecessarily occupied in the trial of such persons.

The Report contains but few remarks on the conduct of the police, which is said not to compare unfavourably with that in other parts of the province. Mr. Dutt suggests that the initial pay of Sub-Inspectors should be raised, so as to secure officers of a better social position. A case of torture during investigation was detected in Cuttack, and a head-constable and constable were prosecuted to conviction. The question of reorganizing the village police in Orissa has long occupied, and still occupies, the attention of Government. The Lieutenant-Governor regrets to notice that more chaukidars were punished, and not so many rewarded, in 1895 as in 1894.

7. *Land Revenue.*—The total demand (including the arrear demand) on account of Land Revenue, Road and Public Works and Zamindari Dâk Cesses was Rs. 22,86,793, and of this amount Rs. 22,13,738, or 96·8 per cent., were collected and Rs. 2,601 remitted, leaving a balance of Rs. 70,454. The collections show a satisfactory improvement on the previous year.

The land revenue demand on permanently-settled estates in this Division is comparatively small, being little more than a lakh and-a-half; of this sum all but Rs. 20 was collected. There was no arrear demand. The collections in temporarily-settled estates were very satisfactory, and exceeded 99·9 per cent. of the total demand (current and arrear) in all three districts; the collections in Government estates were also good except in Balasore. The following are the percentages of collections to current demand in these estates :—

Cuttack	...	...	95·3
Balasore	...	...	77·8
Puri	...	...	93·5

The standard of 90 per cent. was thus surpassed, except in Balasore, where the collections were below the standard, but no explanation of the deficiency has been given. Of Road and Public Works Cesses, 90·2 per cent. of the gross demand was realized. The results of the year's collections as a whole are highly creditable to the Commissioner and Collectors of the Division. The reduction in the numbers of estates brought to sale for arrears of revenue and of certificates issued for realization of public demands is also a satisfactory feature in the year's report.

8. *Surveys and Settlements.*—The progress made in the settlement of the temporarily-settled estates of the Division and of the Khurda Government estates will be separately reviewed. Here it is only necessary to note that the settlement of rents is now making satisfactory progress, and that the proceedings are causing no excitement among the raiyats, while the zamindars are awaiting the results of the land revenue assessment with anxiety. The Lieutenant-Governor has every intention of treating them with consideration, and hopes shortly to be able to announce the percentage of assets that will be taken.

Section 39 of the Tenancy Act was extended to the Division during the year.

9. *Wards' Estates.*—There were six estates in the Division under the management of the Court of Wards with a current demand of more than 3½ lakhs. The collections were 104·6 per cent. of the current demand—a satisfactory result. The outstanding arrears amounting to 2 lakhs of rupees or nearly two-thirds of the current demand are large, and it is probable that a large proportion of this sum might with advantage be written off.

10. *Excise: Stamps: Income-tax.*—The excise revenue amounted to Rs. 6,07,000 and showed an increase of Rs. 36,000, and its incidence per head of population rose from 2 annas 4·3 pies to 2 annas 6·07 pies. The increase is mainly in the consumption of country spirit. A revenue of Rs. 3,93,500 was derived from stamps, which was less by Rs. 6,900 than in the previous year. There are 2,700 persons in the Division assessed to income-tax, and they pay Rs. 56,600. The Commissioner reports that the enquiries into incomes made both by Assessors and Deputy Collectors are often less complete than could be wished.

11. *Railways and other Public Works.*—Railway construction is proceeding in Orissa with great activity; the East Coast Railway was working traffic as far north as Khurda Road Station before the close of the year, and it is expected that the branch line to Puri, which takes off from that point, will be opened shortly. The Bengal-Nagpur Railway is being continued through Balasore and Cuttack to join the East Coast Railway.

The area irrigated by the Orissa Canals was 121,000 acres; and the total revenue demand was Rs. 2,82,000, of which Rs. 2,43,000 were collected, and the large balance of Rs. 77,000 outstanding at the commencement of the year reduced by four-sevenths.

12. *Education.*—The number of schools and pupils increased by 400 and 7,000, respectively, to 6,500 and 106,000. There was a slight increase in Muhammadan pupils. The total expenditure on education was Rs. 4,53,000. Of this sum, District Boards contributed Rs. 84,000 and Municipalities Rs. 5,300. Rupees 2,80,000 were spent on primary education, District Boards spending Rs. 38,000 and Municipalities Rs. 3,700. The Commissioner remarks that the results of B.A. examination of the students of the Ravenshaw College during the year were unsatisfactory, and suggests that "if there be any possible way of improving the institution, the remedy should be sought for and applied." The attention of the Director of Public Instruction will be called to his remarks.

13. *Dispensaries and Hospitals.*—There are 30 institutions for providing medical relief; and 114,000 patients were treated during the year under report at a cost of Rs. 40,000. The General Hospital at Cuttack and the Cholera Hospital at Puri receive praise from the Magistrates of those districts, but the former institution stands in need of pecuniary help.

14. *Local Self-Government Institutions.*—There are five Municipalities in the Division—Cuttack, Jajpur, Kendrapara, Puri, and Balasore. At Puri the ancient Markund tank has been cleaned out for the first time on record, thanks to the zeal and energy of Dr. Banks, the Civil Medical Officer. Some smaller sanitary improvements appear to have been made at Kendrapara. Of the work of the other Municipalities, the Report gives a somewhat meagre account. All the District Officers report favourably of the working of the District Boards, and the Commissioner himself is of opinion that the loyalty and intelligence with which they have performed their duties deserve recognition. The Lieutenant-Governor is glad to notice that the number of Muhammadans in public employ is increasing.

15. *Social and Political Institutions.*—Seven Societies and Clubs appear to have held meetings during the year. A Committee was able to collect nearly Rs. 70,000 in subscriptions for the repairs of the great temple at Puri.

16. *The conduct of Zamindars* is reported to have been generally satisfactory, though some exceptions are made. The Lieutenant-Governor notices with pleasure that Rajas Baidyanath Pandit and Baikantanath De, Rai Hari Ballabh Bose Bahadur, Babu Radha Charan Das, and Babu Satyendra Nath De are favourably mentioned for their liberality and public spirit.

17. The Lieutenant-Governor thanks the Commissioner for his efficient administration of the Division and for his clear and concise report, from which extracts are published for general information.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Offg. Secretary to the Govt. of Bengal.

Extracts from the Annual General Administration Report of the Orissa Division for the year 1895-96.

* * * * * * *

IV.—PUBLIC HEALTH.

34. The following table compares the recorded mortality in the districts of this Division, and the death-rate per mille during the past two calendar years:—

District.	Population as per census of 1891.	Number of deaths from—										Rate per mille.	
		Cholera.		Fever.		Small-pox.		Other causes.		Total.			
		1894.	1895.	1894.	1895.	1894.	1895.	1894.	1895.	1894.	1895.	1894.	1895.
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Cuttack ...	1,937,671	6,712	4,116	37,320	27,140	1,719	1,398	22,357	17,870	68,108	50,424	35·14	26·02
Balasore ...	994,625	4,905	2,261	14,859	13,600	210	168	12,784	13,450	32,758	29,479	32·99	29·63
Puri	944,998	1,993	2,331	8,302	6,541	405	193	16,367	16,895	29,067	25,960	30·75	27·47
Total ...	3,877,294	13,610	8,708	60,481	47,281	2,334	1,659	53,508	48,315	129,933	105,863	33·5	27·30

35. I am not disposed to place absolute reliance on these figures, or to accept the conclusion that the death-rate in the Division was only 27·3 during the year. But in so far as the figures can be relied upon, they show that the Division fared much better in respect of public health during the year under report than in the previous year, there having been a decrease in mortality from all causes.

36. The death-rate per mille of the population during the past five years is compared in the following tabular statement:—

Year.	Cuttack.	Balasore.	Puri.	Total.
1	2	3	4	5
1891 ...	23·38	26·18	27·76	25
1892 ...	38·34	43·61	37·86	39
1893 ...	24·26	25·91	29·02	25·8
1894 ...	35·14	32·99	30 75	33·5
1895 ...	26·02	29·63	27·47	27·30

37. In Cuttack the death-rate in 1895 was lower than that of 1894 and 1892, but somewhat higher than that of 1891 and 1893, but the Collector thinks that, having regard to the fact that registration is probably more accurate than before, the year 1895 should not be considered less healthy than 1891 and 1893.

38. The District Officer of Balasore says that no definite explanation can be given for the fluctuation in the number of deaths from year to year, but the above figures indicate that the year 1895 was healthier than 1892 and 1894, and less healthy than 1891 and 1893.

39. In Puri, excluding cholera which was worse than in the preceding year, there was a total decrease of 3,445 in the mortality from other causes.

Seasonable rainfall, which supplied the people with good drinking-water and replenished their tanks and wells, is believed to be one cause of the good health during the year. Climatic conditions are also said to have been more favourable.

40. The following table gives the total number of births and deaths and their rate per mille of the population in the different municipalities of this Division :—

District.	Town.	Population.	Deaths registered.				Birth registered.			
			1894.	1895.	Rate per mille.		1894.	1895.	Rate per mille.	
					1894.	1895.			1894.	1895.
1	2	3	4	5	6	7	8	9	10	11
Cuttack	Cuttack	42,033	1,404	1,198	33·4	28·73	990	1,046	23·55	24·88
Cuttack	Jajpur	11,992	555	465	46·2	38·9	276	340	23·01	26·68
Cuttack	Kendrapara ...	17,647	582	489	28·9	27·71	521	545	29·5	30·88
Balasore	Balasore	20,775	645	660	51·04	31·76	607	535	29·21	25·75
Puri	Puri	28,794	1,351	1,253	46·9	43·6	448	563	15·5	19·5
	Total ...	121,341	4,537	4,065	37·4	33·5	2,842	3,009	23·4	24·8

41. In so far as these figures can be relied upon,—and I do not think they are absolutely reliable—they show the death-rate to be between 27 and 34 per mille except in Puri town, where the circumstances are exceptional. And the birth-rate (excluding Puri) is shown to be between 24 and 30

Vaccination.

42. The following table gives the statistics of vaccination :—

Districts.	Number of vaccinators.	Number of persons vaccinated.	Successful.	Unsuccessful and unknown.	Cost of establishment.	Average cost per head.	Average cost per head of successful cases.	Number of cases inspected.	
								Found successful.	Found otherwise.
1	2	3	4	5	6	7	8	9	10
Cuttack	48	18,398	16,221	2,177	Rs. A. P. 2,356 6 10	Rs. A. P. 0 2 2	Rs. A. P. 0 2 3	16,221	2,177
Balasore	43	41,296	40,688	608	1,714 11 6	0 0 7	0 0 7	62,955*	735*
Puri	30	22,486	21,437	1,049	291 8 9	0 2 0½	0 2 2	11,928	790
Total ...	120	85,180	81,346	3,834	4,362 13 1	0 9·8	0 10·2	90,804	3,702
Total for 1894-95 ...	115	81,292	77,189	4,093	7,048 4 6	0 4 5½	0 5 0½	67,658	2,839

* Cases inspected by different officers have been taken as so many different cases inspected.

43. The number of vaccinations performed during the year, as well as the number which proved successful, show a large increase over the previous year, and it is to be noted that, although there was an increase in the staff of vaccinators, the cost of the establishment shows a remarkable decrease. But the result in Cuttack is not satisfactory when compared either with the previous year or with the other two districts during the year under report. Though the number of vaccinators was larger, there was a decrease both in the number of total operations and of successful cases. The average number of operations to each vaccinator was only 383, against 528 in the preceding year, while the same in Balasore and Puri was 923 and 748 respectively, against 884 and 714 in the previous year. On a reference being made to the Civil Surgeon, he explains that the figures are not altogether reliable; that any increase in the number of vaccinators necessarily decreases the average number of cases for each vaccinator, and that more satisfactory results could be expected if free vaccination was introduced.

44. The system of requiring each vaccinator to deposit a security of Rs. 10 was in force in Balasore during the year, and no exception to this rule was made.

45. The District Officer of Cuttack reports that people are said to prefer inoculation to vaccination, the former being considered to have a better effect as a protective measure. The District Officer of Puri states that there was some opposition to vaccination from ignorant persons in the Khurda subdivision, which was, however, overcome through the tact of the Subdivisional Officer.

The District Officer of Balasore states that since the introduction of vaccination, inoculation is almost unknown except along the southern boundary of his district. This is attributed to the employment of almost all the inoculators as licensed vaccinators.

46. There were nine cases reported under the Prohibition of Inoculation Act, IV (B.C.) of 1865, one being in Puri, six in Cuttack, and two in Balasore. The former was a true one, but the proceedings were stopped by the trying Magistrate, as the man who inoculated the children could not be traced.

The particulars of the six cases in Cuttack are given in the subjoined table:—

Cases reported.	Actually brought to trial.		Persons acquitted.	Persons convicted.
	Cases.	Persons.		
1	2	3	4	5
6	6	9	4	5

The accused in the two cases in Balasore were sentenced, one to 15 days' and the other to one and-a-half month's rigorous imprisonment.

47. There was no case reported in Puri under the Vaccination Act, V (B.C.) of 1880. In Cuttack there were 11 cases, including one pending from the previous year. In the 10 cases reported during the year, 11 persons were actually brought to trial, of whom 7 were convicted and 4 acquitted.

48. The District Officer of Balasore has furnished no report on the working of the Inoculation or Vaccination Act. His attention will be drawn to this omission.

V.—MATERIAL CONDITION OF THE PEOPLE.

49. The material condition of the people during the year under report was good. Good harvests were reaped in the last winter and the preceding winter; the cultivators were therefore well off; and rice was exported in larger quantities in the last cold season than has been known for many years past. The prices of rice were comparatively low during the last year, and the landless labourers found employment and fair wages in large numbers in the railway lines under construction.

50. Mr. De, Collector of Balasore, remarks that the condition of the petty *bhadra lok* classes, who are averse to manual labour, is steadily deteriorating. I imagine the condition of the moneyless "genteel" class is a hard one all over the world in these days of open competition, and Bengal is no exception to the rule.

51. Mr. Growse, Collector of Cuttack, remarks that the material condition of the people generally was good on account of good harvests, low prices, and the construction of the Bengal Nagpur Railway, which gives employment to large numbers of labourers.

52. Mr. Bell, Collector of Puri, gives some interesting figures, and takes the annual produce of food-grains in his district at over 74 lakhs of maunds, and the annual local consumption at nearly 67 lakhs. He comments on the rise in the price of rice within the last 20 years, which has greatly benefited the cultivators, but must have been a severe strain on the landless classes. Roughly speaking, husked rice sold, Mr. Bell finds, at 27 seers the rupee during the five years ending 1876, while the average price during the five years ending 1895-96 is 17 seers the rupee. The good harvests reaped in the last year and the year before has improved the condition of the people, and money borrowed on registered bonds fell in Puri district from Rs. 1,13,307 in 1894-95 to Rs. 49,854, which is less than one-half.

53. As was remarked by my predecessor in paragraph 59 of the Divisional Administration Report for 1894-95, the subdivision of Khurda affords exceptional facilities for an intimate knowledge of the condition of the people, as the State is the landlord. Mr. J. N. Gupta, the present Subdivisional Officer, has made an intelligent use of his opportunities, and the facts which he has ascertained are of great value.

54. The whole population of the subdivision consists of agriculturists and agricultural labourers. The people who are known as mahajans, as well as those who are skilled artizans, generally own lands like the other agriculturists. The condition of the people during the year under review was good owing to two or three good harvests.

55. Nevertheless, the majority of the cultivators are in debt, and always remain in debt, to the mahajans. They borrow paddy from the village granaries, pay off with high interest after the harvest, and begin to borrow after they have consumed the surplus. Mr. Nagendra Nath Banerjee in his his excellent Agricultural Report on Cuttack, published in 1893, estimated that 75 per cent. of the agriculturists remained almost always in debt. My predecessor in paragraph 58 of the last Annual Report estimated the proportion to be 50 per cent. Mr. Gupta has made a careful enquiry into this important subject in 11 villages of his subdivision, and has found that out of 536 tenants, no less than 370, *i.e.*, about 70 per cent., of the tenants were in debt.

56. The cause of this permanent indebtedness is said to be that the Uriya peasant lives beyond his means. Mr. Nagendra Nath Banerjee estimates that a cultivator holding 10 *mâns* of land has an annual income of Rs. 155, and spends Rs 172. Mr. Gupta, similarly, after examining the income and expenditure of certain cultivators, finds their expenses to be in excess of their income.

57. I do not think that this is the correct explanation. Mr. Gupta estimates the income from land, but does not estimate other income which the cultivator occasionally derives from labour or otherwise. I cannot accept the theory that the agricultural population of Orissa habitually live beyond their incomes.

58. The true explanation of the chronic indebtedness of 70 per cent. of the cultivators seems to be this, that they have always been in the habit of getting indebted. The easy-going Uriya cultivator is less assiduous in bettering his condition and freeing himself from the grasp of the mahajan than the ordinary Bengali cultivator. So long as he has his land, he has credit with the mahajan, and he sees no reason why he should not borrow when he wants, and pay off when he can. I have no doubt, however, that after a longer period of settled rule, and after the railway line has been opened through Orissa, the Uriya cultivator will learn to be more provident.

59. Coming now to the subject of landless labourers, the construction of the new railway line has been, in Khurda as elsewhere, a great boon to them, for the time being. Mr. Gupta reports that local coolies were paid 3 annas a day, carpenters and masons 6 annas, and cartmen 10 annas a day. An additional anna all round was allowed at the ploughing and sowing time.

60. In paragraphs 63 and 64 of the last annual report, some mention was made of a class of farm labourers called *halias*, who are said to remain in a condition of semi-slavery. The *halia* is a willing bondsman, who borrows at the time of distress and offers to repay by personal services, which he seldom succeeds in doing. The account given by Mr. Gupta of this class, and of the steps he has taken to ameliorate their condition, is interesting, and is quoted below :—

"The real obstacle which stands in the way of *halias* regaining their personal freedom is the exorbitant interest which is charged on the money that is advanced to these men. It is generally much more than the miserable pittance of Rs. 12 or Rs. 15, which they get as an annual salary every year.

"At the recent meeting of all the leading sarbarahkars of the estate, which I held for the consideration of the condition of the Khurda people, it was agreed that the only practical good that can be done to the *halias* would be to induce the people of Khurda not to charge any interest from the *halias* on the money advanced to them. All the sarbarahkars present signed their names in a document by which they promised to forbear from receiving any interest from the *halias*. I have now instructed the kanungoes in their periodic visits of the villages to note the condition of these *halias* and report for censure any sarbarahkar who may be charging interest from the *halias*. The good example set by the sarbarahkars, it is hoped, will be followed by the other well-to-do people of the village."

61. While I appreciate the endeavours made by the Subdivisional Officer to give the poor *halia* a chance of rescuing himself, it would be incorrect to suppose that his condition is that of a helot. On the contrary, he is generally treated as a servant of the family in which he lives, and is not allowed to die of want, so long as his employer is not himself in difficulties.

62. A prolonged enquiry has been made in Khurda subdivision into the grave question whether, as a result of the free right of transfer possessed by tenants, the lower classes of cultivators are being dispossessed of their lands and turning labourers, and whether non-agriculturist money-lenders are getting possession of agricultural holdings. Mr. McPherson, late Subdivisional Officer of Khurda, judging from the large number of mutations of holdings registered in his office, apprehended that the class of labourers was increasing by a considerable recruitment from among the smaller tenantry. A more careful examination of the mutation cases has dispelled this apprehension. The number of sales of petty holdings has been large, but the instances of acquisition of petty holdings by cultivators have also been large, and there is no reason to apprehend that the land-owning cultivators are decreasing in number, or that the landless labourers are increasing.

63. A very satisfactory and exhaustive enquiry has been made by Mr Gupta on this point. He has extended the sphere of his enquiry over a hundred villages, situated in different parts of his subdivision, and has taken two dates, sixty years apart from each other, to compare the results. By means of such comparison he has found that the proportion of land-owning tenants has not decreased but has increased within these sixty years. I quote Mr. Gupta's remarks below :—

"Land may have changed hands, but the question whether there has been a speedy and rapid comparative increase in the number of the landless classes may be, as I have already said somewhere else, most satisfactorily solved by taking into account two points of time sufficiently removed from each other and then from statistical records of these periods to compare the ratio between landless and landholding classes at each of the two periods. In the note which I submitted to the Commissioner, I compared the figures—

(1) "For five villages collected at the last two settlements of 1835 and 1881. The result showed that the ratio of land-owning to landless men stood at 64·36 in 1835 and at 57·43 in 1881.

(2) "Of the same five villages I then took the figures collected at the last settlement and at the present time. The result showed that the proportion has remained stationary at 64·36 during the last 60 years.

"I have now examined the figures for no less than 100 villages in all the different parts of the estate collected at the last settlement and at the present time, and the figures show that whereas the proportion between the land-owning and the landless classes for these 100 villages at the last settlement was 63·7 to 36·3, to-day the ratio stands at 67·5 to 32·5. There has thus been perceptible decrease in the number of landless men."

64. This, I think, is as satisfactory evidence as the subject admits of. Much has been written from time to time on the supposed evils resulting from the unrestricted right of transfer possessed by tenants, apprehensions have been expressed that their holdings are going into the hands of non-agriculturist money-lenders, and proposals have been made in the interests of the raiyats to deprive them of the right of transfer, or in other words, of the marketable value of the only property which they possess. To such proposals and theories we can oppose the significant fact that in a large subdivision, which is the property of Government, the tenants have exercised this unrestricted right during a period of sixty years, and lands have not passed out of their possession to any extent into the hands of non-agricultural money-lenders and mahajans. I am persuaded that if similar enquiries were made in other parts of Bengal, it would be found that the right of transfer possessed and exercised by raiyats by custom in all parts of Bengal has been beneficial, not detrimental, to their interests. The unthrifty and unprovident individual comes to grief as among zamindars, but as a class the tenants are certainly better off by having a marketable value for their holdings than if the holdings had no such value.

65. With regard to the money-lenders (or rather paddy-lenders) and mahajans of Khurda, Mr. Gupta finds after a careful enquiry that about 90 per cent. of them are merely substantial raiyats and sarbarahkars, that they are nearly all residents in the estate, and that since 1885 only 20 men, who are non-residents, have bought lands in Khurda. The plain fact is that it does not pay an ordinary money lender to buy raiyati holdings, unless he wishes to turn into a raiyat. There is no danger therefore in Bengal of raiyati holdings passing into the hands of non-agriculturist money-lenders.

66. The practice of subletting does not prevail to any large extent in Khurda. From a comparison of the figures of 20 villages Mr. Gupta finds that the total number of under-tenants has decreased from 672 to 484 within the last 15 years. It is clear therefore that the Khurda raiyats are not passing into the status of lazy middlemen. On the contrary, those who pay us rents are generally those who actually cultivate the land.

67. The average extent of a cultivator's holdings in Khurda has not been given in Mr. Gupta's report, but on a further reference to him, I am informed that it is about 4 *mâns* or acres. This agrees approximately with the figure given by Mr. Sakhawat Hossein for the Kanika estate in paragraph 155 of his Settlement Report, which I quote below :—

"The practice of splitting holdings has since some time been permitted, and it cannot now be altogether stopped, and I do not see any valid objection to it. It is generally assumed that the subdivision of holdings leads to the reduction of their average size below what can support a family. This assumption is, to a great extent, gratuitous and opposed to common sense. No family can permanently starve, and consequently it cannot depend on a holding which is insufficient for its support. When a part of a holding is sold, it either goes to a new tenant or to an old tenant. In the former case, it goes to one who has hitherto been supported by some means other than cultivation. If he goes in for cultivation as a sole means of support, he would naturally buy up as much land, though from different persons, as would enable him to live thereby. In the latter case, the old tenant simply adds to his old holdings. As a rule, the splitting of holdings does not lead to the reduction of their size, but what does the real mischief is over-population, against which there are no prudential checks. If a man having a holding just sufficient for one family gets four sons and in time four families, his holding is split up with a vengeance. The average size of holding held by each *thani* raiyat was 3¼ acres in the settlement of 1865-71, 3⅝ acres in that of 1880-82, and now in the present settlement is 4·13 acres, showing that the free splitting of holdings, which has been permitted during the last 30 years, has not had the effect of reducing their average size.

"Then, it is sometimes held as a reproach to Indian tenantry that the raiyats have their holdings consisting of scattered plots. They have, however, very good reason for doing so. They require lands in different situations in order that they may have some for raising seedlings, some for growing early crops, and some for late crops. It would certainly not suit them and their mode of cultivation to have compact little farms. If a raiyat finds that he has more of one kind of land than he needs, he parts with it and gets a new bit elsewhere. The splitting of holdings does not injure the interest of the proprietor, and it is of real benefit to the tenants, and the continuance of the existing practice, subject, of course, to the proprietor's consent, should be permitted. This would no doubt make the work of maintenance of records difficult, but the difficulty is not insurmountable."

68. Mr. Sakhawat Hossein's remarks are important, and shows that the apprehensions sometimes entertained,—that the right of splitting their holdings exercised by raiyats will lead to their ruin,—are unfounded. The ordinary tenant in Bengal and Orissa may be trusted to know what is best for him, and will not reduce his holdings to less than what will maintain his family. He is careful to keep more than his three acres and a cow.

69. Before concluding my remarks under this section, I wish to add that it would greatly add to our knowledge of the actual state of the cultivating classes in Bengal if enquiries, on the lines indicated above, were instituted every year in all large Government estates, and also in other large estates under the management of the Court of Wards. It would greatly help us in the work of administration as well as of legislation to know accurately the condition of the cultivators in all districts of Bengal, their annual income and indebtedness, the size of their holdings, the custom of transfer of holdings, the proportion of landless labourers, and their wages and condition. Subdivisional officers managing large Government estates and intelligent managers under the Court of Wards could deal with these questions with much more intimate knowledge than officers appointed to obtain statistical information from time to time; and a record of facts compiled by the former from year to year would dispel much ignorance which still prevails on the subject.

VII.—PRICES OF FOOD AND LABOUR.

74. Appendices III and IV show the prices of food-grains and wages of labour which prevailed in each of the district head-quarters of this Division during the last fortnight in March 1896 as compared with the corresponding

periods of the preceding two years. As the outturn of rice was very good, the price was cheaper after the last harvest than it was during the last 10 years, as the following table will show:—

	Sr.	Ch.	
1886-87	22	1¾	per rupee.
1887-88	22	1¼	„
1888-89	19	13	„
1889-90	17	15	„
1890-91	19	8½	„
1891-92	15	5	„
1892-93	15	14	„
1893-94	16	9	„
1894-95	22	2	„
1895-96	25	12	„

75. The wages of labour remained stationary in Cuttack. In Balasore there was some increase in the wages of common masons, superior carpenters, and coolies, and in Puri there was a similar rise in the wages of only common masons and coolies. The increase in wages observable in the case of these classes of labourers is principally due to the demand for workmen on the railway works in progress in these districts.

XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND LAND REVENUE ADMINISTRATION.

170. The prescribed Appendices XVIII to XXV submitted with this report give the required statistics under this head.

Number of estates.

171. The total number of estates in the Division exceeded that of the previous year by 77, being 6,395, against 6,318 in 1894-95. The increase was chiefly due to partition, as well as to inclusion in the revenue roll under separate numbers of police lands, in accordance with the instructions contained in rule 4, Chapter II, page 2 of the new Tauzi Manual, and to resumption and assessment of life-grant revenue-free tenures found invalid on enquiry.

Total demand and collection.

172. The total demand in the several districts was Rs. 19,63,641, of which Rs. 19,28,991 was collected and Rs. 2,498 remitted, leaving a balance of Rs. 32,152. The percentage of total collection on total demand was 98·02, against 93·99 in the previous year, showing a satisfactory increase.

Current demand and collection.

173. The current demand of all classes of estates put together rose from Rs. 18,59,523 in 1894-95 to Rs. 18,59,928 in the year under report, showing a net increase of Rs. 405. This increase is due to resettlement of waste *rasadbandi* and other lands, as well as to resumption of invalid life-grant revenue-free tenures, and inclusion of police lands in the revenue-roll under separate numbers, as noticed above. The current collections from all classes of estates amounted to Rs. 18,28,701, against Rs. 17,52,313 in 1894-95. The percentage of this on the current demand amounted to 98·32, which is much in excess of that in the preceding year, which was 94·23.

Arrear demand and collection.

174. The arrear demand amounted to Rs. 1,03,713, out of which Rs. 1,00,290 was collected, giving a percentage of 96·7, against 81·7 in 1894-95.

Remissions.

175. The remissions granted during the year amounted to Rs. 2,498, of which Rs. 386 were remissions of grace, Rs. 1,910 remissions of right, and Rs. 202 were nominal remissions granted for relinquishment by raiyats of their holdings on account of desertion and death.

Balances.

176. The total balance at the close of the year amounted to Rs. 32,152, against Rs. 1,03,542 in the previous year, of which Rs. 9,188 was doubtful and irrecoverable and Rs. 22,964 was under recovery.

177. The number of estates under direct management in the Division was 42. Of these, 13 petty estates were sold during the year under the orders of the Board at a price of Rs. 1,323.

Khas mahals.

178. The gross demand of this class of estates during the year amounted to Rs. 5,03,323 and the collections to Rs. 4,69,411, which gives a percentage of above 90 per cent. A sum of Rs. 13,771 was expended in improvement works of miscellaneous and sanitary nature. The condition of the tenantry was generally good, except in flooded tracts, where, owing to loss of crops, it was otherwise. Suitable remissions were made to meet individual cases of distress. The most important of the Government estates in this Division is that of Khurda, in the Puri district, the settlement of which, made 15 years ago, is under revision. An endeavour which was partially successful was made by the Subdivisional Officer of Khurda to enlist sarbarahkars and other villagers in the cause of sanitary and other improvements in their villages.

179. Out of a total gross demand of Rs. 3,03,901, a sum of Rs. 2,74,120 was realized and Rs. 103 remitted, leaving a balance of Rs. 29,678, or 9·76 of the gross demand, outstanding at the close of the year. The collections include Rs. 3,283 paid in advance for the year under report, and also the payments made in advance for future periods. The percentage of net balance on gross demand was, as in the previous year, lowest in Puri (2·38) and highest in Cuttack (16·28). Compared with the previous year, the collections show an improvement, being 90·20, against 89·04 per cent. in 1894-95.

Road and public works cesses.

180. The collection of petty demands by kanungoes seems to have been satisfactory in Cuttack and Balasore, but it is reported to have been retarded in Puri by delay in the preparation of arrear lists which under the new Tauzi Manual have to be prepared at the end of the second kist.

181. A sum of Rs. 1,09,691 was remitted by 10,377 money orders during the year, against Rs. 1,07,836 by 10,126 orders in the previous year. The divisional result was thus an increase in postal transactions, though there was a decrease both in the number of money-orders and the amount remitted in Cuttack, as compared with the previous year, which is attributed to the causes enumerated in paragraph 207 of the previous year's report. Many proprietors of large estates prefer to make payments through their agents, but the money-order system is a real boon to small proprietors who have no agents, and who are saved the trouble of long journeys and of dancing attendance on our low-paid amla, who are not conspicuous for their honesty. The money-order system is therefore as popular with small proprietors as it is unpopular with our amla in the Collectorates.

Remittance of land revenue and cesses by money orders.

182. No money-order was refused during the year.

183. The Government have by their Resolution No. 503, dated 12th December 1895, authorized the payment of rent by money-orders in the Puri district from 1st January 1896, and the number of such money-orders issued was 3 for an amount of Rs. 16. The success or otherwise of the working of this system cannot be judged as yet.

184. The number of estates or shares of estates which become liable to sale for non-payment of Government revenue during the year was 677, against 680 in 1894-95. Of these, only 24 (17 whole and 7 shares) were actually sold, giving a percentage of 3·5 to the total number which became liable to sale, against 5·5 in the previous year. The revenue demand of the estates sold was Rs. 84,170, and the arrears for which they were brought to sale amounted to Rs. 1,57,282. The amount of purchase-money was Rs. 1,82,000, or about 2½ times the Government revenue. Compared with the previous year, the amount for which defaults were made show a very considerable increase. This is due to the fact that the estate of Kotdesh, in the Puri district, with a Government revenue of Rs. 81,082, defaulted since April 1894, and the sale of the estate was postponed for various reasons till now. The fact of this estate having been sold for Rs. 1,64,000 only partly accounts for the low proportion of the purchase-money to Government demand of the estates sold in the Division. The sale-price of

Operation of the Sale Law.

the estate in question was, however, not inadequate, as it is six times the ascertained income of the estate. Another fact which is said also to have contributed materially to reduce the prices of estates sold is the re-settlement of the Division now in progress, owing to which the public are not forward in purchasing temporarily-settled estates.

185. The number of estates exempted from sale was 653, with a Government revenue of Rs. 3,23,140. Appendix XIX supplies details of the dates of sale, &c.

186. There were 9 appeals preferred against sales during the year, viz., 7 from Cuttack and 2 from the Puri district. Of the 7 Cuttack appeals, 2 were dismissed, 1 was recommended to Government for annulment of sale, and 4, instituted at the close of the year, are pending. The 2 appeals from Puri were dismissed.

Working of the certificate procedure.

187. The total number of certificates filed during the year, excluding those received from other districts, was 12,781, against 14,598 in 1894-95. In 5,227 cases payments were made on issue of notices, and in 7,096 cases on attachment of property, while in 301 cases recourse was had to actual sale. In 15 cases demands were satisfied on issue of warrants. In the 3 cases in which the debtors were imprisoned, all were released without payment of their debts. In course of my inspection of the Cuttack road-cess and certificate offices, I noticed that numerous certificates had been issued somewhat recklessly for insignificant sums, *down to one pice*. This appears to me to be an abuse of the certificate procedure.

Surveys and settlements.

188. The attestation and assessment work in connection with the Divisional settlement was in progress in the Balasore district during the year under report.

* * * * * * *

XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

264. During the year under report work was started in connection with the branch line of railway from Jutni to Puri, and the Orissa branch of Bengal-Nagpur Railway, in addition to the East Coast Railway already in progress. The following is a brief account of the work done on each line.

East Coast Railway and its branch to Puri.

265. A Special Deputy Collector was appointed to finish the land acquisition work for this line in the districts of Cuttack and Puri. The work on the main line in the district of Puri was pushed on vigorously, and the portion from Khurda Road station southwards was opened for traffic towards the close of the year. The whole of the branch line (from Khurda Road to Puri) was surveyed, and the railway authorities were put in possession of the area except a few acres of homestead land. It is expected that the branch line from Khurda Road station to Puri will ere long be open for traffic.

Bengal-Nagpur Railway.

266. Work was started in the last winter. Two Special Deputy Collectors were appointed to acquire land in the districts of Cuttack and Balasore, and arrangements have been made to put the railway authorities in possession of the lands as soon as possible. Considerable progress has been made in both the districts within a short time. The District Engineer of Balasore hopes that by the beginning of 1897 rails will have reached the Subarnarekha river.

XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

MUNICIPALITIES.

335. *Cuttack.*—There are three municipalities in this district, viz.—Cuttack, Jajpur, and Kendrapara. The Civil Surgeon of the district is the Chairman of the first, and the Subdivisional Officers are the Chairmen of the other two.

336. The table below gives the number of meetings held and the percentage of attendance in each:—

Names of Municipalities.	Number of members, including Chairman.	Number of meetings held.	Percentage of attendance.
1	2	3	4
Cuttack ...	18	21	48·1
Jajpur ...	12	15	72
Kendrapara ...	12	15	53·92

337. In Cuttack there are 18 Commissioners, of whom 12 are elected and 6 nominated. Of the nominated Commissioners, Babu Lal Bihari Ghose having died, Babu Harry Ballabha Bose was appointed in his place by Government, and on the transfer of Dr. Zorab, the late Civil Surgeon of the district, Dr. Meadows was elected as Chairman in his place. Of the elected Commissioners, Babu Girish Chandra Gupta having been transferred, his place was filled up at a bye-election held after the close of the year.

338. The Commissioners are said to have taken great interest in the municipal work. No meeting was adjourned for want of a quorum.

339. In the Jajpur Municipality of the 12 Commissioners, 2 died during the year, and their places were duly filled up. The number of meetings adjourned for want of a quorum was 3, against 2 in the preceding year.

340. In the Kendrapara Municipality 15 meetings were convened during the year under report, and 2 of these were adjourned for want of a quorum. The Municipal Commissioners are said to have taken interest in the affairs of the Municipality.

341. The receipts and expenditure of each municipality as compared with the preceding year are shown in the subjoined table:—

Names of Municipalities.	Receipts.		Expenditure.	
	1894-95.	1895-96.	1894-95.	1895-96.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Cuttack ...	47,487	47,726	47,370	47,349
Jajpur ...	4,604	5,046	5,189	4,484
Kendrapara ...	7,827	8,046	7,520	7,743

342. With regard to the sanitation of the town, Mr. Growse, the Collector, writes:—

"The sanitary condition of the town has been satisfactory, and the Sanitary Commissioner's recent visit disclosed nothing very glaringly wrong. The question of providing the "town with a filtered water supply has been voted beyond the means of the Municipality, and, "as at present advised, I doubt whether the Municipality would be justified in incurring the "great expense necessary."

343. The total amount expended in the Jajpur Municipality during the year under report was Rs. 4,484. The sanitary charges amounted to Rs. 1,677, against Rs. 2,074 in the preceding year.

344. The sanitary condition of Kendrapara town is said to have been good on the whole. Roads were kept clean, two unhealthy private tanks were re-excavated, and steps were taken to fill up ditches and *nalas*. The health of the

town was good throughout the year except in September and October, when cholera broke out in 30 villages out of 64 in the town. The total number of deaths occurred was 103. All possible measures are reported to have been adopted towards checking the disease.

345. As regards the administration of this Municipality, Mr. Growse remarks, that municipal administration seems to be more unpopular and meets with more opposition in Kendrapara than in the other towns.

346. *Balasore.*—In this Municipality there were 18 members, as in the preceding year. Out of these 5 were official and 13 non-official. The number of meetings held during the year was 14, against 19 in the preceding year, and the percentage of attendance was 38·88, which is very low. Of the 14 meetings, there were 2 at which there was no quorum. Babu Udoya Nath Kar, a member of the Municipality, is said to have attended no meetings at all during the year.

347. The total receipts and expenditure of the year under report were Rs. 17,203 and Rs. 17,046, against Rs. 15,794 and Rs. 16,047 respectively in the preceding year. The increase in the receipts was attributed to the collection of latrine-tax and of subscriptions and donations from the public for the maintenance of the Balasore Pilrim Hospital, which was made over to the Municipality during the year under report. In addition to this, a larger amount of fees under section 261 of the Municipal Act is said to have been realized during the year than in the preceding year. The increase in the expenditure is said to be due to charges for sanitary works executed during the year and for the maintenance of the Pilgrim Hospital.

348. *Puri.*—The Municipal Board of this town consists of 15 members, of whom 10 are elected and 5 appointed by Government. The number of meetings held during the year under report was 14, against 16 in the preceding year, and the percentage of attendance 50·6. No meeting adjourned for want of a quorum.

349. The total receipts and expenditure during the year under report were Rs. 33,815 and Rs. 34,233, against Rs. 35,386 and Rs. 38,014, respectively, in the preceding year.

350. The total expenditure shows a decrease, which is said to be due to the fact that the amount expended in the last year included sums spent on the Bara Danda drainage work, whereas no such large work was undertaken during the year under report.

351. The main roads of the town are said to be as clean as can be expected, but the bye-lanes are not so. It is said that more drains are required to serve as feeders to the Bara Danda drain, as reported last year.

352. The main source of water-supply of the town is wells and tanks. Some of these are reported to have been in a filthy state. The worst of these unclean tanks are the Markund and Swetgunga, and attempts have recently been made to clean them and remove the silt. Mr. Bell, the District Officer, writes:—

"The Markund tank with the Swetgunga is filthy beyond description, and is now being "dewatered and the silt is being removed. The cleansing for the first time in its history of "this ancient tank, which is overcrowded at ordinary seasons, and very much overcrowded "at festivals, cannot but be of great benefit. Great credit in this connection is due to "Dr. Banks, the Civil Surgeon, to whose energy and perseverance it is largely due that the "difficulties inseparable from such an undertaking have been successfully combated."

353. I entirely agree with the District Officer in the remarks he makes about Dr. Banks, an officer who takes much interest in his municipal work, and has worked with the utmost zeal to improve the sanitary condition of Puri town. Credit is due to him for having cleaned the Markund tank. The attempt made, however, to dewater and clean the Swetgunga tank in May last was a failure, as the pump, I understand, was not powerful enough for the purpose. As the rains have now set in, the tank cannot be cleaned, I am afraid, till the next dry season.

District Boards.

354. The statement below shows the number of members, the number of meetings held, and the average percentage of attendance of the members of the District Boards during the year under report:—

Name of district.	Number of members.	Number of meetings.	Average percentage of attendance.
1	2	3	4
Cuttack ...	21	14	46·6
Balasore ..	16	13	46·15
Puri ...	18	21	30·7

There was a great falling off noticeable in the average percentage of attendance against Puri. This is said to be due to non-attendance of certain non-official members owing to their illness.

355. *Cuttack.*—The average attendance of the Jajpur Local Board shows a decided improvement, being 6·3, against 4·7 in the preceding year. The average attendance of the Cuttack and Kendrapara Local Boards was about the same as in the preceding year.

356. The number of Committees attached to the Cuttack District Board is four, viz.—(1) Finance, (2) Education, (3) Public Works, including ferries and pounds, (4) Sanitation. The Committees appear to have done useful work, and held altogether 36 meetings during the year.

357. The total receipts and expenditure of the District Board during the year under report were Rs. 1,10,093 and Rs. 1,09,373, against Rs. 1,19,814 and Rs. 1,22,674 respectively in the preceding year.

358. *Balasore.*—There are four Committees attached to the District Board, and the number of meetings held by them was 29, against 30 in the preceding year.

359. The powers delegated to the Local Boards are said to have been well exercised.

360. The total receipts and expenditure during the year under report amounted to Rs. 71,094, and Rs. 67,177, against Rs. 75,691 and Rs. 71,900 respectively in the preceding year.

361. *Puri.*—The total receipts and expenditure of the District Board during the year under report amounted to Rs. 59,714 and Rs. 62,083, against Rs. 60,696 and Rs. 50,647 respectively in the preceding year.

362. The Board appears to have spent a fair amount of money on a certain number of new useful works.

363. The Local Boards of the district have the charge of the following branches of administration, viz.—

(1) Pounds.
(2) Ferries.
(3) Village roads.
(4) Khurda Dispensary.

364. Mr. Growse says of the Cuttack District Board:—

"The Board has worked well and 'kindly,' and it is a pleasure to work with it."

Mr. De says of the Balasore District Board:—

"The District Board and the Local Boards have worked in a generally satisfactory manner."

Mr. Bell says of the Puri District Board:—

"I will content myself with reiterating my predecessor's opinion of last year that the Board are quietly doing a good deal of useful work."

365. I have always considered it a clear gain to the cause of good administration to associate non-official gentlemen with us in our work, and the

intelligence, and local knowledge with which these gentlemen have worked deserve recognition, and have made local self-government a success in these provinces. The question of the formation of Union Committees is now under the consideration of Government, and reports have been called for from district officers and will shortly be submitted. There is much room for the extension of local self-government in this direction. Union Committees, if carefully formed and properly managed, will form a sort of link between administrative officers and the people, which at present does not exist. District and subdivisional officers will find themselves more in touch with the people through Union Committees than they now are, and will obtain material help from them, not only in the work of sanitary and other improvements in villages, but also in their administration and judicial work.

XXXVII.—GENERAL REMARKS.

400. I have very few remarks to make under this head, as I have not been a year in this Division yet.

The most important fact in the history of the year is the opening of the railway lines. The line from Khurda Road, southwards to the Madras Presidency, is open for traffic, and the line northwards to Calcutta is under construction. Orissa will witness great changes when this line is completed. The country will become more accessible, and there will be greater facilities for emigration and immigration. Export and import trade will receive an impetus, and probably the wages of labour and the prices of food-grains will be somewhat affected. The majority of pilgrims will come by rail, and the annual outbreak of cholera along the pilgrim route will probably be stopped. And the fact that Cuttack will be about 12 hours' journey from Calcutta will, indirectly, have its salutary influence on the progress of this Division.

Another fact which is probably receiving even more attention from the people at the present moment, is the re-settlement of the Division, which is now in progress. More than three-fourths of this Division consist of temporarily-settled estates, and all these estates are under re-settlement. Zamindars all over the Division are naturally watching these operations with interest, and are expecting the decision of the Government as to the percentage of the assets which will be left to them, with eagerness and anxiety.

Two successive good harvests have, for the time being, improved the condition of the agricultural people, and the Railway lines under construction give ample employment to labourors. The present condition of the people, therefore, is comparatively good. The people of Orissa are a quiet law-abiding people, not given to crime, and the year under review was marked by a perceptible decrease in crime throughout the Division, owing to the good harvests.

The re-organisation of the Chaukidari System, the re-organisation of the Patwari System, and the formation of Union Committees are important measures under contemplation. If these measures are adopted and carried out with due care, they cannot help proving beneficial to the people.

CONDITION AND PROSPECTS OF CROPS IN THE PATNA DIVISION.

The 16th October 1896.—The following papers are published for general information.

M. FINUCANE,
Offg. Secy. to the Govt. of Bengal.

No. 565G., dated Bankipore, the 8th October 1896.
From—J. A. BOURDILLON, Esq., Offg. Commissioner of the Patna Division,
To—The Secretary to the Government of Bengal, Revenue Department.

WITH reference to Government order No. 821T.—R., dated the 30th ultimo, and in continuation of my letter No. 119Ct. of the 25th idem, I have the honour to submit the following report on the condition and prospects of crops in the districts of this Division for the fortnight ending on the 3rd instant.

GENERAL REMARKS.

2. During the period under report there has been no rain anywhere, except less than half an inch at Barharwa in the north-west of the Bettiah subdivision in Champaran. From about the 20th to the 25th, and again during the last few days, a strong west wind has been blowing in the middle of the day, which has had the effect of greatly drying the land and withering the standing crops.

3. The period covered nearly corresponds with that of the Hathiya asterism (September 25th to October 10th), and is therefore one in which plentiful rain is expected and is required to keep alive the *kharif* and to moisten the land so as to enable the cultivators to begin sowing the *rabi*. In those districts where water is carefully stored, *e.g.*, Gaya and parts of Shahabad and Patna, the standing crops up to date are in good condition, and will in any case give a fair return. Further, in all the area commanded by the Soñe canals the *kharif* crops are magnificent. Elsewhere rain is badly needed, and if it does not fall within the next few days the standing crops will suffer greatly, and the area of *rabi* sowings will be much contracted.

4. I have just returned from a visit to Dehree and the Sone canals, and have spent three days in Mr. Buckley's company. Every effort is being made to work the canals to the best advantage, and not a drop of water is being wasted which could be profitably used for irrigation.

5. As regards prices, there has been a sharp rise in the price of all grain almost everywhere within the last week, which is due to two causes—(1) the practical certainty that the Hathiya rains have failed, (2) large purchases made for despatch to the North-Western Provinces. There have been some ebullitions of popular feeling which will be noticed below in their proper places, but after some oscillation prices have steadied down for the present and confidence has been restored.

6. All the information that I have been able to obtain, both official and non-official, points to the fact that there is a sufficiency of grain in the Division, and what is needed is money to buy it with. For this reason I think that before long test relief works will have to be opened almost everywhere in order to give work to the unemployed. These will take at present the form of repairs to roads or construction of new roads in accordance with the usual civil works programme of the District Boards. Large quantities of earthwork have to be executed on the projected railways in Gaya, Shahabad, Muzaffarpur and Darbhanga, which will employ thousands of work-people through the winter. I now turn to make a few remarks on the condition of the different districts.

7. *Patna.*—The Collector reports that rain is not urgently wanted; but if it falls within a week, the estimated outturn of winter rice will be 12 annas, otherwise the crop will not exceed an 8-anna one, and in many places it will be as low as 6 annas. The floods in the south and south-west of the Bihar subdivision, referred to in my last report, have caused very little damage and will lead to no distress. On the contrary, the area inundated by them is a *rabi* country, and the floods have supplied the necessary moisture. The event of

this week has been the sharp rise in prices all over the north of the district and in the case of all classes of food-grains.

8. The local *goladars* in Barh and Phulwari closed their golas to retail sale about the 30th ultimo, and the people were put to great straits to obtain grain. The Collector has pointed out to the *goladars*, as far as possible, the danger they are running in pursuing this policy, and has advised them to sell by retail as before. In this he has been very successful. Mr. Inglis also held a public meeting in the city on Sunday, the 4th, to consider the situation, at which it was decided to raise funds privately to aid the necessitous by selling small quantities of grain at a somewhat lower rate than that quoted by the regular dealers. I have impressed on Mr. Inglis that this must be treated as an entirely private arrangement, and at my request he has withdrawn all officials from the managing committees. Government is therefore in no way committed to this charitable policy. I have in a separate letter reported on the ebullitions at Dinapore and elsewhere.

9. *Gaya.*—Prices have risen, and common rice is now selling at 9 seers per rupee. During the last fortnight I have traversed the whole district, and have satisfied myself that for the present there is nothing to fear. While I was in Gaya there were clamorous crowds asking for a Government rate to be fixed for the sale of grain: this was of course rejected. After I had left on Sunday, the 4th, there was an alarm of *loot*, but the Magistrate and District Superintendent of Police had already taken precautions, and the police were so quickly on the spot that nothing occurred. The price of common rice, which was 12 seers up till the 1st, when I left, rose to 9 seers by the 5th, and has there stayed.

Mr. Savage has asked the Mohunth of Budh-Gaya, who has large hoards of grain, to come forward and sell it to the poor in small quantities on easier terms than the Banias.

10. *Shahabad.*—Owing to the causes enumerated in paragraph 5 above, and specially to the operations of purchasers from the North-Western Provinces, the price of grain at Arrah rose suddenly on the 30th ultimo and 1st October. On the latter date the grain-dealers suspended retail sales, and there was considerable apprehension of a grain riot. In these circumstances the Officiating Magistrate, Mr. Egerton, took the unwise step of forbidding the exportation of grain, by an order under section 144, Criminal Procedure Code, dated the 2nd October. Fortunately, however, he reported his proceedings to me by telegram, and I forthwith cancelled his order by wire. Both then and since I have impressed upon him that no direct interference with trade can possibly be allowed, although he is at liberty to use persuasion and advice as much as he pleases to induce the Banias to sell at fair rates. Police protection has been given to those grain-dealers who asked for it, and I have directed the Magistrate to realise the cost under section 13 of the Police Act, and also to enlist special constables if required. The latest reports state that up to yesterday all was quiet again, and the Magistrate is now taking proper steps to maintain order.

11. *Saran.*—Mr. Wheeler says that further reports and enquiries seem to show the general yield of the *makai* crop has not been much more than 6 annas for the district as a whole. The rice is withering away daily, and even were good rain to fall now, a large proportion must be lost.

12. He also reports that within the last few days he has received several complaints from Chapra that the Banias do not sell at the prices they report, and that they are inflating prices unduly, sometimes changing the rate two or three times in the day. Agents from the North-Western Provinces are also in the district buying up grain for exportation, and this has also tended to raise prices. Applications have been made to the Collector to interfere, which he has of course declined to do.

13. A meeting of the District Board was held on the 3rd instant to discuss what preliminary measures were advisable in order to enable the Board to start relief works as soon as the necessity for them was demonstrated. It was resolved—

(*a*) to empower the Chairman to stop any works now in hand which are not of urgent necessity;

(*b*) to request all planters as far as possible to execute the repair works made over to them on a system of *haziri*, so as to enable them to gauge the demand for labour;

(*c*) to circulate the authorised programme of relief works for the suggestions of members.

These moderate proposals have my approval.

14. *Champaran.*—Under date the 5th instant, Mr. Macpherson, Collector of Champaran, writes that there was a fall of ·37 of an inch at Barharwa, and that all over the district much has been done to irrigate the crops by damming the hill streams. His opinion is that the winter rice crop continues to hold out, and it will be saved if there is rain during the Hathiya asterism. In one or two tracts the winter rice crops will be very poor even if good rain falls.

15. During the first week of the fortnight prices fell somewhat owing to new grain (*bhadoi*) coming into the market, but during the last week there has been a sharp rise, and common rice is selling for 11 seers at Motihari and 12½ seers at Bettiah, instead of 14 or 15 seers, which is the usual rate at this time of the year.

16. *Muzaffarpur.*—The winter rice crop is daily deteriorating for want of rain, which is most urgently needed to prevent the plants from withering. Prices are steadily rising, and rice has already reached almost famine rates. No rioting or disturbance is reported.

17. *Darbhanga.*—There was no rain during the fortnight, and a good fall is urgently required. If there is rain, there will be very fair paddy over the greater part of the district; otherwise it will be poor everywhere, and there will be scarcely any in the west and north-west of Madhubani. Mr. Carlyle thinks there is some risk of prices rising so high as to cause a good deal of distress, as prospects are so bad in other parts of India. He was with me here on the 6th, and returned to Madhubani the same night to watch the development of affairs.

18. *Conclusion.*—In view of the disturbed state of public feeling, and the risk of grain riots should the market grow tighter, I have thought it right to cancel all leave for the Puja holidays, and to ask District and Subdivisional Officers to remain at or near their head-quarters. These orders have been loyally accepted, and indeed in most cases the District Officers, at any rate, had anticipated my wishes. A concession has been allowed in one or two special cases.

19. You will recognise that this is not the report required by section 9 of the Famine Code. I cannot say that "scarcity actually prevails" or that "famine is imminent" in any part of the Patna Division; but if no rain falls by the end of the Siwati asterism, which closes on the 6th November, there will be no doubt of the matter. Meanwhile, I am issuing a circular to all District Officers, calling their attention to section 11 of the Famine Code, and instructing them to start test works carefully as they find necessary.

20. I propose to submit a further report on or about the 22nd instant, and will remain at my head quarters throughout the holidays.

No. 940T.—R., dated Darjeeling, the 15th October 1896.

From—M. FINUCANE, Esq., Offg. Secy. to the Govt. of Bengal, Revenue Dept.,
To—The Commissioner of the Patna Division.

I AM directed to acknowledge the receipt of your letter No. 565G., dated the 8th October 1896, reporting on the condition and prospects of the crops in the districts of the Patna Division.

2. The Lieutenant Governor fears that the fact that no rain has fallen since the date of your report has made the outlook even more gloomy than you describe it to be. There can even now be no doubt that the serious rise in prices is pressing with great severity upon the labouring classes, and no time should, in His Honour's opinion, be lost in offering work on the district roads under the conditions prescribed in section 56 of the Famine Code, treating these for the present as "test works" under section 11. The District Boards must now be called upon to revise their budgets by cutting out all avoidable expenditure and appropriating all the funds they can find to relief works proper. There will certainly be full demand for all the work that the Boards

can supply. Should no rains fall before the end of this month, there can be little doubt that a serious failure of *aman* rice and *rabi* crops will be inevitable, and the Local Government will have to largely supplement the Board funds. It is fortunate that the railway extensions both in South and North Bihar are likely to supply work for a large section of the population during the coming winter. You should certainly submit the report prescribed by section 9 of the Famine Code by the first week in November if the rain still holds off.

3. Meantime all executive officers should carefully study the Famine Code and the history of past scarcities The Magistrates and Police must keep a sharp look-out for any indications of rioting, and take prompt steps to suppress it. The standing crops must be carefully watched, and their condition reported weekly in detail of local areas. The stocks of food-grain should be enquired into. Every effort should be made to utilise whatever water-supply there may be from hill streams, tanks and wells, for purposes of irrigation. Loans for well-sinking should be freely given. The officers of the Opium, Survey, and Settlement Departments may be utilised for the purposes of these local enquiries. This need not at present interfere with their ordinary duties.

4. The Lieutenant-Governor approves of the action so far taken by yourself and the District Officers as now reported, except in the case of the Officiating Collector of Shahabad, whose order forbidding exports of grain under section 144 of the Criminal Procedure Code was rightly cancelled by you as both ill-advised and illegal. As regards the action taken by the District Board of Saran, the Lieutenant-Governor approves of it; but with reference to the execution of work by planters on a system of *hazíri*, I am to point out that no relief work can under the Code be paid by daily wage irrespective of task. The Code rules must be strictly followed in all district relief works, whether test or other.

5. The Lieutenant-Governor will be prepared, if the situation becomes worse, to place an officer on special duty to assist you. Meantime the Director of Land Records and Agriculture has been instructed to proceed to Bihar at an early date.

LIBERALITY OF CERTAIN GENTLEMEN OF MYMENSINGH AND DACCA.

No. 1159G., dated Dacca, the 30th September 1896.

From—The Commissioner of the Dacca Division,
To—The Secretary to the Government of Bengal, General Department.

THE gentlemen named in the margin propose to commemorate the recent visit to Dacca and Mymensingh of His Honour the Lieutenant-Governor of Bengal by the benefactions noted in the annexed list. I have the honour to request that the liberality and public spirit thus exhibited by these gentlemen may be acknowledged by the Government.

1. Raja Rajendra Narayan Roy Bahadur, of Bhawal.
2. Raja Surjya Kanta Acharjee Bahadur, of Muktagacha.
3. Rai Jogendra Kisor Rai Chowdhury Bahadur, of Ramgopalpur.
4. Rai Pran Sankar Chowdhury, Zamindar, Teota.
5. Babus Janaki Nath Roy and Sita Nath Roy, of Bhagyakul.

NAME OF DONOR.	Amount of donation.	Work on which to be spent.	
1	2	3	
	Rs.		Rs.
Raja Rajendra Narayan Roy Bahadur, of Bhawal.	40,000	For the extension of the Burigan-ga bund towards the west.	20,000
		For the extension of the Simpson Ward attached to the Dacca Mitford Hospital.	5,000
		For supply of good water to his tenants of Bhawal by excavating ponds and wells under supervi-sion of the District Board of Dacca.	15,000
			40,000
Raja Surjya Kan'a Acharjee Bahadur, of Muktagacha (Mymensingh).	7,600	For the construction of and fitting the same with necessary furniture an Eye Ward to be attached to the Nasirabad Dispensary, to be called "Mackenzie Eye Ward." Cost of maintenance to be borne by the donor.	
Rai Jogendra Kisor Rai Chow-dhury, of Ramgopalpur (Mymensingh).	11,000	For the excavation of tanks throughout the district by the District Board of Mymensingh. The tanks to be called after the name of His Honour the Lieutenant-Governor.	10,000
		For the extension of the water-works for the benefit of the residents of the Government Estate Wari (Dacca).	1,000
			11,000
Rai Pran Sankar Chowdhury, Zamindar, Teota.	1,000	For the re-excavation of an old tank in the head-quarters of the Manickganj subdivision and building a masonry ghat in the same under the supervision of the Subdivisional Officer.	
Babus Janaki Nath and Sita Nath Roy, of Bha.yakul.	5,000	To the District Board of Dacca for the excavation of two tanks alongside the Srinagar road for drinking purposes.	

MOHIM CHANDRA GHOSH,
Personal Assistant, for Commissioner.

No. 962T.M., dated Darjeeling, the 12th October 1896.

From—H. H. RISLEY, Esq., C.I.E., Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Dacca Division.

I AM directed to acknowledge the receipt of your letter No. 1159G., dated the 30th September 1896, in which you report that the gentlemen named in the margin have proposed to commemorate the recent visit to Dacca and Mymensingh of His Honour the Lieutenant-Governor of Bengal by executing certain works of public utility specified in the list annexed to your letter, and request that the liberality exhibited by them may be acknowledged by Government.

1. Raja Rajendra Narayan Roy Bahadur, of Bhawal.
2. Raja Surjya Kanta Acharjee Bahadur, of Muktagacha.
3. Rai Jogendra Kisor Roy Chowdhury Bahadur, of Ramgopalpur.
4. Rai Pran Sankar Chowdhury, Zamindar, Teota.
5. Babus Janaki Nath Roy and Sita Nath Roy, of Bhagyakul.

2. In reply, I am desired to request that you will be so good as to convey to these gentlemen an expression of His Honour's thanks for the public spirit and liberality. This correspondence will be published in the *Calcutta Gazette* for general information.

WEATHER AND CROP REPORT.

For the week ending the 19th October, 1898.

Burdwan.—Rainfall nil all over the district. Weather hot and fair. Rain badly wanted for the standing *aman* which is withering in different parts of the district. Sugarcane doing well. The sowing of *rabi* is being retarded for want of rain. Fodder and water sufficient. Common rice selling as follows:—

				Srs.	
Sadar	...	...	...	12 to 15	per rupee.
Kalna	...	...	...	12	
Katwa	...	...	...	12 to 13½	
Raniganj	...	...	...	10	

Birbhum.—Weather fine. No rain since September. Is is greatly need d as the crops are suffering. Harvesting of *aus* proceeding. Rice selling at 12 to 13 seers per rupee.

Bankura.—No rain. It is badly wanted for *aman*. Prospects gloomy. Probable outturn of *aus* 8 to 10 annas. Water and fodder sufficient. Common rice selling at 11 to 12 seers per rupee. Price is daily rising for heavy exports.

Midnapore.—No rain. Weather seasonable and cool for this time of the year. Rain is wanted badly. Paddy is suffering very much for want of moisture. Prospects of sugarcane and *til* hopeful wherever there is moisture; likewise indigo is being sown in lands showing moisture. Heavy daily exports of paddy and husked rice have raised the price from 14 to 10 seers per rupee. Cattle-disease reported from Binpur. Fodder and water sufficient Coarse rice selling as follows:—

				Srs.	
Sadar	...	...	...	10	per rupee.
Contai	...	...	...	14 to 16	
Tamluk and Ghatal	...	...	...	12½ to 14	

Hooghly.—No rain throughout the district. Weather hot during day; cool at night. *Aus* is being cut. *Aman* withering for want of rain. Rice sells average at 10 to 12 seers per rupee.

Howrah.—Rainfall nil. Weather seasonable. Harvesting of jute and sowing of *rabi* going on. Rain badly wanted for *aman* rice. Supply of fodder and water sufficient. Common rice selling at 10 to 12½ seers per rupee.

24-Parganas.—Rainfall nil. Hot in the day and cool in the night. Prospect of *aman* fair. Rain is much wanted shortly. Ploughing for *rabi* crops going on in Barasat and Basirhat subdivisions. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	c.	
Sadar	...	...	...	10 to 13	8	per rupee.
Barasat	...	...	...	9	0	
Basirhat	...	...	...	10	10	
Diamond Harbour	...	...	...	11	6	

Nadia.—No rain. Days hot; nights cool. *Aman* suffering much for want of rain. Prospects of *rabi* crops gloomy owing to drought. Fodder sufficient. Price of rice varies from 10 to 11 seers per rupee.

Murshidabad.—Rainfall nil. Weather seasonable. Sowing of indigo and *rabi* crops going on. *Kalai* plants thriving. Harvesting of *aus* continues. State of *aman* and sugarcane seems good. Rain wanted for all standing crops. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	11	per rupee.
Kandi	...	...	...	13	
Jangipur	...	...	...	11½	

Jessore.—Rainfall at Jhenida ·60. Weather seasonable. Prospects of *aman* gloomy. Rain badly wanted. Lands being prepared for *rabi* crops. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	9½ to 11	per rupee.
Jhenida	11 to 12	
Magura	9 to 9½	
Narail	10	
Bangaon	11 to 12	

Khulna.—No rain. Weather fine and cool. Agricultural loans will be given in Mollahat thana. *Aman* paddy withering for want of rain. No cattle-disease. Fodder and water sufficient. Prices of common rice:—

		Srs.	
Khulna	...	9 to 10	per rupee.
Bagerhat	...	8½	
Satkhira	...	9½	

Rajshahi.—Rainfall nil. Days hot; nights cool. Prospects fair. Rain urgently wanted for rice crop and *rabi* sowings. Winter rice withering in places. No attle-disease. Fodder and water available. Common rice selling from 9 to 10 seers per rupee.

Dinajpur.—Rainfall ·07 at Thakurgaon only. Weather hot during day; cool at night. Transplantation of *haimanti* is over. Standing crops on low lands doing well, but on high lands suffering for want of rain. Cultivation for *rabi* crops commences. Common rice selling from 10 to 11 seers per rupee. No cattle-disease. Fodder and water sufficient.

Jalpaiguri.—Rainfall nil. Days warm; nights cool. Steeping of jute continues. Rain badly wanted for standing crops. Preparaton of land for tobacco going on. Condition of cattle generally good. Fodder and water sufficient. Common rice selling at Sadar 10 and at Alipur subdivision 7½ seers per rupee.

Rangpur.—Average rainfall ·19. Washing of jute nearly finished. Lands are being prepared for tobacco plantation. Prospects fair. Common rice selling at 9 to 11 seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Weather clear. Jute washing going on. Winter rice doing well. Cattle-disease in three villages. Fodder and water ample. Price of common rice at head-quarters 9 seers and in the interior from 7½ to 11¼ seers per rupee.

Pabna.—Rainfall ·91 at Pabna. Weather getting cooler. Prospects of *aman* crop very poor. *Aus* rice selling at 10 seers per rupee at Pabna and common rice 8 seers per rupee at Sirajganj. Fodder sufficient.

Dacca.—Rainfall nil. Weather seasonable. Prospects of *aman* fair. Fodder available. No cattle-disease. Price of common rice 8 to 10 seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. Rain wanted for the growth of *aman* crop. Fodder available. No cattle-disease. Common rice sells at 7½ to 8 seers per rupee.

Faridpur.—No rain. Weather seasonable. Rain necessary for *aman* paddy. Rice selling at 8 or 9 seers per rupee. Fodder available.

Backergunge.—Rainfall nil. Weather seasonable. Prospects of standing *aman* crop moderate. More rain wanted. No cattle-disease. Price of common rice varies from 7 to 10 seers per rupee.

Tippera.—Rainfall nil all over the district. Weather hot in the day and cool in the night. *Aman* paddy withering in high lands. Rain badl wanted. Outlook anxious. Cattle-disease reported from Chandpur. Fodder and water sufficient. Common rice selling from 8 to 11 seers per rupee.

Noakhali.—Rainfall (·74) only local. Prospects of crops gloomy for want of sufficient rain. Water and fodder good. Price of rice ranges from 9 to 13 seers per rupee.

Chittagong.—Rainfall 87 Weather hot. Prospects of standing crops generally fair. More rain would be beneficial. Water and fodder sufficient. Rice sells at 11 seers per rupee.

Patna.—Rain urgently wanted for rice crop and *rabi* sowings. Prospects of neither favourable except where artificial means of irrigation are available. Fodder and water for cattle sufficient. Prices rising. Common rice selling at—

		Srs.	
Patna	...	10½	per rupee.
Barh	...	8½	
Bihar	...	9¼	
Dinapore	...	9 to 11	

Gaya.—No rain. Paddy crop suffering for want of rain. Common rice sells at 9 seers against average of 14 seers per rupee.

Shahabad.—No rain. Paddy crops on unirrigated tracts nearly dried up for want up rain. *Rabi* sowings retarded for want of moisture.

Saran.—No rain. Paddy drying up for want of rain. Fields are being prepared for *rabi* sowings, but for want of moisture sowings have not yet been undertaken as usual. Prices of food-grains are—Rice 8 to 10 seers per rupee, wheat 8 seers per rupee, maize 13 seers per rupee, gram 11 seers per rupee, and marua 16 seers per rupee.

Muzaffarpur.—Rainfall nil. Prospects of winter rice crop very bad except in the few places where irrigation is possible. *Rabi* sowings commenced in places, but for want of moisture prospects are very poor. Common rice and wheat sell at 9 seers per rupee each.

Darbhanga.—Rain badly wanted for rice crop. Paddy wherever not irrigated withering in Sadar and Madhubani and *rabi* sowings retarded for want of moisture in places. Prices rising. Common rice selling at Sadar 9 seers per rupee.

Monghyr.—Rainfall nil. Weather seasonable. Rain urgently wanted for paddy and *rabi* crops. Sowing of *rabi* commenced. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Monghyr	9 to 10	per rupee.
Begusarai	9½	
Jamui	12	

Bhagalpur.—Weather seasonable. Rain urgently wanted for *aghani* paddy which is withering for want of water. Sowing of *rabi* crops is being retarded.

Purnea.—No rain. Harvesting of *bhadoi* paddy and jute finished. *Aghani* paddy promising though more rain wanted. *Rabi* sowings begun. Cattle-pox reported from two or three villages. Fodder and water sufficient. Common rice sells at 10 to 11 seers per rupee.

Malda.—No rain. Weather fine and getting cool. Prospects of winter rice very bad owing to want of rain. Rain is also urgently needed for sowing of *rabi* crops. Common rice selling at 11 seers per rupee. No want of fodder and water.

Sonthal Parganas.—No rain. Weather clear with variable winds. The want of rain is causing considerable loss of the rice crop all round the district and keeping back the sowing of the *rabi* crops. Rice sells at about 10 seers per rupee. No want of water or fodder as yet.

Cuttack.—Rainfall nil. Weather hot during day; getting cooler at night. *Laghu* rice suffering for want of rain. *Beali* rice is being harvested. *Rabi* being sown. Rain very badly wanted. Insect-pest disappearing. Condition of cattle good. Fodder sufficient. Common rice sells as follows:—

	Srs.	c.	
Cuttack	15	2	per rupee.
Jajpur	17	1	
Kendrapara	18	6	
Banki	20	0	

Balasore.—No rain. Weather seasonable. *Laghu* rice ripening. *Laghu* and *sarad* crops are being injured by insects. *Sarad* is also suffering for want of rain. Condition of cattle good. Fodder sufficient. Common rice sells as follows:—

	Srs.	
Sadar	13	per rupee.
Bhadrak	16 to 18	

Puri.—Rainfall nil. Weather hot in the day; cool in mornings and evenings. Rain urgently wanted. Paddy plants beginning to wither on high lands. Insects are damaging *laghu* paddy which is being harvested. *Sarad* paddy coming into ear. Lands being prepared for *rabi* crops. Miscellaneous crops doing well. Fodder and water sufficient. Condition of cattle generally good. Common rice selling as follows:—

	Srs.	
Sadar	14 to 17	per rupee.
Khurda	15 to 18	

Angul.—No rain. Hot days; cold nights. *Beali* out. *Laghu* ripening. Outturn of these two not over eight annas. *Sarad* much in need of rain, and where not irrigated will fail. Early *biri* and *kasi* will yield eight annas. Late *biri* and *kasi* will be a failure if no rain falls soon. No cattle-disease. Coarse rice obtainable with difficulty at 14 Cuttack seers per rupee.

Hazaribagh.—Weather hot in day, cold at night. No signs of rain. Prospects of paddy crop reduced to eight annas. *Rabi* fields being ploughed. Rice sells at 7 to 10 seers per rupee. Rice being brought from Raniganj.

Lohardaga.—No rain. Weather hot. Harvesting of *gora dhan* continues. Standing crops badly require rain. No cattle-disease. Fodder and water sufficient. Price of common rice—new 10 seers—old 7 seers per rupee.

Palamau.—No rain since 20th September. Most reservoirs empty. Present prospects of winter rice seven annas. Rain urgently needed for rice and for *rabi* sowings. Condition of cattle good. Water and fodder sufficient. Common rice sells at Sadar 6 seers 12 chitaks per rupee.

Manbhum.—No rain. Weather seasonable. Rain badly wanted. Fodder and water plentiful. Condition of cattle good. Common rice sells at Sadar 10 seers per rupee with tendency to rise.

Singhbhum.—Rainfall nil. Weather fine. Prospects of standing *aman* crop, except on well-irrigated land, are very bad for want of rain. Rice sells at 14 seers per rupee average. Fodder and water sufficient. No cattle-disease reported.

General Summary.—There was no rain during the week with the exception of showers at Rangpur, Pabna, Noakhali, Chittagong and Jhenida in Jessore. Rain is urgently needed all over the province. The winter rice crop has already suffered severely in all but a few districts for want of rain, and the *rabi* sowings are in many places being retarded for the same cause. In Cuttack the insects which had been infesting the rice crop are disappearing; but they are still doing damage in Balasore and Puri. The harvesting of early rice and the washing of jute are still proceeding in some districts. No cattle-disease is reported except from a few places in Midnapore, Bogra, Tippera, and Purnea. The price of common rice is unusually high and is said in several districts to be rising owing to heavy exports.

By order of the Lieutenant-Governor of Bengal,

	Inches.
The total fall of rain from 11th to 17th October 1896	Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0·74
The total fall from 1st January to 17th October 1896	55·17
The average fall of the corresponding period for 24 years, Surveyor-General's Office	62·10

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the ermometers are verified and the readings have been corrected to a standard constructed and verified at the ew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet ove the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86, rmerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in e Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

PART I.

Orders and Notifications by the Lieutenant-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 5818A.

GENERAL.—*No. 1116A.D.—The 14th October 1896.*—The undermentioned officers, whose services have been placed at the disposal of the Public Works Department of this Government, for employment on the work of acquiring lands required for the Hajipur-Katihar extension of the Tirhut State Railway, are vested with the powers of a Collector under Act I of 1894, in the districts mentioned opposite their names :—

Maulvi Najimuddin Ahmed, substantive *pro tempore* Deputy Collector, Darbhanga.
Babu Kanti Bhushan Sen, Deputy Collector, Monghyr.
" Suresh Chandra Chatterji, Deputy Collector, Bhagalpur.

No. 1246A.D.—The 22nd October 1896.—Mr. C. A. Bell is appointed to act, until further orders, in the first grade of Joint-Magistrates and Deputy Collectors, and is posted to the head-quarters station of the 24-Parganas district, on being relieved of his present appointment as Officiating Magistrate and Collector of Puri.

No. 1218A.D.—The 24th October 1896.—Mr. R. H. Renny, Deputy Commissioner, Jalpaiguri, on furlough, is appointed to act, until further orders, as Deputy Commissioner of Palamau.

No. 1220A.D.—The 24th October 1896.—Mr. J. D. Cargill, Assistant Magistrate and Collector, is appointed to act, until further orders, in the first grade of Joint Magistrates and Deputy Collectors, on being relieved of his present appointment as Officiating Deputy Commissioner of Palamau, and to have charge of the Buxar subdivision of the district of Shahabad.

No. 1222A.D.—The 24th October 1896.—Mr. A. H. Cuming, Officiating Joint Magistrate and Deputy Collector, Buxar, Shahabad, is transferred to the head-quarters station of the district of the Southal Parganas.

No. 1239A.D.—The 24th October 1896.—Babu Nobin Chandra Das, Deputy Collector, Chittagong, now acting as Personal Assistant to the Commissioner of the Chittagong Division, is vested with the powers of a Collector under Act I of 1894, in the district of Chittagong.

No. 1242A.D.—The 24th October 1896.—Mr. D. Cameron, District and Sessions Judge, is appointed to act as District and Sessions Judge of Purnea, during the absence, on furlough, of Mr. H. F. Matthews, or until further orders, on being relieved of his present appointment as officiating District and Sessions Judge of Muzaffarpur by Mr. A. W. Mackie.

No. 1244A.D.—The 24th October 1896.—Mr. E. Geake, Joint-Magistrate and Deputy Collector, is appointed to act as Magistrate and Collector of Rangpur, during the absence, on deputation, of Mr. E. B. Harris, or until further orders, on being relieved of his present appointment as Officiating District and Sessions Judge of Purnea.

Mr. E. Geake is appointed to act, until further orders, in the second grade of Magistrates and Collectors.

No. 1249A.D.—The 24th October 1896.—Maulvi Syed Ali Ashruf, Officiating Deputy Magistrate and Deputy Collector, Patna, is transferred to the head-quarters station of the district of Champaran.

No. 1252A.D.—The 24th October 1896.—Mr. H. Wheeler is appointed to act temporarily as Magistrate and Collector of Malda, *vice* Mr. J. C. Price, about to retire, on being relieved of his appointment as Officiating Magistrate and Collector of Saran.

No. 1254A.D.—The 24th October 1896.—The order of the 12th October 1896, transferring Mr. J. W. Minden Augier, Officiating Deputy Magistrate and Deputy Collector, Monghyr, to the head-quarters station of the district of Cuttack, is cancelled.

POLICE.—*No. 1287A.D.—The 26th October 1896.*—Mr. H. V. H. Roberts, District Superintendent of Police, Purnea, is allowed leave for two months, under article 291 of the Civil Service Regulations, with effect from the 5th November 1896.

No. 1289A.D.—The 26th October 1896.—Mr. A. B. C. Comber, Assistant Superintendent of Police, on furlough, is appointed to act as District Superintendent of Police, Purnea, during the absence, on leave, of Mr. H. V. H. Roberts, or until further orders.

No. 5820A.—The 27th October 1896.—In modification of the order dated the 12th October 1896, Mr. J. V. Ryan, Assistant Superintendent of Police, is posted to Shahabad, on being relieved of his present appointment as Officiating District Superintendent of Police of that district.

JAILS.—*No. 5060A.—The 13th August 1896.*—Mr. P. Donaldson, Superintendent of the Presidency Jail, is allowed leave for three months, under article 291 of the Civil Service Regulations, with effect from the 9th September 1896, or such subsequent date as he may avail himself of it.

The following notifications are republished from the *Assam Gazette*:—

No. 6692G.—The 13th October 1896.—Mr. D. H. Lees, I.C.S., Officiating Deputy Commissioner, Kamrup, on being relieved by Captain P. R. T. Gurdon, I.S.C., is transferred to Mangaldai as Assistant Commissioner, and placed in charge of that subdivision.

[Sixth Publication.]

The 21st September 1896.

No. 177.—Notification.—It is hereby notified that, in exercise of the powers conferred on him by section 99 of Act III (B.C.) of 1876, the Lieutenant-Governor of Bengal proposes to substitute the following for rules 6 and 7 of the revised water-rate rules for the

Saran Canals published under Notification No. 106 in the *Calcutta Gazette*, dated 26th March 1894:—

6. Leases will be granted for the year 1896-97 for any one of the four canals to any person, approved by the canal officer, who has a beneficial interest in the use of the water. The charge for the use during the whole year, or any part of it, of each of the canals will be—

	Rs.
No. III.—The Daha river	10,000
„ IV.— „ Gundaki „	5,500
„ V.— „ Dhanai „	6,500
„ VI.— „ Gangri „	8,000
Total ...	30,000

The water-rate must in each case be paid in full into the Government Treasury either at Gopalganj or Chapra, before a lease will be granted, or before water will be admitted into a canal. An application for a lease for the year 1896-97 must be made in the form of Appendix I.

7. Leases will be granted for a period of three years ending on the 31st March 1899 to any person, approved by the canal officer, who has a beneficial interest in the use of the water.

The charge for the use during the period of three years of each of the canals will be—

Canals.	Payment to be made.		
	Before water is admitted in 1896-97.	Before the 15th April 1897.	Before the 15th April 1898.
1	2	3	4
	Rs.	Rs.	Rs.
No. III.—The Daha river ...	9,000	8,000	7,000
„ IV.— „ Gundaki „ ...	5,000	4,500	4,000
„ V.— „ Dhanai „ ...	6,000	5,500	5,000
„ VI.— „ Gangri „ ...	7,000	6,000	5,000
Total ...	27,000	24,000	21,000

Water will not be admitted into any canal during any particular year until the water-rate of that year has been paid in full into the Government Treasury, either at Gopalganj or Chapra. An application for a lease for a term of three years must be made in the form of Appendix II.

[Sixth Publication.]

The 22nd September 1896.

No. 178.—Notification.—The Lieutenant-Governor of Bengal proposes, under sections VI and XI of Act V (B.C.) of 1864, to make the following additional rule, with effect from 1st December 1896, for boats, &c., passing out of the Dhappa Lock, to be included with those published under Notification No. 144, of the 23rd May 1893, at pages 493 and 494, Part I of the *Calcutta Gazette* of the 31st idem:—

Additional toll.—All boats, steamers and flats, after passing out of the Dhappa Lock, must proceed outsidet he toll limit at Bamonghatta within 48 hours, otherwise a fresh toll will be levied in accordance with the rules in force.

No. 131Marine.—The following notification No. 190, dated the 20th October 1896, issued by the Administration of Burma relative to the imposition of quarantine regulations in the Port of Rangoon is published for general information.

A. D. McARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

GENERAL DEPARTMENT,

NOTIFICATION.

Dated Rangoon, the 20th October 1896.

No. 190.—In exercise of the power conferred by Act I of 1870, the following Rules for Quarantine against Plague have been made by the Chief Commissioner of Burma, with the previous sanction of the Governor-General in Council: they have effect from this date in the Port of Rangoon as a temporary measure:—

I.—The commander of every vessel, including junks or other native craft, arriving from Bombay, shall, on arrival at the pilot brig, hoist a yellow flag and indicate by signal the port from which she has come.

II.—Such commander shall not, except as hereinafter provided, allow any communication either with the shore or with any other vessel or boat, except with the boat, supplying a pilot from the pilot brig, and in that case communication shall be limited to receiving on board the pilot, his servant, if any, and baggage.

III.—The pilot shall not take such vessel higher than Elephant Point, but shall anchor it there until the Health Officer of the Port has visited it and ascertained by enquiry from the commander whether any person on board is suffering, or has during the voyage suffered, from plague. If the Health Officer is satisfied by such enquiry that no person on board is suffering, or during the voyage has suffered, from plague, or if the vessel has undergone since leaving Bombay a quarantine which is properly proved for not less than eight days at Colombo or some other British port, the Health Officer shall by writing under his hand to be delivered to the commander, permit such vessel to haul down the yellow flag and proceed upwards in the port and hold free communication with the shore and with vessels and boats in port. If the ship has not undergone eight days' quarantine at Colombo or some other British port since leaving Bombay, the Health Officer shall direct the commander to take the vessel to the quarantine anchorage and there to remain for a period of eight days from the date of arrival in the harbour. The Health Officer shall also direct the commander to prohibit, during the period for which the vessel remains at the quarantine anchorage as aforesaid, all communication, except such as is hereinafter provided for between such vessel and the shore, or other vessels and boats in the harbour.

IV.—If the Health Officer shall have reason to believe at the time when the vessel arrives in the harbour that any person on board is suffering, or during the voyage has suffered, from plague, he shall direct the commander to take the vessel to the quarantine anchorage as aforesaid, and there to remain for a period of fifteen days from the day of arrival in the harbour; and shall further direct that during such fifteen days intercourse between the said vessel and the shore or other vessels and boats in the harbour shall be prohibited as provided in Rule III.

V.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of the last case occurring, and be subject to all the prohibitions provided for in Rules III and IV.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Chief Commissioner as places of quarantine, there to remain for a period of eight days, or, if the vessel has been placed in quarantine for fifteen days, for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.

VIII.—It will be the duty of the Conservator of the Port to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores, and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine to be subsequently removed by members of their crews.

IX.—All vessels arriving at Rangoon, which may have communicated with any vessel coming from Bombay, shall be subjected to the same quarantine as vessels arriving at Rangoon from Bombay, unless the communication was held after the vessel from Bombay was released from quarantine.

By order,

D. H. R. TWOMEY,
Officiating Secretary.

JAIL DEPARTMENT.

No. 10976, dated the 26th October 1896.—Mr. M. S. Emerson made over charge of the Buxar Central Jail to Mr. G. A. Davis on the afternoon of the 9th October 1896.

Subordinate Educational Service.

The 7th October 1896.—Babu Kura Ram Ray, Head Master of the Patna Survey School (Class IV), is appointed to be Head Master of the Bihar School of Engineering, Patna, with effect from 11th July 1896, the date on which he joined that appointment.

Babu Prasanna Kumar Bose, Second Master of the Patna Survey School (Class VI), is appointed to be Third Master of the Bihar School of Engineering, Patna, with effect from 11th July 1896, the date on which he joined that appointment.

The 8th October 1896.—Babu Nilmani Mukerjea, Sub-Inspector of Schools, Hooghly, (Class VI), has been granted by the District Board of Hooghly leave on medical certificate for 15 days, with effect from the 19th September 1896.

The 11th October 1896.—Babu Harabans Sahai, Deputy Inspector of Schools, Bhagalpur, and now Officiating Deputy Inspector of Schools, Darbhanga (substantively *pro tempore* in Class V), is allowed leave of absence for 15 days under Article 291 of the Civil Service Regulations, with effect from the 23rd October 1896, or such subsequent date as he may avail himself of it.

The 16th October 1896.—In supersession of the orders of the 9th September 1896, Babu Sajivan Lal Sinha, B.A., Second Master of the Bhagalpur Zilla School (Class V), is appointed substantively *pro tempore* to be Head Master of the Patna City School, on a salary of Rs. 150 a month, outside the graded list, with effect from the date on which he joined that appointment, during the absence on deputation of Mr. J. H. D'Abreu.

NOTICE.

THE following Rules of the Eden Hindu Hostel are published for the information of the Hindu Students of the Presidency College, and of the Hindu and Hare Schools who are residing in Calcutta otherwise than with their parents or *bonâ fide* guardians, in *reference* to the Notification published in page 693, Part I of the *Calcutta Gazette*, dated the 17th June 1896.

I.—ADMISSION.

1. None but *bonâ fide* Hindu students from the mufassal attending a recognised School or the Arts' Department of an affiliated College, shall be admitted to the Hostel. Students of the Medical College may be admitted to the Hostel, provided they undertake to abide by all the rules.

2. Students of the Presidency College and the two Schools attached thereto, shall have a preferential claim to the accommodation in the Hostel. Students of other Colleges and Schools will be admissible up to a certain limit, on an undertaking being given by the Heads of the institutions concerned that they will render such help to the authorities of the Hostel, in the enforcement of discipline and in the realisation of fees, as may be required of them by the rules of the Hostel.

3. Applications for admission shall be made in a prescribed form, accompanied by a certificate of good character from the Head of the institution in which the applicant is, or has been, reading. Every admission shall be subject to the approval of the Principal of the Presidency College.

4. Except those admitted under the foregoing rules, no one shall be allowed to live in the Hostel.

II.—FEES.

5. A fee of Rs. 4 shall be paid by each student on admission or re-admission to the Hostel.

6. The charge for board and light only shall be at the rate of Rs. 8 a month. Besides this, each boarder shall be charged on the following scale for rent, rates and establishment :—

				Rs.	
Ground floor	...	...	...	2	a month.
First ,,	...	...	...	4	,,
Second ,,	...	...	...	5	,,

A student occupying a separate cubicle shall be charged one rupee extra.

7. The monthly fees are payable *in advance* in one sum to the office of the institution to which the students belong, on or before the 10th of each month. For every day's delay, a fine of four annas will be levied. The authorities of the College or School receiving the fees shall make daily remittances of the same to the Superintendent of the Hostel.

8. Students taking admission after the 10th of the month shall get full deduction of the monthly rate (Rs 8) for board and light only for the period prior to their admission. Students withdrawing from the Hostel on or before the 15th of the month shall get a similar deduction for the period subsequent to their withdrawal. Every withdrawal requires the previous sanction of the Principal of the Presidency College. Application for withdrawal should be made by the guardian.

9. A student absenting himself from the Hostel for more than 15 consecutive days with the written permission of the Superintendent, shall be entitled to remission of the monthly fee at the rate of three annas a day.

10. Students withdrawing from the Hostel between 1st December and 1st May following will be charged for the up-keep of the institution for the remainder of the term at the rate of Rs. 2 a month.

11. The Hostel shall be closed for the summer and Puja vacations, during which each boarder shall be charged Rs. 4 and Rs. 2 respectively.

III.—FURNITURE.

12. Each boarder shall, on admission to the Hostel, be supplied from the Hostel fund with a bedstead, a stool, a table, and brass utensils. He shall bring his own bedding and a small trunk. Any other furniture can only be admitted with the consent of the Superintendent.

13. The unauthorised removal of an article of furniture from its allotted place shall be punished with fine. A student wilfully damaging furniture will be required to replace it, or to pay the cost of its repair.

IV.—MEALS.

14. There shall be a uniform course of dietary, consisting of rice and such other articles as are used in ordinary Hindu families. There shall be a fixed scale, which will not be exceeded except with the sanction of the Principal. Arrangements for the daily meals shall be made by a Mess Committee composed of five senior students, in consultation with the Joint Superintendent and the Medical Officer, and in accordance with the scale laid down for the purpose. As is done in the Civil Engineering College, three of the adult boarders will be taken in rotation to assist in making the bazar purchases and in issuing the required quantity of each article.

15. Boarders shall come to the dining halls for their meals between 9 and 11 A.M. and between 8 and 10 P.M. Those failing to do so shall be treated as absent.

16 In cases of sickness, boarders shall be supplied free of charge with such invalid diet as may be prescribed by the Medical Officer of the Hostel and in accordance with the sanctioned scale.

17. Vegetarians shall have a separate mess and shall get extra curries in lieu of fish curry.

V.—CONDUCT.

18. Boarders will be required to pay strict obedience to the rules, and to behave well in matters not provided for by the rules. All breaches of discipline or cases of misconduct will be reported by the Ward Monitor to the Superintendent, and in serious cases, by the Superintendent to the Principal.

19. A Conduct Register of each student will be kept by the Superintendent, who no power to cancel or alter an entry once made and signed. Students are liable to be fined and to have their names placed in the Conduct Register for—

(1) Disobedience of orders or infringement of the rules.
(2) Absence without leave
(3) Continued neglect of study.
(4) Insubordination or disrespect to the authorities.
(5) Assaulting or abusing a servant of the Hostel.
(6) Want of cleanliness or tidiness in their rooms.
(7) Misconduct not provided for by the rules.

20. Students may be removed from the Hostel for habitual or gross misconduct, for continued idleness or neglect of study, or for frequent entry in the Conduct Register. Every such removal shall be reported to the authorities of the institution to which the student belongs, and also to his guardian.

21. Boarders shall not crowd round a visitor or follow him while in the premises. They shall remain in their places, unless called out by the Superintendent or by the visitor himself. Good manners require that official visitors should receive from boarders the customary marks of respect.

VI.—SICKNESS.

22. Boarders will be attended gratis by the Medical Officer of the Hostel.

23. Boarders falling sick shall be removed to the hospital ward, where they will be under special arrangements.

24. Persons attacked with small-pox shall be promptly removed from the Hostel. Those attacked with measles, cholera, or other infectious disease, shall be entirely segregated from the rest.

VII.—ATTENDANCE.

25. The rolls shall be called by the Ward Monitors twice a day, viz., (1) at 6 A.M. from 1st March to 31st October, and at 6-30 A.M. from 1st November to 28th February, and (2) at 8-30 P.M.; and also by the Superintendent once a day. Any one found absent will be called upon to explain the cause of his absence. Any boarder staying away from the Hostel premises after nightfall shall be reported to the Principal, unless he is able to give a satisfactory explanation in writing to the Superintendent.

26. The gate will be closed at 8-30 P.M., when outsiders shall leave the premises. The roll shall be called immediately afterwards. Every ingress or egress after that hour shall be recorded in a book kept for the purpose at the gate. The gate will be locked for the night at 11-30 P.M., and will not be unlocked until the next morning after roll-call.

VIII.—OUTSIDERS.

27. The Hostel being an institution for students, no outsider shall be allowed to live in it. Visitors to boarders shall only be allowed in the Hostel with the permission of the Superintendent, and at such hours as he may prescribe. No visitor shall be allowed to have a meal in the Hostel. Hawkers shall not be allowed to enter the Hostel premises except at stated times.

IX.—HOURS FOR READING.

28. There shall be stated hours for reading, during which no boarder shall go to another's room or in any interrupt others in their studies.

X.—YOUNG BOARDERS.

29. Young boarders shall be separated as much as possible from adults, and shall be under the special charge of the Superintendent. They shall take their meals apart from the adults.

XI.—GAMES.

30. Country games and foot-ball may be played in the Hostel compound. Boys taking part in the latter shall pay a monthly subscription of one anna to the Secretary of the Hostel Foot-ball Club. The arrangements for all games shall be regulated by the Club.

XII.—MENIAL SERVANTS.

31. All servants shall have their duties specified. The ward servants shall be under the immediate orders of the Monitors, to whom all complaints of neglect of duty, or of insubordination or misconduct, shall in the first instance be made. The Superintendent shall be the final authority in punishing a servant. In no case shall a servant be assaulted or abused by a boarder.

XIII.—LIBRARY.

32. The library attached to the Hostel will be open for the issue and receipt of books every day from 6 to 8 P.M. On Sundays and College holidays it will be kept open from 1 to 4 P.M.

33. No student shall take out more than one book at a time, nor shall he keep it for more than a fortnight.

34. Students shall on no account pass the books from one to another, nor shall they lend them to persons unconnected with the institution.

35. If any book is damaged or lost by a boarder, he shall be fined, at the discretion of the Superintendent, up to the cost of replacing it.

36. No boarder shall be allowed to take out a book of reference.

XIV.—MUTUAL CO-OPERATION.

37. Students should always bear in mind that the institution is solely meant for their welfare. They should therefore look to its interest with zealous care. A loyal observance of the rules will go a great way towards insuring the reputation of the institution and their own comfort. The Superintendent will listen to any complaints or suggestions that may be brought to his notice by a boarder in a proper manner. An institution like this can prosper only with the mutual co-operation of its members.

PEARY CHARAN SARKAR'S STREET;
CALCUTTA,
The 20th October 1896.

A. PEDLER,
Principal, Presidency College.

APPROVED by—

C. A. MARTIN,
Offg. Director of Public Instruction.

NOTIFICATION.

IT is hereby notified that at the next half-yearly departmental examination of Junior Civilians, Deputy Magistrates and others, to be held on the 9th November 1896 and the two following days, there will be one local Examination Committee convened in this Division, viz., at No. 24-1, Dalhousie Square, West, Calcutta, for officers employed in all the districts in this Division.

By order,
PURNA CHANDRA MITTER,
Personal Assistant, for Commissioner.

PART IA.

Orders and Notifications by the Government of India, &c.

[*Reprinted from the "Gazette of India."*]

The following orders issued by the Government of India in the Home Department are published for general information.

C. W. BOLTON,
Offg. Chief Secy. to the Govt. of Bengal.

NOTIFICATIONS.

SANITARY.

The 21st October 1896.

No. 351.—The services of the undermentioned officers are placed temporarily at the disposal of the Government of Bengal:—

(1) Surgeon-Lieutenant E. S. Peck, M.B., B.S.
(2) Surgeon-Lieutenant C. D. Dawes.

The 23rd October 1896.

No. 359.—The following rules for quarantine against plague which have been made by the Bengal Government in exercise of the power conferred by section 1, Act 1 of 1870, with the previous sanction of the Governor-General in Council, are published for general information.

The rules have effect from the 21st October 1896, as a temporary measure, at the Port of Calcutta:

I.—The Commander of every vessel, including buggalows or other native craft arriving from Bombay, shall, on arrival at the Sandheads, hoist a yellow flag, and indicate by signal the port from which she has come, and shall keep such flag and signal flying until permitted to take it down as hereinafter provided. The pilot on going alongside a vessel from Bombay shall direct the flag prescribed above to be hoisted if it has not already been done.

II.—The Commander shall not, without first having obtained permission as hereinafter provided, allow any communication except orally with the shore or any other vessel or boat excepting only with the boat supplying the Pilots* from the Pilot Brig, and in that case communication shall be limited to receiving on board the Pilot, his Leadsman, servant and baggage.

* *N. B.*—Pilotage is compulsory for all vessels over 100 tons in the Port of Calcutta.

III.—If there is any case of sickness on board, and the Pilot has reason to believe that it is plague, he shall telegraph to the Port Officer from Saugor, and not proceed beyond Diamond Harbour without the permission of the Port Officer.

IV.—If the Pilot has no reason to believe that there is any one suffering from plague on board, he shall bring the vessel up the river to Mateeabrooj, and shall anchor it there till the Health Officer has visited it.

V.—The Health Officer, as soon as he has received information of the arrival of the vessel at Mateeabrooj, shall visit it, and ascertain by enquiry from the Commander or the Medical Officer on Board, or other sources of information, whether any person on board is suffering or has suffered from plague.

VI.—If the Health Officer is satisfied that no one is suffering from plague, or has suffered from plague since the vessel left Bombay, and if the vessel has been allowed pratique at any intermediate port, including Colombo, he shall allow the passengers to land, but shall detain the vessel at Mateeabrooj till such measures have been taken for the disinfection of the mails and cargo and hold as he may consider necessary.

VII.—When he is satisfied that the necessary measures have been taken for the disinfection of the mails, cargo and hold, he shall allow the mails and cargo to be landed, and shall by writing under his hand, to be delivered to the Commander, permit such vessel to haul down the yellow flag, and to proceed upwards in the Port, and to hold free communication with the shore and with vessels and boats in Port.

VIII.—If the vessel has not been allowed pratique at Colombo or other intermediate ports, or if through her not carrying a qualified Medical Officer, or for other reasons, the Health Officer is not satisfied that no one on board has suffered during the voyage from plague, he shall direct the Commander to take the vessel to the quarantine anchorage at Mateeabrooj or elsewhere duly appointed by the Port Officer, there to remain for a period of eight days from the date of arrival in harbour. The Health Officer shall also direct the Commander to prohibit, during the period for which the vessel remains at the quarantine anchorage as aforesaid, all communication, except such as is hereinafter provided for, between such vessel and the shore or other vessels or boats in the harbour.

IX.—If the Health Officer, as the result of the enquiry made under paragraph V above, shall have reason to believe, at the time when the vessel arrives in the harbour, that any person on board is suffering from plague, or if during the time the ship is in quarantine at Mateeabrooj under Rule VIII, any case of the disease breaks out, he shall direct the Commander to take the vessel by the quarantine anchorage at Diamond Harbour or elsewhere duly appointed by the Port Officer, there to remain for a period of fifteen days from the day of arrival in the harbour; and shall further direct that during such fifteen days, intercourse between the vessel detained under this Rule, or Rule III, and the shore or other vessels or boats in the harbour, shall be prohibited as provided in Rule II.

X.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of the last case occurring, and be subject to all the prohibitions provided for in Rule IX.

XI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on broad the vessel, to such particular spots as may from time to time be selected by the Port Officer as places of quarantine, there to remain for a period of eight days if under rule VIII, or if the vessel has been placed in quarantine for fifteen days, for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

XII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine, to be subsequently removed by members of their crews.

PORT BLAIR.

The 20th October 1896.

No. 880.—Assistant Surgeon Dina Nath Sanyal, M.B., Junior Medical Officer, is appointed to be *ex-officio* an Assistant Superintendent at Port Blair, with effect from the 11th June 1896.

The 23rd October 1896.

No. 916.—The services of Mr. P. Donaldson, Superintendent of the Presidency Jail, are replaced at the disposal of the Government of Bengal, with effect from the date on which he arrived at Calcutta on return from temporary duty at Port Blair.

POLICE.

The 23rd October 1896.

No. 583.—The services of Mr. St. Quintin Byrne, an Assistant Superintendent of Police in Assam, are replaced at the disposal of the Government of Bengal.

H. J. S. COTTON,
Offg. Secy. to the Govt. of India.

The following order, issued by the Government of India, in the Department of Finance and Commerce, is republished for general information.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

MUNICIPAL AND LOCAL

NOTIFICATION.

No. 912T.-M.—The 8th October 1896.—It is hereby notified for general information that under the provisions of section 9(*d*) of the Bengal Municipal Act III of 1884, as amended by Bengal Act IV of 1894, and on the recommendation of the Commissioners of the South Suburban Municipality, made at a meeting, that the Municipality be sub-divided, the Lieutenant-Governor intends to subdivide that Municipality into two Municipalities by separating the Garden Reach, Mudially and Dhobapara wards (Wards Nos. XIII, VI and VII) from that Municipality, and constituting those wards a second Municipality, unless good reasons are shown to the contrary within six weeks from the date of the publication of this notification in the *Calcutta Gazette*.

2. The two Municipalities thus formed will be called the South Suburban and the Garden Reach Municipalities, and their respective boundaries will be as follows :—

I.—BOUNDARIES OF THE SOUTH SUBARBAN MUNICIPALITY.

The Northern boundary—Commences at north-eastern corner of Tangara Road at Hatgachia, thence westward along the southern edge of the said Tangra Road, then southward along the eastern edge of Tangra Road to its junction with Topsi Road, thence westward along Teeljalla Road up to the point where it meets the Eastern Bengal State Railway, Southern Section, thence southward along the eastern edge of the said Railway to its junction with the Port Commissioners Railway (to Budge-Budge), thence westward along the south of the said railway to the point where it crosses Russa Road, thence southward along the eastern edge of the Russa Road to its junction with Tollygunge Bridge Road, thence westward across the bridge over Tolly's Nulla to Tollyganj Circular Road, Shahapur Road, Goragacha Road, Taratula Road, up to the point opposite which Sonai 3rd lane commences.

The Eastern boundary—Commences at the western border of Gariffa, thence northward along the western border of Haltoo Luskkar Ghat, Nonadanga, Choubaga, Dhallenda, Bynchtolla and Hatgacha.

The Southern boundary—Commences at the northern border of Joka, where it is cut by the Bukrahat Road, thence eastward till it meets the Diamond Harbour Road at Thakurpuker outpost, thence eastward to Kalagachia along the northern edge of that road till it meets the south-western limit of the Thakrun Chuck, thence northward along the western border of the Thakurun Chuck, Chuck Banban, Kalupur and Sodepur; thence eastward along the northern border of Sodepur and the Sodepur Lane till it meets the Haridaspore Lane; thence southward and along the western edge of Kowrapuker Road up to the culvert across the Thakurpuker and Kowrapuker Roads, a little to the south of of Kowrapuker outpost building, thence northward along the western bank of Kowrapuker khal, till it meets Tolly's Nulla, thence eastward along the northern boundaries of villages Sibpur, Roypur, Bajeh Roypur and Ibrahimpur, thence again to the south, commencing at the north-western corner of Garia and passing southward along the Garia Hat Road till it meets the Russa Road, thence westward till it meets the Tolly's Nulla, thence southward along the Tolly's Nulla and Gunga Nulla, thence eastward to the south-eastern extremity of Barhash.

The Western boundary—Commences at the point in the Taratollah Road opposite which the Sonai 3rd lane commences, thence a little to the north-west, and then turning southward through Bhatohana along the Jenjirpool khal, crossing the Budge-Budge Road, and thence along Bagir khal, till it meets Gungarampur Road; thence turning westward along the southern edge of Gungarampur Road, meets the Shibrampore Road, thence turning south along the Shibrampore Road, thence turning east along the Kastdanga Road, then turning southward along the Kastdanga branch road, and the eastern borders of villages Bagpatha and Kalagachia.

II.—BOUNDARIES OF THE GARDEN REACH MUNICIPALITY.

On the north—A line drawn along the southern bank of the river Hooghly from the north-eastern corner of Nundiyal village boundary to the point where it meets the Neemuk-mahal Ghat Road.

On the east—Thence southward along the western edge of the Neemuk mahal Ghat Road crossing the Garden Reach Road and Circular Garden Reach Road, and continuing south-easterly along the western edge of Taratala Road till it meets the point opposite the junction of Taratala Road and Sonai 3rd lane.

On the south—Thence in a north-westerly direction along the northern borders of Daulat-pur, Kristopur, Gangooah, Belpookuria, Ramdashatee, Mankalhate, and kismut Dum-Duma.

On the west—Thence turning northward along the eastern borders of Kadampore, Kismut Satghara and Nundiyal villages, as far as the river bank at the north-east corner of Nundiyal village boundary.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 3956L.S.-G.—The 24th October 1896.—It is hereby notified that the members of the Naugaon Local Board, in the district of Rajshahi, having at a meeting under section 25 of the Bengal Local Self-Government Act III of 1885, requested the Lieutenant-Governor to appoint a Chairman, the Lieutenant-Governor is pleased, under the said section, to appoint Babu Ambica Prosad Sen, Sub-divisional Officer, to be the Chairman of that Local Board, *vice* Babu Gosain Das Dutt, resigned.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series *including postage*, Rs. 22-8.

	Without postage.	With postage
	Rs. A. P.	Rs. A. P.
For the Calcutta Series	10 0 0	12 8 0
,, each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
,, a part of the Calcutta Series purchased separately (*inclusive of postage in India*	.....	2 0 0
part of each of the Madras, Bombay, and Allahabad Series purchased separately (*inclusive of postage in India*)		1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit :—

	For town.	For mufassal.
	Rs. A. P.	Rs. A. P.
For the Calcutta Series, per copy ...	0 8 9	0 10 3
,, each of the Madras, Bombay, and Allahabad Series, per copy ..	0 5 3	0 5 0
,, the Calcutta Series. For the year	7 2 6	8 6 3
,, each of the Madras, Bombay and Allahabad Series. For the year	4 4 6	4 11 3

Persons desiring to subscribe for or purchase the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
,, Curator of Government Books, North-Western Provinces and Oudh.
,, Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 *should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.*

ADVERTISEMENTS will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance—

	One page.	Half page.	Quarter page.
For one issue ...	Rs. 20	Rs. 14	Rs. 9
,, three issues ...	,, 55	,, 36	,, 24
,, six ,, ...	,, 100	,, 68	,, 45
,, nine ,, ...	,, 145	,, 96	,, 64
,, twelve ,, ..	,, 180	,, 120	,, 80

SEVERAL volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage.	With postage.
	Rs. A. P.	Rs. A. P.
Bengal Law Reports for one year ..	20 0 0	22 8 0
Single copies, Rs. 2 per copy.		
Full Bench Rulings, Parts I and II .	20 0 0	22 8 0

Obtainable at the Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depot.

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

Notice.

IT is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

Catalogue of Books procurable from Thomason College Book Depôt.

Application to be made to Curator. Cash must accompany order. Articles will be sent by Value-payable Post to persons in Government employment only. It is ... letters containing remittances be registered.

ROORKEE MANUAL OF APPLIED MECHANICS

Vol. I.—Direct and Transverse Strain, principally by Analytical Methods ...	8	0
II.—The Stability of Structures, mostly by Graphic Methods (in the Press) ...		

MANUALS.

	Rs	A
VII.—Surveying, (by Major Firebrace, R.E.), (6th edition), with Curve Table, (in the Press)		
XIII.—Drawing, (by Lieut. R. Pulford, R.E.)†	8	0
XIIIA.—Drawing, First Principles of Geometrical (by Lieut. R. Pulford, R.E.) (4th edition)	1	4
XIV.—Simple Applied Mechanics, (2nd edition), Parts I and II in one...	3	0
Simple Applied Mechanics, Part II, (1st edition)		
XV.—Examples of Estimating. Comprising a progressive series of Estimates (with plans of Buildings and Bridges, worked in detail). By P Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master, (5th edition), (in the Press)		
XVI.—Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E.	0	4
XVII.—Specimens of Printing used in the College Drawing Course and Entrance Examinations ...	0	6

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting section X, is the course for the Upper Subordinate class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

	Rs.	A.
Curve Tables, complete for laying any curve ...	0	4
Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master	1	0

* Date of Edition on sale.
† Originally published at Rs. 15, reduced to Rs. 8.

MISCELLANEOUS—(*continued*).

ENGINEERING WORKS.

	Rs.	A.
Useful Rules and Tables, relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers with Tables, &c. By Rai Kunhya Lal	2	8
O'Callaghan's Earthwork Tables for India, in one large sheet, 8 annas; mounted on cloth and bound, (in the Press)	1	12
Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces ...		
Tyndall's Hand-book of Specifications	5	0
The Indian Engineer's Pocket Book ...	0	4
Wooden Bridges and Designs. By Kunhya Lal, (in the Press)		
Blasting under Water, (2nd edition) ...	0	12
Waugh's Instructions for Topographical Surveying	1	4
Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. ...	0	6
Tables for Degree Curve and Intersection Angles, from 90° to 180°, and for Fixed Tangents from 100 feet to 7,500 feet. By F. G. Brook Fox, Esq., M.I.C.E.	2	4
Graphic Hydraulic Diagram for channels in earth, &c., by R. G. Kennedy, Esq., Executive Engineer	7	8
Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width	1	8

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pie into decimals of a Rupee. With a few others of general utility. (4th edition)	1	8
Boileau's Tables of Log $\sin^2 \frac{1}{2} P$ (for computing time)	0	4
Cape's Logarithms, with tables of Squares, Cubes, &c. (in the Press) ...		
„ Geometry	1	4
„ Mechanics	1	0
Military Topography	0	8

HINDUSTANI.

Elements of Hindustani Grammar (in the Press)		
Technical Dialogues—English and Urdu ...	1	0
A Vocabulary of Common and Technical Words in English-Urdu	1	0
History of India (*Itihas Timirnasak*), Hindi, Parts I and II, each Part	0	4
Short Account of Ganges Canal (English and Urdu)	0	8
